# SUPPLEMENT TO The Calcutta Gazette.

WEDNESDAY, JANUARY 2, 1895.

## OFFICIAL PAPERS.

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on payment of Six Rupees per annum if delivered in Calcutta, or Twelve Rupees if sent by Post.*

### CONTENTS.

	Page.		Page.
WEATHER and Crop Report for the week ending 31st December 1894	1	RESULTS of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee from 23rd to 29th December 1894	10
Results of the Meteorological Observations taken at the Alipore Observatory from 23rd to 29th December 1894	3	Circular and Eastern Canals for the week ending Saturday, the 22nd and 29th of December, 1894	11
Meteorological report of the Province of Bengal for the week ending Saturday, the 29th of December 1894	4	Bengal Central Railway for the month of October 1894	12
Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.) the 29th of December 1894	6	Weekly return of Traffic Receipts on Indian Railways	13

### WEATHER AND CROP REPORT.

*For the week ending 31st December 1894.*

**Burdwan.**—Rainfall nil. Weather seasonable. Prospects of crops continue satisfactory. Price of common rice 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather cold and bright. Reaping of paddy continues. Outlook of *rabi* crops good. Sugarcane prosperous. Rice selling from 15 to 21 seers per rupee. Fodder and water abundant.

**24-Parganas.**—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of *aman* going on. *Rabi* crops doing well. Rice sells at—

	Srs.	Ch.	
Sadar	11 to 13	8	} per rupee.
Barasat	15	0	
Basirhat	16	9	
Diamond Harbour	15	0	

Condition of cattle good. Fodder and water sufficient.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Cultivation of *rabi* crops still going on. Common rice sells from 16 to 20 seers per rupee. Fodder and water sufficient.

**Murshidabad.**—Rainfall nil. Weather seasonable. Sowing of *rabi* finished. Prospects favourable. Fodder sufficient. Rice sells at 16 seers per rupee.

**Dinajpur.**—Report not received.

**Rangpur.**—Report not received.

**Pabna.**—Rainfall nil. Weather clear and cool. Prospects of crops good. *Aman* being harvested. Common rice selling from 13 to 16 seers per rupee. Fodder and water-supply sufficient.

**Dacca.**—Rainfall nil. Weather seasonable. Harvesting of *aman* continues; prospects good. *Rabi* crops thriving. Common rice 12 to 20 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Report not received.

**Patna.**—0.05. Harvesting of rice almost completed. *Rabi* and poppy promising. Sugarcane being pressed. Common rice sells at—

				Srs.	
Sadar	...	...	...	18	} per rupee.
Barh	...	...	...	19	
Bihar	...	...	...	20	
Dinapore	...	...	...	11 to 14	

**Gaya.**—There was slight rainfall on the 25th. Weather seasonable. Harvesting of paddy and pressing of sugarcane continue. *Rabi* and poppy doing well. In some places prices above and in some below normal. Fodder and water sufficient.

**Champaran.**—Report not received.

**Darbhanga.**—Report not received.

**Bhagalpur.**—Rainfall nil. Weather warmer. All crops on the ground promise well. Prices falling.

**Purnea.**—Rainfall nil. Weather cool. Mornings foggy. Prospects of crops very good. Harvesting of *aghani* rice going on briskly. Common rice 17 to 24 seers per rupee.

**Cuttack.**—Rainfall nil. Weather seasonable. *Sarad* harvest continues. Cultivation of *dalua* rice in progress. *Rabi* harvest commenced. Condition of cattle good. Fodder sufficient.

**Hazaribagh.**—Rainfall nil. Weather cold. Harvesting of paddy completed with 16 annas outturn everywhere. Poppy rather backward. All *rabi* crops promise well. Fodder and water abundant. Common rice selling from 16 to 20 seers per rupee.

**General Summary.**—There was slight rain in Bihar, but none is reported elsewhere. Reports of the crops continue satisfactory. The harvesting of winter rice is proceeding with good results. Prospects of *rabi* crops and sugarcane are favourable. Poppy is generally doing well, but in Hazaribagh the crop is backward. Cattle are in good condition. The price of common rice is normal and is falling in some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 1st January 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

# SUPPLEMENT TO THE CALCUTTA GAZETTE, JANUARY 2, 1895.

## Results of the Meteorological Observations taken at the Alipore Observatory from 23rd to 29th December 1894.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

*P.*, dew, *=*, fog.

N.B.—In the weekly report from 18th to 24th November 1894 read "28" for "8" as the miles recorded on the 18th November 1894.

\* Mean of 6 days. † Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the The humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 29TH OF DECEMBER 1894.

A BAROMETRIC depression which had advanced from North-Western India had affected the province during the previous week, but quite at its close its effects had passed away. Hence weather was again fine and settled in Bengal on the 23rd, or the first day of the week under review, and pressure had risen rapidly, while temperature had fallen briskly. The sky was also almost cloudless, and there was a complete absence of rain. On this day, however, a feeble barometric depression had crossed the North-West frontier and had advanced into South-West Rajputana, moving probably in an easterly direction. On the 24th the depression had again advanced rather rapidly in an easterly direction, and was near Nowgong in Bundelkhand, while a shallow secondary depression had formed in the Central Punjab. In Bengal on this day a further rather brisk fall of temperature had occurred except at a few of the western stations where temperature was rising, and which were thus beginning to be affected by the depression. The pressure also on the 24th showed the influence of the advancing depression, and it had fallen briskly, particularly at the western stations, where the fall equalled about 0.08". On the 25th the depression had again advanced eastwards, but it had become diffused and ill-defined, while the secondary depression in the Panjab had also commenced to fill up. In Bengal pressure had continued to fall rapidly owing to the advance of the depression, and had become below the normal, while the temperature changes were variable. Skies had, however, commenced to cloud over, specially at the western stations where a few rain showers were also recorded. On the 26th pressure had again fallen slowly in Bengal and was in distinct defect. Temperature, on the other hand, had risen rather rapidly, owing to the influence of the depression, and skies were moderately clouded, though only a few local showers were reported. On the 27th a brisk increase of pressure occurred in Bengal, and the effects of the depression to a great extent passed away, as pressure had become above the normal. Temperature had commenced to fall very rapidly at the western stations, where the fall in the mean temperature ranged from 6° to 9°, while at the central and eastern stations temperature was still rising and cloud proportion and humidity began to decrease and weather became more settled. In the hills however, on the 27th conditions were still disturbed, and both Darjeeling and Gnatong, reported snowstorms during which about a fifth of an inch of rain was received and which was reported on the 28th. On the 28th the cold wave of air had swept over the whole province, and the mean temperature fell usually by from 3° to 7°, while humidity also decreased rapidly and skies became cloudless. The changes of pressure, on the other hand, were rather variable. On the 29th, or the last day of the week under review, fine settled weather prevailed over the whole province, and pressure was high, while temperature and humidity were unusually low, the mean temperature being in defect by amounts ranging up to 5° at some of the south-western stations.

**Pressure.**—The mean pressure for the week has been above the normal at all stations except those in the hills. The excess has usually equalled from 0.01" to 0.03", and the excess amounts have been fairly equally distributed over the whole province.

**Temperature.**—The average mean temperature for the whole province for the week has been in defect by about 0.3°. Orissa, however, has shown a slight excess temperature, but the variations have been in all cases small.

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been considerable in the day or maximum temperatures, which have been generally in defect by about 1° or 2°, while the night or minimum temperatures have usually been in excess, the excess ranging up to from 3° to 4° at such stations as Patna and Purnea.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 29th of December 1894.

	Normal mean maximum temperature for the week ending 29th December.	Actual mean maximum temperature for the week ending 29th December 1894.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 29th December.	Actual mean minimum temperature for the week ending 29th December 1894.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 29th December.	Actual mean daily temperature for the week ending 29th December 1894.	Variation of actual mean from the normal.

*Rainfall.*—Beyond a few local showers of little or no importance in the districts of Darjeeling, Gaya, Patna, Shahabad, Saran, and Sonthal Parganas, the whole province has again been rainless during the week.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 29th of December 1894:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.				Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

### THE MONSOON OF 1894.

THE following report is published for general information.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

The 7th January 1895.

Secy. to the Govt. of Bengal.

### METEOROLOGICAL SUMMARY FOR THE MONSOON PERIOD OF 1894.

THE following statement is intended to give a brief history of the more important features which have characterized the south-west monsoon period and preceding months of 1894 in Bengal.

January was a month in which the north-east monsoon conditions were not very strongly developed. Although rather numerous barometric depressions

appeared in North-Western India, and passed eastwards through Upper India, they all practically broke up before reaching Bengal. The waves of warm moist air, however, in front of these depressions affected Bengal largely during the month, but with one slight exception the depressions themselves did not give any rain to Bengal. Owing, therefore, to this absence of the passage of cold weather storms through Bengal, on which almost the whole of the rainfall of this season depends, the province was practically rainless in this month, except for some light rain in Orissa and some showers towards the close of the month in Bihar and North Bengal. The waves of warm moist air in connection with the depressions, however, caused the mean temperature of the province to be above the normal by about a degree, the excess temperature being largest in the west of the province, while humidity was also decidedly higher than usual during January. Owing to the absence of depressions cloud proportion was unusually low, and only equalled about half the normal amount. In the case of pressure the changes from day to day were on the whole small, indicating the existence of fairly settled weather practically throughout the month, while the mean pressure for the whole period was in defect by about 0·02" to 0·03".

In February the number of barometric depressions coming from Western and North-Western India and affecting Bengal was small, and those which occurred were of comparatively little importance. A feeble depression affected the province and gave rain in Bihar and North Bengal on the 2nd and 3rd. A second depression coming from Western India affected Bengal on the 8th, 9th, and 10th, and again gave moderate rain in Bihar. Later on a feeble low-pressure area was formed over Bengal, and conditions became disturbed, and during the week ending the 24th rather numerous local storms occurred, most of them of the ordinary hot-weather type, which gave light to moderate rain over the greater part of the province of Bengal (except Orissa), and also in Assam. These disturbed conditions continued in East and North Bengal and in parts of Chota Nagpur till the close of the month, but in other districts the disturbances ceased from about the 24th.

Owing to the disturbances being smaller in number and less influential than usual, rainfall was smaller than the normal in all divisions of Bengal except Bihar and Chota Nagpur. The average falls were indeed in all cases less than an inch, and in Orissa and South-West Bengal they were particularly defective.

Again, temperature was above the normal practically throughout February, the excess in the mean temperature varying from about 4° in the north and north-east of the province to about 1° to 2° in South Bengal and Orissa, and indeed for the whole of Bengal the excess averaged 3°·1. Humidity was also much higher than usual, the excess ranging up to about 25 per cent. of the usual amount at Gaya. The cloud proportion was also in rather large excess at many stations.

The mean pressure for the month was in very slight excess of the normal. In the great majority of cases the excess varied between 0·01" and 0·02", and was fairly equally distributed over the province. So far, however, as can be judged from the readings at Darjeeling, it would appear that the excess pressure was largest in the upper strata of the atmosphere, for at that station the excess equalled 0·058".

In March fine settled weather prevailed over the province for the greater part of the month, and the only disturbed conditions of any importance were in connection with a barometric depression which occurred over Bengal during the first week of the month. Practically none of the barometric depressions or storms originating in or travelling through North-Western India advanced over Bengal, and hence the province was remarkably free from disturbance during the month. Thus the amount of rain which was received over the province was very small, except in East Bengal. The falls in most divisions averaged less than, or about a quarter of an inch, and in South-West Bengal the fall was less than two-thirds of an inch. The falls were hence much below the normal in all divisions except East Bengal, which, on the other hand, received the large average fall of 4·71 inches, or about sixty per cent. more than usual in March.

The mean temperature for the month was slightly above the normal over the southern half of the province and in slight defect over the northern half, the variations ranging from an excess of  $1^{\circ}4$  in Orissa to a defect of  $0^{\circ}5$  in Bihar. Humidity was lower than usual at the majority of stations, and the defect was largely noticeable in South-West Bengal, while cloud proportion, on the other hand, was usually above the normal. The defect in the humidity was probably due to the fact that winds during March had an unusually strong westerly element in them, and, except at a few of the eastern stations, where easterly and north-easterly winds were reported, winds were westerly or west-south-westerly in almost all cases. The northerly element in the wind directions, which sometimes prevails in March, was not strongly developed.

The mean pressure for the month was below the normal in all districts, the defect being moderate in amount and equalling about  $0.025''$  in South Bihar and in the extreme east of the province, while it equalled  $0.04''$  in South-East Bengal. On the other hand, in Chota Nagpur and the west of Bihar the defect only equalled  $0.01''$ .

In April for the first day or two weather was quite settled, but from the 3rd instant slightly disturbed conditions set in, which lasted till the 7th, during which a considerable number of local or hot weather storms with rain occurred. At this period a barometric depression developed over North Bengal, where pressure on the 7th became a fifth of an inch in defect. The disturbed conditions brought about by this depression apparently passed in an easterly direction over Cachar, and from the 8th to the 11th Silchar reported no less than sixteen and a third inches of rain. Weather over the greater part of Bengal during this period was fine and settled, but from the 12th to the 14th, when the disturbance in Cachar was passing away, rather numerous local storms with rain occurred in East and North Bengal.

At the end of the second and beginning of the third week in April an ordinary hot weather barometric depression developed in Chota Nagpur, and during the third week hot season storms or nor'-westers with moderate to heavy rain were numerous in all districts, and these continued to a considerable extent up to the end of the month. Hence the number of hot weather storms occurring in April was about equal to those in normal years, and many of them were of moderate strength.

The amount of rain brought by these disturbances was decidedly larger than usual in North Bengal, and rather larger than usual in Orissa and Chota Nagpur. The falls in South-West Bengal and Bihar were about the usual quantity, but decided defects were reported in East Bengal. One noticeable feature in the rainfall of April was the extraordinarily heavy fall in Silchar, which received no less than  $23.54$  inches during the month.

The mean temperature for the month was in defect by amounts which usually were less than one degree at the great majority of stations except at a few in the east, north-east, and south-east of the province, where very slight defects were registered. Humidity and cloud proportion, on the other hand, were decidedly higher than usual. Winds were decidedly less strongly westerly than usual, and the mean directions for the month were southerly in the centre, south and west of the province, south-easterly at the south-eastern and eastern stations, and easterly at most of the northern stations. The mean pressure for the month was very slightly in defect of the normal, and the usual variations were from  $0.01''$  to  $0.02''$ .

In the Bay weather was fine up till nearly the close of the month, when a small cyclonic storm of very considerable intensity was formed in the Andaman Sea. The storm apparently originated in an area of comparatively low pressure on the 26th of April to the west of the Tenasserim coast. The depression grew deeper on the 27th, and on the morning of the 28th a small storm had formed in the Andaman Sea, which developed rapidly on that day and advanced into the Gulf of Martaban. The centre of the storm passed inland about midway between Rangoon and Moulmein at noon on the 29th, and afterwards broke up during the night of this date. It was a rather severe storm, though small in extent, and appears to have done a considerable amount of damage.

This storm apparently formed in front of the first or preliminary advance of south-west monsoon winds up the Bay.

In May the hot season conditions were very strongly developed, and the number of local storms with rain which occurred was smaller than usual, so that temperature was generally unusually high. A hot weather low pressure area formed over the province on the 7th and 8th, and hence very strong southerly winds set in at the head of the Bay, bringing up much moisture and giving rather numerous local storms to the east and north of the province. This depression was, however, of short duration and it disappeared on the 9th or 10th, but reappeared on the 13th and 14th, and it continued to exist in a more or less pronounced form up till the 28th or 29th, when it filled up or passed away southwards. During the existence of the depression, which was well marked in the northern districts, dry and indeed almost rainless weather with more or less westerly winds existed to the west and south of the depression, and partly over the area occupied by it. Hence unusually high temperatures were recorded over the western half of Bengal towards the close of May, while East and North Bengal received frequent rain during local storms, and thus the two halves of the province showed great contrasts of temperature conditions.

Thus on the morning of May 28th, while at the extreme eastern stations the mean temperature of the previous 24 hours had been in defect by amounts ranging up to  $6^{\circ}9$  at Sibsagar, over Bengal generally temperature was in large excess by amounts ranging up to the exceedingly large amount of  $16^{\circ}2$  at Bankura. On this morning no less than 15 stations reported maximum temperatures of  $110^{\circ}$  and upwards, while at Bankura a temperature of  $117^{\circ}1$  was reported, which was no less than  $23^{\circ}3$  above the normal maximum temperature of that day.

Towards the close of the month, as the low pressure moved southwards, conditions changed and local storms with rain began to occur in the western districts, and temperature fell. The mean temperature for the month was hence in excess by about  $4^{\circ}$  or  $5^{\circ}$  in the west of the province, while it was in slight defect at the extreme eastern stations. Pressure, on the other hand, was rather largely below the normal, the defect usually ranging from  $0.05''$  to  $0.07''$ , and being smallest at the southern and south-western stations. Humidity and cloud proportion were generally in slight excess during May.

An average fall of 7.66 inches of rain was received in North Bengal, and one of 5.94 inches in East Bengal, but even those rather large amounts were less than the usual amount by a quarter to one-sixth the usual falls. South-west Bengal only received 3.13 inches, or not much more than half the normal fall, while Bihar, Orissa and Chota Nagpur each received average falls of only about four-fifths of an inch of rain, and those represent only about a third or a quarter of the usual falls.

The actual falls were heaviest in South-East Bengal, where the districts of Chittagong and South Lushai Hills received about sixteen and seventeen inches of rain. Another area of heavy precipitation also existed in North Bengal, where average falls of 11 to 14 inches were reported in the Darjeeling and Kuch Bihar districts. On the other hand, in Palamau and Puri and in some parts of Bihar either practically no rain at all or very light falls indeed were received during the month.

During May it is usual for two or three strong advances of south-west monsoon winds to take place in the south of the Bay, the indications of which are to be found in the increased wind velocities at the Ceylon stations. In front of such advances also cyclonic storms are frequently, if not usually formed. In the present year these advances were conspicuous by their absence, and no strong advance of monsoon winds was registered at all. A slight strengthening of the winds at the Ceylon stations was noticed from about the 1st to the 5th of May, but if this did represent an advance of monsoon winds, it was of a most feeble character. Later on, about the 29th to the 31st, there were indications of the existence of squally, unsettled weather in the centre of the Bay, which may have formed in front of a feeble inrush of moist winds over the Bay, but again if this did represent an advance of the monsoon current, it

was of extremely feeble character. Practically, therefore, there was no real advance of monsoon winds in the Bay in May.

In the early part of June a very feeble hot weather barometric depression formed over the west of Bihar, but it only existed for a few days, though its influence was sufficient to give rather numerous hot weather storms with rain for the first week or ten days of the month. During this period certain changes were taking place over the sea area, and feeble monsoon winds, due to the Arabian Sea current, made their appearance on the Malabar coast on the 4th and 5th of June, and then slowly advanced northward along the Bombay coast, and also penetrated partly into the interior. This advance on the whole appears to have been decidedly weaker than usual. In the extreme south of the Bay the first rather strong advance of monsoon winds due to the Bay current occurred on the 1st of June, on which date winds became strong, and light to moderate rain fell at the Ceylon stations. From this date this branch of the monsoon current continued to blow with moderate strength only at the Ceylon stations and at the stations on the South Coromandel coast, and again on the whole the strength of these winds was rather smaller than usual. From about the 7th to the 9th of June this current appeared to be creeping up the east and centre of the Bay, and had probably reached Burma. On about the 9th instant it was approaching the north of the Bay. It had not apparently passed over the south-eastern portions of Bengal to any appreciable extent up to the 9th instant, and the rainfall occurring in the central and western parts of Bengal was practically confined to local showers, though these were decidedly numerous, and the general and heavy rain accompanying the first burst of the monsoon had not occurred. From the 10th to the 12th the changes were of little importance, but on the latter date a distinct low pressure area commenced to form in South-East Bengal and over the neighbouring parts of the Bay. This rapidly developed into a small cyclonic storm, the centre of which was on the 13th not far from Chittagong, and immediately after its formation it began to move in a north-westerly direction, and on the 14th was between Jessore and Faridpur, but it had filled up to a certain extent. On the 15th it was in Chota Nagpur, probably not far from Chaibassa, but was then decidedly feeble. On the 16th it had passed away from the province altogether. This storm was of importance, as it brought up the monsoon current and rains over the whole province, and these may be said to have set in over Bengal on the 13th and 14th of June. A noticeable feature was the very rapid extension of the monsoon rains over the whole province after they had commenced in the southern districts, and hence, while the rains were only a day or two earlier than usual in setting in over South-West and Central Bengal, they were at least a week earlier than usual in commencing over Chota Nagpur and Bihar.

The current of monsoon winds over Bengal began to fall off from the 17th to the 20th, when another barometric depression formed in the north of the Bay, and this after developing slightly passed inland during the 21st, and on the 22nd was between Chaibassa and Balasore, while on the 23rd it was to the west of Chota Nagpur and was still advancing in a north-westerly direction, and hence had ceased to affect the province. For the period the 17th to the 21st, therefore, rainfall was light, but with the wave of monsoon winds brought up by the depression and the current following in after it, rainfall continued heavy and general up till the 27th of June.

On the 28th, again, the monsoon current flowing over Bengal fell off in force, and a third depression formed in the Bay, and this passed inland on the morning of the 30th close to Balasore, and it again gave a heavy advance of monsoon winds to Bengal.

With the three depressions or storms in the period from the 13th to the end of June, each bringing up heavy rainfall, the monsoon conditions were rather strongly developed during this period, and comparing the falls over the whole province with the normal values, the actual rainfall equalled 114 per cent. of the normal. The actual rainfall during June varied from between 20 and 30 inches in and near the hills in North Bengal, and also over considerable parts of South-East Bengal, to falls of between 3 and 5 inches in parts of the Muzaffarpur and Darbhanga districts; but the greater part of the province

received between 10 and 15 inches. Compared with the normal fall for June the actual falls were decidedly below the normal over the eastern half of the province, and also in the greater part of the northern districts. In the majority of cases where defects were recorded they were small, usually up to 5 inches, but over a considerable area in North Bengal the defect varied from 5 to 10 inches, while at Buxa in the Darjeeling district the defect was no less than 16·16 inches. On the other hand, the whole of Western Bengal, Chota Nagpur, Orissa, and the south of Bihar, received a rainfall above the normal, the excess amounts in some parts of Chota Nagpur ranging from 5 to 8 inches. Generally the rainfall varied from an average amount of about 16 inches in East Bengal and 14 inches in North Bengal, in both of which districts it was in rather large defect, to about 10 inches in South-West Bengal and 9 inches in Bihar, in which district excess falls on the average were registered.

For the month of June the average pressure was in slight defect only, the extreme variation being 0·03" in Chota Nagpur. The variations of temperature from the normal were exceedingly small, and slight excess temperatures were recorded at the north-eastern stations, and slight defects elsewhere. In the case of humidity and cloud proportion these elements were again in distinct excess over the greater part of the province during June.

The meteorology of July was rather extraordinary from the number and importance of the barometric depressions and cyclonic storms which formed, all of which moved in a westerly or north-westerly direction. Four of these storms, three of which were severe, were formed over the sea, or partly over the sea and partly over the land, whilst two feeble depressions were formed over the land area.

In the first week two feeble storms occurred: one passing from the north-west angle of the Bay, and the other being formed in the centre and north of the province, but these were of little importance. After this came three severe storms, each more severe than the last, and the path of each of which was to the north of the former path. These were practically formed over the Bay, and moved in paths varying from north-west to west. The first of the three was decidedly severe, and the two last very severe, the third doing a good deal of damage to the shipping at the head of the Bay. The sixth was a feeble storm, as judged by the depression of the barometer, but it was highly important in the amount of rainfall it gave, and particularly because it gave heavy rain to areas which had hitherto received very little rain in July.

The first of the severe storms formed in the east of the Bay on the 8th and developed moderately up till the 10th, when it began to move in a westerly direction, and the centre crossed the Orissa coast almost immediately over Puri at about 2 A.M. of the 12th. It afterwards continued its rapid westerly or west-north-westerly advance and broke up in Lower Sind on the 14th and 15th. In its passage across the peninsula its daily rate of advance was about six hundred miles. The second severe cyclonic storm existed from July 14th to the 23rd. It formed in the north of the Bay on the 14th or 15th, with a centre probably to the west of the middle of the Bay, and advanced slowly in a north-north-westerly direction towards the north-west angle of the Bay, crossing the coast a little to the south of Balasore soon after noon of the 17th. After crossing the coast it changed its line of advance and travelled across India in a west north-westerly and westerly direction, breaking up in Lower Sind on the 23rd and 24th. It not only gave very heavy weather in the Bay and in its track through India, but it also gave heavy weather in the western parts of India and in the Arabian Sea, while exceptionally heavy rain accompanied it, and disastrous floods were caused in parts of Western and North-Western India by the action of this storm.

The third severe cyclonic storm of the month was formed in the north-east of the Bay on the 22nd and 23rd, and rapidly developed in severity advancing inland in a west-north-westerly direction, and on the morning of July 24th it was close to Calcutta. It afterwards passed between Midnapore and Bankura and continued its movement, so that on the 26th it was entering Bagalkhand, and on the 28th it filled up near Sutna. This storm gave exceptionally heavy rain, and also did a good deal of damage to the shipping at the head of the Bay of Bengal.

The other depressions and feeble storms which formed during the month were unimportant.

With this succession of storms large amounts of rain were brought up to the province, but the distribution was singular. The general rainfall of the province was about 20 per cent. in excess of the normal, but nevertheless some districts did not receive much more than half or one-third the usual amounts for July. Thus in Kuch Bihar a *defect* of no less than 68 per cent., and in Rangpur a *defect* of 62 per cent. of the normal fall in July was recorded, while on the other hand, in the same division of North Bengal, the district of Pabna received an *excess* fall of 74 per cent. Again, in Bihar the district of Darbhanga received a fall 48 per cent. less than usual, and Muzaffarpur and Purnea showed *defects* of about 40 per cent., while also in Bihar the district of Bhagalpur received a fall 51 per cent. in *excess*, and Gaya an *excess* of 46 per cent. of the normal fall. Hence, though the monsoon rainfall of July was good on the whole, it was remarkable for its irregular distribution, and in this respect the monsoon of 1894 appears to have been almost unique.

The actual average rainfall recorded in the different divisions varied from about nineteen inches in East Bengal, Orissa and Chota Nagpur, and fourteen inches in South-West Bengal and Bihar, to only eleven inches in North Bengal. Slight to moderate excess general falls were therefore recorded in all districts except North Bengal.

As indicated previously, the distribution of rainfall during July was extremely irregular. The falls indeed varied from 57 inches in parts of South-East Bengal and over 40 inches in parts of North Bengal, to a fall of only 3.57 inches at Shiuhar in the Muzaffarpur district, and to falls of only two inches at Sunderganj in the Rangpur district and at Dinhatta in the Kuch Bihar district, and to falls of about four inches at Rangpur itself and Peerganj also in the Rangpur district. Thus at almost neighbouring stations the falls varied to an enormous extent.

Compared with the normal amounts for July, the actual falls also exhibited most startling discrepancies. The whole of the north of the province, north of a line from about Netrakona to the south of the Champaran district, received a defective fall, the defect usually exceeding five inches, and at such stations as Siliguri, Kuch Bihar, and Mathabhanga exceeding fifteen inches, while the southern parts of the province received excess falls exceeding 5 and 10 inches over a large area and ranging up to excess falls of more than fifteen inches at Cox's Bazar, Chandbali and Contai. The following are instances of the extraordinary irregularity of the rainfall in July at neighbouring stations. In the Saran district Siwan received an excess fall of more than nine inches, while Gopalganj, only a few miles to the north of it, received a defective fall of three inches; in Champaran, Bettiah received an excess fall of three inches and Motihari a defective fall of four inches; and in the Bhagalpur district Banka received an excess fall of thirteen inches and Bhagalpur itself an excess of seven inches, while Supaul received a defective fall of five inches. Hence it will be seen that the fall was exceedingly irregular even at neighbouring stations, and it is therefore impossible to give any very correct general review of the rainfall of the month.

In July the mean pressure for the month showed very slight defects at some of the stations in South Bengal and in Orissa, while slight excess temperatures were registered elsewhere, the excess equalling 0.02" to 0.03" at the northern stations. The whole of the north of the province which received a defective rainfall, showed a mean temperature about 1° in excess of the normal, while the remainder of the province showed slight defects, the defects being largest in the south-west of the province. Humidity during the month was on the whole slightly higher than usual, though the sky was decidedly less heavily clouded.

In August the conditions were in striking contrast to those of July, for not a single storm of importance was formed, and only two very feeble barometric depressions were generated, one of which was formed over the north-west angle of the Bay on August 6th, and advanced westwards into the Central Provinces, where it broke up on the 9th, while the second depression which existed for no less than eight days, was formed over the south-east of the province, and gradually advanced in a north-westerly direction to Nowgong, where it filled up.

During the greater part of the month however the conditions were of well developed monsoon character, except perhaps during the last week, when rainfall became light. Generally the rainfall of the province was about 8 per cent. above the normal. A noticeable feature of the rainfall in August was that Orissa and South-West Bengal, which received rather large excess falls in July, received rather scanty falls in August, while again North Bengal, which received a fall 20 per cent. in defect in July, received a fall 11 per cent. in excess in August. The general rainfall for the month equalled about nine inches in Orissa, eleven inches in South-West Bengal, fifteen inches in Bihar and North Bengal, and about seventeen to eighteen inches in Chota Nagpur and East Bengal. Excess falls of from one and a-half to three and-a-half inches were recorded in North Bengal, East Bengal, Bihar and Chota Nagpur, and defects of one to two inches in South-West Bengal and Orissa. In the case of the number of rainy days, that is, days on which at least a tenth of an inch of rain fell, excess numbers were recorded in every district except Orissa, and even in South-West Bengal, where the rainfall was defective, rain fell on one day more than usual in the month. In such districts as Bihar and Chota Nagpur, indeed, rain fell during August on nearly five days more than the average number. This would seem to point to the falls themselves having been rather lighter than usual, though decidedly more numerous.

The mean pressure for August was in slight defect at all stations, while the variations of temperature during the month were unimportant, and the mean temperature for the whole month was in defect by 0·7. Cloud proportion and humidity, on the other hand, were both higher than usual.

The monsoon current in the Bay had been a little feeble during the last week of August, but quite at its close a fresh advance was taking place, in front of which a barometric depression formed in the centre of the Bay on August 30th, and which then advanced towards the North Madras coast, which it crossed on September 1st, and afterwards travelled as far as the South-East Punjab, where it filled up on the 7th. A second feeble depression formed in the Bay on the 7th and advanced into the Central Provinces, where it filled up on the 9th. Another very feeble depression then formed in the north-west of the Bay on the 14th and advanced in a north-westerly direction, filling up over Bihar and Chota Nagpur on the 17th and 18th instant. A fourth depression or feeble cyclonic storm next formed at the head of the Bay on the 23rd, which steadily intensified until the afternoon of the 27th, when it passed inland near Puri as a storm of moderate severity. Its inland course was first in a west-north-westerly direction, and then north-westerly and northerly, and finally north easterly, and the storm only broke up on October 1st in the Himalayas, probably to the north of Benares. Hence the weather in September was again unusually disturbed for the greater part of the month, as no less than four depressions or storms were formed, all of which advanced in a westerly or west-north-westerly direction.

The actual rainfall in the month varied from about 40 inches in and near the hills in North Bengal, to the small fall of about 2 to 4 inches in the south of Chota Nagpur, hence the falls were heaviest in the north-eastern districts and lightest in the south-western districts of the province. In some parts of East Bengal, however, there were some areas of unusually low rainfall, and thus at Manikganj (Dacca district), Atia (Mymensingh district), and Daudkandi (Tippera district) falls of rather less than 4 inches were received. Another area of exceptionally light rainfall was shown in South-West Bengal, and falls of four inches or less were registered at Mohesroka (Howrah district), Saugor Island, Jessore and Magura, and Bangaon in the Jessore district. Comparing the actual falls with the normal, the southern half of the province received a largely defective fall and the northern half generally very considerable excess falls. The areas of largest defect were in the extreme southern and south-eastern parts of Bengal, where the rainfall was in defect at many stations by from five to eight inches, and largely defective falls of about four to six inches were reported from parts of Central and North Bengal.

On the other hand, a very large area in North Bengal received from 10 to 20 inches in excess of the normal, and some parts more than 20 inches, and again there was a centre of very heavy rainfall in Bihar, where excess falls of more than 10 inches were received at such stations as Patna and Dinapora. A similar excess fall was reported at Chanchal in the Malda district.

Indeed, the rainfall in September was distributed very irregularly, and in the midst of districts receiving excess falls some stations reported defects, and thus, while Chanchal, in the Malda district, received an excess fall of 10·48 inches, Malda, the sadar station of the district, reported a defect of 2·65 inches. Also the general fall in Champaran was 3·2 inches in defect, while the district of Darbhanga received 4·43 inches in excess, and the district of Patna 7·62 inches in excess. Compared with the normal considerable or large excess falls were received in North Bengal and Bihar, moderately defective falls in South-West Bengal and Chota Nagpur, and largely defective falls in East Bengal and Orissa, while for the whole province the rainfall equalled 96 per cent. of the normal. While, however, only two divisions showed excess falls in the month, the number of rainy days, on the other hand, was decidedly larger than usual in all divisions except East Bengal and Chota Nagpur, and hence the defective rainfall appears to have been due rather to the lightness of the falls than to want of actual rainy days.

The variation of the mean pressure of the month from the normal was exceedingly small, and a defect of about 0·01" only was registered. The average mean temperature for the month also was nearly normal, though slight excess amounts of about half a degree were registered in the extreme west, south-west, and south of the province, while elsewhere defects of about similar amount were recorded. Humidity and cloud proportion were again in excess at the majority of stations.

At the commencement of October a barometric depression began to form at the head of the Bay, the centre of which passed inland on the evening of October 2nd between Balasore and Saugor Island, moving in a north-westerly direction. It continued to advance, afterwards changing to a northerly direction, till October 6th, when it broke up in the Himalayas, not far from Naini Tal. This small storm brought up another rather feeble burst of monsoon winds, the effects of which passed away about the 7th, when the monsoon current began to retreat southwards, giving moderate rain in its retreat. By the 17th fairly fine weather had set in over Bengal and the area of lowest pressure had retreated over the Bay, when the second storm of the month was formed, which existed from the 18th to the 22nd. This storm, which extended over a large area, though it was not intense, formed in the centre of the Bay and advanced in a west-north-westerly direction, crossing the coast between Nellore and Madras in the early morning of October 21st, and it afterwards apparently broke up on the 22nd. The storm was accompanied by a heavy wave of monsoon winds, which advanced northwards after the storm had broken up, and on the 22nd and 23rd this wave reached Bengal, when again general rain set in. On the 24th exceptionally heavy rain fell in Bihar, and on the 25th this was followed by the formation of a very distinct barometric depression over this area, which continued to exist till the 28th when it broke up, and again the south-west monsoon current retreated southwards to the Bay. This retreat was followed by the formation of a very large but rather diffused cyclonic storm in the Bay, which generated on the 29th near the Andaman Islands, and then advanced slowly across the Bay, crossing the coast between Cocanada and Masulipatam about 6 A.M. on November 2nd, and it broke up after passing inland for a short distance on November 4th. This storm was again accompanied by a heavy wave of monsoon winds, which began to reach Bengal on November 1st and 2nd, and afterwards spread over the whole province, giving another burst of heavy rainfall in the first week of that month. Hence it will be seen that the weather in October was again decidedly stormy, and two cyclonic storms and two more feeble depressions were formed during this period.

The rainfall during October was unusually heavy, and the general fall over the whole of the province was 59 per cent. in excess of the normal. This heavy fall was brought about by the effect of the two storms and the two barometric depressions previously described, and by the fact that the monsoon current was influencing the province almost up to the close of the month. The falls in North Bengal, Bihar, Orissa and Chota Nagpur equalled from about seven to seven and-a-half inches, while in South-West Bengal and East Bengal the falls were from four and-a-half to five and-a-half inches. The falls, indeed, in Chota Nagpur, Bihar and North Bengal were from three and-a-half to four inches in excess of the normal. The average numbers of rainy days also in

each division were much larger than the normal, and in such districts as Chota Nagpur, Bihar and North Bengal, the actual number was about twice as large as usual.

The excess fall when calculated as a percentage varied from 140 per cent. in excess in Chota Nagpur and 113 per cent. in excess in Bihar to the comparatively small excess of 5 per cent. in South-West Bengal and of 4 per cent. in East Bengal, thus again showing the comparative absence of rain in the two last named divisions which characterized the greater part of the monsoon season of 1894.

Owing to the disturbed nature of the weather in October, the general pressure for the month was rather largely in defect, the variations having been generally from 0.04" to 0.06". The average mean temperature for the month was on the other hand in excess by about a degree. Humidity and cloud proportion were again very much higher than usual in October.

It is usual in most years to close the Monsoon Summary with the review of October, but in the present year the effect of the large storm which crossed the Madras coast on November 2nd was to cause another wave of moisture-laden monsoon winds to advance over the province. Indeed from the 1st and 2nd of November, Bengal was actually influenced by the cyclonic circulation of winds accompanying the storm, and fairly general rain commenced from the 2nd and continued up till about the 5th, when a dry north-westerly wind began to set in at the north-western stations, gradually driving back the moist easterly winds which had been previously blowing. Again, in the retreat of the moist winds rather heavy rain was received, but by the 10th instant the dry north-westerly winds had advanced over the whole province, and from this date fine settled weather of ordinary cold season character set in and continued till the close of November.

The falls of rain in November averaged about four to five and-a-quarter inches in South-West and East Bengal and about three and-a-third inches in Orissa. In the remaining districts of North Bengal, Bihar and Chota Nagpur the falls averaged between one and one and-a-half inches. These falls were in all cases very largely in excess of the normal amounts. During the existence of this disturbed weather, pressure was in decided defect, while temperatures, and specially the night temperatures, were in very considerable excess. Humidity and cloud proportion were also largely above the normal amounts.

The principal features of the monsoon season of 1894 and of the previous months of the year have therefore been as follows:—

1. In the first four months of the year, or in what may be called the pre-monsoon months, the variations of pressure from the normal were small. Slight defects of about 0.02" were recorded in January and April, and also very slight defects in March, while in February, on the other hand, slight excess pressures were registered.

2. In the same period temperature was in excess for the first three months of the year, the excess being from 3° to 4° in February and smaller in the other two months. In April, on the other hand, slightly defective temperature was recorded.

3. Humidity and cloud proportion were in excess in three out of the four months.

4. Practically no cold weather storms reached Bengal, and though they were fairly numerous in North-Western India, they broke up in almost all cases before reaching Bengal.

5. The hot season conditions in Bengal therefore set in rather earlier, and in a somewhat more intense form than usual.

6. Local storms almost of the type of hot weather storms commenced in Bengal in the last week of February; in March they were few in number, while in April they were rather numerous, and some of them were decidedly influential.

7. In April also a small but rather severe cyclonic storm formed in the Andaman Sea and passed over Burma.

8. The rainfall of the first four months of the year was generally small. Very decided defects were recorded in January, February and March, but in April slight excess amounts were received.

9. May was a month in which the hot season conditions were developed in the western and central districts of the province to a most abnormal extent, and most excessive temperatures were recorded. Rainfall was also in rather large defect in May, and pressure was also much lower than usual.

10. In the Bay there were practically no large advances of south-west monsoon winds at all in May, but from the beginning of June a large advance was made, which reached the north of the Bay in the second week, and in front of which a small storm was formed which advanced through Bengal in a north-westerly direction, causing the commencement of the monsoon rains. Owing to the rather rapid passage of the depression practically from South-East Bengal to Bihar, the rains spread with unusual rapidity over the province.

11. The rains set in over the whole of Bengal from about the 13th to the 14th of June, or slightly earlier than usual, in the southern districts, and about a week earlier than usual in Bihar and in the north-western districts generally.

12. The strength of the monsoon was fairly great throughout the whole of its existence, and it gave rain unusually late until the end of October and the early part of November.

13. The monsoon was characterized by numerous storms and barometric depressions; three depressions were formed in June; there were four severe cyclonic storms and two barometric depressions in July; August was free from storms; in September there were four very influential depressions, and in October there were two depressions, one of which was an influential one, together with two cyclonic storms, both of which were very large and extensive, though not very severe. The last storm influenced the weather also in the early part of November.

14. Hence the rainfall from June to the 15th of November was unusually heavy, the monsoon rains being at least 10 per cent. heavier than usual.

15. There were areas of well marked excessive precipitation in the districts of Manbhum, Shahabad and Gaya and other parts of Bihar, while, on the other hand, the falls were particularly light and defective in Rangpur, Howrah, Hooghly and Rajshahi.

16. Pressure was usually in slight defect almost throughout the monsoon months, the defect being large in October and the early part of November.

17. Temperature was either normal or in slight excess in all months except August, when a small defect was registered.

18. Humidity and cloud proportion were in excess throughout the monsoon months.

19. The following tables give briefly the amount and variation of the rainfall in each of the six meteorological divisions month by month for the period 1st of May to the 15th of November inclusive:—

*Actual Rainfall in inches during 1894.*

METEOROLOGICAL DIVISIONS.	May.	June.	July.	August.	September.	October.	1st-15th November	Monsoon season 1894.
South-West Bengal.	3.13	10.54	14.54	11.36	7.40	4.55	4.03	55.55
North Bengal	7.66	13.47	11.22	15.53	18.25	7.82	1.50	75.45
East Bengal	5.94	16.22	19.51	17.92	9.18	5.61	4.26	78.67
Bihar ...	0.82	9.39	13.22	14.53	11.28	7.32	1.13	57.99
Orissa ...	0.78	12.02	19.24	9.37	7.10	6.90	3.30	58.71
Chota Nagpur	0.82	11.92	18.19	17.09	7.47	7.16	1.05	63.70

*Variation of actual Rainfall from the normal in inches.*

South-West Bengal.	— 2.27	+ 0.40	+ 2.54	— 1.35	— 1.64	+ 0.22	+ 3.75	+ 1.65
North Bengal	— 1.60	— 4.10	— 2.86	+ 1.50	+ 4.83	+ 3.40	+ 1.36	+ 2.53
East Bengal	— 2.58	— 1.94	+ 2.91	+ 1.96	— 2.90	+ 0.21	+ 3.49	+ 1.15
Bihar ...	— 1.97	+ 1.61	+ 1.02	+ 3.03	+ 2.44	+ 3.88	+ 1.35	+ 11.36
Orissa ...	— 3.09	+ 3.23	+ 6.74	— 2.04	— 3.15	+ 0.74	+ 2.39	+ 4.82
Chota Nagpur	— 1.83	+ 3.94	+ 5.03	+ 3.53	— 1.24	+ 4.19	+ 0.84	+ 14.46

*Variation expressed as a percentage of the normal fall.*

METEOROLOGICAL DIVISIONS.	May.	June.	July.	August.	September.	October.	1st—15th November.	Monsoon season 1894.
South-West. Bengal.	— 42	+ 4	+ 21	— 11	— 18	+ 5	+ 1,339	+ 3
North Bengal	— 18	— 23	— 20	+ 11	+ 36	+ 77	+ 971	+ 3
East Bengal ...	— 30	— 11	+ 18	+ 12	— 24	+ 4	+ 453	+ 1
Bihar ....	— 71	+ 21	+ 8	+ 26	+ 28	+ 113	+ 1,687	+ 24
Orissa ...	— 80	+ 37	+ 54	— 18	— 31	+ 12	+ 263	+ 9
Chota Nagpur	— 69	+ 49	+ 38	+ 26	— 14	+ 141	+ 400	+ 29

20. Finally, the rainfall of the whole province for the period May to the 15th of November averaged 65·01 inches, while the normal fall for the period is 59·02 inches. The actual fall was thus in excess by practically six inches. Expressed as a percentage, the actual rainfall of Bengal for the monsoon season of 1894 was in excess of the normal by 10 per cent.

A. PEDLER, F.R.S., ETC.,

*Meteorological Reporter to the Govt. of Bengal.*

METEOROLOGICAL OFFICE, BENGAL,  
The 12th December 1894.

TABLE I.

*Actual Monthly Rainfall of districts in Bengal for the months of May to November 15th, 1891.*

[N.B.—The figures in this table are the arithmetical averages of the corresponding figures in the returns for the subdivisional stations.]

METEOROLOGICAL DIVISION.	DIVISION.	DISTRICT.	May.	June.	July.	August.	September.	October.	1st-15th November.	TOTAL.

METEOROLOGICAL OFFICE, BENGAL,

The 12th December 1894.

A. PEDLER, F.R.S., ETC.,

Meteorological Reporter to the Govt. of Bengal.

## LIBERALITY OF RAI GUNGA PROSAD SINGH BAHADUR OF DARBHANGA.

No. 5, dated Calcutta, the 4th January 1895.

From—N. BONHAM-CARTER, Esq., Under-Secretary to the Government of Bengal  
Municipal Department,

To—The Commissioner of the Patna Division.

I AM directed to acknowledge the receipt of your letter No. 586G., dated the 26th September 1894, in which you report that Rai Gunga Prosad Singh Bahadur of Darbhanga has consented to make a gift of Rs. 12,000 for the construction of a hospital at Laheria Serai in memory of his late father, Rai Bunwari Lal Sahu Bahadur.

2. In reply, I am desired to say that the Lieutenant-Governor accepts this generous offer, and to request that you will be so good as to convey to the donor an expression of the thanks of Government for his public spirit and liberality.

## WEATHER AND CROP REPORT.

For the week ending 7th January 1895.

**Burdwan.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops and sugarcane favourable. Price of common rice varies from 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather seasonable. Reaping of winter rice nearly finished; outturn very good. Prospects of *rabi* crops and sugarcane good. Common rice selling from 15 to 21 seers per rupee. Fodder and water sufficient.

**24-Parganas.**—Rainfall nil. Weather seasonable. Harvesting of *aman* continues; outturn good. Prospects of *rabi* crops good. Condition of cattle good. Fodder and water sufficient. Rice sells at—

				Srs.	Ch.	
Sadar	...	...	...	11 to 13	0	} per rupee.
Barasat	...	...	...	15	0	
Basirhat	...	...	...	16	9	
Diamond Harbour	...	...	...	16	0	

**Murshidabad.**—Rainfall nil. Weather seasonable. *Rabi*, sugarcane, mulberry and indigo doing well. Fodder sufficient. Price of rice 16 seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* going on. Cultivation of *rabi* crops still continues. Common rice sells from 16 to 20 seers per rupee. Fodder and water sufficient.

**Dinajpur.**—Rainfall nil. Harvesting of *haimanti* rice half over. Price of rice 13 to 14 seers per rupee. No outbreak of cattle-disease nor any complaint for fodder and drinking water.

**Rangpur.**—Rainfall nil. Weather seasonable. Harvesting of *aman* still going on. Prospects good. Price of common rice varies from 9 to 18 seers per rupee in the district.

**Pabna.**—Rainfall nil. Weather cool. Prospects of crops continue good. Harvesting of *aman* nearly over. Common rice selling at 16 seers per rupee. Fodder and water-supply sufficient.

**Dacca.**—Rainfall nil. Weather seasonable. Harvesting of *aman* continues; prospects good. *Rabi* crops thriving. Price of common rice varies from 12 to 20 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Rainfall nil. Weather seasonable. Harvesting of *aman* nearly over; 17 annas outturn expected. Sowings of *rabi* crops continue. Prospects good. Prices steady. Fodder and water sufficient.

**Patna.**—Rainfall nil. Harvesting of paddy almost finished. Prospects of *rabi* and poppy favourable. Common rice selling at—

				Srs.	
Sadar	...	...	...	18	} per rupee.
Barh	...	...	...	18	
Bihar	...	...	...	19	
Dinapore	...	...	...	17½	

**Gaya.**—Rainfall nil. Harvesting of paddy and pressing of sugarcane in progress. *Rabi* crops and poppy promising. Prices about normal. Fodder and water sufficient.

**Champaran.**—Rainfall 0.12 at Motihari. Weather cold and occasionally cloudy. Standing crops doing well with recent rainfall. Paddy harvest finished. *Aman* rice selling at 18 seers per rupee. Fodder and water sufficient.

**Darbhanga.**—Early part of the week cloudy. Harvesting of rice over. Prospects of *rabi* crops continue favourable. Poppy doing well. Weeding operations in progress. Condition of cattle good. Price of common rice 17 seers per rupee.

**Bhagalpur.**—Rainfall nil. Weather seasonable. All standing crops promising. Prices better.

**Parnea.**—Rainfall 0.02. Weather very cold with foggy mornings. Prospects of crops good. Harvesting of *aghani* paddy nearly over. Price of common rice varies from 16 to 22 seers per rupee.

---

**Cuttack.**—Rainfall nil. Weather seasonable. *Sarad* and *rabi* harvest in progress. Sowing of *dahua* rice continues. Condition of cattle good. Fodder sufficient.

**Hazaribagh.**—Rainfall nil. Weather fine and cold. Prospects of poppy generally good; about  $\frac{1}{3}$  measurements completed. Harvesting of *kurthi* and *surguja* going on. Common rice selling from 15 to 20 seers per rupee. Fodder and water sufficient.

**General Summary.**—There was a little rain in North Bihar, but none is reported elsewhere in the province. General agricultural prospects continue favourable. The rice harvest is being rapidly completed, and a good outturn is generally expected. *Rabi* crops and poppy are promising. Sugarcane is generally a good crop; it is being cut and pressed in parts of the Patna division. The price of common rice continues generally normal. No cattle-disease is reported.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 8th January 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

**Explanation.—Summary.**—The normal means of air pressure and temperature are the arithmetical average or means of the readings during the same period for the year. The humidity of the atmosphere is expressed in percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 5th of January 1895.

DISTRICT OBSERVATIONS.															DISTRICT.
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	OF WEEK.				RAINFALL.						
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

last ten years. The variations are *negative* when the mean of the week is less than the corresponding normal mean, and *positive* when greater. Numbers denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District Observations of rainfall the numbers during the past ten years. The means of the district are the numerical average of the rainfall returned received in the district, *etc.* from total rainfall at the subdivisions.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 5th of January 1895.

Meteorological division.	Division.	District.	Station.	RAINFALL.							Total number of rainy days.	Rainfall of week.	Average rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th October 1894.	Average rainfall from 16th October to date.
				Sunday, 30th Dec. 1894.	Monday, 31st Dec. 1894.	Tuesday, 1st.	Wednesday, 2nd.	Thursday, 3rd.	Friday, 4th.	Saturday, 5th.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY,  
THE 5TH OF JANUARY 1895.**

On the 30th of December, or the first day of the week under review, a barometric depression which had entered Upper Sind on the 29th had advanced into South-East Rajputana, and hence pressure was falling slowly, while temperature was increasing briskly in Bengal. On the 31st the primary depression had advanced into Bundelkhand and was between Nowgong and Sutna, while a secondary depression had formed in the Central Punjab. The barometric changes on this day in Bengal were usually small, but the temperature changes continued large, and temperature was increasing except at a few of the northern and north-eastern stations. On the 1st of January the primary depression had moved slightly eastwards and was a little to the east of Sutna, while the secondary depression had commenced to fill up. Pressure hence again fell in Bengal on this day, while there was also a moderately rapid increase in the temperature. On the 2nd the primary depression had advanced in a south-easterly direction and covered Orissa, South Bengal and the head of the Bay, where pressure had fallen slowly and was in moderate defect, while again temperature had risen moderately over Bengal and had become rather largely in excess, several stations showing excess amounts of about  $5^{\circ}$  in the night or minimum temperatures; on this day also a few light showers were reported. On the 3rd the depression over the head of the Bay and neighbouring land area had practically filled up; hence pressure had risen briskly in Bengal, while temperature was beginning to fall at the western stations, though at the central and eastern stations a further rise was reported. On the 4th a further slow to moderate increase of pressure occurred, showing the depression had continued to pass away, while temperature was again falling slowly at the great majority of stations. On the 5th, however, the increase of pressure had ceased and a fall set in, but temperature still continued to decrease, and had become comparatively low, so that ordinary north-east monsoon conditions had again set in over the province.

*Pressure.*—The mean pressure of the province for the week has been distinctly below the normal, but the defects have been small and usually do not average more than about a hundredth of an inch.

*Temperature.*—On the other hand the mean average temperature for the week has been moderately above the normal, and the average excess for the whole province has equalled  $0.9^{\circ}$ . The excess has been largest in Chota Nagpur, Bihar and North Bengal, while on the other hand slightly defective temperatures have been recorded in Orissa.

The actual temperatures registered during the week and their variation from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been small in the day or maximum temperatures, which have been generally in excess by about half to one degree, while the night or minimum temperatures have usually been also in excess, the excess ranging up to from  $2^{\circ}$  to  $4^{\circ}$  at such stations as Purnea and Patna.

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 5th of January 1895.*

	Normal mean maximum temperature for the week ending 5th January.	Actual mean maximum temperature for the week ending 5th January 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 5th January.	Actual mean minimum temperature for the week ending 5th January 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 5th January.	Actual mean daily temperature for the week ending 5th January 1895.	Variation of actual mean from the normal.
Cuttack	82.6	81.3	-1.3	59.1	59.1	0	70.9	70.2	-0.7

Calm 247.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·3☉ lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

O. LITTLE,

The total fall from 1st January 1894 to 5th January 1895 ... .. 48.66

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 65.58

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

P, dew, —, fog.

Table of Rainfall recorded at Stations in Bengal for the month of December 1894	86	Weekly return of Traffic Receipts on Indian Railways	104

### RESOLUTION ON THE REVISED BUDGET ESTIMATE OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG, FOR THE YEAR 1894-95 AND THE BUDGET ESTIMATE FOR THE YEAR 1895-96.

No. 154Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

*Dated Calcutta, the 15th January 1895.*

### RESOLUTION.

READ—

Letter No. 842, dated the 22nd October 1894, from the Vice-Chairman of the Commissioners of the Port of Chittagong, submitting, through the Accountant-General, Bengal, the revised budget estimate of the Commissioners for the year 1894-95, and the estimate for the year 1895-96.

THE principal difference between the figures in the estimate for the year 1894-95, sanctioned in Resolution No. 55Marine, dated the 9th January 1894, and those for that year given in the revised estimate now submitted, are shown below :—

Receipts.			
		Budget estimate.	Revised estimate.
		Rs.	Rs.
Fees and fines—			
Licenses	...	940	770
Other fees and fines.	...	600	100
Sundry receipts	...	14,988	26,680

*Expenditure.*

	Budget estimate.	Revised estimate.
	Rs.	Rs.
Administration—		
Exchange compensation allowance ...	466	1,088
Vessels and boats—		
Repairs to vessels and boats ...	893	3,000
Light houses—		
Stores ...	5,000	2,000
Hospital charges—		
Rent on account of Seamen's Hospital building on Rangmahal Hill ...	1,800	909

2. The sanctioned estimate of receipts under the heads mentioned above has been altered mainly with reference to the actuals of the six months ending on the 30th September 1894. The increase under the head "Sundry receipts" includes a sum of Rs. 4,911 paid by the Government on account of the deputation allowance of Messrs. J. E. O'Connor and J. H. Apjohn, who were appointed by the Government of India to report on the question of the acquisition of certain lands at Chittagong for the requirements of the Port Trust and the Assam-Bengal Railway, as well as a sum of Rs. 3,126, being the amount refunded by the Executive Engineer, Calcutta Workshops Division, on account of savings on the cost of the new works carried out at the Kutubdia Light House, the full estimated expenditure on which had been paid to the Public Works Department.

3. Under the head "Expenditure" the principal items that call for notice are the following:—

- I. Vessels and boats.                      I. Light-houses.  
III. Hospital charges.

The increased estimate under the head "Vessels and boats" is based on the actuals of the six months ending on the 30th September 1894. The decrease under the head "Light-houses" is due to the fact that blue light composition is no longer required for the light-houses. The estimates under "Hospital charges" has been reduced, as no rent has been paid on account of the building since August last, the house having been purchased.

4. The Lieutenant-Governor sanctions the revised estimate subject to the above remarks.

5. The budget estimate for 1895-96 is based generally on the revised estimate for 1894-95, and does not call for any special remarks. The Lieutenant-Governor sanctions the estimate of receipts and expenditure for the year 1895-96 under section 69 of Act IV (B.C.) of 1887.

6. An abstract of the revised estimate for 1894-95, and of the estimate for 1895-96, is subjoined:—

RECEIPTS.	1893-94.	1894-95.				EXPENDITURE.	1893-94.	1894-95.				1895-96.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Govt. of Bengal.

## WEATHER AND CROP REPORT.

*For the week ending 14th January 1895.*

**Burdwan.**—Rainfall nil. Weather rather warm for the season. Prospects of crops favourable. Price of common rice varies from 10 to 19 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather rather warm for the season. Reaping of winter rice nearly finished; outturn very good. Prospects of *rabi* crops good. Fodder and water sufficient. Common rice selling from 16 to 20 seers per rupee.

**24-Parganas.**—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of *aman* continues. Condition of cattle good. Fodder and water sufficient. Rice sells at—

	Srs.	Ch.	
Sadar	...	...	11 to 13 0
Barasat	..	...	15 0
Diamond Harbour	...	...	16 0
Basirhat	...	...	19 3

} per rupee.

**Murshidabad.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops, mulberry and indigo favourable. Harvesting of *katui* continues. Fodder sufficient. Price of rice 16 seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* going on. Cultivation of *rabi* crops over. Fodder and water sufficient. Common rice sells from 16 to 21 seers per rupee.

**Dinajpur.**—Report not received.

**Rangpur.**—Rainfall nil. Weather cold and seasonable. Sowing and transplanting of potato, tobacco and other cold-weather crops finished. Harvesting of *aman* nearly finished. Price of common rice continues 9 to 18 seers per rupee.

**Pabna.**—Rainfall nil. Weather cool. Prospects of crops continue good. *Aman* still being harvested. Common rice selling at 11 seers per rupee. Fodder and water-supply sufficient.

**Dacca.**—Rainfall nil. Weather seasonable. Harvesting of *aman* continues; prospects good. *Rabi* crops thriving. Common rice 12 to 20 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Rainfall nil. Weather seasonable. Reaping of *aman* still continues. Cultivation for and sowing of *rabi* crops well advanced. Prospects fair. Prices continue normal. Water and fodder sufficient.

**Patna.**—Rainfall nil. Prospects of *rabi* crops and poppy continue favourable. Common rice sells at—

	Srs.	
Sadar	...	18
Barh	...	18
Bihar	...	18
Dinapore	...	17½

} per rupee.

**Gaya.**—Rainfall nil. Harvesting of paddy approaching completion. *Rabi* crops in ear and prospect of poppy fair. Prices somewhere above and somewhere below normal. Fodder and water sufficient.

**Champanan.**—Rainfall nil. Weather cold and cloudy. Prospects of crops fair. Common rice selling at 18 seers per rupee. Fodder and water sufficient.

**Darbhanga.**—Rainfall nil. Weather fine with slight clouds. Prospects of *rabi* crops continue favourable. Poppy plants progressing favourably. Fodder for cattle sufficient. Common rice 17 seers per rupee.

**Bhagalpur.**—Rainfall nil. Weather warm for the season. A shower is wanted for the *rabi* crops. Prospects otherwise satisfactory.

**Purnea.**—Rainfall nil. Weather seasonable. Prospects of crops good. Some land is being ploughed for *bhatoi* rice. Fodder and water sufficient. Coarse rice 19 to 20 seers per rupee.

**Cuttack.**—Rainfall nil. Weather seasonable. Harvesting of *lughu sarad* rice nearly over; that of *guru sarad* and *rabi* crops continues. *Dalua* rice in progress. Condition of cattle good. Fodder sufficient.

**Hazaribagh.**—Rainfall nil. Weather clear and warmer. Poppy somewhat backward in some places. Over half the koti measurements completed. Harvesting of paddy over. Sugarcane being squeezed. Prospects of crops generally good. Common rice selling from 15 to 20 seers per rupee. Fodder and water sufficient.

**General Summary.**—There was no rain during the week. The general prospects of the crops are satisfactory. The harvesting of winter rice is nearly finished, and the outturn is generally good. The condition of the cold-weather crops continues generally satisfactory. Poppy is also a promising crop: but somewhat backward. Prices of common rice continue generally normal. No reports have been received of cattle-disease.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
*The 15th January 1895.*

C. E. BUCKLAND,  
*Secretary to the Govt. of Bengal.*

## SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF DECEMBER 1894.

The most important features in the meteorology of December 1894 have been :—

1. No less than four barometric depressions advanced from North-Western India over Bengal during the month—practically one in each week. The depressions, however, were not of very influential character, and they gave comparatively little rain in their passage through the province. Each depression, however, gave a very distinct warm wave in front of and during the depression. The cold waves of air following on after the depressions have, however, been of unusually short duration owing to the rapidity with which the depressions have succeeded each other.

2. The retreat of the south-west monsoon current in the south of the Bay in December was unattended with the formation of any cyclonic storms. Indeed, there were no barometric depressions even formed over the Bay in December, and hence the weather over the Bay was much less disturbed than usual. Therefore, no disturbance of the weather in Bengal was caused by these actions.

3. Conditions in Bengal on the whole have been much less settled than usual during December. The first depression affected the weather in Bengal from about the 4th to the 6th; the second depression affected the weather conditions from the 11th to the 15th or 16th; the third from the 20th to the 22nd, and the fourth from about the 24th to the 28th. Hence the duration of the fine settled north-east monsoon weather during December in Bengal was rather limited.

4. Though weather has thus been less settled than usual in December, as the depressions were very feeble, the amount of rain falling in the province has been small, and the largest average divisional falls have only equalled 0.57 inch in East Bengal and 0.18 inch in North Bengal. In other divisions the falls have only averaged a few hundredths of an inch.

5. Owing to the feeble nature of the depressions, the mean pressure for the month has shown only very slight variations from the normal. The majority of stations report very slight defects, but the variations as a rule do not equal a hundredth of an inch.

6. The average mean temperature of the province has been in excess by rather more than a degree, the excess being largest in Bihar, Chota Nagpur, and Orissa. This excess has been almost entirely confined to the night or minimum temperatures, which have been generally  $2^{\circ}$  to  $3^{\circ}$  above the normal, while on the other hand the day or maximum temperatures have been in slight defect over the greater part of the province.

7. Humidity has been very decidedly above the normal at the great majority of stations, while cloud proportion has also been somewhat higher than usual.

Ordinary cold-season conditions existed over Bengal at the end of November and the commencement of December, but on the 2nd of December a barometric depression formed in Baluchistan, which advanced rather rapidly in an easterly and south-easterly direction. The depression had reached Bihar on the morning of the 5th, and with its gradual advance towards and over the province, pressure fell very considerably, while temperature rose largely; and on this date the night temperatures were  $5^{\circ}$  to  $7^{\circ}$  in excess of the normal at many stations, and in some cases the excess was  $10^{\circ}$  and  $11^{\circ}$ . In its passage over the province local rain showers were received, and in some cases the falls were heavy; a few rain showers were also reported on the 6th. After the 6th, however, the depression rapidly passed away, and fine settled weather with increasing pressure and falling temperature set in over the province, and this continued up till the 10th. On the 9th, however, the first indications of a new barometric depression approaching Lower Sind were shown, and this depression advanced eastwards till on the 11th its centre had reached Sutna, and the depression was beginning to affect Bengal. On the 12th the depression had apparently reached Bengal, but on the 14th and 15th pressure rose slowly to briskly, and the depression either began to pass away or to fill up over Bengal. Hence, from the 10th to the 13th or 14th the conditions which usually accompany a depression affected Bengal, when temperature and humidity were high, while pressure was low. Cloud proportion also increased largely in Bengal, and moderate rain fell on the 14th in East Bengal, while rain was reported on the morning of the 15th. From the 15th, however, with the passing away of the depression, conditions began slowly to improve, temperature and humidity fell, and pressure rose, while the skies cleared and fine settled weather again obtained from the 16th up to about the 20th. A third barometric depression then entered Baluchistan and North-Western India on the 19th, and on the 20th it had advanced rapidly towards the Central Provinces and Bundelkhand. On the 21st the depression from Bundelkhand had again advanced very rapidly about 500 miles in an easterly direction, and it was over East and Central Bengal. Hence, again, conditions changed rapidly in Bengal, and temperature and humidity rose, while pressure fell, and showers were reported on the 21st and 22nd. On the morning of the 22nd the depression had apparently either filled up over Bengal or had advanced in an easterly direction, and from this date fine settled weather again obtained over the province. This was, however, quickly followed by the advance of a fourth depression, which entered North-Western India on the 23rd, and advanced rapidly in an easterly and south-easterly direction, reaching Bengal on the 25th, when it again produced increasing temperature and humidity with falling pressure, while a few local showers occurred on the 25th and 26th. On the 27th pressure rose briskly, and the depression passed away, and the cold wave of air following in the rear of the

storm reached Bengal on the 27th and 28th, and from this date till the end of the month fine settled weather with decidedly low temperature and humidity and with rather high pressure obtained.

**Pressure.**—Owing to the passage of the depression over the province in the first week of the month, pressure was in distinct defect, the variations equalling from about 0.055" at the western stations to 0.025" in the east and south of the province. In the second week, notwithstanding the passage of a depression, the average pressure was nearly normal, while in the third week an average excess of 0.03" to 0.05" was registered. In the fourth week, again, the average pressure was very nearly normal, an excess of about one or two hundredths of an inch being reported. For the whole month the mean pressure has, however, been very nearly normal, and at a little more than half the number of stations defects have been reported, while slight excess pressures have been registered at the remainder; the variations, however, in both cases are usually less than a hundredth of an inch.

**Temperature.**—The cause of the rather large variations of temperature during the month has already been referred to, and the average mean temperature of Bengal has been in excess by rather more than 1°. This excess had been entirely caused by the unusually high night or minimum temperatures, which have at many stations been 3° in excess of the normal.

The general variation of temperature from the normal of the month is best shown by the following table, which gives the variation of the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province, week by week, throughout the month:—

STATIONS.	WEEK ENDING 8TH DECEMBER 1894.			WEEK ENDING 15TH DECEMBER 1894.			WEEK ENDING 22ND DECEMBER 1894.			WEEK ENDING 29TH DECEMBER 1894.

**Rainfall.**—The only district average rainfalls of importance have been—Backergunge 1.37 inches, Noakhali 1.01 inches, Chittagong 0.98 inch, South Lushai Hills 0.73 inch, and falls of a quarter to half an inch at Jalpaiguri, Darjeeling, Rangpur, Pabna, Dacca, and Faridpur.

The following table gives in a condensed form the summary of the rainfall information in Bengal for the whole year. It gives a comparison between the actual monthly and total rainfall of the year with the normal values in each of the six meteorological divisions of Bengal, the actual falls being expressed as percentages of the normal amounts. From these figures it will be seen that all the divisions except South-West Bengal have received falls rather larger than usual during the year, the excess varying from 25 per cent. in Chota Nagpur and 22 in Bihar to 2 per cent. in East Bengal. Taking Bengal as a whole, the rainfall of 1894 has been larger than the normal amount by 9 per cent:—

METEOROLOGICAL DIVISIONS.	Actual rainfall of the year 1894 expressed as a percentage of the normal fall for the period.

The total fall of rain from 6th to 12th January 1895 ... .. Inches. Nil

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 0.07

The total fall from 1st to 12th January 1895 ... .. Nil

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 0.11

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

Δ, dew.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 12TH OF JANUARY 1895.

ON the 6th of January, or the first day of the week under review, a barometric depression appeared on the North-West Frontier, and in Beluchistan a rapid fall of pressure was recorded. Pressure had also fallen moderately over the greater part of India, the fall in Bengal equalling about a twentieth of an inch, while the temperature and humidity changes were rather variable. On the 7th the depression had advanced to near Jeypore, but it was still too far distant to affect Bengal, and pressure was rising slowly, while temperature had also increased over this area. On the 8th the depression had advanced in a south-easterly direction into Bundelkhand, and its centre was near Nowgong, and hence pressure began to fall slowly over the western districts of Bengal, while a further increase of temperature occurred, and both day and night temperatures in Bengal became rather considerably in excess of the normal, and humidity was also decidedly high. On the 9th the depression had remained practically stationary, but pressure had fallen slightly to briskly over the western half of Bengal, showing that the depression had decidedly intensified, and was affecting Bengal more largely, and hence temperature again rose and the sky became lightly to moderately clouded. On the 10th the depression had advanced in a south-easterly direction, and probably existed over the head of the Bay, but it had become very feeble, and it was not well marked. Pressure was hence falling slowly over the southern and eastern districts of Bengal, while it was rising elsewhere, and temperature had again risen moderately over practically the whole province, and both day and night temperatures became in excess by amounts ranging from about 2° over a large part of the province up to 5° and 6° in the western districts. On the 11th the depression at the head of the Bay disappeared, but a new depression accompanied by an irregular cyclonic circulation of winds appeared in Bundelkhand, which again affected the weather in Bengal, where pressure had fallen moderately, while temperature rose briskly, and at several stations southerly winds appeared, which caused a very considerable increase in the humidity. On this day the excess in the mean temperature at a good many stations equalled about 5°, while in certain cases, such as at Jalpaiguri, the night temperatures were about 10° higher than usual. On the 12th the depression had advanced from Bundelkhand and had travelled eastwards into Bengal, but it was filling up, and had become of comparatively little importance. It was, however, still affecting the weather in Bengal rather considerably, and was giving unusually high temperature and humidity with lightly to moderately clouded skies.

Thus it will be seen that throughout the whole of the week under review, Bengal has been under the influence of two successive barometric depressions, and hence weather has been slightly disturbed with unusually high temperature and humidity for the season for almost the whole of this period.

*Pressure.*—Owing to the influence of the two depressions the mean pressure for the week has been in defect by considerable amounts, the defect ranging usually between 0.02" and 0.04". The pressures registered and their variations from the normal have, however, both been somewhat irregular, showing that the atmosphere has been a little disturbed.

*Temperature.*—It has been unusually high practically throughout the week, and the average mean temperature of the province has been 2.7° in excess. This excess has been unusually large at the western stations, and in Behar and Chota Nagpur it has equalled between 4° and 5°.

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been very large in the day or maximum temperatures, which have been in excess by about two to three degrees, while the night or minimum temperatures have usually been also in extremely large excess, the excess ranging up to from 5° to 7° at such stations as Hazaribagh and Patna:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 12th of January 1895.

	Normal mean maximum temperature for the week ending 12th January.	Actual mean maximum temperature for the week ending 12th January 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 12th January.	Actual mean minimum temperature for the week ending 12th January 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 12th January.	Actual mean daily temperature for the week ending 12th January 1895.	Variation of actual mean from the normal.
Cuttack	83.9	84.6	+0.7	59.3	67.7	+8.4	71.6	72.7	+1.1

### EMBANKMENT AND DRAINAGE REPORTS FOR 1893-94.

No. 141/.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT

Irrigation.

*Dated Calcutta, the 19th January 1895.*

### RESOLUTION.

READ—

The Embankment and Drainage Reports for 1893-94.

THE reports submitted by Superintending Engineers deal not only with embankments, but with all drainage and other miscellaneous irrigation works which are not dealt with in the Canal Revenue Report, and they cover the expenditure of the year shown in the statement following:—

	Rs
I.—Embankments, class A, in Orissa	1,06,169
Ditto „ B, Schedule D and other Government embankments	2,31,463
Ditto „ C maintained under contract	97,839
Ditto „ D maintained by annual apportionment of charges	10,616
II.—Works carried out by civil officers	51,913
III.—Works undertaken under the provisions of the Drainage Act	23,699
IV.—Drainage works carried out at the cost of Government	35,922
V.—Drainage works carried out under the Embankment Act	12,662
Total	5,70,613

*1.—Embankments maintained by the Irrigation Department.*

2. The public embankments in Bengal are divided into two classes:—

*First.*—Embankments the property of Government, which are maintained at the public expense.

*Second.*—Embankments maintained by Government officers at the cost of the persons interested.

In the first class there are—

*A.*—The embankments in Orissa, which are maintained under Act XXXII of 1855.

*B.*—The embankments enumerated in Schedule D of Act VI (B.C.) of 1873, among which are included those of the Burdwan Raj estate taken over in 1804, and some additional lengths, which have at various times been added to the schedule under the provisions of section 43 of Act II (B.C.) of 1882, as also three short lengths of embankments in the Pabna, Bogra and Bankura districts.

Embankments of the second class are situated in several districts, the most important being those on the banks of the river Gandak in the Champaran, Muzaffarpur and Saran districts, and those in the Midnapore district. These, again, are divided into two classes—

*C.*—Those in which the cost of maintenance is recovered from the persons interested by the payment of a fixed annual charge under a contract extending over a term of years not exceeding 30, as provided for in sections 63—68 of Act II (B.C.) of 1882.

*D.*—Those in which the cost of maintenance is recovered from the persons interested by an annual apportionment of the actual charges.

Lengths of embankments. 3. The lengths of embankments in each class are shown below:—

EMBANKMENTS.	LENGTH.	
	Miles.	Feet.
1	2	3
Embankments maintained at the expense of Government—		
<i>A.</i> —In Orissa ... ..	797	1,971
<i>B.</i> —Schedule D and other Government embankments.	1,109	1,239
Embankments not maintained at the expense of Government—		
<i>C.</i> —Maintained under contract ... ..	470	3,622
<i>D.</i> —Ditto by annual apportionment of charges.	77	1,055
Total for 1893-94 ... ..	2,454	2,607
Corresponding total for 1892-93 ... ..	2,471	3,111
Difference, decrease ... ..	17	504

A reduction of 4 miles 824 feet has occurred in the total length of embankments in Orissa (Class A) owing to a revision of the list. In class B embankments there is a reduction of 14 miles 5,175 feet on account of the abandonment of three lengths of the Selye right and left embankments, aggregating 15 miles 255 feet in length, in the Midnapore district. The Chota Manika embankment in the Bogra district, (360 feet in length), which was shown under class D in 1892-93, has now been included in Class B. There was a net increase of 2 miles 215 feet in the length of embankments in class D. The additions to this class of embankments during the year were (1) the extension of the Turki embankment in the Muzaffarpur district for 2 miles 1,320 feet along the Tetaria road, (2) an embankment 1,660 feet long constructed in the Purnea

district to join the ends of the Panwar and Kosi embankments, and (3) an addition of 1,320 feet to the Tolly's Nala embankment. The following embankments in class D were abandoned during the year—(1) a short length of 10 feet in the Gaya district, (2) the Chota Manika embankment in the Bogra district, 360 feet long, transferred to class B, and (3) the Kolia embankment in the Birbhum district, 3,715 feet in length, omitted, as it is under the charge of the Collector.

4. The floods in the Orissa rivers were of an ordinary character, but there was a cyclone in May 1893 in Orissa, which did much damage to the embankments, causing several of them to be breached. In the South-Western Circle the year was an eventful one for floods. The Cossye was in constant flood from 23rd June till the middle of September 1893, the highest reading registered at Midnapore being 91.70 on the 23rd June. The embankments in the Midnapore district on both banks of the river were breached in several places. The floods in the Rupnarain were higher than in the preceding year, and the right embankment was breached in many places. The floods in the Hooghly were higher than any on record during the last five years, but they did very little damage to the embankments. There were high floods in the Damodar. Out of a total length of 700 feet, about 625 feet of the line of spurs at Lakra on the Damodar right embankment were washed away, and the embankment breached. A second breach occurred at Bangacha in the Damodar right embankment. The floods in the various rivers crossed by the Orissa Coast Canal, viz., the Subarnarekha, the Panchpara, the Burrabullong, and the Muttai, were frequent and high, and did much damage to the canal banks. The floods in the Sone and Gogra were of an ordinary character. There were several high floods in the Gandak, and extraordinary floods occurred in the rivers Teor, Boor Gandak and Bagmati during the year. The highest Gandak flood occurred on the 21st October, and caused a considerable amount of damage to all the protective works at various points along the river, but the embankments on both sides were not injured. Great damage was done to the protective works on the Turki embankment, and especially to the new extension of the embankment along the Tetaria road, which was breached in several places and the new earthwork considerably damaged.

5. The Champaran and Tirhut embankments have hitherto been separated by a short break, through which a considerable volume of water used to flow from the Gandak into the Bya nala in the flood season. An estimate amounting to Rs. 12,465 was sanctioned in Bengal Government's letter No. 26T.—I., dated 19th May 1893, for closing the break and building a sluice in the nala. The work was nearly completed at the end of the year. The Golaghat sluice in the 24th mile of the Champaran embankment was remodelled. The inspection bungalow at Champadanga was rebuilt on an estimate sanctioned by Government on the 21st December 1893. Spurs costing Rs. 8,062 were constructed for the protection of the Rampur Boalia embankment. In the Purnea district the village road situated between the ends of the Panwar and the Kosi retired embankments was raised above flood level.

6. (a) *Ordinary repairs.*—The ordinary repairs to the embankments in the Orissa Circle cost Rs. 46,863, as against Rs. 57,794, in the preceding year, and Rs. 69,693, the average of the nine years ending with 1892-93. The reduced expenditure is mostly due to the works in the Puri Division not having been completed during the year. In the South-Western Circle the sum spent on ordinary repairs amounted to Rs. 1,56,673, against an expenditure of Rs. 1,65,357 last year. In the Sone Circle extensive repairs had to be carried out to the protective works on both sides of the river Gandak on account of the serious damage done to them by the floods of October 1893.

(b). *Breaches and retired lines.*—The cost of repairs to the river protective works in the Orissa Circle was Rs. 45,539, against Rs. 54,586 in 1892-93 and Rs. 43,342, the average of the nine years ending with 1892-93. The main expenditure was on retired lines, due to the floods of 1892, the work being carried out and paid for in 1893-94. There was also considerable expenditure on revetment work, due to revetting the river bank at Kendupatna in place of maintaining spurs. In the South-Western Circle the expenditure in filling breaches

and making good other damages, caused by the cyclone and floods of May and June 1893, to the embankments in the districts of Midnapore and Hooghly, amounted to Rs. 22,315 and Rs. 18,933 respectively. In the 24 Parganas the expenditure under the same heads was Rs. 17,800. The expenditure on retired lines in the South-Western Circle was Rs. 19,256 as compared with Rs. 26,621 in the previous year. In the Sonc Circle a retired line  $1\frac{1}{2}$  miles in length was constructed in the 17th mile of the Tirhut embankment at a cost of Rs. 2,815 in consequence of the encroachment of the river on the main bund.

7. The cost of repairing the Burdwan Raj estate embankments, in the districts of Burdwan, Birbhum, Hooghly, and Midnapur, was Rs. 1,09,445, against Rs. 85,803 in 1892-93. The increase is mainly attributable to the heavy repairs necessitated by the cyclonic storm of May 1893. The repairs were executed in the year under review.

8. The cost of repairing the Orissa embankments (Class A) during the year amounted to Rs. 1,06,469, which, for a total mileage of 797 miles 1,971 feet, is at the average rate of Rs. 133.52 per mile as against Rs. 147 in 1892-93. The Class B embankments, whose aggregate length is 1,109 miles 1,239 feet, cost Rs. 2,31,463 to repair, giving an average rate of Rs. 208.66 per mile, against Rs. 181 in the preceding year.

As regards embankments maintained by Government under contract with the persons interested (Class C), the actual cost of repairs amounted to Rs. 97,839, or Rs. 207.86 per mile, against Rs. 92,996, or Rs. 197 per mile in the preceding year. The sums payable under contract, compared with the maintenance charges, including book charges for establishment and tools and plant, are shown in the following table, together with the amount recovered during the year, and the balance remaining to be recovered:—

YEAR.	MIDNAPORE DISTRICT.		SARAN DISTRICT.		CHAMPARAN DISTRICT.		MUZAFFARPUR DISTRICT.		TOTAL.		Recoveries.	Balance to be recovered.	Surplus.	Deficit on the contract.

1892-93 ...	55,087	55,000	24,536	23,900	38,848	13,000	21,770	10,415	1,40,241	1,02,315	...	...	...	...
1893-94 ...	73,083	55,000	30,474	23,900	30,101	13,000	16,933	10,415	1,60,506	1,02,315	1,09,045	38,097	...	48,281
Total ...	6,11,121	7,15,000	4,13,915	3,10,700	3,75,974	1,30,000	2,01,016	1,04,160	16,02,020	12,50,850	12,31,753	38,097	...	...

It will be seen from these figures that Government is a loser by Rs. 48,281 on the results of the year, and that the outstanding balance to be recovered amounts to Rs. 38,097. The loss to Government in 1892-93 was Rs. 37,926, and the average annual loss for the nine years ending with 1892-93 was Rs. 24,061.

As explained last year, the outlay incurred by the Public Works Department on embankments of Class D cannot be brought on the books of the Civil Department as recoverable until it has been accepted by the Collectors concerned, the unavoidable result being a heavy arrear balance on the books of the Public Works Department. The actual outlay of the year is stated by the Superintending Engineers concerned (Appendix C) to have been Rs. 12,069, while the recoveries of the year (Appendix C, column 7), were Rs. 10,773, the arrear balance at the close of the year being Rs. 12,593, inclusive of amounts not yet accepted by Collectors. Comparing these figures with those submitted by the Board of Revenue (Appendix B), it will be seen that the recoveries of the year (column 17) amounted to Rs. 18,645, instead of Rs. 10,773, as reported by the Superintending Engineers. No explanation of this discrepancy has been given. The figures in the Board's return only include amounts which have been accepted and apportioned by the Civil Department, and hence no comparison between the "advances" and "outstanding balances," as here reported and as given by the Superintending Engineers, can be made.

The figures supplied by the Board (Appendix B) are shown in a more concise form in the statement below. The recoverable amount falling due within the year was Rs. 33,328, out of which Rs. 18,645 were collected, the recoveries thus falling short of the demand by Rs. 14,683—

	DUE DURING THE YEAR.		FALLING DUE IN SUBSE- QUENT YEARS.		TOTAL.	
	Column of Board's return.	Amount.	Column of Board's return.	Amount.	Column of Board's return.	Amount.

Balance (arrear) ...	26	14,683	27	2,23,384	26,27	2,38,067
Total ...	...	33,328	...	2,23,384	.....	2,56,712

9. The administrative sanction of Government is now required in the case of all new works costing more than Rs. 1,000, which are carried out by civil officers, and such works must be approved by the Chief Engineer. The amount provided in the budget was Rs. 60,000, out of which Rs. 51,943 were expended. The distribution of this expenditure by districts is given in the subjoined statement :—

Division.	District.	Expenditure.
		Rs.
Burdwan ...	Midnapore ...	10,000
Presidency ...	24-Parganas ...	2,996
Rajshahi ...	Rajshahi ...	1,000
Dacca ...	Mymensingh ...	390
Chittagong ...	Chittagong ...	7,578
Ditto ...	Noakhali ...	2,047
Patna ...	Patna ...	2,445
Do. ...	Gaya ...	9,190
Do. ...	Shahabad ...	2,543
Bhagalpur ...	Bhagalpur ...	650
Ditto ...	Sonthal Parganas ...	2,000
Orissa ...	Cuttack ...	249
Do. ...	Balasore ...	301
Do. ...	Puri ...	3,693
Chota Nagpur ...	Lohardaga ...	2,048
Ditto ...	Palamau ...	3,041
Ditto ...	Manbhum ...	302
Ditto ...	Singbhum ...	1,560
Total ...		51,943

10. The nature of the expenditure is shown below :—

Construction and repairs of embankments ...	Rs. 30,938
Excavation of tanks ...	2,695
Repairs to tanks ...	1,870
Construction of wells ...	1,682
Repairs to wells ...	1,691
Excavation of water-courses ...	2,470
Repairs to Irrigation channels, &c. ...	5,294
Construction of culverts ...	83
Establishment ...	1,130
Expenditure in the Sadar subdivision of the Gaya district, of which no details have been given ...	4,190
Total ...	51,943

The chief instances of repairs to embankments were (1) the Kutubdea embankment in Chittagong, which cost Rs. 5,225; (2) the Majnamutha embankment in Midnapore, which cost Rs. 5,408; and (3) the Dowlatpore embankment in the 24-Parganas, which cost Rs. 1,461. Of the expenditure of Rs. 5,294 on irrigation channels, &c., Rs. 3,604 were spent in Gaya, Rs. 1,343 in Shahabad, and Rs. 347 in Cuttack. New wells were constructed in the Patna, Gaya, and Shahabad districts at a cost of Rs. 760, Rs. 622, and Rs. 300 respectively. The expenditure on the excavation of water-courses was mainly in the Midnapore and Gaya districts.

11. These works (five in number) were all undertaken with a view to the

*III.—Works undertaken under the provisions of the Drainage Act.* drainage of the swamps in the southern part of the Hooghly district. Four of the schemes have been completed; the fifth (the Ampta scheme) has not yet been sanctioned, the expenditure so far on it being confined to preliminary expenses. The following account of the expenditure incurred to date is given by the Superintending Engineer, South-Western Circle: the figures relate to expenditure on construction only, and include charges for establishment and tools and plant—

			Rs.	
1.	Dankuni drainage works	...	3,96,236	Completed.
2.	Howrah ditto	...	2,59,463	Ditto.
3.	Rajapur ditto	...	8,50,152	Ditto.
4.	Burrajulla ditto	...		
5.	Ampta ditto	...	2,083	Not sanctioned.

These figures do not agree with the figures supplied by the Accountant-General. The Superintending Engineer has been asked to reconcile the discrepancies.

12. The cost of maintenance of the Dankuni drainage channels during the year was Rs. 6,762, against the average assumed annual cost of Rs. 4,390, on which the capitalization was based.

13. The apportionment of the cost of the Howrah scheme was completed during the year. The entire demand will be made in one bill. The maintenance charges have been capitalized for Rs. 50,000. The total amount to be recovered, including original cost, is Rs. 5,24,924. Of this sum, Rs. 4,37,149 represents principal, and Rs. 87,775 interest. The expenditure on the maintenance of the Howrah drainage works during the year was Rs. 1,320, against Rs. 2,000, the basis of the capitalization.

14. The total cost, including the maintenance charges, is reported to be 13.3 times the estimated annual increased value in the case of the Dankuni works, and only 8.7 times in the case of Howrah.

15. The cost of the Rajapur scheme up to March 1894 is reported by the Accountant-General to be Rs. 9,48,996, including the expenditure by the Civil Department. The surveys for the apportionment of the cost were in progress during the year, and are expected to be shortly completed. Some modifications were made in the previous year's survey arrangements in order to reduce the cost, and make the work more efficient. Mr. Todd's services were dispensed with, and the work is now being done directly under the Director of Bengal Surveys. The cost of maintenance of the Rajapur and Burrajulla drainage works during the year amounted to Rs. 3,371 and Rs. 804 respectively.

16. The last year was a year of unprecedented and continual rain during the months of May, June and July, and the drainage works were thoroughly tested as to their ability to do the work expected of them. Paddy, which was twice transplanted, was twice destroyed, and it was not till the middle and end of August that the level of the water in the different drainage basins was sufficiently reduced and the transplantation completed for the third time. The result was bumper crops in the Howrah and Rajapur basins. The crops in a portion of the Dankuni basin are reported not to have been so good, as the sluices are said not to have worked properly.

Up till 1893 doubts were entertained whether the drainage works, especially in the case of Rajapur, which is the most important and costly, had not been made unnecessarily large. The following remarks, which are taken from Mr. Duke, the Collector of Hooghly's 4th Annual Report on the drainage works in the

Hooghly district during 1893-94, sum up the conclusions to be drawn from the past year's experience:—

“So far the *Rajapur* drainage scheme may be considered a complete success. In a year of ordinary rainfall the capacity of the sluice may be considered more than sufficient, but in an unusual year, like the year under review, it would have been impossible to drain out the flood-water if the sluice gate had been smaller. If the rainfall had been as great in August and September as in previous months, there would have been no chance of the transplantation of paddy. The sluice alone, so long as the rainfall continued excessive, failed to reduce the level.”

Mr. Duke's statement, that the sluices in connection with the Dankuni scheme did not work properly, and that the Dankuni basin suffered more during the last rains than any other drainage basin, is being investigated, with the view to the adoption of such remedial measures as may be found necessary.

Orders have been issued for the preparation of detailed plans and estimates for the improvement of the drainage of the Amta basin.

17. Under this head two original works were in progress during the year,

*IV.—Drainage works carried out at the cost of Government.* the cost being charged to provincial agricultural works—

NAME OF WORK.	Expenditure up to March 1894.	Expenditure of year.	Completed or in progress.
1	2	3	4
Balliagahi drainage works ... Constructing datum blocks in the bed of the Protapkhali khal.	Rs. 1,88,569 909	Rs. 20,010 909	Completed. Ditto.

The Balliagahi drain was open throughout the year, and was largely used as a navigation channel by the exporters and traders of the Balliagahi Bazar, the prescribed tolls being paid from July 1893. The traffic receipts amounted to Rs. 4,131 from 3,187 boats.

The Protapkhali khal was cleared of silt. The khas tahsil drainage khals in the Balasore Division and the Balli bhal drainage works were maintained at a cost of Rs. 5,871 and Rs. 9,132, respectively.

18. Only two small works were constructed under the Embankment Act—(1) pipe sluice at Haral in embankment No. 84, schedule D, at a cost of Rs. 921, and (2) a tunnel sluice at Dhosa in embankment No. 81, schedule D. An expenditure of Rs. 9,616 was incurred during the year for the acquisition of land for the Churial khal drainage works, which were completed in the year 1890-91. The Churial khal drainage works and the irrigation sluice and connecting channel at Kumrool in the 50th and 51st mile of the Damodar left embankment were the only works maintained during the year.

ORDER.—Ordered that a copy of this Resolution and of its appendices (A to C) be published in the *Calcutta Gazette*, and submitted to the Government of India, Public Works Department, for information.

Ordered, also, that copies of this Resolution and of its Appendices (A to C) be forwarded to the Secretaries to the Government of Bengal in the Revenue and Financial Departments; Secretary to the Board of Revenue, Lower Provinces; Commissioners of the Patna, Bhagalpur, Rajshahi, Presidency, Burdwan and Orissa Divisions; Superintending Engineers of the Orissa, South-Western, Sone, and Northern Circles, and Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

*Secretary to the Government of Bengal.*

APPENDIX A.

Steps have been taken to realize the balance under the Public Debt Recovery Act.

This is minus Rs. 910 realized in advance during last year.

Postcards have been issued for the realization of the balance. Rs. 1 realized since close of the year, and certificate issued for Rs. 6. For Rs. 293 Public Demand's Recovery Act will be resorted to. Rupees 90 are being appropriated.

Rupees 11 realized after the close of the year. Postcard issued for Rs. 306. For Rs. 293 Public Demand's Recovery Act will be resorted to. Rupees 90 are being appropriated.

\* Owing to the adjustments effected in the supplementary accounts for March 1893, the figures differ from those shown in the report for 1892-93.

(a) Adjusted in the supplementary accounts for March 1893.

## WEATHER AND CROP REPORT.

For the week ending 21st January 1895.

**Burdwan.**—Rainfall at Raniganj 0·04. Weather seasonable. Prospects of *rabi* crops satisfactory. Fodder and water sufficient. Price of common rice varies from 15 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather seasonable. Prospects of crops favourable. Fodder and water sufficient. Rice sells from 16 to 20 seers per rupee.

**24-Parganas.**—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of *aman* continues. *Boro* is being sown in the Diamond Harbour sub-division. Condition of cattle good. Fodder and water sufficient. Rice sells at—

				Srs.	Ch.	
Sadar	...	...	...	11½ to 13	0	} per rupee.
Barasat	...	...	...	15	0	
Basirhat	...	...	...	19	3	
Diamond Harbour	...	...	...	15	0	

**Murshidabad.**—Rainfall at Sadar 0·04. Weather cool. Harvesting of *aman* finished. Prospects of *rabi* crops good. Fodder available. Price of rice 15 seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* going on. *Rabi* crops doing well. No cattle-disease. Fodder and water sufficient. Common rice sells from 18 to 22 seers per rupee.

**Dinajpur.**—Average rainfall very little. Harvesting of *haimanti* rice is nearly finished. Cultivation of *bhadoi* is going on in some places. Common rice 14 to 15 seers per rupee. No complaints of fodder and drinking water. No report of any cattle-disease.

**Rangpur.**—Rainfall 0·04 at Sadar and 0·07 at Nilphamari. Weather seasonable. The rainfall is beneficial to the standing crops. Harvesting of *aman* nearly finished and that of mustard has commenced. Price of common rice varies from 9 to 18 seers per rupee in the district.

**Pabna.**—Rainfall nil. Weather cool. Prospects of crops good. Harvesting of *aman* nearly over. Common rice selling at 16 seers per rupee. Fodder and water-supply sufficient.

**Dacca.**—Rainfall nil. Weather seasonable. Harvesting of *aman* completed. *Rabi* crops thriving. Price of common rice varies from 12 to 20 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Rainfall nil. Weather seasonable. Harvesting of *aman* nearly over. Cultivation for and sowing of *rabi* crops continue. Prospects fair. Prices steady. Water and fodder sufficient.

**Patna.**—The rain on 15th greatly benefited the *rabi* and poppy which are commencing to flower. Common rice sells at—

				Srs.	
Sadar	...	...	...	18	} per rupee.
Bihar	...	...	...	19	
Barh	...	...	...	17½	
Dinapore	...	...	...	17½	

**Gaya.**—Harvesting of paddy approaching completion. *Rabi* and poppy crops fair. Prices generally about normal. Fodder and water sufficient.

**Champan.**—Rainfall at Motihari 0·26. Weather cold. Prospects of *rabi* and poppy fair. Common rice selling at 17 seers per rupee. Fodder and water sufficient.

**Darbhanga.**—Rainfall at Sadar 0·22. *Rabi* much benefited by rain; prospects favourable. Poppy doing well. Fodder for cattle sufficient. Prices remain stationary.

**Bhagalpur.**—Weather seasonable. Standing crops doing well, but more rain is wanted.

**Purnea.**—Rainfall at Sadar 0·11. Weather seasonable. Prospects of crops good. Price of coarse rice varies from 20 to 25 seers per rupee. Fodder and water sufficient.

**Cuttack.**—Rainfall nil. Weather seasonable. *Sarat* rice harvest nearly over. *Rabi* harvest continues. Cultivation of *dalu* rice in progress. Condition of cattle good. Fodder sufficient.

**Hazaribagh.**—Weather cold and clear. Prospects of poppy continue good. *Rabi* crops good all round. Fields being ploughed. Fodder and water sufficient. Common rice selling at 15 to 18 seers per rupee.

**General Summary.**—There was general rain in Bihar, and light local showers are also reported from some districts of Bengal. The harvest of winter rice is nearly finished, and has yielded a good outturn for the whole province. The cultivation of spring rice is in progress. The *rabi* and poppy crops are generally reported to be doing well, and to have benefited, especially in Bihar, from the rainfall. Cattle are in good condition. The price of common rice is generally steady, but shows a fall in some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 22nd January 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

\* Mean of 6 days.

**Explanation.—Summary.**—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the years 1871-80. The humidity of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question. Stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 19th of January 1895.

DISTRICT OBSERVATIONS.															DISTRICT.
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	OF WEEK.				RAINFALL.						
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

**Explanation.**—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0.02 inch of rain has fallen.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 19TH OF JANUARY 1895.

At the close of the previous week a feeble form of low-pressure area covered Bengal. This was intensified on the 12th, or the first day of the week under review, when pressure had fallen briskly over Bengal, and a distinct barometric depression existed, while winds also showed a distinct tendency to cyclonic circulation in connection with it. Hence temperature and humidity were high, and excess amounts of  $8^{\circ}$  to  $10^{\circ}$  were recorded in the night temperatures at such stations as Patna, Gaya, Saugor Island and Berhampur. On the 13th pressure had begun to rise slightly in Bihar and Chota Nagpur, while it fell moderately to rapidly at the eastern and northern stations in the province, and a very decided barometric depression again existed in North Bengal. Temperature and humidity conditions continued practically unaltered in Bengal, and the night temperatures were usually about  $5^{\circ}$  to  $9^{\circ}$  in excess. On the 14th pressure had again risen briskly to rapidly in Bengal and Assam, and the depression had to a great extent disappeared, but temperature in Bengal still continued excessive. Rather general rain had also been received in Bihar and Chota Nagpur in connection with this depression, and very numerous rain-showers were reported on the morning of the 15th in the western and northern districts. On the 15th, though pressure continued to rise in Bengal, while temperature also fell slowly, yet conditions were far from settled, for a cyclonic circulation of winds commenced in the North-Western and Central Provinces, and this was apparently connected with another feeble low-pressure area, which began to pass eastwards through Bengal on the 16th, causing a brisk to rapid fall of pressure, particularly in the western districts, and causing a large increase in the cloud proportion with fairly general rain in Bihar, and somewhat numerous but usually light rain showers in Chota Nagpur. Temperature, on the other hand, began to fall slowly to rapidly. On the 17th pressure continued to fall slowly over Bengal, and the province was still rather largely influenced by the depression, so that skies were overcast over a very considerable area, though the rainfall had to a great extent ceased, but temperature had again risen briskly at the great majority of stations. On the 18th pressure began to rise in Bengal, and the depression was hence disappearing; temperature therefore commenced to fall briskly, the decrease in the mean temperature at many stations equalling  $5^{\circ}$  and  $6^{\circ}$ ; cloud proportion and humidity also began to decrease, and only one or two local showers were reported. On the 19th, or the last day of the week, pressure had again risen moderately to briskly, and the effects of the depression had quite disappeared, temperature had again fallen considerably, and had become decidedly low and below the normal, while a dry northerly current was blowing over the whole of Bengal, skies were almost cloudless, and no rain had fallen. Hence, at the close of the week, fine settled weather of rather strongly developed north-east monsoon character obtained over the province.

*Pressure.*—The variations of the mean pressure from the normal have been decidedly irregular, and in several cases at neighbouring stations they have been of opposite character. At the great majority of stations, however, the average pressure has been in slight to moderate excess, but the variations have usually not been larger than  $0.03^{\circ}$ .

*Temperature.*—The distribution of temperature has also been decidedly irregular; and thus while the average mean temperature in Orissa shows an excess of  $2.3^{\circ}$ , East Bengal one of  $1.8^{\circ}$ , and South-West Bengal one of  $0.7^{\circ}$ , in the remaining Divisions small defects have been recorded. For the whole province the mean temperature for the week has been  $0.5^{\circ}$  in excess.

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been large in the day or maximum temperatures, which have been in excess at about half the stations by about two to three degrees, while they have been in defect at the others. On the other hand, at most stations the night or minimum temperatures have usually been in large excess, the excess ranging up to from  $3^{\circ}$  to  $5^{\circ}$  at such stations as Patna, Calcutta, Chittagong and Cuttack:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 19th of January 1895.

	Normal mean maximum temperature for the week ending 18th January.	Actual mean maximum temperature for the week ending 18th January 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 18th January.	Actual mean minimum temperature for the week ending 18th January 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 18th January.	Actual mean daily temperature for the week ending 18th January 1895.	Variation of actual mean from the normal.
Cuttack	84.9	85.7	+0.8	60.2	64.8	+4.6	72.6	75.2	+2.6
Calcutta	77.3	77.6	+0.3	55.9	59.8	+3.9	66.6	68.4	+1.8

Gaya	76.3	73.9	-2.4	51.4	51.8	+0.4	63.9	62.0	-1.9
Purnea	75.0	72.6	-2.4	49.4	50.5	+1.1	61.7	61.6	-0.1
Hazaribagh	73.5	70.5	-3.0	51.2	50.6	-0.6	62.4	60.6	-1.8
Darjeeling	44.9	45.5	+0.6	35.2	34.0	-1.2	40.1	39.8	-0.3

**Rainfall.**—Ohota Nagpur has received an average fall of 0·27 inch and Bihar one of 0·28 inch. A few unimportant showers have also been received in North and South-West Bengal and in Orissa.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 19th of January 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.

					0.14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newmann's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

$\Delta$ , dew;  $\equiv$ , fog; o, overcast.

\* The decrease is chiefly due to the "Kumbh Mela" at Allahabad and the running of special trains in the corresponding period of 1894.

*Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.*

The Council met at the Council Chamber on Saturday, the 19th January, 1895.

### Present:

- The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
- The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General*.
- The HON'BLE H. J. S. COTTON, C.S.I.
- The HON'BLE SIR JOHN LAMBERT, K.C.I.E.
- The HON'BLE D. R. LYALL, C.S.I.
- The HON'BLE J. A. BOURDILLON.
- The HON'BLE MAULVI ABDUL JUBBAR KHAN BAHADUR.
- The HON'BLE F. R. S. COLLIER.
- The HON'BLE C. E. BUCKLAND.
- The HON'BLE C. A. WILKINS.
- The HON'BLE ROMESH CHUNDER DUTT, C.I.E.
- The HON'BLE MAHARAJA RAVANESHWAR PRASAD SINGH BAHADUR OF GIDHOUR.
- The HON'BLE SURENDRANATH BANERJEE.
- The HON'BLE L. GHOSE.
- The HON'BLE MAHARAJA SIR LUCHMESSUR SINGH BAHADUR, K.C.I.E., OF DAR-BHANGA.
- The HON'BLE MAULVI SERAJUL ISLAM KHAN BAHADUR.
- The HON'BLE J. G. WOMACK.
- The HON'BLE J. N. STUART.
- The HON'BLE MAULVI MUHAMMAD YUSUF KHAN BAHADUR.

## NEW MEMBERS.

The HON'BLE MR. ROMESH CHUNDER DUTT and the HON'BLE MAULVI MUHAMMAD YUSUF KHAN BAHADUR took their seats in Council.

## RECRUITMENT OF ASSISTANT SUPERINTENDENTS OF POLICE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been drawn to the announcement which has appeared in the newspapers to the effect that a competitive examination will be held under the orders of the Madras Government for the recruitment of Assistant Superintendents at which Natives of India will be allowed to appear?

Will the Government reconsider its decision excluding Natives of India from the competitive examination for the recruitment of the superior staff of the Police Service in Bengal, and pass orders similar to those of the Government of Madras?

The Hon'ble MR. COTTON replied:—

“The Government has not received any information on the subject of the newspaper statement referred to, and it is not known whether it is correct or not. In any case the Lieutenant-Governor is unable to reconsider the decision which was communicated to the Hon'ble Member in August last, that Natives of India will not be appointed to the higher offices in the Bengal Police by competitive examination, but will as a rule be promoted by selection from among Inspectors of Police.

“The orders of the Government of India approving and confirming the decision of the Government of Bengal have lately been transmitted to the Committee of the Indian Association, who submitted a memorial on the subject, and those orders enunciate the policy by which the Government of Bengal is guided in the selection of Natives of India for appointment to the higher ranks of the Police.”

## PROCEEDINGS IN THE CASE OF CHUNDER KISHORE MUNSHI.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to the following remarks made by the High Court in connection with certain proceedings on the part of Mr. Beatson-Bell, late Subdivisional Officer of Serajganj, in the case of Chunder Kishore Munshi:—

“We cannot conclude this judgment without expressing our unqualified disapproval of the high-handed and overbearing conduct of Mr. Beatson-Bell in this matter as disclosed in his own evidence; his novel but apparently illegal method of replenishing the Lady Dufferin Fund is not before us and we say nothing about it. A copy of this judgment will be forwarded to the Local Government.”

Will the Government state what notice it has taken of the remarks of the High Court, and in what way it has marked its disapproval of these proceedings on the part of Mr. Beatson-Bell?

The Hon'ble MR. COTTON replied:—

“The Lieutenant-Governor caused a copy of the judgment of the High Court to be sent to Mr. Bell; but, after a careful consideration of the whole case, he came to the conclusion that it was not necessary for him further to interfere in the matter.”

## ASSAULT BY MAGISTRATE OF KHULNA.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to the case of assault instituted by one Keshab Lal Mitter against Mr. Beatson-Bell, late Magistrate of Khulna? Whether the Government is aware that the charge was withdrawn on 'an apology being tendered by Mr. Beatson-Bell, who practically admitted the charge?' Does the Government approve of these proceedings on the part of Mr. Beatson-Bell? If not, what action has the Government taken to mark its disapproval of Mr. Beatson-Bell's conduct in the matter?

The Hon'ble MR. COTTON replied:—

"The attention of Government was drawn to the case referred to when it occurred. If the complainant had confined himself to memorialising the Lieutenant-Governor for redress, suitable notice would have been taken of Mr. Bell's conduct. As, however, Keshab Lal Mitter preferred a complaint before the Criminal Courts, the Lieutenant-Governor considered it sufficient to leave the vindication of justice in the hands of the Courts before which the case was brought."

## CONDUCT OF DEPUTY MAGISTRATE OF KHULNA.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to the proceedings of Babu Satish Chunder Bose, late Deputy Magistrate of Khulna, who summarily dismissed under section 95 of the Penal Code the case of assault instituted by one Keshab Lal Mitter against Mr. Beatson-Bell, although the substantial truth of the charge was subsequently admitted by Mr. Beatson-Bell? Is the Government aware that the said Deputy Magistrate put off under various excuses the granting of copies of the proceedings asked for by the complainant, for which expedition fee had been paid, and finally issued notice upon the complainant to show cause why he should not be prosecuted under section 211 of the Indian Penal Code? Is the Government aware that these proceedings have been condemned by the High Court? And is it the case that, notwithstanding these proceedings, the Deputy Magistrate was soon after promoted. If not, what action has the Government taken to mark its disapproval of his conduct?

The Hon'ble MR. COTTON replied:—

"The proceedings of the Deputy Magistrate referred to came under the consideration of Government. This officer was formerly Settlement Officer of Midnapore, and, as a consequence of hard work and exposure in that district, it was reported in April last that his brain was affected, and the Civil Surgeon then certified that he was suffering from cerebral derangement. He was accordingly allowed the privilege leave of two months and 21 days to which he was entitled, with effect from the 1st May last. While on leave he was transferred to Khulna, and he joined that district on the 26th July. The action taken by him in dealing with the complaint preferred by Keshab Lal Mitter on the 30th July was, in the Lieutenant-Governor's opinion, inexplicable, except on the hypothesis that his mind had not regained its equilibrium, and that he was still unfit to discharge properly the duties of a Deputy Magistrate. He was at once relieved of his duties, and called on to take further leave for such period as might afford him a fuller opportunity of recovering his health, and it was directed that he should not be allowed to rejoin until he was certified by a Presidency Surgeon in Calcutta to be quite recovered.

"Babu Satish Chunder Bose is an officer who has hitherto borne a high reputation, and as his name happened to stand, according to seniority, first for promotion from the sixth to the fifth grade of Deputy Magistrates, His Honour saw no sufficient reason for passing him over when a vacancy occurred, and he was accordingly promoted in his turn on the 14th September last."

## EMPLOYMENTS OF MUHAMMADANS IN BURDWAN DIVISION.

The Hon'ble MAULVI ABDUL JUBBAR KHAN BAHADUR asked—

Whether the Government is aware that the remarks of Mr. R. C. Dutt, the Officiating Commissioner of the Burdwan Division, that “in fact the Muhammadans in this Division are mostly cultivators, labourers and traders,” under the heading “Employment of Muhammadans,” paragraph 5, section 118 of the General Administration Report of the Burdwan Division for 1893-94, published in the supplement to the *Calcutta Gazette* of the 10th October last, do not accurately represent the social condition of the Muhammadans of that Division, and whether in justice to the Muhammadans of the Burdwan Division, the Government will ascertain the fact that in Bengal the Burdwan Division contains the largest number of respectable Muhammadan families for whose maintenance the Mogul Government granted Aima lands, which exist nowhere except in the Burdwan Division and in the district of Murshidabad, and that 50 years ago the Muhammadans of that Division were not only largely employed in offices under the British Government, but held in Bengal more than a moiety of the posts of Principal Sadar Ameens, which were the highest judicial appointments then open to the natives?

The Hon'ble MR. DUTT replied:—

“The remarks quoted by the Hon'ble Member occur at the end of paragraph 118 of the Commissioner's Divisional Report, and are based on the remarks of District Officers quoted in the preceding portions of the same paragraph, and assert a fact, which is undoubtedly correct, that most of the Muhammadan population of the Burdwan Division live by cultivation, trade and labour. This fact is not inconsistent with what is stated by the Hon'ble Member, viz., that the Burdwan Division contains a large, possibly the largest, number of respectable Muhammadan families of high social standing, holding Aima lands from olden times. This is well known to Government, and it is not necessary therefore to ascertain it by further enquiry. Nor does the Government think it necessary to ascertain what percentage of appointments under the British Government, and of the posts of Sadar Ameens, was held by the Muhammadans of this Division 50 years ago. Government has always desired that the Muhammadans of this and other divisions should qualify themselves by education for obtaining their fair share of appointments in all offices, and the Hon'ble Member will find from paragraph 108 of the Burdwan Divisional Report that the Commissioner and the District Magistrates under him, are carefully noting the progress of education among Muhammadans from year to year.”

## STATEMENT OF THE COURSE OF LEGISLATION.

THE HON'BLE the PRESIDENT said:—“When the Council closed its Session in the last autumn, there were three Bills before it which were referred to Select Committees. Those Bills were the amendment of the Revenue Sale Law Act, the amendment of the Public Demands Recovery Act, and a Bill to facilitate Sanitary Drainage.

“In regard to the Revenue Sale Law's amendment, I have to announce to the Council that the Government has resolved to withdraw that Bill from its consideration. It will perhaps be remembered that the main principle which underlay that Bill arose out of a suggestion which the High Court made in the course of the discussion of the amendment which originated in Mr. John Beames' time, and which had been pending for many years. It was to the effect that at present a proprietor whose estate is sold for arrears of revenue could make an objection to the Collector, then appeal to the Commissioner and then to the Board, and then start again on a new series of litigation by taking his case first to the Munsif and then appealing to the Subordinate Judge, or to the Judge of the District, and then again to the High Court. It was pointed out that this multiplicity of litigation was an evil in itself, and a state of things which should be avoided, and the High Court were ready to

agree that all reference to the ordinary Civil Courts should be barred if we could assure them that the notices given to the proprietors, that their estates would be sold in default, could be made quite certain to reach them, so that no complaint could be made that their estates had been sold without their knowledge and at prices extremely incommensurate with their values. That suggestion seemed to me an extremely reasonable one, and one that it was highly desirable to adopt, and we set ourselves to work to frame a series of provisions to secure that the notice should be served under the conditions and in the manner suggested by the High Court, so as to ensure absolute certainty that the notices would reach their destination: When the Bill was referred to a Select Committee, it was circulated to a large number of officials and non-officials, and the criticisms which we have received from those authorities have been of a very destructive character. It has been shown satisfactorily that the attempt made in the Bill to provide for an efficient service of notice would be in the last degree laborious and difficult, and could not be declared to be absolutely certain of success, and we have received advice from all quarters to abandon that portion of the Bill. This seemed to me to be the most important part of the Bill, and if it was abandoned, the result would be that there would be little left of any great importance which could be laid before the Council as a Bill which was worthy of their consideration. The criticisms which were received attacked also some other suggestions of amendment, and these also seemed to have considerable weight. I have decided, therefore, that it would be better to withdraw the Bill.

"It will be a matter for further consideration whether at a later date the Government should redraft such portions of the Bill as are not open to similar criticism, and which seem important enough to deserve the attention of the Legislature, and if so, a fresh Bill may possibly be laid before you; but there is nothing definitely settled at the present moment.

The other two Bills—the Drainage and the Certificate Act Amendment Bills—are before Select Committees of the Council, and I trust they will now be able to resume their sittings and carry on the consideration of these measures.

"In the present Session we have to introduce several Bills, one of which is of considerable importance. It is a Bill to provide for the maintenance of a record of rights in districts in which there is a cadastral survey, and it is a Bill which will presently be introduced by the Hon'ble MR. BUCKLAND. That Bill we propose both to introduce and to read in Council to-day, and at a future meeting to refer it to a Select Committee.

We also propose to introduce to-day a Bill to amend the Suburban Police Act and the Calcutta Police Act, so as to penalise the offence of improper solicitation on the part of public women or their touts, and with this Bill also I trust two steps will be taken to-day, and that the Select Committee stage will be reached at the next meeting of the Council.

"There are a few other Bills which are not yet quite ready to be presented, but which I hope will be brought under consideration during the present Session. One is a Bill to introduce the Bengal Tenancy Act, with some slight alterations, into Chota Nagpur, one of its provisions being to regulate the procedure for the commutation of services which are still largely rendered there in lieu of the payment of rent. We consider it desirable that these services should be commuted. We have been in communication with the Government of India on this subject for a long time. Sanction for the introduction of the Bill has not yet been received, but I trust it will not now be long delayed.

"There is another Bill, also belonging to the Revenue Department, for an amendment of the law of partition in regard to which there have been discussions going on for a long time, but which I trust we shall be able to introduce during this Session.

"A small Bill to provide for the segregation of lepers will also be laid before the Council at the next meeting. We have just received intimation that the Government of India has sanctioned the introduction of this Bill, but we have not yet received an official communication on the subject, and we have therefore postponed its introduction to the next meeting.

"There are two other little Bills, one of which is to facilitate and regulate the establishment of works connected with the use of electricity for the lighting

of Calcutta and for other purposes, and the other is a Bill to make some small amendments in the Calcutta Port Act, both of which have been hanging fire for some time. These Bills do not involve any matters of great importance, and I hope we shall receive sanction to introduce them before the close of the Session.

"I propose on the present occasion to suggest that, after introducing in the two Bills, which will be introduced and read in Council to-day, we shall adjourn for about a month to allow time for these Bills to be considered by the public, and to enable us to receive any suggestions and criticisms that may be offered, and when we next meet we shall put these Bills forward a stage, and take such steps as it may be possible to take with regard to the Drainage Bill and the Certificate Act Amendment Bill, according to the progress which the Select Committees may make during the interval."

### THE LAND RECORDS MAINTENANCE BILL.

The Hon'ble Mr. BUCKLAND moved for leave to introduce a Bill to provide for the Maintenance of Records of Rights in Bengal, and for the recovery of the cost of Cadastral Surveys and Settlements. He said:—"In moving for leave, Sir, I may mention that by the Lieutenant-Governor's orders and under Rule 34 of the Rules for the Conduct of the Business of this Council, this Bill has already been published in the *Calcutta Gazette* of last Wednesday. It has been possible therefore to place the Bill at once in the hands of Hon'ble Members of Council, who will find, in the Statement of Objects and Reasons attached thereto, a brief description of the aims and intentions of Government. I should perhaps at this point make a few observations on the history of this measure, and I will make them as briefly as possible.

"It is well known to the Council that the survey and settlement of North Bihar has been for some time in progress, and that other large settlements are also being conducted in other parts of the country. In the discussions that have taken place regarding field surveys and the framing of records of rights ascertained at settlements, there has been a general consensus of opinion that an effort should be made to maintain the records which are prepared with great labour and expense, corrected in such a manner that they may not become obsolete, but may be readily available for ascertaining titles and interests in land, for the prevention of litigation, or for its despatch when undertaken. I will not pause to prove elaborately this consensus of opinion, but I will content myself with one quotation from the Secretary of State's despatch of 5th July, 1894, in which the following words occurred:—

'It has been regarded by the Home Government and by the Government of India as essential that the village record of rights, when once prepared by the Cadastral Survey, should be maintained and periodically corrected up to date.'

"It may also be within the knowledge of the Council that various schemes have from time to time been put forward for this purpose. Those who are curious in such matters will find some account of the discussion on the subject recorded in paragraphs 96 and 99 of the Summary of the Bengal Administration Report for the year 1893-94. It is only necessary for me to say here that the discussion was closed by the Secretary of State's despatch of the 5th July, 1894 already mentioned, which was published in the Supplement of the *Calcutta Gazette* of the 3rd of October, 1894. The decision then arrived at by the Secretary of State was that a Bill should be introduced into the Legislature for the maintenance of the records of rights in Bengal, and that the scheme of the Bill should provide for increasing the number of Rural Registrars, and for compelling, by various disabilities, landlords and the tenants of various degrees to register all changes of rights and occupancies as they occur. The Secretary of State approved also of the adoption of such sanctions and safeguards as might be considered expedient, but without the imposition of any fresh tax beyond a moderate fee on registrations. The Bill now before the Council has been prepared in conformity with this authority of the Secretary of State. It has been prepared with the assistance of the Board of Revenue and some of the most experienced Settlement Officers of the province, and the sanction of the Government of India has been given to its introduction into this Council in its present form.

"Presuming that Hon'ble Members have been able to glance over the brief Statement of Objects and Reasons, I will now proceed to give a more

detailed account of its provisions. The Bill is to apply only to the districts or parts of districts in which survey-settlements have been carried out under the Tenancy Act, or any other law, to which the Lieutenant-Governor may extend its operation. The Record of Rights has been defined to mean the documents called the khewat, which records proprietary interests, and the khatian, which records the tenants' interests. The Bill, it will be observed, is divided into three parts, of which Part I—Registration of Mutations, and Part III—Miscellaneous, contain the main provisions required for the Maintenance of Records of Rights. It is intended that the Registrars and Sub-Registrars appointed under the Indian Registration Act shall also be Registrars of Mutations of the proprietary and tenants' rights indicated in the Bill, and shall keep such registers as may be prescribed. In one of these registers all changes affecting the entries in the record of proprietary rights, and in another all changes affecting the record of tenants' rights, are to be entered by the Registrars of Mutations under certain procedure.

“As the Sub-Registrars are necessarily stationary and not peripatetic officers, it is necessary to secure that the mutations which they have to register shall reach them at their offices. It has therefore been provided that information of mutations having taken place shall reach these officers in the following manner. All persons acquiring proprietary rights are to be allowed their option of giving notice of the mutation to the Sub Registrar, instead of applying to the Collector under the provisions of the Land Registration Act for registration of their names and interests: the Sub-Registrar is to forward the notice to the Collector, and when the Collector has ordered any mutation of names under the Land Registration Act, and has communicated the fact of such mutation to the Sub-Registrar, the latter is to record it in one of his Registers of Mutations.

“All persons transferring their rights as tenuro-holders, raiyats at fixed rates, and as occupancy raiyats, and all persons claiming to have acquired the status of such tenants, are to give notice to the Sub-Registrars; and such notice is to be treated as a document under the Indian Registration Act. The Sub-Registrar is to notify the fact of such reported transfer to the landlord, and to record the fact of the transfer, and of the landlord's consent or non-consent thereto, in the other of his two Registers of Mutations.

“It might be hoped that these provisions would provide for the registration of all changes of proprietary and tenants' interests; but it is considered desirable, as a matter of precaution, to provide other means of giving completeness to the scheme. For this reason power is taken to direct holders of estates or tenures to file in the Sub-Registrar's office periodical statements of changes in the record of rights in each village. I notice that the Bill as drawn contains no penalty for failure on the part of the holder of the estate or tenure to comply with this direction, and it will be necessary to insert one. Moreover, all Sub-Registrars to whom, when acting under the Indian Registration Act, instruments or memoranda of transfers of proprietary or tenant rights in land are presented or forwarded for registration under the provisions of that Act, will be required to proceed to take steps as if the above mentioned notices of mutation had been made to them as Registrars of Mutations, and to have entries made in their Registers of Mutations. Also, the Civil Courts are to be required to keep the Sub-Registrars informed of every decision affecting proprietary and tenant rights in land.

“Bearing in mind the want of complete success which has attended the working of the Land Registration Act in the case of proprietary titles, it would perhaps be too much to expect that the very considerable extension of registration work now aimed at could be completely successful. On the other hand, it has been brought to my notice by a high authority on the subject that, in one of the Bihar districts at least, although the landlords have not largely availed themselves of the provisions of the Land Registration Act in the past, the days when the automatic sanction of that Act was a failure are passing away. I am informed that there is no such apathy among the transferees of tenures; and that there is not a rent case in the district where this special ground (of non-registration of title) is not invariably taken, so that the pettiest shareholders are beginning to register their names with the Collector before they attempt to sue. To ensure then that the provisions of the Bill which require the registration of mutations shall be as fully observed as it is possible

to ensure anything by foresight, some sections, numbered 15 and 16 in the Bill have been inserted, which will entail on the parties what may be called self-acting disabilities, as well as direct penalties for failure to give notices of mutation either of proprietary or tenant rights in land. The principle of these disabilities in the case of proprietary rights is not new, as it is borrowed from the Land Registration Act, to which I have referred, and it will now be extended to tenants' rights.

"The Miscellaneous part of the Bill contains provisions of the usual character, namely, for appeals and for taking power to make and alter rules, with which I need not trouble the Council further at this moment.

"Part II of the Bill refers to a different subject, which is only brought in here because legislation is now being undertaken. I have hitherto been dealing with the question of maintaining the records of settlements. Part II, as Hon'ble Members will see, relates to the recovery of costs of a survey-settlement, *i.e.*, of a survey and preparation of a record of rights. The principle that the expenses of survey and settlement operations shall be defrayed by the landlords and tenants of lands in the local area under survey-settlement in such proportions as the Local Government, having regard to all the circumstances of each case, may determine, is now the law, as contained in section 114 of the Tenancy Act of 1885. Such expenses have already been recovered in several cases under orders of apportionment issued by the Local Government. In paragraph 74 of his minute of the 20th of September, 1893, the Hon'ble Sir Antony MacDonnell stated that the provisions of this section 114 have been found in practice to be in some cases defective. He mentioned certain conditions and objections to the method now provided by law as indicating the desirability of devising some means for improving the method of recovery of the costs of a survey and settlement by a transitory cess. The idea which then found favour was that a temporary cess for this purpose should be levied after the manner of the Roads and Public Works cess, which has long been familiar in Bengal. But when the Secretary of State's orders were received with regard to the apportionment of the expenditure in the North Bihar Survey in certain definite shares between the State, the zamindars, and the raiyats, it soon became apparent that it would be impossible to maintain any close approximation to the apportionment so sanctioned if the method of the Roads and Public Works cess was observed. That method has, therefore, with the concurrence of the Board of Revenue, and with the cognizance of the Government of India, not been reproduced in the present Bill. It is now proposed to provide a system supplementary to section 114 for facilitating the recovery of the cost of the survey-settlement by a temporary cess, to be levied rateably per acre from proprietors and tenants as well as owners and occupiers of revenue-free and rent-free tenures and holdings. It will be open to all parties to pay up their shares of the cost either in one payment or by instalments. As regards proprietors, a promise was made to them in 1892 that, when the cost imposed on any single estate is large, payment should be facilitated by taking it in instalments, and this condition will be carried out by the Bill. As regards tenants, their share of the cost is small, and it is conceived that they will usually pay when the extract from the khatian which contains the records of their rights is presented to them: if not they also will be allowed to pay in instalments, but in this case they will have to pay an additional sum of 20 per cent., which will be retained by the proprietors as cost of collection. Under the Road Cess Act the proprietors receive nothing for the expense and risk they incur in collecting their share of the cess from the tenants, and the present provision has been made to prevent objection being taken to the imposition of this duty on the landlords as being an additional burden on them from which they derive no advantage. But it may be safely anticipated that the burden will not be a serious one in any individual case.

"At the beginning of my remarks, I stated that the Bill has been published in the Gazette. As it is a short Bill, and hon'ble members have presumably been able to make themselves generally acquainted with the intentions of Government, I trust that the motion which now stands in my name will be carried, so that the Bill may be read in Council to-day. It is not proposed to proceed further with it in Council for some weeks. Meanwhile, the Bill will be circulated to certain Commissioners and District Officers in the parts of the

country where extensive settlement operations are in progress, and the leading Associations of the country, which are specially interested in survey and settlement matters, will be further consulted without delay. It is hoped that their reports will be received in the course of a month, and that the Bill may then be referred to a Select Committee.

"The Hon'ble MR. BUCKLAND introduced the Bill to provide for the maintenance of records of rights in Bengal, and for the recovery of the cost of cadastral surveys and settlements."

The Hon'ble MAHARAJA SIR LUCHMESSUR SINGH BAHADUR of Darbhanga said:—"I wish to reserve my remarks on this Bill until such time as a motion is made to refer it to a Select Committee, but certain remarks have fallen from the Hon'ble Member in charge of the Bill, in consequence of which I desire to say a few words.

"The Hon'ble Member said that under the Road Cess Act the proprietors receive nothing for the expense and risk they incur in collecting their share of the cess from the tenants, and the present provision has been made to prevent objection being taken to the imposition of this duty on the landlord as being an additional burden on them from which they derive no advantage. But it may be safely anticipated that the burden will not be a serious one in any individual case. But I think that in many cases, although you are allowing him 20 per cent. for cost of collection, the zamindar will suffer very considerably if you make him, against his will, liable for arrears unrecoverable from raiyats. I know of one case in which a zamindar has for a long time been paying the Government revenue and cesses punctually, though tenants default and disappear. Only the other day he was unable to pay a small portion of the road cess that was due from some of his raiyats, and his property was sold in consequence. The case is now being fought out in the Board of Revenue. For the last two years he has been kept out of possession of his property. I consider that a very serious case for that particular landlord. I think that if this record of rights is really so beneficial to the tenants as it is expected, the raiyats will of their own accord come forward to pay their portion, and I think zamindars should not be made liable for the collections, except in those cases in which they themselves specially desire it. It is true that according to the Road Cess Act, zamindars are liable for the payment of their raiyats' share of the road cess, but because the sin has been committed once, it is no reason why it should be committed a second time. I do not think one man should be made liable for the debts of another person. Then, as regards the last paragraph of the Hon'ble Member's speech, I see that it is proposed to ask the opinions of certain Commissioners and District Officers, as well as Associations of the country, and I think we ought to be thankful to the Government for having given us the opportunity of laying our views before them on the present Bill, but if I might do so, I would suggest that this Council should also ask for the opinions of District Judges and the High Court Judges. I had the honour of serving on the Select Committee of the Bengal Tenancy Act, and I can assure you that we derived very great assistance from the opinions of the District Judges and the Judges of the High Court. In conclusion, I again thank the Government for allowing us one month's time to put forward our opinions. When the matter comes to the Select Committee stage, I shall be in a position to express an opinion from the zamindar's point of view."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I do not, at the present stage, desire to offer any opposition to this Bill or to discuss at any length the principles and details relating to the same. I may be allowed to state that I have seen the Bill for the first time in the Council Chamber to-day, and I have therefore not been able to familiarise myself with the provisions it contains, and I know nothing at present with certainty and precision regarding a subject of such vast importance except such general information as I have been able to glean casually from the public press. I have not seen the Bill in the *Calcutta Gazette*, and I am not therefore in a position to make any useful observations in regard to the same. I submit that a sufficiently long period should be fixed in order that public criticism might be obtained, and it

appears to me that one month might be sufficient for that purpose. As regards the persons from whom criticisms should be invited, I perfectly agree with THE HON'BLE MAHARAJA SIR LUCHMESSUR SINGH OF DARBHANGA that District Judges and the Hon'ble Judges of the High Court should also be requested to submit their opinions on the subject of this Bill. I hope there will be no objection to this course being adopted."

The Hon'ble MAHARAJA RAVANESHWAR PRASAD SINGH BAHADUR of Gidhour said:—"I beg to support the proposal made by the Hon'ble MAHARAJA SIR LUCHMESSUR SINGH OF DARBHANGA. In my humble opinion an important measure like the cadastral survey and the maintenance of the record of rights which concerns a large body of land-holders and tenants should not be rushed through. The opinion of the different land-holders' associations and members of the Judicial Service and of the Bar should be taken before the Bill is referred to a Select Committee. This, I humbly submit, appears to me to be the right course to adopt in regard to a measure of such vital importance as the Bill before us."

The HON'BLE MR. BUCKLAND said:—"I think I understood the Hon'ble MAHARAJA SIR LUCHMESSUR SINGH OF DARBHANGA to say that he offered no serious opposition to this Bill being introduced, and that he reserved his remarks until the Bill reached a further stage and was referred to a Select Committee. It is not therefore necessary for me to detain the Council by replying on this occasion to what the Hon'ble Member has said."

The HON'BLE the PRESIDENT in closing the debate said:—"On the part of the Government, I shall be very happy to accept the suggestion which has been made by my hon'ble friends who have spoken that District Judges and the High Court should be included in the number of those who should be consulted on the provisions of this Bill. I should explain that what is referred to here is a circular to be sent out by the Government, not by this Council. It will be in the option of the Council or of the Select Committee to consult any one they like; but the idea in our minds was that we should save a certain amount of trouble and expedite business by circulating the Bill and asking opinions beforehand, so as, if possible, to get the opinions before a Select Committee is appointed and begins its sittings. But it will be entirely in the power of the Select Committee when they begin to sit to take any steps they wish and to call for further opinions. Nothing done by the Government at this stage can bind the Committee or check their action in this matter.

"With reference to what fell from the Hon'ble MAHARAJA SIR LUCHMESSUR SINGH about the incidence of the cost of the cess upon the tenants, I agree with him, in the hope that in almost all cases the cess which falls on the tenants will be paid by the tenants themselves immediately when the extract from the register, which is the record of their rights—the *khatian* as it is called, is delivered to them. In private settlements, and in settlements of wards' estates, it has been found as a rule that payments have been made in this way. But there are of course cases in which payments have been refused or deferred, and it is to meet such cases that the provision which has been referred to by the Maharaja has been made, namely, that the cess should be recovered through the landlords, who would retain a percentage of 20 per cent. to cover the risk of recovering the cess from their tenants and the expenses consequent thereon. When it is remembered that the average cost of a survey-settlement is expected to be about 8 annas, and I think nowhere, even under the difficult circumstances in the northern parts of Bihar and Bhagalpur, does it exceed 10 annas per acre, and that the tenants' share of that is  $\frac{1}{10}$ ths, or  $2\frac{1}{2}$  annas— $2\frac{1}{2}$  annas being an extremely small proportion of the average rent which in Bihar we take to be from Rs. 3 to Rs. 4 per acre—it does not seem to me that the addition of  $2\frac{1}{2}$  annas per acre upon a rental of from Rs. 3 to Rs. 4 per acre is likely to prove a material source of distress to zamindars, or a sum which is not likely to be recovered on the rare occasions referred to by the Maharaja, when tenants default or disappear. It seems to me that the trouble and risk would be covered by the 20 per cent. commission which we have allowed.

I should like to make one further remark in addition to what was said by the Hon'ble Mr. BUCKLAND in introducing the Bill. I wish to point out that in framing this Bill we have attempted to achieve an end which has been long sought for, and which to my own knowledge has been aimed at in the provinces of Northern India, but which has not been attained hitherto. Under the present system, when mutation of proprietary rights occurs either by sale or mortgage, or any transfer which involves a deed, the successors have to undergo two different operations. They have first to go to the Registry Office to obtain registration by depositing their deeds; they then go to the Collector's office to obtain mutation of names, which is ordinarily known as *dakhil kharij*. It has always seemed to me, and the point was mentioned long ago in one of Sir Henry Maine's minutes, that an undue amount of trouble is imposed upon the parties by compelling them to carry out these two different operations in two different places, and I think we may claim to have conferred a benefit upon the proprietary body by the proposal which this Bill contains, namely, that by one and the same operation we carry out the two results. They will now be able to go with their deeds to the Sub-Registrar—a course which will *ipso facto* have the effect which, under the former procedure, required two operations, namely, a second journey to the Collector's office to effect mutation. At one and the same time the registration of the deed will be accomplished and the mutation of names recorded in the Collector's office, and thus a considerable saving in trouble and expense will be effected."

The Motion was put and agreed to.

The Hon'ble Mr. BUCKLAND applied to the President to suspend the Rules for the Conduct of Business to enable him to introduce the Bill and to move that it be read in Council.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If I am in order, I may be permitted to enquire why the Rules of Business should be suspended in this case, and in fact it is proposed to suspend them also in connection with another Bill on the agenda to-day. The same procedure was followed with regard to two or three Bills last year. The Council has got a body of rules, and they ought not to be departed from, except in a case of extreme urgency, and up to this time the ground has not been made out for a case of extreme urgency as far as the Bill now before the Council is concerned."

The Hon'ble the PRESIDENT said:—"The Rules of the Council provide that the President, for sufficient reason, whether on the application of a member or otherwise, may suspend any of the rules for a particular purpose.

"The object of suspending the Rules on this occasion is to avoid the necessity of calling the Council together on Saturday next simply to forward this Bill by a single stage. It appears to me that no sufficient object will be gained by putting hon'ble members to this inconvenience. I declare the rules suspended."

The Hon'ble Mr. BUCKLAND then introduced the Bill, and moved that it be read in Council.

The Motion was put and agreed to.

The Bill was read accordingly.

#### PUBLIC DEMANDS RECOVERY ACT, 1880, AMENDMENT BILL.

The Hon'ble Mr. BUCKLAND moved that the Hon'ble Mr. WILKINS be added to the Select Committee on the Bill to amend the Public Demands Recovery Act, 1880, in the place of the Hon'ble Mr. Allen, retired.

The Motion was put and agreed to.

## CALCUTTA AND SUBURBAN POLICE ACTS, 1866, AMENDMENT BILL.

The Hon'ble SIR JOHN LAMBERT moved for leave to introduce a Bill to further amend the Suburban Police Act, 1866, and the Calcutta Police Act, 1866. He said:—"The amending Bill has been rendered necessary on account of certain representations which were made to the Government by persons of influence, both natives and Europeans—persons to whose influence and to whose representations the Government have considered it right to attach considerable weight. They approached the Government on the ground that in many parts of the town considerable annoyance is caused to residents and to passers-by by solicitations to immorality made in the public streets. Speaking for myself I am not prepared to say that the evil complained of has reached any very considerable growth in the Town of Calcutta, when regard is had to the area and the population of the Town of Calcutta and the Suburbs. But still it is a matter of notoriety that in certain parts of the town the annoyance complained of does exist, and the Government are anxious that relief should be given by the grant of powers to the Police which they do not now possess. The local Acts to which I have referred, and which regulate the powers of the Town and Suburban Police, contain no provision enabling the Police to deal effectually with offences of the nature to which I have drawn attention; therefore the only course which is open to the public or to the Police is to proceed by summons, and to deal with these matters as public nuisances, and to prosecute under the provisions of the Penal Code. But in such cases the Courts require independent evidence, and I think the Council will agree with me in considering that respectable persons who have a substantial grievance of this sort should not be put to the annoyance and trouble of appearing in open Court and making a public statement of the facts which constitute the grievance of which they complain. This, I think, is the view which the Government take, and it is on these grounds that it is proposed to vest the Police with powers which they do not now possess.

"Turning to the Bill, which is in the hands of hon'ble members, it will be seen that it is proposed to amend the Suburban Police Act as well as the Calcutta Police Act. But if this is done, it is not proposed to set the Police in motion indiscriminately in all parts of the Town and Suburbs, but only in those localities where complaint has been made and where it is known that a real and substantial grievance exists. The Council will also see that safeguards have been provided in the Bill by enacting that only officers above the rank of constable and other selected officers will be permitted to exercise the new powers, and further that summary arrest is prohibited whenever the name and address of the offender are known or can be at once ascertained. Turning to the section which provides punishment, it cannot, I think, be contended that the punishment provided in the Bill is more severe than is necessary to act as a deterrent in the majority of cases which will come before the Courts. The offenders who have to be repressed are chiefly male touts who act on behalf of women, and I think it cannot be said that such punishment will be regarded as excessive in the case of such persons. As regards women who cause annoyance by open solicitation, I think their number is not very great, and I am of opinion that as soon as it is known that summary powers have been granted to the Police, the cause of complaint in this direction will be very largely diminished. With these remarks I move for permission to introduce a Bill to amend the Suburban Police Act, 1866, and the Calcutta Police Act, 1866."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I for my part support this motion most unhesitatingly, and if I am at liberty to say so, the Hon'ble Sir John Lambert has placed the general public under a deep debt of gratitude by introducing this measure. This Bill is a step in the right direction, and I have no criticism to make on the principle of the Bill. The only question which may be raised is whether it has gone far enough to remedy the evil which it is the object of the Bill to prevent. With regard to the powers proposed to be conferred upon the Police, it is not necessary to offer any

opinion at present, and therefore I reserve my remarks to the next meeting of the Council.

The Motion was put and agreed to.

The Hon'ble SIR JOHN LAMBERT applied to the President to suspend the Rules of Business to enable him to introduce the Bill, and to move that it be read in Council.

The Hon'ble the President having declared the Rules suspended—

The Hon'ble SIR JOHN LAMBERT introduced the Bill, and moved that it be read in Council.

The Motion was put and agreed to.

The Bill was read accordingly.

#### BENGAL SANITARY DRAINAGE BILL.

The Hon'ble MR. LYALL moved that the Hon'ble MR. R. C. DUTT be added to the Select Committee on the Bill to facilitate the construction of drainage works for improving the sanitary condition of local areas.

The Motion was put and agreed to.

The Council adjourned *sine die*.

CALCUTTA ;  
The 29th January, 1895. }

GORDON LEITH,  
*Assistant Secretary to the Govt. of Bengal,  
Legislative Department.*

## WEATHER AND CROP REPORT.

For the week ending 28th January 1895.

**Burdwan.**—Rainfall at Sadar 1·20, Raniganj 0·75, Kalna 0·63, Katwa 0·19. Weather seasonable. Prospects of *rabi* and sugarcane good. Fodder and water sufficient. Price of common rice varies from 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather cool. Harvesting of winter rice finished. *Rabi* looks well. *Boro* being sown. Fodder and water sufficient. Common rice sells from 15 to 21 seers per rupee.

**24-Parganas.**—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of *aman* on low-lands going on. Gathering of *kalai* continues. Sugarcane being pressed. Condition of cattle good. Fodder and water sufficient. Rice sells at—

			Srs.	Ch.	
Sadar	...	...	11½ to 13	0	} per rupee.
Barasat	...	...	16	0	
Basirhat	...	...	19	3	
Diamond Harbour	...	...	15	0	

**Murshidabad.**—Rainfall at Sadar 0·15. Weather cold. Prospects of *rabi* crops and indigo favourable. Fodder sufficient. Price of rice 16 seers per rupee.

**Khulna.**—Rainfall at Sadar 0·11, Bagerhat 0·05, Satkhira 0·37. Weather seasonable. Harvesting of *aman* still continues; outturn estimated at 16 annas. Fodder and water sufficient. Common rice sells from 18 to 22 seers per rupee.

**Dinajpur.**—Average rainfall 0·11. Weather very cold. *Bhadoi* cultivation has begun. No outbreak of any disease among the cattle, and no complaint of fodder and water.

**Rangpur.**—Rainfall nil. Weather seasonable. Harvesting of mustard going on. Land under preparation for *bhadoi* crop. Price of common rice varies from 9 to 13 seers per rupee.

**Pabna.**—Rainfall nil. Weather clear and cool. Prospects of crops good. Harvesting of *aman* nearly over. Fodder and water-supply sufficient. Common rice selling at 16 seers per rupee.

**Dacca.**—Rainfall nil. Weather seasonable. *Rabi* crops thriving. Mustard being harvested. Cultivation of *boro* commenced. Price of common rice varies from 12 to 20 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Rainfall nil. Weather seasonable. *Aman* harvest over; outturn 17 annas. State and prospects of *rabi* crops fair. Prices stationary. Water and fodder sufficient.

**Patna.**—Rainfall at Sadar 0·10. Prospects of *rabi* and poppy much improved by the rain. Prices of common rice :—

			Srs.	
Sadar	...	...	18	} per rupee.
Barh	...	...	17½	
Dinapore	...	...	17½	

**Gaya.**—Rainfall at Sadar 0·20. Standing crops doing well. Prices about normal. Fodder and water sufficient.

**Champanan.**—Rainfall at Motihari 0·09. Weather cold. Prospects of *rabi* and poppy fair. Common rice selling at 16 seers per rupee. Fodder and water sufficient.

**Darbhanga.**—Rainfall at Sadar 0·3. Late rain greatly benefited *rabi* except mustard and peas in flower. Poppy doing well. Fodder for cattle sufficient. Prices stationary.

**Bhagalpur.**—Harvesting of paddy completed. Prospects of *rabi* good. Fodder and water sufficient.

**Purnea.**—Rainfall at Sadar 0·04. Weather seasonable. Prospects good. Harvesting of *aghani* nearly over. *Rabi* crop promises well. Coarse rice sells from 18 to 20 seers per rupee. Fodder and water sufficient.

**Cuttack.**—Rainfall nil. Weather seasonable. *Sarad* rice harvest not yet over. *Rabi* harvest continues. Cultivation of *dhua* rice in progress. Price of common rice varies from 11 seers 13 chitaks to 25 seers per rupee. Condition of cattle good. Fodder sufficient.

**Hazaribagh.**—Weather cold and bright. *Rabi* prospects good. Poppy doing well, but backward. Fodder and water sufficient. Common rice selling at from 15 to 20 seers per rupee.

**General Summary.**—There was rain in Bihar and in parts of western and central Bengal during the week. The general agricultural prospects are favourable. The harvesting of winter rice is over except on low lands in a few districts, and a good outturn has been generally obtained. The *rabi* and poppy crops are doing well, but the latter is backward in Hazaribagh. Sugarcane is being pressed in some districts. The sowing of spring rice is in progress, and the preparation of lands for the *bhudo* crop has begun in North Bengal. No cattle-disease is reported. The price of common rice continues generally steady and normal.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 29th January 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

\*Mean of 5 days. †Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the readings during the same period for the The humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 26th of January 1895.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 26TH OF JANUARY 1895.

FINE settled weather of rather strongly developed north-east monsoon character prevailed over Bengal at the close of the previous week, and these conditions continued at the beginning of the week under review. On the 20th pressure and temperature were falling slowly over Bengal, and while pressure was generally slightly above the normal, temperature was in rather large defect, the deficiency at many stations equalling from  $4^{\circ}$  to  $6^{\circ}$  in both day and night temperatures. On the 21st a deepish barometric depression had formed in the Punjab, while a second and more feeble depression was passing through South Rajputana and Central India, but they were still too far distant to affect Bengal, where pressure was rising slowly and the temperature changes were small and variable. On the 22nd the depression in the Punjab had filled up, while the depression from Central India had advanced into the eastern districts of the North-Western Provinces and Bhagalkhand. Pressure, however, on the 22nd began to fall over practically the whole of Bengal, the fall being largest in the western districts, and the warm wave of air in front of the depression affected the province largely, an increase of the mean temperature of from  $5^{\circ}$  to  $8^{\circ}$  occurring at many stations, while skies became heavily clouded at many stations, particularly in the west of the province. On the 23rd the depression had advanced over Bengal, where pressure had generally fallen briskly, and temperature had again risen by  $4^{\circ}$  and  $5^{\circ}$  at many stations. The skies were also almost overcast, and fairly general rain was received, but the falls were usually not heavy. On the 24th the depression had either broken or filled up, or had passed eastwards away from India, and hence pressure had risen briskly in Bengal, while a rapid fall in the temperature occurred, the fall at many stations equalling  $6^{\circ}$  and  $7^{\circ}$ . A few showers had again been received in the eastern districts, but skies were beginning to clear rapidly. On the 25th and 26th, again, fine settled weather of rather strongly developed north-east monsoon character and with falling temperature and humidity set in over Bengal, and the skies became practically cloudless, while rainfall entirely ceased. At this time, indeed, some decidedly low minimum temperatures were registered, and some stations in South-West Bengal, North Bengal, Bihar and Chota Nagpur registered night temperatures of about  $43^{\circ}$  and  $44^{\circ}$ .

**Pressure.**—The general average pressure for the week has been very distinctly above the normal. The distribution of the excess has, however, been rather variable, and the largest excess amounts of about  $0.04''$  to  $0.06''$  have been recorded at several of the western stations, such as Arrah, Chapra, Bankura, Midnapore and Krishnagar, while on the other hand at other stations the excess has been less than  $0.01''$ .

**Temperature.**—The average mean temperature of the whole province for the week has been  $2.2^{\circ}$  below the normal, and this excess has been tolerably equally distributed in all divisions.

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been large in the day, or maximum, temperatures, which have been in defect at most stations by about two to three degrees, while they have been in defect at others by  $4^{\circ}$  and upwards. At most stations the night, or minimum, temperatures have been in moderate defect, usually less than  $2^{\circ}$ , while on the other hand two stations report slight excess amounts:—

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 26th of January 1895.*

	Normal mean maximum temperature for the week ending 26th January.	Actual mean maximum temperature for the week ending 26th January 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 26th January.	Actual mean minimum temperature for the week ending 26th January 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 26th January.	Actual mean daily temperature for the week ending 26th January 1895.	Variation of actual mean from the normal.

**Rainfall**—Has been more general during the past week than in any week since the commencement of the cold season. The amounts falling have, however, on the whole been small, and in no large division does the fall average as much as a fifth of an inch; usually, indeed, the falls have been between a tenth and fifth of an inch. The smaller districts, which have received the largest average falls, have been—Burdwan (0·71 inch), Bankura (0·30 inch), Saran (0·31 inch), Monghyr (0·36 inch), and Palamau (0·36 inch).

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 26th of January 1895 :—

METEOROLOGICAL DIVISIONS.		TEMPERATURE.						RAINFALL.									
		Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.	
				Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

					0.22

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

*p.*, dew; *c.*, overcast.

## CIRCULAR AND EASTERN CANALS.

### DISTRICT ROAD FUND.

No. 598R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

*Dated Calcutta, the 2nd February 1895.*

### RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 904L.F., dated 19th January 1895, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th September 1894.

**RESOLUTION.**—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the 2nd quarter of the year 1894-95 be published in the *Calcutta Gazette* and circulated to the officers concerned.

**ORDER.**—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to the Commissioners of the Rajshahi, Chittagong, Bhágalpur and Chota Nagpur Divisions, to the Superintending Engineers of the Northern and Western Circles, to the Inspector of Works, Eastern Circle, and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

*Secretary.*

G. E. MANISTY,

Offg. Accountant-General, Bengal.

**NOTE ON THE LATE COTTON CROP IN  
BENGAL, 1894-95.**

The following is published for general information.

C. E. BUCKLAND,  
*Secy. to the Govt. of Bengal.*

REVENUE DEPT.,  
*The 5th February 1895.*

**DEPARTMENT OF LAND RECORDS AND AGRI-  
CULTURE, BENGAL.**

*Note on the late cotton crop in Bengal for the year 1894-95.*

*Explanatory.*—There are generally speaking two cotton crops in Bengal, viz., the early crop which is sown during the monsoon rains and harvested during the cold weather, and the late crop which is usually sown at the close of the rainy season and harvested during the hot weather. The forecast of the early crop was issued on the 30th November 1894. This report furnishes statistics of area and outturn of the late crop only, which is believed to be the less important of the two. It will appear from the district returns attached to this report, that out of the sixteen districts included in it, only three districts, viz., Saran, Darbhanga, and Manbhum, show areas under cotton exceeding 10,000 acres.

*Area sown.*—The total area sown this year with the late variety of cotton appears from the appended statement to amount to 111,300 acres, against 114,300 acres in 1893-94. The decrease as compared with last year is nominal, but the area is less than the normal; owing to the late and heavy rainfall of the latter part of the last monsoon season, which interfered with sowing operations.

*Character of the crop.*—The weather after the sowing season has been on the whole favourable to the prospects of the crop, which it is estimated will yield an outturn of 14 annas against 11 annas of the previous year. The effect of the late rains was more important on the area sown than on the outturn of the crop. Out of the sixteen districts from which returns have been received, four districts, viz., Saran, Muzaffarpur, Bhagalpur, and Angul and Khondmals, estimate the crop as a full average one of 16 annas. The remaining 12 districts give estimates varying from 9 to 15 annas. Nine districts report this year's crop to be better than last year's, five report it to be equal to that of last year, and only two districts, viz., Birbhum and Balasore, report worse crops.

N. N. BANERJEE,  
*Assistant Director of the Department of Land  
Records and Agriculture, Bengal.*

COUNTERSIGNED.

R. NATHAN,  
*for Director of the Department of Land  
Records and Agriculture, Bengal.*

CALCUTTA,  
*The 30th January 1895.*

Forecast of the late cotton crop of Bengal, 1894-95.

1	2	3	4	5	6	7	8	9
Divisions.	District.	Approximate normal area under late cotton.	Approximate area sown last year (1893-94).	Estimated area sown this year (1894-95).	Taking 10 acres to the present average cotton crop (1893-94).	Taking 16 acres to the present average cotton crop (1894-95).	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Bardwan	Birbhum	Acres. 1,000	Acres. 1,100	Acres. 700	Acres. 18	Acres. 12	The rainfall lasting late, the area under cotton has decreased slightly, and the cotton cannot be expected to be more than three-fourths of an average crop.	
	Bankura	2,500	1,400	1,600	7	13	There was increase both in area and cotton crop during the current year as compared with that of last year, but it could not reach the normal average, respectively, owing to copious rainfall at the sowing season.	
	Midnapore	6,000	9,100	2,100	7	9	The decrease in area this year is due to excessive moisture in the soil in the Contai subdivision. (Owing to reasonable rain after sowing, the cotton is likely to be better than that of last year.	
Patna	Patna	3,100	2,300	2,100	9	11	The late rains this year explain the short sowings. The weather being now favourable, the cotton is expected to be better than last year.	

1	2	3	4	5	6	7	8	9
DIVISION.	DISTRICT.	Approximate normal area under late cotton.	Approximate area sown last year (1893-94).	Estimated area sown this year (1894-95).	Taking 16 annas to the acre, how many acres will represent the average output of the year last year (1893-94)?	Taking 16 annas to the acre, how many acres will represent the average output of the year last year (1894-95)?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Panna-conda	Saran	40,000	40,000	40,000	16	16		
	Champan	1,000	1,000	1,000	10	14	Owing to timely rain the output of the crop which is doing well, is expected to be better than last year's.	
	Muzaffarpur	9,000	9,000	9,000	5	16	The season has been being favourable, a full crop is expected.	
	Darbhanga	12,000	12,000	10,500	10	10	The decrease in the area is due to unusually heavy rainfall at the time of sowing and the output is not expected to be better than last year.	
Bhagalpur	Monohyr	600	600	500	10	12	Owing to timely rain the output of this year will be better than last year. The normal area has been revised from 1,500 acres to 500 acres after enquiry.	The Collector has been requested to form reasons for altering the normal area to so large an extent.
	Bhagalpur	2,700	2,700	2,700	16	16		
	Cuttack	5,700	4,300	4,300	14	15	This year there has been sufficient rain and the weather is favourable hence the increase in the estimated output.	

Orissa	Puri	3,300	1,200	1,600	5	12	The lands for the late cotton crop are being prepared in place. The season being favourable up to date, the area now sown is expected to be under the crop and the cotton good if the season does not turn out to be unfavourable afterwards.
	Balasore	200	200	200	14	13	The decrease in cotton is due to excessive rain.
	Angul and Khondmals	3,500	3,500	3,500	16	16	The season has been favourable for sowing the late cotton crop, and the cotton will probably be 16 annas. No cotton is grown in the Khondma sub-division.
Chota Nagpur	Manbhum	28,000	28,000	28,000	7	10	There was no heavy rain during the time of sowing, hence the partial increase in cotton.
	Singbhum	3,200	3,200	3,200	13	13	...
	Total	121,100	114,300	111,300	11	14*	

\* As estimated by this Department

N.B.—Twenty annas represent a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

## WEATHER AND CROP REPORT.

For the week ending the 4th February, 1895.

**Bardwan.**—Rainfall nil. Weather seasonable. Prospects of *rabi* and sugarcane are promising well. Fodder and water sufficient. Price of common rice varies from 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Winter rice crop is being threshed. Prospects of *rabi* crops favourable. Fodder and water sufficient. Common rice selling at from 15 to 21 seers per rupee.

**24-Parganas.**—Rainfall at Sadar 0 01. Weather seasonable. Harvesting of *aman* on lowlands still going on. Prospects of *rabi* and other standing crops good. Condition of cattle good. Fodder and water sufficient. Rice sells at—

	Srs.	Ch.	
Sadar	...	...	11½ to 13 0
Bararat	...	...	16 0
Basirhat	...	...	19 3
Diamond Harbour	...	...	15 0

} per rupee.

**Murshidabad.**—Rainfall nil. Weather cool. Transplantation of *boro* paddy continues. *Rabi* crops and indigo doing well. Fodder sufficient. Price of common rice 16 seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* still going on; outturn estimated at 16 annas. No cattle disease. Fodder and water sufficient. Common rice sells at from 16 to 19 seers per rupee.

**Dinajpur.**—Average rainfall 0 06. Weather fine with occasional clouds and heavy west wind. Mustard is being gathered. Sugarcane is being pressed. No report of any disease among the cattle, and no complaint of fodder and water. Price of common rice 14 to 16 seers per rupee.

**Rangpur.**—Slight rain in Kurigram and Nilphamari. Land under preparation for *bhados* crops. Prospects of tobacco good. Harvesting of mustard going on.

**Pabna.**—Rainfall nil. Weather cool. Prospects of crops continue good. Harvesting of *aman* finished. Fodder and water-supply sufficient. Common rice selling at from 18 to 20 seers per rupee.

**Dacca.**—Rainfall nil. Weather seasonable. *Rabi* crops thriving. Rain wanted. Cultivation of *boro* rice going on. No cattle disease. Fodder available. Price of common rice varies from 12 to 20 seers per rupee.

**Chittagong.**—Rainfall nil. Weather seasonable. Cultivation of *rabi* crops nearly over. Prospects fair, but rain is needed. Water and fodder sufficient. Prices stationary.

**Patna.**—Rainfall 0 71 at Sadar. *Rabi* crops much benefited by the rain. Peas and gram in pods. Wheat in ears. Poppy flowering. Common rice sells at—

	Srs.	
Sadar	...	17½
Barh	...	17½
Dinapore	...	17½
Bihar	...	19

} per rupee.

**Gaya.**—Threshing of paddy going on. *Rabi* crops fair. Early poppy sowings in bud and blossom. Prospects good. Fodder and water sufficient. Prices about normal.

**Champanan.**—Rainfall 0 56 at Motihari. Weather cold. Prospects of *rabi* and poppy fair. Fodder and water sufficient. Common rice selling at 16 seers per rupee.

**Darbhanga.**—Rainfall 0 44 at Sadar. All *rabi* crops benefited by the rain, except *rahar* and wheat, which are reported to be slightly injured. Poppy doing well. Fodder for cattle sufficient. Prices remain almost stationary.

**Bhagalpur.**—Rain on Saturday (2nd February) very beneficial to crops. Mustard largely sown this year and got in. Other oil-seeds and young wheat are thriving.

**Purnea.**—Rainfall 0 14 at Sadar. Weather cool with strong westerly wind. Prospects of crops good. Mustard is being harvested with a fair outturn. Fodder and water sufficient. Coarse rice 16 to 22 seers per rupee.

**Cuttack.**—Weather cloudy and hot, with a few drops of rain. *Rabi* harvest continues. *Dalua* rice growing. Condition of cattle good. Fodder sufficient. Price of rice varies from 11 seers 13 chitaks to 25 seers per rupee.

**Hazaribagh.**—Rainfall 0·33 at Sadar and 0·03 at Guidi. Weather cloudy and damp. Prospects of *rabi* crops good all round. Sugarcane is being cut in some parts. Rain has done good to poppy which is doing well. *Kothi* measurements nearly completed. Fodder and water ample. Common rice selling at from 13 to 20 seers per rupee.

**General Summary.**—There was rain generally over Bihar and Chota Nagpur and in parts of North Bengal during the week. It has done good to the *rabi* crops except the *rahar* and to the poppy. Both the *rabi* and the poppy are promising well. In Eastern Bengal rain is needed for the *rabi*. The harvesting of winter rice is finished except in a few low-lying tracts, and the general results have been satisfactory. Mustard is being gathered, and other early *rabi* crops are coming into flower. Sugarcane is being cut and pressed in some districts. The cultivation of spring rice is in progress. Cattle are generally reported well. The price of common rice continues normal and almost stationary.

· By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 5th February, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

\*Mean of 5 days. †Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question station in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 2nd of February 1895.

DISTRICT OBSERVATIONS.																DISTRICT.
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	OF WEEK.				RAINFALL.							
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 2ND OF FEBRUARY 1895.

At the close of the previous week fine settled weather of rather strongly developed north-east monsoon character had set in in the rear of a barometric depression which had previously passed through the province. Hence on the 27th or the first day of the present week both day and night temperatures were rather considerably below the normal, skies were almost cloudless except in the extreme north of the province, and there was a complete absence of rain except for a light shower at Darjeeling; pressure was also above the normal at practically all stations, though a slight to moderate fall was recorded on the morning of the 27th. On the 28th conditions remained practically unchanged, except that temperature was rising very slowly, while pressure had again fallen slowly and had become almost normal in amount. On the 29th the fall of pressure had ceased, and a slight to moderate rise had set in, while temperature had also risen and the variation of the day temperature from the normal became small, while the night temperatures remained in considerable defect. On the 30th pressure had again commenced to fall rather briskly in Bengal, and had become in distinct defect, while in Western India a barometric depression appeared, the centre of which was lying over Lower Sind and Kathiawar, and which was advancing in an easterly direction. On the 30th also temperature had risen moderately at the great majority of stations in Bengal, while cloud proportion was also increasing at many stations. On the 31st the barometric depression had advanced from Sind into South-east Rajputana and Central India. Hence pressure had again fallen in Bengal, and had become in small to moderate defect, while a further increase had occurred in the temperature, and both day and night temperatures were usually in decided excess. Humidity had also increased rather largely and was very high, while the amount of cloud was increasing decidedly. On February 1st a fresh barometric depression which had appeared in Beluchistan on the 31st had advanced rapidly in an easterly direction into Rajputana, while a deepish secondary depression had formed in the North Punjab. A further fall of pressure therefore occurred in Bengal, which was rather large at the western stations, and pressure became in defect by amounts ranging up to a tenth of an inch at Gaya. Temperature also again rose and became in very decided excess and skies became rather heavily clouded. On the 2nd the primary depression had advanced from Rajputana to Baghelkhand, while the secondary depression in the Punjab was filling up. The primary depression then began to affect Bengal more largely, and Bihar and the western districts reported moderate general rain, while the skies were heavily clouded in practically all districts. Temperature also remained unusually high, while pressure with the advance of the depression was also decidedly low; indeed the mean temperature was from  $3^{\circ}$  to  $7^{\circ}$  above the normal on the 2nd, while pressure was about  $0.04''$  in defect.

*Pressure.*—As pressure was high at the commencement of the week and low at its close, the mean pressure for the week has not been very far removed from the normal. At most of the western stations slight defects of about  $0.01''$  to  $0.02''$  have been recorded, but at a few of the northern stations slight excess pressures have been registered.

*Temperature.*—The variations of temperature from the normal have been large, for at the commencement of the week the readings reported were about  $2^{\circ}$  to  $4^{\circ}$  in defect, and at its close they were  $3^{\circ}$  to  $7^{\circ}$  in excess. The average for the whole week shows that the mean temperature of the province was  $0.5^{\circ}$  in excess, the largest excess having been reported in North Bengal, where it has equalled  $2^{\circ}$ .

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been small in the day, or maximum, temperatures, which have been in defect at most stations by less than a degree, while they have been in excess at others by about  $2^{\circ}$ . At most stations the night, or minimum, temperatures have been in moderate to large excess varying up to  $4.3^{\circ}$  at Cuttack, while on the other hand four stations report slightly defective temperatures:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 2nd of February 1895.

	Normal mean maximum temperature for the week ending 2nd February.	Actual mean maximum temperature for the week ending 2nd February 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 2nd February.	Actual mean minimum temperature for the week ending 2nd February 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 2nd February.	Actual mean daily temperature for the week ending 2nd February 1895.	Variation of actual mean from the normal.
Cuttack	60.1	65.6	+5.5	60.5	61.8	+1.3	73.3	75.2	+1.9
Calcutta	77.2	77.8	+0.6	55.9	58.3	+2.4	66.9	67.4	+0.5
Chittagong	72.7	77.6	+4.9	56.7	58.3	+1.6	67.2	68.7	+1.5

Patna	78.4	78.8	+0.4	49.8	50.7	+0.9	67.6	68.7	+1.1
Gaya	76.5	78.1	+1.6	47.4	48.9	+1.5	64.7	66.5	+1.8
Purnea	74.9	78.1	+3.2	47.4	48.6	+1.2	61.2	62.3	+1.1
Hazribagh	73.4	78.2	+4.8	50.7	51.1	+0.4	62.1	63.2	+1.1
Darjeeling	43.3	45.2	+1.9	38.0	39.8	+1.8	38.2	41.0	+2.8

**Rainfall.**—An average fall of 0·36 inch of rain has been recorded in Bihar, while slight to moderate showers have also been received in Chhota Nagpur and North Bengal. The districts which have received the heaviest falls have been Shahabad 0·55 inch, Champaran 0·54 inch, Patna 0·51 inch, Gaya 0·60 inch, Darbhanga 0·44 inch, and Saran 0·41 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 2nd of February 1895 ;—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

### PRELIMINARY NOTE ON THE WHEAT CROP OF BENGAL, 1894-95.

The following is published for general information.

REVENUE DEPT.,  
The 6th February 1895.

C. E. BUCKLAND,  
Secy. to the Govt. of Bengal.

### DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

#### *Preliminary note on the wheat crop of Bengal, 1894-95.*

1. *Character of the season.*—The latter part of the last monsoon season was characterised by unusually late and heavy rainfall, which lasted till the end of the first week of November, being particularly heavy in Bihar, Chota Nagpur, and North Bengal. The late rainfall retarded sowing operations, and prevented much of the usual area

from being sown in wheat. The decrease is specially noticeable in South Bihar.

Since the end of the first week of November, there was practically no rain until after the middle of January; as the district returns describe the condition of the crop about the middle of the month, the effect of the recent rainfall was not taken into account in the forecast.

The crop appears to be so far free from fungoid and insect pests.

2. *Area cultivated.*—The total area sown in wheat this year in the chief wheat-growing districts of Bengal is estimated at 1,552,600 acres, against 1,583,800 acres sown in 1893-94; the decrease is 31,200 acres, or nearly 2 per cent. on the area sown last year. The decrease is solely attributable to the unusually late continuance of the monsoon rains. No attempt has been made to compare this year's area with the estimated normal area, owing to misconceptions, which still seem to exist with regard to the meaning of the term 'normal area.'

3. *Outturn.*—The outturn of the standing crop may be estimated at 15 annas against 12 annas, which was the estimated outturn of the crop of 1893-94. The fact of the crop being sown unusually late owing to the prevalence of wet weather in October and the beginning of November has told unfavourably on its prospects, particularly in South Bihar and Chota Nagpur. Since sowing, however, the weather has been favourable, and the January rains make the prospects more favourable than it was at the time of the submission of the district returns.

CALCUTTA,

*The 30th January 1895.*

## First Forecast of the Wheat Crop of Bengal, 1894-95.

DIVISION.		1	2	3	4	5	6	7	8	9
District.			Approximate normal area under wheat.	Approximate area sown last year (1893-94).	Estimated area sown this year (1894-95).	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1893-94).	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1894-95).		Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
PATNA.	Shahabad	...	Acres. 173,060	Acres. 116,900	Acres. 123,400	Annas. 72	Annas. 11		Owing to the excessive rain lasting late during the year, wheat was less cultivated in the sub-divisions of Arrah, Buxar and Bhabua than elsewhere. The outturn is promising.	The Collector estimates the crop at 7 annas in the Sadar subdivision, 16 annas in Buxar, 12 annas in Bhabua, and 14 annas in Sasaram. The cause for such wide variations is not understood.
	Patna	...	121,500	114,100	100,100	84	121		The weather being up to date very reasonable, a better outturn is expected this year than last. The less area sown is due to the late rains, which did not get off the land till it was too late to sow it in full.	
	Gaya	...	127,000	120,000	124,000	11	11		The decrease in the area sown this year is due to excessive rainfall at the time of sowing. The outturn is expected to be about 11 annas. The sowings being late, the crop is behind time.	
	Saran	...	127,500	127,500	140,000	15	15		The area sown was less than normal and last year's owing to delay in the cessation of rains at sowing time.	
	Champarn	...	47,000	47,000	41,000	16	16		Owing to late rain the area sown is less than that of last year.	
	Muzaffarpur	...	70,000	70,000	70,000	16	16		.....	
	Darbhanga	...	110,200	104,600	102,000	12	16		The decrease in the area sown with wheat this year as compared with the last year's area is due to excessive moisture caused by unusually heavy rain in October. The prospects of the crop are, however, good, and if the weather should continue favourable, there is every reason to expect an average crop.	

The Collector estimates the crop at 7 annas in the Sadar subdivision, 16 annas in Buxar, 12 annas in Bhainsa, and 11 annas in Saran. The cause for such wide variations is not understood.

DIVISION.										BRAGALPUR.										BURDWAN.									
District.			Approximate normal area under wheat.			Approximate area sown last year (1893-94).			Estimated area sown this year (1894-95).			Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1893-94).			Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1894-95).			Remarks by the District Officers.			Remarks by the Department of Land Records and Agriculture, Bengal.								
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24						
BRAGALPUR.	Bhagalpur	...	Acres. 215,500	Acres. 192,200	Acres. 215,300	Annas. 134	Annas. 16	This year there has been sufficient rainfall, which has led to the cultivation of a larger area than in the last year; the forecast is good, as the moisture warrants the expectation of a good outturn.			A revised forecast will be submitted on receipt of the sub-divisional figures.			It is not understood why, if the season proved favorable, the area sown this year should fall so short of the normal.			The Deputy Commissioner returned last year's acreage under wheat as 14,212 acres. This error has been corrected and the figure changed to 65,100 acres, which area was returned under wheat in the final report on the wheat crop of 1893-94. The cause of the large decrease in the area sown this year as compared with the normal should be explained in the final report.												
	Monghyr	...	183,000	106,500	106,600	14	14	The year was favourable for the cultivation of wheat crop. The crop is looking well, but is backward owing to late sowing on account of late rains.			The year was favourable for the cultivation of wheat crop. The crop is looking well, but is backward owing to late sowing on account of late rains.			The season being favourable, a larger area than that of last year was sown with wheat in the Sadar sub-division.			Taking the district outturn as a whole, it is expected to be better than last year's, and is attributable to better distribution of rainfall.												
	Purnea	...	24,000	22,700	23,000	13	16																						
	Sonhal Parganas	...	68,400	65,100	68,000	13	14																						
BURDWAN.	Maida	...	85,500	42,000	42,000	8	16	The season was favourable to the cultivation of the wheat crop, and 16 annas outturn is expected.			There is no extensive wheat cultivation in this district. Owing to excessive rain the condition of the crop is worse in the Sadar sub-division than what it was last year. In the Kalna sub-division heavy rainfall in November 1894 affected the outturn, and it will, therefore, be the same as was in last year. Owing to seasonable rainfall in sowing time the outturn in the Katwa sub-division is expected to be better than last year. In the Raniganj sub-division there is an increase in the present estimate of outturn, which is apparently due to the sufficient rainfall.																		
	Burdwan	...	2,100	1,400	1,400	104	12																						

Bankura	...	6,500	4,900	5,900	12	11	The favourable state of the weather at the sowing season, as well as afterwards, has increased the area under wheat and has improved the prospects of the crop as compared with last year. The decrease of area as compared with the normal is said to be due to facilities for sowing other crops.
Birbhum	...	5,500	5,700	5,500	12	12	Owing to late rainfall in the sowing season and want of rainfall since, the area under wheat has fallen slightly this year, and the outturn is not likely to be more than 12 annas.
Hazaribagh	...	9,500	8,500	8,000	11	12½	The deficiency in the area and outturn is due to heavy rains which lasted very late this year.
Lohardaga	...	2,200	1,100	1,500	7	10	The increase over the area sown in 1892-93 as also in the outturn is due to comparatively seasonable rainfall, but the decrease is compared with the normal area is owing to excess of moisture.
Palaman	...	13,000	17,700	15,900	12	10	The increase in the area and outturn is due to sufficient rain during the sowing and ploughing seasons.
Manbhum	...	79,500	78,500	7,500	8	10	The crop at present appears to be promising as there has not been too much rain.
Singbhum	...	2,800	2,500	2,500	"	"	The increase in outturn is due to seasonable rainfall.
Nadia	...	27,500	10,000	22,000	11	10	The increase in the area sown is due to the improvement of lands on account of floods, and also to the fact that several crops sown broadcast were damaged by the excessive rain in September, October, and the beginning of November. The season being late, the cultivators could not re-sow the lands with the same crops, but sowed wheat thereon. If there be rain at the end of January the outturn will probably exceed the estimate.
Murshidabad	...	150,500	128,700	122,200	10	13	The decrease in area sown this year as compared with the normal and last year's area is due to the soil being moist on account of heavy rains in ploughing time. The increase in the estimated outturn is attributable to the moisture of lands owing to the heavy showers at the close of the rainy season.

CHOTA NAGPUR.

PRESIDENCY.

The Deputy Commissioner estimates the outturn at 16 annas against 15 annas reported by the police, and also considers the estimate of area sown this year to be low.

If the crop be promising, 14 annas would seem to be a low estimate.

The Deputy Commissioner estimates the outturn at 16 annas against 15 annas reported by the police, and also considers the estimate of area sown this year to be low.

If the crop be promising, 15 annas would seem to be a low estimate.

DIVISION.		Remarks by the District Officers.										Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9				
Taking 10 annas to represent the average outturn per acre, how many annas represented the outturn last year (1893-94).												
Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1894-95).												
Estimated area sown this year (1894-95).												
Approximate area sown last year (1893-94).												
Approximate normal area under wheat.												
Acres.												
Acres.												
In the Naogaon and Sadar sub-divisions, owing to late rains, many cultivators could not sow the seeds in time, and there is a decrease in the area cultivated. In the Nator and Naogaon sub-divisions the moisture in the land and bright sunshine will facilitate the growth of the plants and 16 annas outturn is expected. In the Sadar sub-division not more than 1½ annas outturn is expected on account of want of rainfall in the sowing season. The district average outturn is estimated to be 14 annas.												
The water of the last rains not having subsided in the usual time, the cultivation of the lands ordinarily sown with wheat was retarded, and hence the decrease in cultivation; but there being no rain at the sowing time, an average outturn is expected.												
There is not much wheat cultivation in the Sadar and Nilphamari sub-divisions.												
Better outturn is expected on account of seasonable rainfall.												
The sowing was retarded owing to the soil remaining wet till lately, on account of the flood continuing longer this year than usual, and of the heavy rainfall in November last. It is yet too early to form a correct estimate of the probable outturn. Hardly more than 8 annas is expected.												
.....												
(n) As estimated by this department.												

It should be explained in the Final report why the area sown this year has fallen so considerably short of the normal.

(n) As estimated by this department.

## WEATHER AND CROP REPORT.

*For the week ending the 11th February, 1895.*

**Burdwan.**—Rainfall at Sadar 0·02. Weather cloudy. Prospects of *rabi* crops favourable and of sugarcane tolerable. Fodder and water sufficient. Price of common rice varies from 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nominal. Thrashing of paddy going on. Prospects of *rabi* crops good. *Boro* rice is being sown in some places. Common rice selling from 14 to 21 seers per rupee.

**24-Parganas.**—Rainfall nil. Weather seasonable. Harvesting of *aman* nearly finished; yield good. Prospects of *rabi* and other standing crops good. Condition of cattle good. Fodder and water sufficient. Rice sells at—

	Srs.	Ch.	
Sadar	...	...	12 to 13 0
Barasat	...	...	15½ 0
Basirhat	...	...	19 3
Diamond Harbour	...	...	15 0

} per rupee.

**Murshidabad.**—Rainfall nil. Transplantation of *boro* rice nearly finished. Prospects of *rabi* crops, indigo and mulberry good. Fodder sufficient. Price of common rice 15½ seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* nearly finished, and the outturn is estimated at 16 annas. Common rice sells from 16 to 22 seers per rupee. No cattle disease. Fodder and water sufficient.

**Dinajpur.**—Rainfall nil. Weather fine. Mustard is being gathered. Sugarcane is being pressed. Common rice sells from 14 to 16 seers per rupee. No report of any disease among the cattle, and no complaint of fodder and water.

**Rangpur.**—Rainfall nil. Weather seasonable. Land under preparation for *aus* and jute. Sugarcane prospects good. Price of common rice varies from 9 to 17 seers per rupee.

**Pabna.**—Rainfall nil. Weather cool. Prospects of standing crops good. Common rice selling at from 17 to 20 seers per rupee. Fodder and water-supply sufficient.

**Dacca.**—Rainfall nil. Weather seasonable. *Rabi* crops thriving. Rain wanted. Ploughing for early rice going on. Common rice sells from 12 to 18 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Rainfall nil. Weather seasonable. Cultivation of *rabi* crops nearly over. Prospects fair, but rain is wanted. Prices stationary. Water and fodder sufficient.

**Patna.**—Rainfall nil. Prospects of crops excellent. Poppy-lancing commenced. Common rice selling at 17½ and 19 seers per rupee at Sadar and Bihar respectively.

**Gaya.**—Rainfall nil. Peas being harvested. Other *rabi* crops doing well. Prospects of poppy fair. The late rainfall favourable to standing crops. Prices about normal. Water and fodder sufficient.

**Champanan.**—Rainfall nil. Prospects of *rabi* crops and poppy good. Fodder and water for cattle sufficient. Common rice selling at 16 seers per rupee.

**Darbhanga.**—Late rain improved prospects of *rabi*; *rahar* and wheat, however, suffered slightly. Poppy plants progressing favourably. Fodder for cattle sufficient. Prices stationary.

**Bhagalpur.**—Rainfall nil. Weather seasonable. Standing crops doing well.

**Purnea.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops good. Mustard is being harvested with fair outturn. Common rice sells from 16 to 22 seers per rupee. Fodder and water sufficient.

**Cuttack.**—Weather cloudy and hot, with a few drops of rain. *Rabi* harvest nearly over. *Dahua* rice growing. Prospects good. Condition of cattle good. Fodder sufficient. Rice sells from 11 seers 13 chitaks to 25 seers per rupee.

**Hazaribagh.**—Weather cloudy and damp. Rainfall at Sadar 0·15 and Giridi 0·49. Prospects of *rabi* crops good all round. Sugarcane outturn 16 annas. Poppy progressing satisfactorily. *Kothi* measurement nearly completed. Fodder and water sufficient. Common rice sells from 14 to 20 seers per rupee.

**General Summary.**—There was a little rain in Hazaribagh, but practically none in the other reporting districts. The general prospects of the *rabi* continue favourable, but in East Bengal the crop requires rain. Mustard is being gathered, and in many districts the pressing of sugarcane is going on. Spring rice is being sown and transplanted, and the young plants are doing well. In parts of North and East Bengal the lands are under preparation for the autumn crops. The reports of the poppy crop in Bihar and Hazaribagh are promising; lancing has begun in Patna. No cattle-disease is reported. The price of common rice is generally steady and normal.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
*The 12th February, 1895.*

C. E. BUCKLAND,  
*Secretary to the Govt. of Bengal.*

[illegible]

## SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JANUARY 1895.

The following have been the principal features in the meteorology of January 1895 :—

1. The mean pressure for the month has varied very slightly from the normal. About one-half of the stations report very slight excess pressures, usually of about 0·01" or under, and the remaining half slight defects of about similar amounts. Hence the general average pressure for the whole month has been almost absolutely normal. In Assam on the whole pressure has been in defect by nearly 0·02". The barometric changes from day to day during the month have also been generally small.

2. The average mean temperature for the month for South-West, North, and East Bengal has been almost absolutely normal. Bihar, Orissa, and Chota Nagpur, on the other hand, have shown slight excess temperatures, ranging from about half to one degree. In the case of the day temperatures, however, they have been in general defect by about a degree, while on the other hand the night, or minimum, temperatures have been in excess at the majority of stations by rather more than a degree.

3. Humidity has been in distinct excess at all stations, the excess amount usually averaging from 5 to 10 per cent. On the other hand, cloud proportion has usually been in slight defect from the normal amount.

4. The weather in Bengal during January was affected by rather numerous barometric depressions coming from North-Western and Central India. The first disturbance was caused by a feeble depression from the 1st to the 3rd; the province was then affected by a second depression from the 8th to the 10th; by a third depression from the 11th to the 14th, and by a fourth from the 16th to the 18th. A fifth depression, which gave moderate general rain, affected Bengal from the 22nd to the 25th, after which fine settled weather prevailed practically till the end of the month. The majority of these five depressions were, however, feeble, and gave very little rain, but each gave a wave of high temperature and humidity in front of and in connection with the depression, and usually a cool wave in its rear.

5. Rain has, however, been received in all divisions, the amounts ranging from about four-tenths of an inch in Bihar and Chota Nagpur and a fifth of an inch in South-West Bengal and Orissa to only a few hundredths of an inch in East Bengal, and in all divisions the falls have been rather largely below the normal amounts.

The following is a brief summary of the principal meteorological changes which have occurred during January :—

At the end of December a barometric depression had entered North-Western India, and had travelled in a south-easterly direction, and on the 31st of December it was in Bundelkhand. On the 1st of January the depression had moved slightly eastwards, and was a little to the east of Sutna. On the 2nd the depression covered Orissa, South Bengal and the head of Bay, while on the 3rd it had partially, and on the 4th it had entirely filled up. Hence, with the advance of this depression, temperature, humidity, and cloud proportion became high, while pressure was low, but the depression was not of sufficient importance to give any general rainfall, and only a few local showers occurred in Bihar, principally in the Champaran district. From the 4th, however, fine settled weather with comparatively low temperature and humidity again set in, which lasted till about the 8th, when Bengal began to be affected by a second barometric depression, which had appeared on the North-West Frontier on the 6th, and had advanced eastwards till on the 8th its centre was near Nowgong in Bundelkhand.

Hence pressure began to fall slowly over the western districts of Bengal on the 8th, while a further increase of temperature occurred, and both day and night temperatures in Bengal became rather considerably in excess of the normal, while humidity was also decidedly high. On the 9th the depression had remained practically stationary, but pressure had fallen slightly to briskly over the western half of Bengal, showing that the depression had decidedly intensified and was affecting Bengal more largely, and hence temperature again rose and the sky became lightly to moderately clouded. On the 10th the depression had advanced in a south-easterly direction, and probably existed over the head of the Bay, but it had become very feeble, and was not well marked. Pressure was hence falling slowly over the southern and eastern districts of Bengal, while it was rising elsewhere, and temperature had again risen moderately and both day and night temperatures became in excess by amounts ranging from about 2° over a large part of the province up to 5° and 6° in the western districts. On the 11th the depression at the head of the Bay disappeared, but a new depression accompanied by an irregular cyclonic circulation of winds appeared in Bundelkhand, which again affected the weather in Bengal, where

pressure had fallen moderately, while temperature rose briskly, and at several stations southerly winds appeared, which caused a very considerable increase in the humidity. On this day the excess in the mean temperature at a good many stations equalled about  $5^{\circ}$ , while in certain cases, such as at Jalpaiguri, the night temperatures were about  $10^{\circ}$  higher than usual. On the 12th the depression had advanced from Bundelkhand, and had travelled eastwards into Bengal, and hence temperature and humidity were high, and excess amounts of  $8^{\circ}$  to  $10^{\circ}$  were recorded in the night temperatures at such stations as Patna, Gaya, Saugor Island and Berhampur. On the 13th pressure had begun to rise slightly in Bihar and Chota Nagpur, while it fell moderately to rapidly at the eastern and northern stations in the province, and a very decided barometric depression again existed in North Bengal. On the 14th pressure had again risen briskly to rapidly in Bengal and Assam, and the depression had to a great extent disappeared, but temperature in Bengal still continued excessive. Rather general rain had also been received in Bihar and Chota Nagpur in connection with this depression, and very numerous rain-showers were reported on the morning of the 15th in the western and northern districts. On the 15th, though pressure continued to rise in Bengal, while temperature also fell slowly, yet conditions were far from settled, for a cyclonic circulation of winds commenced in the North-Western and Central Provinces, and this was apparently connected with another feeble low-pressure area, which began to pass eastwards through Bengal on the 16th, causing a brisk to rapid fall of pressure, particularly in the western districts, and causing a large increase in the cloud proportion with fairly general rain in Bihar, and somewhat numerous but usually light rain showers in Chota Nagpur. On the 17th pressure continued to fall slowly over Bengal, and the province was still rather largely influenced by the depression, so that skies were overcast over a very considerable area, though the rainfall had to a great extent ceased, but temperature had risen briskly at the great majority of stations. On the 18th pressure began to rise in Bengal, and the depression was hence disappearing; so that temperature commenced to fall briskly, the decrease in the mean temperature at many stations equalling  $5^{\circ}$  and  $6^{\circ}$ ; cloud proportion and humidity also began to decrease, and only one or two local showers were reported. On the 19th the effects of the depression had quite disappeared, temperature had fallen considerably, and had become decidedly low and below the normal, while a dry northerly current was blowing over the whole of Bengal, skies were almost cloudless, and no rain had fallen.

Fine settled weather of the ordinary cold-season type therefore again set in from the 19th and lasted till the 22nd, when a depression advanced from South Rajputana and Central India into the eastern districts of the North-Western Provinces and Bundelkhand, and began to affect Bengal. On the 23rd the depression had advanced over Bengal, and on the 24th it had either broken or filled up or had passed eastwards from India. In its advance over Bengal it gave the usual large rise in temperature and increase in humidity and cloud proportion, and in addition it gave fairly general rain on the 23rd over the greater part of the province, and at this time the most general and probably the heaviest rainfall of the month was received. From about the 25th instant, however, again, fine settled weather of rather strongly developed north-east monsoon character set in over Bengal accompanied by decidedly low temperatures, and at this time several stations in South-West and North Bengal, Bihar, and Chota Nagpur registered night temperatures of about  $43^{\circ}$  and  $44^{\circ}$ . The weather then continued fine, but with gradually increasing temperature until practically the close of the month, when Bengal again began to be slightly affected by a depression which was advancing from North-Western India.

*Pressure.*—The variations of pressure due to the passage of the depressions through the province have not been large, and the comparatively low pressure experienced during the depressions has been to a great extent neutralized by the high pressures registered during the cold waves following in the rear of the depressions. Hence the variation of the mean pressure from the normal has been unusually small, and the average pressure for the whole province has been practically normal. Slight excess amounts, usually not exceeding a hundredth of an inch, have been recorded at about half the number of reporting stations, and similar defects at the other half. The variations of pressure from the normal, week by week, showed that pressure was in slight defect in the first and second weeks, it was nearly normal in the middle of the month, while for the remainder of the month pressure was usually in slight excess. In Assam the average defect of pressure for the month equalled 0.019".

*Temperature.*—The average mean temperature of Bengal was  $0.9^{\circ}$  in excess in the first week of the month, while in the second week the excess had risen to no less than  $2.7^{\circ}$ . In the third week the excess had fallen to  $0.5^{\circ}$ , while a rapid fall of temperature then occurred, and a defect of  $2.2^{\circ}$  was registered for the next week, while at the close of the month temperature was becoming normal. Hence, for the whole month, for the whole province the mean temperature was in excess by only  $0.4^{\circ}$ , the excess being practically confined to Chota Nagpur, Orissa and Bihar. The excess was also practically entirely confined to the night, or minimum temperatures, for the average day, or maximum temperatures, for the month have usually been in small defect.

In Assam the temperature for the month was  $1^{\circ}$  in excess of the normal.

The actual variations of the maximum, minimum, and mean temperatures, week by week, for the month from the normal values at nine typical stations in different divisions of the province are given in the following table :—

STATIONS.	WEEK ENDING 5TH JANUARY 1895.			WEEK ENDING 12TH JANUARY 1895.			WEEK ENDING 19TH JANUARY 1895.			WEEK ENDING 26TH JANUARY 1895.			WEEK ENDING 2ND FEBRUARY 1895.

**Rainfall.**— The largest average divisional rainfalls have equalled about four-tenths of an inch only in Bihar and Chota Nagpur, while the falls in South-West Bengal and Orissa have averaged about a fifth of an inch only. In North and East Bengal the rainfalls have averaged the small amounts of an eighth and a sixteenth of an inch respectively. Hence in all cases the divisional rainfalls have been rather largely below the normal.

In the case of the smaller districts the falls have been about equal to, or in some cases even in excess of, the normal amounts in Burdwan, Bankura, Nadia, Patna, Gaya, Shahabad, Saran, Monghyr, Puri, Palamau and Manbhum, while on the other hand the following districts have received either no rain at all or amounts only averaging one or two hundredths of an inch:—Midnapur, Howrah, Calcutta, Dacca, Faridpur, Backergunge, Noakhali, Chittagong, South Lushai Hills, Cuttack and Balasore.

In Assam during the month Sibsagar has received 1.58 inch of rain, Dhubri 0.18 inch, and Silohar 0.16 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the month of January 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.						
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th October 1894.

N. 227, N.E. 50, E. 6, S.E. 16, S. 14, S.W. 14, W. 25, N.W. 95, Calm 199.			

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2.5° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

*N.B.*—The anemograph was under repair from 2 p.m. of the 10th to 4 p.m. of the 14th January, 1895; hence the results of that period are deficient.

O. LITTLE,

METEOROLOGICAL OFFICE, INDIA;  
Calcutta, the 11th February 1895.

\* Mean of 5 days.

**Explanation.—Summary.**—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the year. The humidity of the atmosphere is expressed in percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question is the district mean, in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 9th of February 1895.

DISTRICT OBSERVATIONS.																DISTRICT.
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	OF WEEK.				RAINFALL.							
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

\* mean of 5 days.

last ten years. The variations are *negatives* when the mean of the week is less than the corresponding normal mean, and *positives* when greater. Numbers denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal during the past ten years. The means of the district are the numerical average of the rainfall returned received in the district, i.e., from total rainfall at the subdivisions.

## Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 9th of February 1895.

**Explanation.**—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the return, are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0.10 inch of rain has fallen.

**Calcutta, the 12th February 1895.**

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 9TH OF FEBRUARY 1895.

At the close of the previous week weather had become rather disturbed in Bengal as a barometric depression which had advanced eastwards from North-Western India had reached Bundelkhand, Chota Nagpur and the adjacent districts of the Central Provinces, and hence on the 2nd instant pressure was low and temperature very high in Bengal, the excess in the night temperature ranging up to about  $10^{\circ}$ ; skies were also almost overcast and a good many rain-showers were reported. On the 3rd or the first day of the week under review, the depression had moved in an easterly direction and was lying over the western and central districts of Bengal, but it was becoming rather more feeble in character, though pressure was falling rapidly at the eastern and northern stations. Hence temperature and humidity continued unusually high, the skies were still rather heavily clouded, and a good many light local showers were reported. On the 4th instant pressure again fell briskly to rapidly at the eastern and northern stations, and a decided depression continued to exist in and near the Himalayas. The changes of temperature were variable, but a rather rapid reduction of humidity commenced, and skies began to clear.

On the 5th a brisk to rapid increase of pressure had occurred, and the depression had practically filled up, and the cool wave of air in the rear of the depression swept over Bengal, giving again fine settled weather with a rapid decrease in both temperature and humidity, so that temperature became much more nearly normal than it had been. On the 6th pressure continued to increase slightly to briskly, while a further rapid fall of temperature occurred, and the mean temperature became usually from  $3^{\circ}$  to  $6^{\circ}$  below the normal. From the 6th to the morning of the 9th the changes were unimportant, and rather strongly developed north-east monsoon conditions prevailed over Bengal, but on the 9th another very feeble form of barometric depression began to advance over Bengal from the Central Provinces, giving again rapidly increasing temperature and humidity with a large increase of cloud, though the decrease of pressure was small. Hence at the beginning and end of the week conditions were a little abnormal and somewhat disturbed, but for the remainder of the period the north-east monsoon conditions were rather strongly developed.

Pressure was rather largely in defect of the normal at the commencement of the week, and the defect then slowly but steadily disappeared, and from the 7th pressure was in moderate excess, though at the close of the week the excess had disappeared, and pressure had become almost normal, though, if anything, slightly in defect. Hence the average pressure for the week has been in very distinct defect, usually varying from  $0.02''$  to  $0.05''$ .

*Temperature.*—The average mean temperature of the whole province has been about one degree below the normal, the defect being largest in Bihar and Chota Nagpur. On the other hand, in Orissa, slight excess temperature has been registered.

The actual temperatures registered during the week, and their variations from the normal temperature of the present season, are clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been large in the day or maximum temperatures, which have been in defect at most stations by about two to three degrees, while they have been in defect at others by about  $5^{\circ}$ . At most stations the night or minimum temperatures have also been in slight defect, while on the other hand four stations report slight excess temperatures:—

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 9th of February 1895.*

	Normal mean maximum temperature for the week ending 9th February.	Actual mean maximum temperature for the week ending 9th February 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 9th February.	Actual mean minimum temperature for the week ending 9th February 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 9th February.	Actual mean daily temperature for the week ending 9th February 1895.	Variation of actual mean from the normal.
Cuttack	88.4	85.8	-2.6	62.6	67.0	+4.4	75.5	70.4	-5.1
Calcutta	79.6	78.0	-1.6	57.1	57.4	+0.3	64.4	67.7	+3.3
Chittagong	79.7	79.0	-0.7	56.2	54.5	-1.7	64.0	67.8	+3.8
Burdwan	81.3	77.4	-3.9	55.3	58.0	+2.7	68.3	66.7	-1.6
Patna	75.3	70.9	-4.4	49.9	49.6	-0.3	62.6	60.3	-2.3
Gaya	78.8	73.6	-5.2	53.1	50.3	-2.8	66.0	62.0	-4.0
Purnea	70.6	73.5	+2.9	44.4	48.1	+3.7	62.5	64.8	+2.3
Basaribagh	75.0	70.9	-4.1	51.3	49.5	-1.8	61.6	60.2	-1.4
Darjeeling	48.8	45.5	-3.3	32.3	33.2	+0.9	38.1	39.4	+1.3

*Rainfall.*—The average falls in Chota Nagpur and Orissa have equalled from about a quarter to a fifth of an inch, while elsewhere the average falls have only equalled a few hundredths of an inch. Hence in all divisions the falls have been largely below the normal amounts.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 9th of February 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

The mean relative humidity ... .. % 66

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office ... .. 69

The total fall of rain from 3rd to 9th February 1895 ... .. Inches. 0.01

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 0.27

The total fall from 1st January to 9th February 1895 ... .. 0.01

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 0.73

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

d. drizzling rain; d., dew.

Home Department Resolution No. <sup>2-Sanitary</sup>  
103-14, dated the 3rd May 1887.

Correspondence with, and reports from, the Government of Bombay and Messrs. Thomas Cook & Son on the arrangements made by the latter in connection with the conveyance of pilgrims to and from the Hedjaz from 1888 to 1894.

### RESOLUTION.

In the Resolution of the 21st January 1886, cited above, it was stated that in October 1884 a communication had been received from Messrs. Thomas Cook & Son expressing the readiness of that firm to undertake the conveyance of Muhammadan pilgrims between India and the Hedjaz. The success which had

attended the extensive schemes of Messrs. Cook & Son for lessening the difficulties and increasing the comfort of travellers in different parts of the world seemed to the Government of India to afford an assurance that that firm would be successful in placing the arrangements for the conveyance of pilgrims between this country and Arabia on a footing more satisfactory to the Government, and more convenient to the pilgrims themselves, than had hitherto been found possible. After carefully considering the matter in personal communication with Mr. J. M. Cook, the Governor-General in Council came to an agreement with the firm by which they were to be appointed pilgrim agents for the whole of India. Local officers and officers in charge of treasuries were instructed to assist the firm in making known the terms of through conveyance to Jeddah and back, and in disposing of through tickets; and the Government of Bombay were requested to make over to the representatives of the firm the issue of passports in Bombay after they had been signed by the proper authorities, and to instruct the Protector of Pilgrims to work in harmony with the firm and to render them every assistance. On their part Messrs. Cook & Son agreed to arrange with the railway administrations, steam-ship proprietors and others concerned for the conveyance of the pilgrims, at through fares, from all the chief stations in India to Jeddah and back, and to do all in their power to secure the transit of the pilgrims in satisfactory ships supplied with proper accommodation in accordance with the regulations laid down by the Government. The firm were prepared to provide the requisite agency for the work, Muhammadans being appointed for that purpose in all cases where necessary; to establish a special pilgrimage office in the most convenient position in Bombay, and possibly also at Jeddah; and to make all detailed arrangements in connection with the issue of the necessary announcements, forms of tickets, etc. They also expressed their readiness to comply with the requirements and regulations which might be laid down from time to time by the Government of India in the same manner as though they were in the service of the Government.

2. During the winter of 1886-87 Mr. F. H. Cook made a tour in India with the view of personally working out the details of the scheme in communication with the Government of India, and of explaining to the Muhammadan community what the firm proposed to do. In their Resolution of the 3rd May 1887, the Government of India announced the detailed arrangements which had been completed with Messrs. Cook & Son. These were to last for three years from the beginning of 1887 and to be terminable at the end of that period at the option of either the Government or Messrs. Cook & Son. In the event of the Government withdrawing after three years from the scheme, Messrs. Cook & Son were to be at liberty to continue it as a private enterprise. It was explained that, though the Government gave their countenance and assistance to Messrs. Cook & Son's enterprise, they had no desire to constitute a monopoly in favour of the firm. As, however, the firm engaged to convey pilgrims to Jeddah at a fair charge, to protect them while on the journey from extortion and ill-treatment, and to provide them with comforts and facilities in the way of supplies of food and banking arrangements, the Government were, it was stated, satisfied that pilgrims would do well to take advantage of the firm's arrangements. The prices of single and return steamship fares were fixed on the representation of Mr. F. H. Cook and the advice of the Government of Bombay. Tickets, inclusive of the railway and steamer fares, were to be kept for sale at the office of the Collector or Deputy Commissioner of every district in India, and district officers were instructed to give the widest publicity to the advantages to be secured which were set forth in a prospectus approved by the Government of India. A guarantee against actual loss in the execution of these arrangements, up to £2,000 for the first year and £1,000 for each of the two following years, was given by the Government of India, on the understanding that Messrs. Cook & Son should furnish their accounts for audit by the Accountant-General of Bombay.

3. The report of Messrs. Cook & Son on the arrangements carried out by them in connection with the Hajj of 1887 showed that, out of a total of 9,839 pilgrims, who sailed from ports in British India for Jeddah and Yembo, 1,936 (or 19·8 per cent.) were booked by the firm. The chief advantage which the pilgrims had secured was stated by the firm to be that of through booking at

fixed rates, inclusive of landing and baggage charges. Messrs. Cook & Son were endeavouring to charter vessels themselves for future voyages in order to be able to furnish improved accommodation on board. The accounts of the firm showed a loss of £2,592, and the sum of £2,000 guaranteed by Government was accordingly paid to them.

4. On the 27th February 1888, Messrs. Cook & Son reported that they had chartered for the coming season four steamers from Bombay to Jeddah and two from Jeddah to Bombay. The dates of departure of these vessels were published in the *Gazette of India*, and the Local Governments and Administrations were requested to give every publicity to them. The report on the working of the arrangements during 1888 showed that 13,532 pilgrims left Bombay for the Hajj in 16 steamers, of whom 3,961 (or 29·3 per cent.) were conveyed by Messrs. Cook & Son in four steamers. A loss was incurred by the firm above the amount of the guarantee of £1,000, and the guaranteed sum was accordingly paid by Government. In his letter dated the 17th April 1889, Mr. J. M. Cook stated that, from the experience they had gained, Messrs. Cook & Son were convinced that it was quite impossible for them to convey the pilgrims in the way they were doing at existing rates for a profit, and that, unless the Government of India expressed satisfaction with, and appreciation of, the past working of the arrangements, they did not consider that they would be justified in incurring the great responsibility and personal labour involved. The Home Secretary's letter of the 18th October 1889 conveyed the reply of the Government of India to the effect that, after making enquiries from the Local Governments and Administrations, they were assured that the conditions under which Indian pilgrims could proceed to the Hedjaz had been materially improved, particularly in the reduction of opportunities for extortion, since Messrs. Cook & Son had undertaken the work, and that the Governor General in Council believed that this was not only the case in the ships by which pilgrims proceeded with the firm's tickets, but also that the example set on the vessels chartered by the firm had raised the standard of comfort on the vessels belonging to other firms. The Government of India accordingly indicated their willingness to continue the arrangements with Messrs. Cook & Son for the years 1890 and 1891, with a guarantee against loss up to £1,000 in each year. Mr. J. M. Cook, the Managing Partner of the firm, when replying to this letter on the 9th December 1889, took exception to some of the criticisms contained in the reports of the local authorities, and stated that he would leave the decision as to the acceptance of a continuance of the arrangements for the years 1890 and 1891 to his son, Mr. F. H. Cook, who was then proceeding to India. On the 15th January 1890, the latter gentleman intimated that he had decided to continue the arrangements for at least the period of two years during which the Government had offered to continue its assistance.

5. The report on the working of the arrangements during 1889 showed that 11,544 pilgrims left Bombay for the Hajj, in 15 steamers, of whom 4,460 (or 38·6 per cent.) were conveyed in the four steamers chartered by Messrs. Cook & Son. The amount of compensation claimed by the firm was Rs. 3,266 on account of the losses sustained in connection with the pilgrim traffic to the Hedjaz in 1889, and Rs. 4,969 representing the losses incurred in previous years, which had not been covered by the guarantee. The former sum was paid to Messrs. Cook & Son, but the Government of India did not consider the firm to be entitled to the latter sum.

6. The report on the arrangements made in 1890 showed that of 9,953 pilgrims who left Bombay for the Hedjaz in eleven steamers, 4,220 (or 44½ per cent.) were conveyed in the four steamers chartered by Messrs. Cook & Son. The statement of account submitted by the firm showed a claim against the Government of Rs. 12,761-15-4, which sum included Rs. 6,272 on account of losses incurred in previous years. In Home Department letter dated the 25th August 1891, the Government of India sanctioned the payment of the sum of Rs. 6,489-13-10, being the amount of actual loss sustained during 1890.

7. On the 29th June 1891, the firm again addressed the Government of India regarding the question of continuing the arrangements. They expressed their conviction that the business of conveying pilgrims to the Hedjaz under the conditions proposed by them and accepted by the Government of India could

never be made self-supporting, and enquired whether the Government was prepared to guarantee them against actual monetary loss. They stated that to enable the arrangements to be carried out in a satisfactory manner, it would be necessary to put on a special service of steamers to compete with the shippers who had been in the trade for many years, and that an increase in the amount guaranteed would be necessary. The Government of India were reluctant to withdraw from the scheme without a further trial of it, and expressed their willingness to continue existing arrangements for a further period of two years (1892 and 1893). This was eventually arranged on condition that the Government of India should pay to the firm the sum of Rs. 6,272 claimed as losses over the sums guaranteed in previous years, and should continue the indemnity and allow losses accruing to the firm in 1892 to be carried on to the accounts for 1893, provided that the total indemnity for those two years should not exceed £2,000. These terms were accepted by the firm in their letter dated the 21st April 1892.

8. The report of the arrangements for the year 1891 showed that out of a total of 12,032 pilgrims who left Bombay for the Hajj in 18 steamers, 4,485 (or 37·2 per cent.) were conveyed in four steamers chartered by Messrs. Cook & Son. The amount of compensation paid to the firm for the losses of the year was Rs. 14,471-8-5.

9. The report on the pilgrim traffic for the year 1892 showed that 12,466 pilgrims left Bombay for the Hedjaz in 19 steamers, and that only 2,939 (or 23·5 per cent.) were carried by Messrs. Cook & Son in three steamers chartered by them. In addition to these the firm conveyed 732 pilgrims in one steamer from Calcutta. The Government of India sanctioned the payment to the firm of the sum of £1,000 towards the loss of Rs. 36,147-2-9 (=£2,259-3-9) sustained by them during the year.

10. In a letter dated the 20th July 1893, Messrs. Cook and Son enquired what were the intentions of the Government of India as to any further continuation of the arrangements with the firm for the conveyance of pilgrims to the Hedjaz, and the Government of India consulted the Government of Bombay upon the matter. The report of the Government of Bombay showed that during the official year 1892-93 the number of pilgrims embarked from Bombay was 11,896, of whom only 1,656, or not quite 14 per cent., were booked by Messrs. Cook & Son. The Bombay Government considered that the influence of Messrs. Cook & Son on the working of the pilgrim traffic was diminishing, and were unable to recommend that the existing arrangements should be continued. The Government of India came reluctantly to the conclusion that they would not be justified, in view of the diminishing number of pilgrims carried through the agency of Messrs. Cook & Son, in continuing the subsidy to Messrs. Cook & Son after 1893. This decision was intimated to the firm and communicated to Her Majesty's Secretary of State for India.

11. The report of Messrs. Cook & Son on the working of the arrangements during 1893 has now been received and considered by the Government of India, and the accounts for the year have been audited by the Accountant-General. The report shows that, in 1893, 18,468 pilgrims left Bombay for the Hedjaz in 29 steamers, but Messrs. Cook & Son only conveyed 1,767 (or 9·5 per cent.) in two steamers. These figures, it appears to the Government of India, are sufficient in themselves to justify the decision come to in October 1893 to terminate the arrangements with Messrs. Cook & Son. The accounts of the pilgrim traffic for that year show that the receipts to the firm from all sources amounted to Rs. 65,636-10, and the expenditure to Rs. 61-348-2-11. There was thus a net gain of Rs. 4,288-7-1 on the year. In pursuance of the conditions accepted by the firm in 1892, the Government of India have to make good the losses of the two years 1892 and 1893 together up to the limit of £2,000. The payment of Rs. 16,023-10-10 has accordingly been sanctioned. With the payment of this sum Messrs. Cook & Son will be recouped for all losses shown in their accounts and admitted on audit by the Accountant-General of Bombay, which have been incurred by the firm since 1887 in connection with their transactions for the conveyance of Indian pilgrims to and from Arabia.

12. In sanctioning the above payment the Governor-General in Council has thought fit to review the history of the arrangements, which were brought to a termination last year, between Messrs. Cook & Son and the Government of India. His Excellency in Council fully recognizes the good work done by the firm in improving the conditions under which Indian pilgrims during the last few years proceeded to the Hedjaz. Its influence has in his opinion been especially manifested in the reduction of the opportunities for extortion. The Governor-General in Council is aware that difficulties were encountered by Messrs. Cook & Son in the opposition of the shippers interested in the traffic, but His Excellency in Council was not without hope that the popularity of the vessels of so influential a firm would have been so great that in time the continuance of the arrangements would not have necessitated a guarantee. This hope has not been realized, and the reports for recent years show that the firm's vessels have lately been less popular as compared with those of other charterers than they were. In these circumstances the Governor-General in Council was forced to conclude that the experiment which had been fully and fairly tried was not likely to be more successful in future, and that the time had come for the discontinuance of the annual subsidy.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations, to the Foreign and Financial Departments, and to Messrs. Thomas Cook and Son, Bombay, for information.

Ordered also that the Resolution be published in the Supplement to the *Gazette of India* for general information.

(True Extract.)

J. P. HEWETT,

*Offg. Secretary to the Government of India.*

## WEATHER AND CROP REPORT.

*For the week ending the 18th February, 1895.*

**Burdwan.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops and sugarcane continue to be favourable. Fodder and water sufficient. Price of common rice varies from 10 to 20 seers per rupee.

**Midnapore.**—Rainfall nil. Weather seasonable. Paddy is being threshed. Prospects of *rabi* crops good. Fodder and water sufficient. Rice selling from 15 to 21 seers per rupee.

**24-Parganas.**—Rainfall at Sadar 0·01. Weather seasonable. Prospects of standing crops good. Harvesting of *aman* finished. Condition of cattle good. Fodder and water sufficient. Rice sells at—

				Srs.	Ch.	
Sadar	...	...	...	11 to 14	0	} per rupee.
Barasat	...	...	...	15	0	
Diamond Harbour	...	...	...	15	0	
Basirhat	...	...	...	13	5	

**Murshidabad.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops, indigo, sugarcane and mulberry are good. Fodder for cattle sufficient. Common rice sells at 10½ seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* is over. *Rabi* crops doing well; the outturn is estimated at 16 annas. No cattle disease. Fodder and water sufficient. Common rice sells from 16 to 22 seers per rupee.

**Dinajpur.**—Rainfall nil. Weather fine. Prospects of crops good. Sugarcane is being pressed. No report of any disease among the cattle, and no complaint of fodder and water. Common rice sells from 14 to 16 seers per rupee.

**Rangpur.**—Rainfall nil. Weather seasonable. Prospects of crops good. Cultivation of *dhadoi* crops in progress. Price of rice 9 to 13 seers per rupee.

**Pabna.**—Rainfall nil. Weather clear and cool. Prospects of crops continue good. Cutting of sugarcane in progress. Fodder and water sufficient. Common rice selling at 18 to 20 seers per rupee.

**Dacca.**—Rainfall nil. Weather seasonable. Prospects of standing crops fair. Rain wanted. Ploughing for early rice and jute going on. No cattle-disease. Fodder available. Price of common rice varies from 12 to 20 seers per rupee.

**Chittagong.**—Rainfall nil. Weather seasonable. Cultivation of *rabi* crops in over. Prospects fair. Rain much needed. Water and fodder sufficient. Prices stationary.

**Patna.**—Rainfall nil. Peas and mustard being harvested. Other *rabi* crops doing well. Poppy being lanced in places. Prices of common rice:—

Sadar	...	...	...	Srs.	} per rupee.
Bihar	...	...	...	18	
Barh	...	...	...	20	
Dinapore	...	...	...	17½	
				17½	

• **Gaya.**—Rainfall nil. Weather clear. *Rabi* crops doing well. Prospects of poppy fair; lancing has begun. Fodder and water sufficient. Prices about normal.

**Champaran.**—Rainfall nil. Prospects of *rabi* crops and poppy good. Fodder and water for cattle sufficient. Common rice selling at 16½ seers per rupee.

**Darbhanga.**—Rainfall nil. *Rabi* prospects continue favourable. Mustard has begun to be harvested in places. Poppy doing well. Fodder for cattle sufficient. Prices stationary.

**Bhagalpur.**—Rainfall nil. Weather seasonable. Standing crops doing well.

**Purnea.**—Rainfall nil. Weather seasonable. Wheat, linseed, gram and other standing crops promise well. Harvesting of mustard and tobacco going on with a fair outturn. Common rice selling from 15 to 24 seers per rupee. Fodder and water sufficient. No cattle-disease.

**Cuttack.**—Rainfall nil. Weather growing hot. *Daba* (spring rice) coming on well. Prospects of tobacco and mustard good. Condition of cattle good. Fodder sufficient. Rice sells from 11 seers 13 chitaks to 25 seers per rupee in the district.

**Hazaribagh.**—Rainfall nil. Weather cloudy. Prospects of *rabi* crops good. Poppy doing well; *kotli* measurement completed. Fodder and water abundant. Common rice selling from 14 to 20 seers per rupee.

**General Summary.**—There was no rain in the Province during the week. The *rabi* crop is generally promising, but in Eastern Bengal it requires rain. The preparation of the soil for the autumn crops is going on in parts of Eastern and Northern Bengal. In some districts the harvesting of mustard and peas has begun, and the pressing of sugarcane is in progress. The lancing of poppy is going on in Patna, Gaya, and Monghyr. Tobacco is being harvested in Purnea with a fair outturn. The price of common rice continues generally steady and normal. No outbreak of cattle-disease is reported.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 19th February, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

The following Statement shows the Quantities of the Principal Staples of Traffic imported into Calcutta from the Interior, during the month of November, 1894.

The mean pressure of the seven days ... .. 29.986

The average pressure of the corresponding period for 24 years, Surveyor-General's Office ... .. 29.949

The total number of hours of bright sunshine ... .. 58.5

The maximum possible number of hours of sunshine ... .. 79.3

The mean temperature of the seven days ... .. 70.0

The average temperature of the corresponding period for 24 years, Surveyor-General's Office ... .. 72.5

The extreme variation of temperature ... .. 29.1

The maximum temperature ... .. 82.7

The highest velocity of the wind in one hour ... .. 9

The mean relative humidity ... .. 68

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office ... .. 68

The total fall of rain from 10th to 16th February 1895 ... .. 0.01

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 0.32

The total fall from 1st January to 16th February 1895 ... .. 0.02

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 1.05

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

☁, dew; ☁, fog; d, drizzling rain.

\* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the readings during the same period for the mean of the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question. The station in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 16th of February 1895.

DISTRICT OBSERVATIONS.															District.
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	OF WEEK.			RAINFALL.							
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

															Singbhum.

\* mean of 6 days.

last ten years. The variations are *negative* when the mean of the week is less than the corresponding normal mean, and *positive* when greater. Numbers denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the local District observations of rainfall the normal during the past ten years. The means of the district are the numerical average of the rainfall returned received in the district, i.e., from total rainfall at the subdivisions.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 16TH OF FEBRUARY 1895.

At the close of the previous week the north-east monsoon conditions were rather strongly pronounced in Bengal, and weather was decidedly cooler and drier than usual. On the 10th, or the first day of the week under review, pressure had risen slowly in Bengal, while a brisk to rapid increase of temperature had occurred, the increase in the mean temperature at many stations equalling from  $3^{\circ}$  to  $5^{\circ}$ , while humidity had also generally increased. On the 11th pressure had commenced to fall, but the increase in temperature and humidity continued. A very slight disturbance also which had been affecting the weather in Baluchistan and the frontier districts for some days had on the 11th passed eastwards across Northern and Central India, and was affecting the western districts of the province and the north-eastern districts of the Central Provinces, and a few rain showers were reported in Chota Nagpur and Bihar also on the 11th. On the 12th pressure had again fallen slightly to briskly over the province, and the feeble disturbance was apparently lying over Bengal, where skies were highly to moderately clouded, and a few local showers were reported. On the 13th pressure had risen slowly to moderately, showing the disturbance was either slowly filling up or passing away, but still a considerable number of stations reported light rain, and skies were moderately clouded; temperature also was very high and considerably above the normal. On the 14th a brisk to rapid increase of pressure occurred over Bengal, and the disturbance completely passed away, so that skies again became almost cloudless and rainfall practically ceased, while a brisk fall of temperature and humidity also occurred on this day. On the 15th pressure again began to fall moderately in Bengal, though it was still in considerable excess, while temperature and humidity fell generally and fine settled weather prevailed. On the 16th or the last day of the week pressure had again fallen rather rapidly in Bengal, the usual fall equalling from  $0.06''$  to  $0.08''$  and pressure became in small defect over the whole province. Temperature, on the other hand, was not very far removed from the normal, as slight excess amounts were registered at the northern stations and slight defects at the central and southern stations. Weather, however, continued generally fine and settled.

*Pressure.*—The average pressure of the week has been not very far removed from the normal, and at the great majority of stations slight excess amounts, usually of a few thousandths of an inch only, have been registered. On the other hand, very slightly defective pressures have been generally registered in parts of Bihar and East Bengal.

*Temperature.*—The variations of temperature during the week have been rather large, but the average mean temperature has been in excess by  $0.7^{\circ}$ , the largest excess of  $1.5^{\circ}$  being registered in Bihar, while a normal temperature has been registered in South-West Bengal.

The actual temperatures registered during the week, and their variations from the normal temperature of the present season, are clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been generally small in the day or maximum temperatures, though the night temperatures show rather a larger variation, moderate defects being shown at some stations and moderate excess amounts at others.

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 16th of February 1895.*

	Normal mean maximum temperature for the week ending 10th February.	Actual mean maximum temperature for the week ending 16th February 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 10th February.	Actual mean minimum temperature for the week ending 16th February 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 10th February.	Actual mean daily temperature for the week ending 16th February 1895.	Variation of actual mean from the normal.
Cuttack	88.0	87.0	+1.0	65.4	66.4	-1.0	77.2	77.2	0
Calcutta	80.7	80.9	-0.2	59.3	59.1	+0.2	70.0	70.0	+0.0
Chittagong	81.1	81.6	-0.5	58.2	58.3	+0.1	69.7	69.0	+0.7
Burdwan	82.0	81.8	+0.2	57.7	56.2	+1.5	69.9	69.0	+0.9

Gaya	80.2	79.7	+0.5	55.4	56.3	-0.9	67.8	68.0	-0.2
Purnea	77.2	77.0	+0.2	53.1	53.1	0	64.7	64.5	+0.2
Huairibagh	76.3	76.4	-0.1	53.3	53.7	-0.4	64.8	65.0	-0.2
Darjeeling	45.4	45.4	0	32.9	30.3	+2.6	39.2	40.4	-1.2

*Rainfall.*—The only division which has received any important rainfall is Orissa, which has averaged  $0.86$  inch. In South-West Bengal, East Bengal and Chota Nagpur also a few local falls have been received, but they have been of no practical importance.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 16th of February 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

*Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.*

THE Council met at the Council Chamber on Saturday, the 16th February, 1895.

### Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General*.

The HON'BLE H. J. S. COTTON, C.S.I.

The HON'BLE SIR JOHN LAMBERT, K.C.I.E.

The HON'BLE D. R. LYALL, C.S.I.

The HON'BLE J. A. BOURDILLON.

The HON'BLE MAULVI ABDUL JUBBAR KHAN BAHADUR.

The HON'BLE F. R. S. COLLIER.

The HON'BLE C. E. BUCKLAND.

The HON'BLE C. A. WILKINS.

The HON'BLE ROMESH CHUNDER DUTT, C.I.E.

The HON'BLE SURENDRANATH BANERJEE.

The HON'BLE L. GHOSE.

The HON'BLE MAULVI SERAJUL ISLAM KHAN BAHADUR.

The HON'BLE MAHARAJA JAGADINDRA NATH ROY OF NATOR.

The HON'BLE MAULVI MUHAMMAD YUSUF KHAN BAHADUR.

## ASSAULT BY MR. BEATSON-BELL.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to an assault alleged to have been committed by Mr. Beatson-Bell, Joint-Magistrate of Tippera, upon an Indian Deputy Magistrate of the place? Whether the matter has formed the subject of any official correspondence? If so, will the Government lay on the table the correspondence which has taken place in this connection?

The Hon'ble MR. LYALL, in the absence of the Hon'ble MR. COTTON, replied:—

“The attention of Government was drawn to this matter, but it has not formed the subject of official correspondence, and no papers therefore can be laid on the table.

“The facts of the case are briefly as follows:—Athletic sports were being held at Comilla on New Year's Day, and were attended by a large crowd: Mr. Beatson-Bell, while engaged in keeping the course clear, gave a push to a Deputy Magistrate, who was among the crowd and was not known to him at the time, and that gentleman unfortunately stumbled and fell, dislocating his shoulder. No one can regret this incident more deeply than Mr. Bell does, and the Deputy Magistrate, whose conduct is very creditable to him, has been the foremost to acknowledge the accidental character of the injury he sustained.”

## STOPPAGE OF A RELIGIOUS CEREMONY AT PAKOUR.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to the proceedings of the Subdivisional Officer of Pakour in the Sonthal Parganas, as published in the *Murshidabad Hitaishi* of the 7th November, 1894, which says that the Subdivisional Officer stopped a particular religious ceremony observed from time immemorial, on the occasion of the annual Kali Puja, by the *Goalas* of that part of the country, and thus hurt the religious feelings of the local public, and caused great dissatisfaction among the orthodox Hindus of the locality? Will the Government be pleased to order an enquiry, and adopt such measures as it may think fit with a view to prevent such interference in future?

The Hon'ble MR. COTTON replied:—

“The attention of Government was attracted to the paragraph in the *Murshidabad Hitaishi* referred to, and enquiry was made on the subject. It was ascertained that it was an old custom among the Sonthali cowherds on occasion of the Kali Puja to cast a pig among a herd of cattle, by whom it is gored to death in a brutal manner. Mr. McLaren Smith, the Subdivisional Officer of Pakour, considering this custom to be a breach of the law for the prevention of cruelty to animals, prohibited it by executive order in 1893 and again in 1894. The cowherds represented the matter to the Commissioner when he recently visited the subdivision, but Mr. Toynbee declined to interfere. The Lieutenant-Governor approves Mr. McLaren Smith's action, and declines to believe that the prohibition of this barbarous and disgusting custom can have hurt the religious feelings of any orthodox Hindus.”

## THE LEPERS BILL.

The Hon'ble MR. BOURDILLON moved for leave to introduce a Bill to provide for the segregation of pauper lepers, and the control of lepers exercising certain trades. He said:—

“MR. PRESIDENT—In accordance with the List of Business of the day, I have now to move for leave to introduce a Bill to provide for the segregation

of pauper lepers and the control of lepers exercising certain trades; and in conformity with the practice of this Council, I have now to introduce the Bill by concisely giving the history of its origin, and by explaining at somewhat greater length than could be done in the brief Statement of Objects and Reasons what its chief objects are, and what means Government propose to adopt in order to carry them out. Any discussion which may be thought desirable in respect of the principles on which it is based will take place when I next move on a subsequent occasion to refer the Bill to a Select Committee.

"It is unnecessary for me to lay before this Council any elaborate history of leprosy in India, to quote instances from Indian history to prove its existence from the earliest times, or to depict the treatment of lepers at various epochs. Let it suffice to say that the leper has always evoked the sympathy of the benevolent, and sometimes the antipathy of the ignorant, while he has from time to time attracted the fiftful attention of the ruling power. But whatever has been done for the relief of lepers has been done in a desultory fashion; and although shelters are believed to have been erected in various places, and the Calcutta Asylum was established in 1811, yet no concerted scheme to better their condition has ever been carried into effect in Bengal, and no actual steps, so far as I know, have ever been taken to enforce the segregation of pauper lepers while providing them gratuitously with food, shelter and medical treatment.

"Of late years, however, public interest in the condition of lepers has been aroused in many countries. The National Leprosy Fund was started under the presidency of the Prince of Wales in 1889, and the attention of educated India was attracted to the subject at about the same time. In 1888, the Government of India, in a Resolution dated the 26th September, encouraged the grant of medical and charitable relief to lepers in voluntary hospitals and leper asylums. In the following year, the Governor General found reason to again consider the subject, and under his orders another Resolution was recorded on the 15th June, 1889, in which it was laid down that, in the opinion of His Excellency in Council, further measures might with advantage be taken with the object of promoting the establishment of asylums or retreats for lepers, and of giving legislative sanction to the retention of lepers in such retreats. With this Resolution a draft Bill was circulated to Local Governments for report, and they were invited to consult the best available opinion on the matter, both official and non-official. The main provisions of this Bill did not differ very greatly from those which are contained in the Bill now to be laid before Council, but it contained a clause allowing lepers voluntarily to seek admission into a retreat or asylum, either for life or for a term of years: it provided for the punishment of lepers who escaped from retreats, insisted on the separation of the sexes among segregated lepers, and gave general powers to Government to make rules for the management and discipline of asylums: it did not lay down, with the precision of the present Bill, the distinction between pauper lepers and others, nor did it make any provision for the prohibition of lepers not paupers from engaging in certain trades or callings which would bring them into immediate contact with the food, drink and clothing of their fellow-men. No less than forty-one non-official bodies and leading officials were consulted, and their opinions were communicated to the Government of India with Sir John Edgar's letter of the 23rd January, 1890. Sir Steuart Bayley accepted generally the provisions of the Bill, but pressed the necessity of prohibiting those coming under the definition of lepers, under penalty of compulsory detention in an asylum, from engaging in trades which involve the preparation and sale of food or clothing, or as washermen, or barbers, and from the use of public tanks, possibly also of travelling by public conveyance. He also proposed to authorise Local Governments to compel contributions from municipalities for the lepers found in such municipalities asking for alms or wandering about without ostensible means of subsistence.

"Not many months after the despatch of this report, the Secretary of State agreed to the proposal of the Executive Committee of the National Leprosy Fund to appoint the Leprosy Commission, which in due course visited India in 1890 and 1891, and submitted a report in the year 1893. While the enquiries of this Commission were proceeding, the Government of India took no action

in the matter; but on the 15th September, 1893, the Supreme Government forwarded to the Government of Bengal certain papers received from the Executive Committee of the National Leprosy Fund commenting upon the report of the Leprosy Commission, together with a memorandum by the Surgeon-General with the Government of India, and requested the Lieutenant-Governor to favour them with his recommendations for giving practical effect to the conclusions of the Leprosy Commissioners.

"At the time that these orders were received, Sir Antony MacDonnell was officiating as Lieutenant-Governor of Bengal, and under his instructions a Resolution was recorded (No. 608T.M. of the 31st October, 1893), in which he reviewed the existing state of the law as regards the control over lepers, and the power of isolating them, whether in Calcutta, in mufassal municipalities or in rural areas generally, and sketched in general terms the measures which he considered to be at once desirable and practicable for the amelioration of the condition of the lepers themselves, and for the protection of the general public. Copies of this Resolution were forwarded for opinion to those persons and public bodies who seemed most likely to make suggestions of value, or who were most closely concerned with the subject, and when the replies were received, it was found that they displayed a general consensus of opinion in favour of a modified system of compulsory segregation and of rigid prohibition from the pursuit of certain trades and callings, while the Legal Remembrancer, who was one of those consulted, advised that these ends could not be compassed without recourse to legislation. In accordance with these recommendations the Government prepared a draft Bill, which was forwarded to the Government of India on the 19th June last for approval, and sanction to its introduction into the Bengal Legislative Council was received on the 7th instant.

"The Bill divides itself naturally into three parts. The first part, consisting of sections 1 to 6 and section 15, lays down some necessary definitions, and gives to the Local Government certain essential powers. The second part (sections 7 to 11) deals with the segregation of pauper lepers; while the third part (sections 12 to 14) treats of the restraints to be placed upon lepers who are not paupers, in respect of the exercise of certain callings.

"Turning back to the first group of sections, it will be observed that the definition of leprosy for the purposes of this Act is made to turn upon the question of ulceration. The Lieutenant-Governor is advised that whatever the class of leprosy, whether tubercular, anæsthetic, or a combination of the two, the period of possible contagion is not reached till ulceration has set in, and for this reason he proposes to make the presence of that condition the test of leprosy. The definition of pauper leper, on the other hand, is based upon the provisions of section 70 of the Calcutta Police Act [IV (B.C.) of 1866] and of section 3 of Bombay Act VI of 1867. Section 3 of the Bill also follows to some extent section 1 of Bombay Act VI of 1867, and empowers the Local Government to declare any place to be a Leper Asylum, and to notify the local areas from which lepers may be sent to it. Section 4, which is taken from section 3 of the draft Bill originally propounded by the Government of India, empowers local authorities to expend funds on, and appropriate property to, leper asylums. Section 5 gives the Lieutenant-Governor the necessary power of appointing Inspectors of Lepers and Superintendents of Leper Asylums with the necessary establishment, and section 6, following the analogy of section 2 of Act XXXVI of 1858, empowers him to appoint a Board for each Leper Asylum, as he can now do for each Lunatic Asylum in the Province. Section 15 bestows on the Local Government the necessary authority to make rules for carrying out the purposes of the Act.

"Sections 7 to 11 deal with the arrest and examination of pauper lepers within duly defined local areas for which a leper asylum has been provided, as well as for their detention and inspection in, and discharge from, such asylums. Section 7 follows sections 70 and 72 of Act IV (B.C.) of 1866, which already in Calcutta empower any police officer to arrest without warrant any person begging in a public place or exhibiting sores in order to excite charity, and it also follows, with slight modifications, section 54, Act X of 1882. Sections 8 and 9 provide that a person who is suspected of being a pauper leper shall be brought without delay before an Inspector of Lepers, and

then before a Magistrate duly authorized under this Act, and the procedure laid down in both these sections has been made as summary and simple as possible. Briefly, the Inspector of Lepers will decide whether the person brought before him by the police as a pauper leper is a leper or not; if he is not, he will be discharged with a certificate to that effect; if he is, he will be forwarded to the Magistrate, and the latter will decide whether he is a pauper leper or not. Sections 10 and 11 provide for the periodical inspection of lepers by the Asylum Board after their admission to an asylum, and for their discharge whenever such a course is possible: the provisions of the Lunatic Asylums Act (XXXVI of 1858, sections 3 and 9) have been closely followed.

"The control of lepers other than paupers, and of their connection with certain trades and callings, is dealt with in sections 12 to 14. The object of these sections is to prevent lepers from engaging in trades which are closely connected with the food, drink and clothing of their fellow-men. Therefore section 12 enables Municipal Commissioners, by bye-laws under the Municipal Acts, duly made and approved by the Local Government in that behalf, to prohibit any person who is reasonably believed to be a leper from carrying on any of certain specified trades or callings within defined limits until he has proved that he is not a leper. In order to make this section still further effective, section 13 empowers an Inspector of Lepers to examine (with proper safeguards) persons suspected to be lepers, while an appeal to the Local Government against a certificate of leprosy is provided by section 14 for lepers other than pauper lepers. The latter can present themselves constantly before the Visiting Board, and no further right of appeal seems required in their case.

"The schedule to the Act prescribes the necessary forms of certificate of leprosy and non-leprosy, of warrant for detention in a Leper Asylum, and of discharge.

"In the foregoing remarks I have indicated the leading features of the Bill, and I have now to say only a few words as to the extent to which Government propose to introduce its provisions, the number of persons likely to be affected by it, and the experience gained in Bombay by those who have been administering a similar measure for some years.

"From the first it has been recognised as probably desirable that legislation should be resorted to in order to enforce the segregation and regulate the conduct of lepers in towns only, and that no attempt should be made to interfere with the movements of lepers in rural areas. This policy has not been lost sight of in the preparation of the present Bill, and there is no intention of extending its provisions to rural areas. The portion which deals with the arrest and detention of pauper lepers cannot come into force anywhere until, under section 3, the Lieutenant-Governor has notified a place to be a Leper Asylum, and has under the same section notified and defined the local areas from which lepers may be sent to such asylum. It is the intention of the Government to notify under this section no local areas except municipalities, so that the powers given to the Police by sections 7, 8 and 9 will be exercised in municipalities only, for the Lieutenant-Governor thinks that it would be unwise to give such power of arrest to the district police in villages and on country roads. The portion of the Bill (sections 12—14) dealing with lepers who pursue certain trades will extend, on the passing of the Act, to all municipal areas; but the bye-laws, without which these provisions of the Bill will remain inoperative, will require the sanction of the Local Government, and an appeal will lie against any order passed by an Inspector of Lepers under section 12.

"Of the number of persons who would at once be affected by the passing of this Act, it is impossible to give any estimate. The published statistics of the Census of 1891 do not show separately the lepers in municipalities and those in the country. Moreover, even did they do so, some additions would probably have to be made to the figures on account of incomplete enumeration, especially in the case of females, and large deductions would be necessary to allow for those who are either pauper lepers or who do not carry on any of the forbidden trades. In regard to pauper lepers, the number who would at once be affected by the provisions of sections 7 to 11 of the Act is greatly restricted by the fact that until a duly constituted asylum is provided, and local areas are defined from which lepers may be sent to it, the Police cannot exercise the powers of arrest and a

forth given them by sections 7, 8 and 9 of the Act. As far as Government are aware, the Asylum in Calcutta is the only public asylum in Bengal which could now be notified under the Act, and the consequence is that for the present, at any rate, the provisions of sections 7—11, if they become law, will apply to Calcutta alone, and to such municipalities within a convenient distance of it as Government may see fit to notify under section 3. The Committee which sat in 1890-91 to consider the question of removing the Calcutta Leper Asylum found that the number of pauper lepers in Calcutta in September, 1890, was 365, and it may be assumed that the number at present is about the same.

"In Bombay proposals were made so long ago as 1885 for the segregation of pauper lepers, but it was not till 1889 that active measures were adopted to seclude lepers of this class. In that city a resort to legislation was unnecessary, as the existing laws empowered the Local Government to declare a place to be a leper asylum, and to declare black leprosy to be an infectious disease dangerous to life, and Resolutions to this effect having been passed by Government, the Health Officer of the Port of Bombay was able, under Bombay Act VI of 1867, to cause to be conveyed to a house of detention and there to be detained any person suffering from black leprosy. In 1890, Sir Dinshaw Manockjee Petit contributed the sum of one lakh of rupees towards the scheme on certain conditions, and another lakh of rupees having been raised by the indefatigable exertions of Mr. Acworth, the Municipal Commissioner, and a strong Committee, a site was selected and work commenced on the 19th August of that year. By the 17th June, 1891, the buildings were completed and occupied, accommodation being provided for 270 lepers in the dry and 250 in the rainy season. The asylum is maintained at the joint cost of Government and the Bombay Corporation, and according to my information it has proved a most unqualified success. The streets of Bombay are cleared of the miserable lepers who used at one time to infest them, and these poor sufferers are well cared for and supplied with all reasonable comforts in large and healthy quarters. I have myself visited the institution, and gladly take this opportunity of again recording my admiration for the work done—a sentiment which I believe to be shared by every visitor to the place, and I have no hesitation in saying that, if every member of this Council had enjoyed a like opportunity, this Bill, in so far as it aims at providing similar institutions for Calcutta and Bengal, would be passed without a dissentient voice.

"I have now to move that the Bill be introduced in Council: I will only urge once more that the measure is admittedly tentative and cautious, and that it is believed to command the general approval of all classes of the community: it embodies no scheme for the general arrest and incarceration of lepers: its provisions, so far as pauper lepers are concerned, will be confined to municipal towns, for the lepers found in which a suitably equipped Leper Asylum has been provided, and for the present there is only one recognized public Leper Asylum in the Province. Lastly, those provisions of the Bill which regulate the trades of lepers, and which, on the passing of the Bill, may be enforced in any municipality as soon as proper bye-laws have been passed, have, it is believed, been fenced about with all the safeguards necessary to prevent abuses and persecution on the one hand, and on the other hand to protect the public as far as may be from the risk, whether real or imaginary, of contracting a disease which has by all nations and in all ages been regarded with peculiar loathing and abhorrence."

The Motion was put and agreed to.

The Hon'ble Mr. BOURDILLON also applied to the President to suspend the Rules for the Conduct of Business.

The Hon'ble THE PRESIDENT having declared the Rules suspended—

The Hon'ble Mr. BOURDILLON introduced the Bill, and moved that it be read in Council.

The Motion was put and agreed to.

The Bill was read accordingly.

## CALCUTTA AND SUBURBAN POLICE ACTS, 1866, AMENDMENT BILL.

The Hon'ble SIR JOHN LAMBERT moved that the Bill to further amend the Suburban Police Act, 1866, and the Calcutta Police Act, 1866, be referred to a Select Committee consisting of the Hon'ble Mr. COTTON, the Hon'ble MAULVI ABDUL JUBBAR KHAN BAHADUR, the Hon'ble BABU SURENDRANATH BANERJEE, the Hon'ble Mr. GHOSE, the Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR and the Mover.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"With your Honour's permission I desire to make a few observations upon the Bill, which is now about to be referred to Select Committee. I must say that I cannot approve of the principle of the Bill in the shape and form in which it has been presented to us. I object to section 5 of the Bill and the principle which underlies that section. I object to the enlargement of the powers of the Police contemplated under that section. I am sorry to find myself in this matter in opposition to the hon'ble member to my right (MAULVI MUHAMMAD YUSUF), who, when the Bill was introduced at the last meeting, was not only pleased to speak in support of its provisions, but even went to the extent of observing that it did not go sufficiently far. My contention is different. My contention is, that the Bill goes a great deal too far. That it goes further than what is safe for us as a Legislature to provide, that it involves a dangerous principle, that it contains a menace to the interests of personal liberty held out in the name of Purity and Morality. I do not wish to be misunderstood. I am friendly to the Purity party, and to the movement which that party have inaugurated in this city. I sympathize with their aims and aspirations. I think they are doing a noble and a splendid work. I will even go further and say that no right-minded person, feeling the least concern in the well-being of the youthful section of the community, can withhold from them the tribute of his respect and admiration; they desire to place a lofty ideal of purity before our young men, and they wish to save them from those temptations to which they are specially exposed in a city like Calcutta. But great as may be my respect for the devoted men connected with the work, unstinted as may be the measure of my admiration for their ardour and self-sacrifice, I feel even a greater degree of solicitude for the maintenance of the rights of personal liberty against the abuse of power. I hope I shall not be accused of importing into this Council a new spirit, so far as our present deliberations are concerned, if I venture to affirm, even in the presence of the Hon'ble SIR JOHN LAMBERT, that the one department of the State which gives the least satisfaction is the Police; that it is capable of considerable improvement, specially as regards the material with which the subordinate ranks of the Police are manned. And yet it is gravely proposed under section 5 of the Bill to confer upon police officials, above the rank of constable, the power to arrest without warrant any person who is presumed in their presence to be making solicitations to immorality. I say that this is a dangerous power to confer upon subordinate police officers. Why, even in England, the exercise of this power has been attended with grave abuse. Hon'ble members will remember the case of Miss Cass. Here was a respectable young lady arrested by a police constable, hauled up before a Police Magistrate, and ignominiously placed upon her trial upon a charge than which it is impossible to conceive a fouler charge as against a young lady. Thanks to the spirit of British justice which prevails in England, she was acquitted. The police constable got his dues. He was tried for perjury, was convicted, and sentenced to imprisonment. This happened in England, in a country where public opinion is strong, where it affords a sufficient safeguard against the extravagances of power, and where the Police are remarkable for their discipline, their devotion to duty, and their freedom from corruption.

"If, under these favourable conditions, a case like this could occur in England, what may we not expect in a country like India, where the Police is what it is, and where public opinion is feeble even to the verge of impotency? What is the justification for this section? The hon'ble member has himself

told us that so far as he is personally concerned, he does not think the evil complained of has assumed grave proportions. I may be allowed to premise. I think I do him no injustice if I assume that if the hon'ble member was left to himself, if he was left to his own unaided impulses, he would not have recommended a provision like this for the consideration of the Council.

"The justification of the Bill is therefore to be sought for, as the hon'ble member himself has told us, in some representations made by certain respectable Native and European gentlemen. I have had an opportunity of discussing the matter with one of the most influential of these gentlemen—the Hon'ble SIR ROMESH CHUNDER MITTER, and I have his authority to say that he strongly condemns this provision of the Bill; he said that he did not want such a provision; that his party did not want such a provision; that they have not got what they wanted, and their memorial fully confirms this view of the matter. I have before me a copy of the memorial which was presented to the Government. The memorial consists of 13 paragraphs, and of the 13 paragraphs, 7 are devoted to the question of the suppression of brothels in this city. The memorialists say that the law on the subject is inadequate; they pray for an enlargement of the provisions of the law in this respect, and they recommend that the Indian law on the subject should be placed upon the same footing with the English law. There is only one paragraph devoted to a request for the suppression of solicitations to immorality. The Bill does not say a single word in reference to that which constitutes the chief prayer, the burden, if I may so call it, of the memorial. But it introduces a matter, which is a subsidiary matter so far as this petition is concerned. I will read this paragraph from the memorial:—

'That your memorialists beg also to point out that there is no provision in the Calcutta Police Act for dealing with open solicitations to immorality, and your memorialists pray that such solicitations may be made distinctly punishable by an enlargement of the scope of section sixty-eight of the said Act, which deals with indecent behaviour, or of section sixty-six of the said Act, which provides against sundry public nuisances, or such otherwise as to your Honour may seem fit.'

"It will be seen from the extract which I have just read that the procedure which is followed in the Bill is not the procedure which they recommend. They pray for an enlargement of section 2 of Act II of 1886, which has superseded section 68 of the Calcutta Police Act. They pray for an enlargement of that section, and not for an enlargement of the powers of the Police, and I think all that it is necessary to do is to add an explanatory note regarding the meaning of the words 'indecent behaviour,' so that they should include solicitations to immorality. This, I think, will satisfy the memorialists, and it is certainly the view of the Hon'ble SIR ROMESH CHUNDER MITTER. These and other matters will no doubt receive the earnest attention of the Select Committee, and I hope and trust that they will see their way to omit section 5 of the Bill altogether. In the endeavour to promote morality, let us not jeopardise the interests of personal liberty. But should the balance of opinion prevail against the view which I have ventured to put forward, I have yet another recommendation to make in this connection—a *via media*, which, I think, will reconcile conflicting opinions. I recommend that the principle of local option be recognised in this section, that the section should not be extended to any locality except upon the application of, say, a hundred or more of the most respectable inhabitants of the place, or of those who resort to it for business purposes. Without some such safeguard, I am afraid the section in its practical operation will be attended with great abuse: it will be a fearful instrument of oppression in the hands of unscrupulous men, and the Bill itself will awaken the gravest public dissatisfaction."

The Hon'ble MR. GHOSE said:—"I am afraid, Sir, this Bill will have to undergo very material modifications before it can be safely passed by this Council or before it can be accepted by the general public. It has already evoked adverse criticism in the columns of the public press, and I find myself in entire sympathy with much of that criticism. If it was found necessary to invest the hon'ble member in charge of the Bill with additional powers in his capacity of Commissioner of Police, for the purpose of abating nuisances

arising in connection with the existence of disorderly houses in respectable neighbourhoods, I should have heartily supported such a proposal. Then there is another evil which has sprung up of late years, and which is certainly not of indigenous growth—I allude to the ostentatious flaunting of vice in places generally resorted to by the public during their evening drive, but so far as I am able to see this Bill does not profess to deal with that. No doubt it would be a difficult matter to prevent persons of any particular class from going to places of public resort so long as they do not misconduct themselves; but at the same time I do not see that there is any difficulty in dealing with the class of men who import these women, and live upon their earnings. But the present Bill proposes to deal with the evil of solicitation in public places, and it proposes to confer upon the Police special powers to repress it. Now the question which first arises is this: Does this evil exist to such an extent as to call for special legislation? My hon'ble friend, the Member for the Corporation, has pointed out that the hon'ble member in charge of the Bill told us, when asking for leave to introduce the Bill, that, speaking for himself, he did not think this evil had attained any considerable magnitude in this city, and I came to the same conclusion, namely, that if the hon'ble mover were left to himself he would probably not have considered it necessary to introduce any special measure. But be that as it may, the present Bill proposes to confer the most plenary powers upon all police officers above the rank of native constable in order to enable them to charge any woman with the offence of solicitation and to arrest her, if necessary, without any complaint whatever having been made by anybody. I am strongly opposed to any such measure. I believe it will lead to a system of wholesale and habitual blackmailing, and, as will not unfrequently be the case, to gross outrage and oppression towards respectable women of the humbler classes who may be charged with this offence.

“The higher and more opulent classes may be safe enough, but how about the poorer classes? Suppose a poor woman of perfect respectability, who is walking along the streets, stops for a moment to speak to a male friend or acquaintance, or even accosts a stranger, to direct her on her way to a particular place, and that she is watched by a police officer from the opposite side of the road; now if this Bill is passed into law, there will be nothing to prevent the police officer, if he were dishonest, from making the grave charge that she had been committing this offence? What would be the position of a respectable young woman under these circumstances? The question is not whether she would be eventually able to prove her respectability and innocence, but the shame and horror of such a charge would be overwhelming, and I think hon'ble members will agree with me that most respectable young women would submit to part with anything they possessed rather than let it be known that they had even been suspected of such conduct. It will be idle to say that no such cases are likely to occur.

“My hon'ble friend, the Member for the Corporation, has pointed out that such cases have happened even in England, and he has alluded to the case of Miss Cass, who fortunately was able to conclusively disprove the charge brought against her. But it would be impossible to exaggerate the horror of her position when she was charged with this offence, and the agonies of shame she must have suffered during and for a long time after the trial was over. You cannot even breathe upon the reputation of a woman, however lightly, without leaving some stain behind, and it seems to me that the shame and the stigma of such a charge would long cling to her, even after a triumphant acquittal. There is nothing on earth which could afford any adequate compensation to a woman who has been subjected to such an outrage. But in the case of a complaint you have some safeguard—you have, at any rate, some person who will be responsible for initiating such proceedings, and who, in the event of the charge being a false one, could be prosecuted under the Penal Code. You propose to do away with even that safeguard, so that if the woman succeeds in proving her entire innocence, all that the police officer has to say is that he made a mistake, but that he really believed she was soliciting. Now I respectfully submit that this is a state of things which the Legislature ought not to countenance.

"I am speaking now not on behalf of any particular class. If the Bill is passed into law, it will affect Europeans and Indians alike. There is a large and growing class of shop-girls in this city, European and Eurasian, who will be affected by this measure just as much as their Indian sisters, and when they come to realise the situation, I apprehend that the European and Anglo-Indian Defence Association will have something to say on the subject. But then it is said that respectable men ought to be spared the trouble and annoyance of having to appear in Court in connection with such cases. I confess I was astonished when I heard this. Are we seriously asked in this Council to have a more tender regard for the susceptibilities of men, however fastidious or squeamish, than for the overpowering sense of shame and for the irreparable wrong that may be caused to innocent women under your present proposal? I trust that the chivalry of hon'ble members will rebel against such a proposition.

"I have heard with very great pleasure that the Hon'ble SIR ROMESH CHUNDER MITTER, at least, has seen the danger to which this measure is liable. For my part, whenever any measure is introduced into this Council for the purpose of enforcing decency and order, I shall always be able heartily to approve of it. But with regard to the present Bill, I see in it elements of grave danger and abuse, and I feel it my duty to point it out at this the only stage at which the principle of a measure can be discussed. I trust the hon'ble member in charge of the Bill and others who support it will not allow their hands to be forced by a number of estimable and well-meaning, but utterly unpractical persons, who still seem to entertain a childlike faith in the exploded doctrine that immorality can be suppressed by Act of Parliament. The social evil has existed in every age and in every country, and I do not believe that a problem, the solution of which has hitherto eluded the grasp of the wisest and most far-sighted statesmen, is likely to be set at rest by undertaking hasty, sentimental and dangerous legislation at the bidding of irresponsible persons."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I have one or two observations to make. As regards section 5, I see that the police officers who have to take action under it must be officers above the rank of a constable, that is as it should be. The point which occurs to me is, whether it will be wise, and whether the balance of convenience or inconvenience points to the direction that police officers should take cognizance of the offence dealt with by this Bill without a complaint. As at present advised, I submit that it will be hazardous in the extreme, if police officers are allowed to take cognizance of this offence without complaint. What I mean by complaint is not a formal complaint to be lodged at the Police Court, for that course would amount to trifling with the Bill, and would frustrate and defeat the very object of the Bill, which aims at a speedy and easy means to enable the party aggrieved to have his redress for the insult offered to him whilst the insult is fresh in his mind. What I mean by complaint is, information given orally at the very moment to the police officer who is authorised to take cognizance of the offence.

"The second observation which I have to make is this: I said on the last occasion that this Bill did not go far enough—an expression which has been repeated in a deprecating tone by one of the learned speakers. But the truth of what I said on that occasion has been fully borne out by the discussion that has even now taken place, and instances and illustrations which the hon'ble member who spoke last has given regarding the shortcomings of the Bill are sufficient to show how the Bill might be extended in its scope and object, and how its provisions might be made to go a little farther. Another instance which occurs to me is this: In a quarter of the town where respectable people live, a house might fall vacant; it might thereupon be hired by women of doubtful character, and they might, with some degree of publicity, so misbehave themselves that their acts would be an outrage on morality, and would offer temptations to innocent population. Gradually other houses in the locality might become vacant, and in course of time they might also come to be occupied by such women. This state of things should, if possible, be remedied, and I throw out as a suggestion, for the consideration of the Select Committee, whether or not opportunity should be taken, now that this Bill is before the Council, to

provide some remedy for the evil which I have spoken of—an evil which, I submit, is not of a mere imaginary character, but which actually exists in real life not only in one quarter of the town, but in various quarters, and which respectable people, beyond any manner of doubt, really feel, but in respect of which there is at present no remedy, the case not amounting to one of public nuisance.”

The Hon'ble SIR CHARLES PAUL said:—“It is always a matter of sincere gratification to me to listen to the fervid eloquence of my hon'ble friend, BABU SURENDRA NATH BANERJEE, or to the silvery language of my respected friend, MR. LALMOHAN GHOSE. But on the present occasion, I may point out to this Council that all their eloquence is pointless, and that the many wise and proper observations which they have submitted have really been wasted. The motion before the Council is to submit this Bill, which was read in Council on the last occasion, to a Select Committee, and the only issue which is open to any member of the Council on this occasion is to submit reasons and considerations why this Bill should not be so submitted to a Select Committee, or in other words, to show fairly and clearly, in order to reverse the opinion of the Council, which was impliedly expressed on the last occasion when they gave leave to read the Bill in Council, that there is no sufficient foundation for any legislative action.

“Now, it cannot be doubted for a single moment that these annoyances, in reference to which adverse criticism has been made, viz., these solicitations to immorality, are of a very disturbing character to society, and no one can be aware better than the hon'ble member in charge of the Bill of the existence of this nuisance. It is said, however, that the hon'ble gentleman made an admission on the last occasion that the nuisance had not grown to any very considerable extent. I apprehend that that observation might be perfectly true, but yet that observation would not remove the ground of the Bill. The ground of this Bill is to ascertain and enquire into the existence of the nuisance, and the object of the Bill is to check its growth, and to see that it does not grow to any considerable extent. This Council is constituted for the making of laws for the peace and good government of the country, and if that be so, I think a sufficient foundation has been laid by the Hon'ble SIR JOHN LAMBERT for the initiation of this measure; and as that is the only question now before the Council, I say without fear of contradiction that neither of the hon'ble gentlemen who have been heard on the other side have laid the axe to the tree at all; and that in fact their observations have been altogether misdirected.

“Now, as to the next set of propositions which my friends have thrown out, no doubt, with considerable warmth and force, and it does considerable credit to themselves, because every member of society should have a tender regard for the liberty of the subject, and those observations have my deepest and warmest sympathy. But here I must point out to your Honour and the Council that the view which they have taken is a mistaken one. We are now proposing that the Council should commit this Bill to the Select Committee, and any proposal as to the form which the Bill should take is merely a matter of procedure to be dealt with hereafter.

“The provisions contained in the Bill are, if I may so say, rough indications for the consideration of the Select Committee, and the gentlemen who will sit on the Committee, particularly my hon'ble friend, MR. GHOSE, will be able to warm up his associates to a proper sense of their duty, and to show why any of these provisions should not be modified. Therefore, the second branch of both my hon'ble friends' observations on this occasion are irrelevant at present, and have nothing to do with the question whether the Bill should be submitted to a Select Committee.

“Then, as to the third point, it often occurs in this Council, and on one occasion His Honour the Lieutenant-Governor particularly called the attention of an hon'ble member who took objection to a certain measure. His Honour said that, if the hon'ble gentleman had taken the trouble to read the Bill before coming to the Council, he would have been able to assist the Council in their deliberations. So I say now that if the hon'ble gentlemen who have spoken on the present occasion had only read section 5 of the Bill,

they would have seen that the Police are only to be empowered to arrest a person who is soliciting another to immorality, 'if the name and address of such person be unknown to him and cannot be ascertained by him then and there.' What is the difficulty? If any person of respectability should be arrested by a police officer on a charge of solicitation, what would be the difficulty in that person giving his name and address? What are the strong powers with which the Police are to be armed under this Bill? I further say that a great portion of the observations which have been addressed to the Council about the liberty of the subject would have been justified if the clause to which I have referred had not existed in section 5.

"I do not wish on the present occasion to anticipate the action of the Select Committee, the members of which are all very well conversant with the subject; they may take evidence on any point, or make any enquiries which they think fit. But I will just say one word about the absence of complaint. No doubt it would have been better if action should be taken upon complaint, but if any one driving on the course were solicited in this way, it would be very hard if he had to complain and dance attendance in the Police Court. If such a clause existed, and a formal complaint was necessary, the value of the Bill would probably be rendered *nil*. When you are passing a legislative measure, it should be passed in such form as to have full force and effect, but to pass it in a manner which will take away a good deal of its force would be to legislate in an imperfect way. I think that we should allow this Bill to be referred to a Select Committee."

\* The Hon'ble Mr. COTTON said:—"I feel bound to make one observation with regard to the remarks which have fallen from the learned Advocate-General. It appears to me that he has gone out of his way to find fault with the procedure adopted by my hon'ble friends, the Hon'ble BABU SURENDRANATH BANERJEE and the Hon'ble Mr. LALMOHAN GHOSE, in objecting to their comments on the Bill now before the Council. I must point out that under Rule 33 of the Rules for the Conduct of the Business of the Bengal Council, it is laid down that on the day when the motion is made for referring a Bill to a Select Committee, or on any subsequent day to which the discussion is postponed, the principle of the Bill and its general provisions may be discussed; and I do not think the observations of my learned friends went at all beyond the comments which they were amply justified in making on the principle of the Bill now before the Council and on its general provisions; and it seems to me that the hon'ble and learned Advocate-General was himself conscious that my hon'ble friends were not really exceeding the right of discussion, inasmuch as a very considerable portion of his own speech was devoted to discussing the principle of the Bill and its general provisions. If the principle of the Bill is not to be discussed when a Bill is referred to a Select Committee, then there is no time when the principle of a Bill can be discussed. On the occasion of the introduction of a Bill the measure has not been sufficiently long before the Council to enable hon'ble members to form a judgment upon it. If the discussion is delayed until the Select Committee has reported upon it, then all that devolves upon the Council is to consider the clauses of the Bill in detail, and I do not see where the opportunity will be afforded of discussing the principle of a Bill generally. It has always been the custom of the Council to discuss the principle of a Bill when it is referred to a Select Committee, and I trust that you, Sir, will be able to affirm that that custom is a sound and proper one.

"With reference to the criticisms to which this Bill has been subjected by my hon'ble friends, I desire to say that I think they have laid undue stress on the danger of oppression and abuse of its provisions. I think neither of my hon'ble friends have drawn sufficient attention to the fact that the powers conferred by the Bill are not vested in the hands of any police officer unless he is an officer above the rank of native constable; that is to say, those powers will only be exercised by officers in the position of head-constable, Sub-Inspector, Inspector, Superintendent, or it may be a European constable. If the hon'ble members consider that such powers as are proposed by this Bill to be exercised by police officers of standing and experience are dangerous, they are of course

entitled to their opinion, but this I must say that if they object to these powers being exercised by officers of such position, then practically their contention will tend to weaken and emasculate all police administration. The object the Government had in framing this clause of the Bill was to provide the most ample safeguards to prevent the abuse of police powers, and with that particular object it is not proposed to confer any powers on ordinary police constables as is done in England. The rank and file of constables are withdrawn from the provisions of this section. It was to meet the objections we have just heard that this class of police officers was purposely excluded, and as the learned Advocate-General very justly observed, further safeguards are introduced in the Bill for the same purpose. Police officers who are empowered to exercise authority under this section cannot arrest any one for making solicitations towards immorality if such person gives his name and address. That, I conceive, is a very great safeguard. If any one objects to give his name and address, the mere fact of such objection places him under suspicion.

"There is another point to which I wish to refer, and that is, that these provisions against solicitation are not principally directed against the unfortunate women who may patrol the streets in order to earn a precarious and dishonourable livelihood. The number of such women in Calcutta, as I am informed, is extremely limited. The number of street-walkers, so great in London, is extremely few in Calcutta, and were their case only considered, I apprehend that the Government would not have embarked upon legislation. But there is a worse evil in this city, to an extent which is unknown in England, but may be paralleled on the Continent. The streets of this city are infested by male touts who introduce men to the dwellings of prostitutes, and it is mainly with a view to bring these men under the clutches of the law that this Bill has been framed.

"Lastly, I must say that I am surprised, and the feeling of surprise is mingled with some share of regret, that the endeavour of the Government to meet the wishes of the Associations who have memorialised the Government with a view to the suppression of immorality in this city, should not have been more cordially met by my hon'ble friends. The desire of the Government is to comply, as far as possible, with the representations of the Associations to which I have referred. It was represented to the Government that the scandal of solicitation in Calcutta had become considerable, and that legislative measures were necessary to put it down. That representation seemed to the Commissioner of Police and to the Lieutenant-Governor to be a reasonable one, and in endeavouring to comply with it this Bill, which has unfortunately met with such opposition at to-day's meeting of the Council, was drafted. I hope and trust that the opposition raised to-day will be suitably answered, and that our deliberations in Select Committee may succeed in obviating the objections which have been taken; but if it should appear that the safeguards which the proposed section contains are really insufficient to prevent abuse and oppression, then I am convinced that the Government and this Council will not hesitate to adopt such further safeguards as may be found necessary and expedient. The only desire the Government has in introducing this Bill is to take steps in response to the representations made to the Government—to take steps, I say, for the prevention of open acts of immorality known as solicitation, and in accomplishing this object I trust that the Government will receive the co-operation of all the members of this Council."

The Hon'ble Mr. DUTT said:—"I have listened with considerable interest to the discussion upon this Bill, and after giving it my best consideration, I still think there is considerable force in the objections which my friends, the Hon'ble BABU SURENDRANATH BANERJEE and the Hon'ble Mr. LALMOHAN GHOSE, have taken against section 5 of the Bill. As, however, the last speaker, the Hon'ble Mr. COTTON, thinks that that section will receive careful consideration at the hands of the Select Committee, I do not wish to dwell upon that point. There is another matter to which I wish to draw the attention of the Select Committee, and that is, that in one respect the Bill does not go far enough. I understand that the memorial from which the

Hon'ble BABU SURENDRANATH BANERJEE has read dwells mostly upon the subject of brothels in this town, and it is a matter of serious complaint that in the northern portion of this town and in many other parts of Calcutta, houses occupied by public women are a public nuisance. I think it was the main object of the memorialists to ask for protection being given against the annoyance to which the respectable inhabitants are subject day after day and night after night. It is very frequently the case that public women in this town, often in respectable neighbourhoods, cause annoyance by loud singing and objectionable behaviour, and as far as I am aware, no adequate protection is given in such cases; and as a resident of this town I can add my testimony to that of the memorialists, that no adequate protection is afforded against such annoyance.

"I hope that either in the Select Committee or in our meeting in Council after the Report of the Committee has been submitted, the provisions of this Bill will be so far extended as to compel the residents of houses of ill-fame in this town to behave in an orderly manner. In most European towns the inmates of such houses are compelled to live in a decorous and orderly way, and that I think is what the memorialists have asked for in respect of Calcutta. I am not sure whether the Select Committee have power to extend the scope of the Bill so far, or whether it would be the work of the Council after submission of the Select Committee's report, but this being the main object of the memorialists, I mention it in order that it may be taken into consideration."

The Hon'ble MAULVI SERAJUL ISLAM KHAN BAHADUR said:—"I happen to be a member of the Purity Society, and took part in the action which the Society has taken in this matter, and I am bound to say that this Bill does not provide really and mainly what we want, namely, the suppression of brothels; and therefore I agree with the last speaker, that the Bill ought to be enlarged to that extent. With regard to section 5, I agree with my hon'ble friends that it is likely to prove an engine of oppression to the public; therefore there ought to be more safeguards than are provided in the section. If that is done, I shall have nothing to say against the principle of the Bill."

The Hon'ble SIR JOHN LAMBERT said:—"After what has fallen from the learned ADVOCATE-GENERAL and from the Hon'ble MR. COTTON on this occasion as regards the merits of the Bill—observations with which I entirely agree—it seems to me unnecessary at this time to refer at any length to the objections which have been brought forward by the Hon'ble BABU SURENDRANATH BANERJEE and the Hon'ble MR. LALMOHAN GHOSE. The chief point of the objections now urged against the provisions of this Bill is to be found in the fact that the Police are to bring up these cases into Court without a complaint. No doubt that is unusual, and the matter is open to discussion and consideration; but my present view is that, if that objection prevails, then the Bill will be inoperative, and it will be far better not to bring this Bill upon the Statute Book, and I would recommend that the Bill be withdrawn. I shall be prepared upon a future occasion to give my reasons for holding this opinion. The objections which have been made in this Council Chamber and outside will receive fitting attention when the Bill comes before the Select Committee. The remarks which have fallen from the Hon'ble BABU SURENDRANATH BANERJEE and the Hon'ble MAULVI MUHAMMAD YUSUF will be considered in Committee; and to ensure that these hon'ble members may have the fullest opportunity of putting forward their views, I beg to move that, with their permission, their names may be added to the names already proposed for the Select Committee."

The Hon'ble THE PRESIDENT said:—"With reference to what has been remarked by the Hon'ble MR. COTTON with regard to the observations which fell from the Hon'ble the Advocate-General, I do not think there is really any such difference of opinion between them as might at first sight appear. I do not understand that the Hon'ble the Advocate-General intended to deprecate any discussion of the principle of the Bill on this occasion. The object of his remarks was to point out that this was not the occasion for the

discussion of the details of the Bill, as they would be considered in Select Committee, and this remark applies more particularly to hon'ble members who will serve on the Select Committee, and will have an opportunity there of pressing objections and suggesting amendments. I myself would go a little farther, and would say that I would not deprecate any hon'ble member expressing his views even on any details of the Bill—not, indeed, discussing these at length or assuming that they are not liable to be amended; but it is for the convenience of the Council that we should know that there are certain details to which he could not give his assent, or that he should suggest any necessary safeguards which would in his opinion effectually carry out the objects of the Bill. It seems to me that the hon'ble member in charge of the Bill has met the difficulty by adding the two hon'ble members who have discussed the details of the Bill to the Select Committee, where they will have full opportunity of expressing their views.

“With regard to what has been remarked by the Hon'ble Mr. DUTT and the Hon'ble MAULVI SERAJUL ISLAM, I should explain that there is some misunderstanding as to the object of the memorial to which reference has been made. That object is not, as the two hon'ble members supposed, to suggest that greater power should be taken to put down brothels, which could be shown to be nuisances, or against which any objection could be urged by persons residing in the neighbourhood on account of annoyance caused by the inmates. The correspondence between this Government and the Government of India, which contains two important reports by the Hon'ble SIR JOHN LAMBERT, shows that the Police have complete power to deal with cases of that kind, namely, that where objection is made by the neighbours that a brothel is a nuisance, or that annoyance is caused thereby, the Police have not only the power, but the power is fully exercised, of putting down the nuisance. The object of the memorial in question was that brothels should be suppressed, even if no annoyance or nuisance is complained of; that the mere fact of it being proved that a place is used by people who lead immoral lives as a brothel should be sufficient to set in motion the power to turn out the inmates, and thus put a stop to the nuisance. That is a proposal quite different from what has been discussed in this Council, and I doubt if hon'ble members would support that view. I may say at once that the Government has been unable to support it, and I think it would be going too far to enlarge this Bill by giving a power of that kind.”

The Motion was put and agreed to.

The Council adjourned to Saturday, the 23rd instant.

## EXHIBITION OF PHOTOGRAPHY, 1895.

THE Executive Council of the Imperial Institute having determined that the United Kingdom Section of the Institute will be for the present best utilised, and the resources of the Home Country effectively displayed by a series of exhibits, illustrative of the progress and present condition of leading industries and manufactures of Great Britain and Ireland, such as the Pottery, China and Glass Exhibition of 1894, arrangements are being made for holding during the forthcoming Summer Season, 1895, a Special Exhibition of Photography in its Application to the Arts, Sciences and Industries throughout the Empire.

The Exhibition will include examples which may be received from the Colonies and India.

The gentlemen whose names are given on the first page of this circular have consented to serve, and have been appointed by the Executive Council as a Committee of Advice in connection with the Exhibition.

The Exhibition, which will be open daily (except Sundays) from 11 A.M. until 11 P.M., from the middle of May to the middle of September 1895, will be divided into the following Seven Classes:—

[Individuals and firms wishing to exhibit in the Exhibition may obtain further particulars concerning the Division in which they wish to enter, on application to "The Secretary, Photographic Exhibition, Imperial Institute, London, S.W."]

### DIVISION I.—THE HISTORY OF PHOTOGRAPHY.

(*To be accommodated in apartments in the Main Building.*)

*Section A.*—Illustrations of the results of *early* Processes and of apparatus and materials used in their practice.

*Section B.*—Illustrations of the progressive development of *modern* Processes.

*Section C.*—Illustrations of the early processes of Photo-mechanical work, and of materials and implements used in their practice.

*Section D.*—Photographic Literature, early and modern.

### DIVISION 2.—ARTISTIC PHOTOGRAPHY.

(*To be accommodated in the East apportionment of the Upper Intermediate Gallery.*)

*Section A.*—A thoroughly representative exhibition of All Schools, embracing known as well as new works.

*Section B.*—Illustrations of the present condition of Photographic Art in various Colonies and in India. (*To include illustrations of the application of photography as a medium for promoting Colonial Industries and Settlement.*)

### DIVISION 3.—PHOTOGRAPHY AS AN INDUSTRY.

(*To be accommodated in the North Gallery.*)

*Section A.*—Illustrations of apparatus used in Photography, and of its manufacture; special processes, such as the grinding and polishing of lenses, the production of brass fittings, cameras, &c., being shown in actual operation.

*Section B.*—The preparation of dry plates, coating of sensitive media, and the various printing processes, shown in actual operation.

*Section C.*—Illustrations of commercial portraiture. Production of portraits, &c., in studios by daylight and artificial light.

### DIVISION 4.—PHOTOGRAPHY IN ITS APPLICATIONS TO INDUSTRIES.

(*To be accommodated in the North Gallery.*)

*Section A.*—Processes of Reproduction, having Photography as their basis, as applied to Illustrated Journalism, Literature, and to purely artistic reproductions; the more common of these processes to be shown in operation, and details connected with rarer processes to be illustrated.

*Section B.*—Industrial applications of Photography to ornamentation, such as Vitreography; and uses of Photography in the Decorative Arts.

**DIVISION 5.—APPLICATIONS OF PHOTOGRAPHY TO THE SCIENCES.***(To occupy a portion of the West allotment of the Upper Intermediate Gallery.)***Section A.—Orthochromatics :—**

Reproduction of objects in colours, pictures, &c.  
 Results obtained by various stains, screens, &c.  
 Special appliances used in Orthochromatics.

**Section B.—Actinometry, Photometry, and Sensitometry.****Section C.—Optics :—**

The Optical Lantern, including processes and appliances for producing enlargements or reductions.  
 Illustrations of processes for producing lantern positives or transparencies.  
 Apparatus, instruments and appliances connected with the Optics of Photography.

*(Special exhibitions of lantern-transparencies as lecture illustrations.)***Section D.—Stereoscopy :—**

Illustrative examples of Stereograms; apparatus and appliances used for producing and exhibiting stereograms.

**Section E.—Photomicrography, in its applications to ordinary Micrographical Research, to Pathology, Bacteriology, &c. :—**

Apparatus and appliances used in connection with Photomicrography.

**Section F.—Spectroscopy :—**

The Spectra of the heavenly bodies, of gases, metals, etc.  
 Apparatus and appliances used in spectroscopy.

**Section G.—Meteorology and Magnetism :—**

Cloud-and-Lightning Photographs.  
 Measurement of Heights of Clouds.  
 Illustrations of Photographic-Recording Apparatus, and their uses.

**Section H.—Astronomy :—**

Photographs of Heavenly Bodies.  
 Photographic Charts of the Heavens.  
 Photographic Astronomical Records.  
 Apparatus, instruments and appliances used in Astronomical Photography.

**Section I.—Automatic Recording Apparatus.****Section K.—General :—**

Other applications of Photography to the Sciences, illustrating the results of researches in connection with which Photography has been applied (*e.g.*, Experiments on light and thermography, chemical action of light upon liquids, etc.).

**DIVISION 6.—APPLICATIONS OF PHOTOGRAPHY TO EDUCATIONAL PURPOSES.***(To be accommodated in apartments in the Main Building.)***DIVISION 7.—MISCELLANEOUS APPLICATIONS OF PHOTOGRAPHY.***(To be accommodated in a portion of the West allotment of the Upper Intermediate Gallery.)***Section A.—Illustrations of the applications of Photography to Architecture and Archæology.****Section B.—Applications of Photography to Engineering.****Section C.—Chronography.****Section D.—Applications of Photography to Surveying; Cartography, &c.**  
Apparatus and appliances used in Photographic Surveying.**Section E.—Photography as applied to Military and Naval purposes.****Section F.—Applications of Photography to Legal purposes and to Zoology (*e.g.*, detection of forgeries, erasures, etc.; production of photo-anthropometric records).**

The Imperial Institute, in pursuance of its objects as defined by the Royal Charter, which include the encouragement and development of British manufactures and industries, will provide attendants, lighting, and all needful supervision and general facilities incidental to the Exhibition as a whole.

Exhibitors will be expected to provide, at their own cost, the Exhibits, Glass Cases and Fittings, and to incur the cost of transit to and from the Institute, and of the necessary attendants for the installation and arrangement of the Exhibits.

As regards processes, the Imperial Institute will be prepared to receive applications, and to provide motive power to a moderate extent, for the display of such processes, subject to the Executive Council being of opinion that the utility and attractiveness of the process to be illustrated is sufficient to justify the outlay thereby involved.

The Committee of Advice has selected and recommended to the Council a preliminary list of firms to whom invitations to exhibit are being transmitted, but applications for permission to exhibit will be received from individuals and firms from all parts of the British Empire.

No sales will be allowed in the Exhibition Galleries, but Exhibitors will be permitted to take orders for articles at the Exhibition. No circulars or trade cards must be distributed by Exhibitors.

A Catalogue will be issued and sold in the Exhibition, in which a reasonable description of the Exhibits, and of any special features to which attention is called by the manufacturers, may be inserted free of charge.

The exhibiting space will be allotted by the Committee of Advice, in proportion to the demand, amongst those individuals and firms included in these lists (or in subsequent lists, to be approved by the Committee) who may wish to exhibit.

All Exhibits, Glass Cases, Fittings, &c., must arrive at the Institute not later than noon on SATURDAY, APRIL 27th, 1895. No cases or Exhibits will be received after that date. The Exhibits must be installed and arranged in their cases not later than noon on THURSDAY, 2ND MAY, 1895.

Screens or other erections must not exceed 8 feet in height.

The passage way indicated in the plan must be preserved throughout the whole length of the gallery.

The Executive Council reserve to themselves the right of refusing to admit to the Institute premises any Cases, Fittings, or Exhibits arriving after noon on the 27th April, and to remove from the Exhibition Gallery, at the cost of the Exhibitor any Exhibits, Cases or Fittings, the arrangement of which may not be completed to the satisfaction of the Council by noon on the 2nd May. In such instances the Executive Council reserve the right to dispose, at their absolute discretion, of the space which thus may become available. Exhibitors will not be allowed to supplement or change their Exhibits during the time the Exhibition remains open, without the permission in writing of the Council.

The acceptance by a firm or individual of the invitation to exhibit will be taken as consent on his part to allow all his Exhibits, Cases and Fittings to remain undisturbed in the Galleries until the close of the Exhibition, and as an agreement on his part to the right of the Council to order, or, if necessary, to cause, without explanation, the removal of the Exhibit at any time they may think proper, and, further, as an agreement to abide by the Regulations here set out.

The conditions above stated are subject to the provisions which are set out in the Special Prospectus issued in connection with each division of the Exhibition.

The Executive Council, while undertaking to supply adequate general control, watching and care, accept no responsibility or liability as regards the Exhibits in respect of damage or loss by fire or accidents, or otherwise.

An invitation to a firm or individual to exhibit will be considered as cancelled if a definite reply is not received by the 2nd February.

All communications should be addressed to—

The Secretary to the Photographic Exhibition (1895),  
Imperial Institute, London, S. W.

The Council reserves to itself the right, in the event of the space applied for considerably exceeding the accommodation available, or for other causes, to allot space only to certain of the applicants.

1st January 1895.

By order.

NOTE.—The Exhibition Galleries may be viewed on any week day after the 8th January, 1895, by the representative of any firm or individual proposing to exhibit, on application to the Chief Clerk, at the Institute, between the hours of 11 A.M. and 3 P.M. (1 P.M. on Saturdays).

## IMPERIAL INSTITUTE OF THE UNITED KINGDOM, THE COLONIES, AND INDIA.

*Special Exhibition of Photography, in its applications to the Arts, Sciences, and  
Industries, throughout the Empire, 1895.*

### DIVISION 2, SECTION A.—ARTISTIC PHOTOGRAPHY.

#### *Exhibition of Photographic pictures.*

In this division will be included only such photographs as have distinct artistic merit. It is hoped that all schools of artistic photography may be represented, and contributions, whether new or previously exhibited pictures, are invited from Home, Colonial and Indian Photographers. Contributions from the representatives of deceased artists (except such works as might better be displayed in the Historical Division) will also be welcomed.

The maximum number of pictures that may be sent in by any one Exhibitor will be six.

A selection will be made by the Committee, whose decision will be final.

The Exhibition will open early in May 1895, and will remain open till about the middle of September or probably a little later.

4. *Character of the crops.*—Out of 43 districts from which returns have been received, only four districts estimate the outturn of the oilseed crops at 16 annas; 24 districts report the crops as varying from 12 to 15 annas, and in the remaining districts the outturn is variously estimated at from 8 to 12 annas. On the whole, the outturn of the oilseed crops in Bengal may be estimated at 12 annas. The prospects of the standing crops appear to be slightly better than those of last year.

B. C. BASU,

*Assistant Director of the Dept. of Land  
Records and Agriculture, Bengal.*

---

COUNTERSIGNED.

R. NATHAN,

*For Director of the Dept. of Land Records and  
Agriculture, Bengal.*

CALCUTTA,

*The 15th February 1895.*

First Forecast of the Oilseed Crops of Bengal, 1894-95.

1	2	3	4	5	6	7	8	9	10
DIVISION.	District.	Names of oilseeds.	Approximate normal area under oilseeds.	Approximate area sown last year (1893-94).	Estimated area sown this year (1894-95).	Taking 16 annas to represent the average output per acre, how many annas represented output last year (1893-94)?	Taking 16 annas to represent the average output per acre, how many annas will represent this year's output (1894-95)?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
BURDWAN.	Burdwan	Linseed Rapeseed mustard. Til (rabi) Other oilseeds Total	Acres. 28,200 23,700 3,200 1,900 37,000	Acres. 26,400 21,500 3,200 1,900 53,000	Acres. 26,400 21,500 3,200 1,900 53,400	Annas. 10 10 12 11 10	Annas. 11 13 11 10 10	In the Sadar sub-division, owing to excessive rain, the condition of the crops is worse than it was last year. Unusual rainfall after the sowing time affected the output to some extent in the Kalna sub-division. In the Katwa sub-division, owing to seasonable rainfall in sowing time there is reason to believe that the output of this year's crops would be better than last year. In the Remiani sub-division there is a decrease in output due to late sowing in account of rains.	
	Birbhum	Linseed Rapeseed mustard. Til (rabi) Total	Acres. 1,900 3,000 500 4,500	Acres. 1,600 3,000 500 4,500	Acres. 1,600 2,500 500 4,000	Annas. 10 12 9 12	Annas. 10 9 9 12	Owing to the late sowing, the area under cultivation is smaller this year, and the output may be a little worse than that of the last year.	
	Bankura	Linseed Rapeseed mustard. Til (rabi) Other oilseeds Total	Acres. 1,300 9,000 7,800 10,000 28,700	Acres. 1,400 6,800 1,400 10,000 19,600	Acres. 1,200 7,000 1,200 16,000 19,400	Annas. 12 12 14 12 14	Annas. 12 12 16 12 13	The normal area under "Other oilseeds," i.e., saugun, &c., is clearly greatly under-estimated. It is impossible to obtain accurate figures, but I am sure from my own observation that it cannot be less than 10,000. As regards other crops, the fluctuations between this year's area and that of the last year is not excessive, but it shows considerable decrease when compared with the normal area. It is explained that this is due to excessive rainfall at the time of sowing.	The Collector raised his figure for normal area under "Other oilseeds" from 2,300 acres to 10,000 acres, and returned this year's area under the same crop as 10,000 acres, but kept the figure (2,100 acres) for last year unchanged. This has been changed to 10,000 acres in this office.

1	2	3	4	5	6	7	8	9	10
DIVISION.	District.	Names of oilseeds.	Approximate normal area under oilseeds.	Approximate area sown last year (1893-94).	Estimated area sown this year (1894-95).	Taking to annas to represent the average outturn per acre of this year's outturn (1894-95)?	Taking to annas to represent the average outturn per acre of the many annas will represent outturn last year (1893-94)?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Burdwan (contd.).	Midnapore	Linseed ... and Rapeseed ... and Mustard. Til (rabri). Other oilseeds. Total ...	Acres. 24,300 41,300 19,400 24,300 107,300	Acres. 14,300 33,600 17,700 19,600 85,200	Acres. 14,900 37,400 17,700 21,500 91,500	Annas. 12 13 10 10 11	Annas. 13 13 12 10 12	As compared with last year, a larger area has been brought under cultivation this year, and the outturn is likely to be better owing to a seasonable rain. In (out) a further area is likely to be brought under cultivation under <i>til</i> . The outturn in that sub-division has not been so good owing to abnormal rain.	
	Hooghly (with Howrah).	Linseed ... and Rapeseed ... and Mustard. Til (rabri). Other oilseeds. Total ...	Acres. 2,700 5,300 2,300 10,300	Acres. 2,600 4,800 2,500 9,900	Acres. 2,600 4,900 2,900 9,800	Annas. 11 14 12 13	Annas. 10 14 10 12	The excessive rainfall in the end of October has stood in the way of a full crop, so we expect less outturn.	Separate figures for <i>til</i> (rabri) should be furnished in the Final Report on the oilseed crops, 1894-95.
	24 Parganas	Linseed ... and Rapeseed ... and Mustard. Til (rabri). Other oilseeds. Total ...	Acres. 1,500 800 700 4,000 6,500	Acres. 1,300 600 800 1,800 4,100	Acres. 1,400 600 700 2,000 4,700	Annas. 7 10 8 8	Annas. 7 10 8 8	The figures of the normal area under <i>til</i> has been revised from 500 acres to 700 acres, as 200 acres have been cultivated this year in the Sadar sub-division, which was not done in the previous years. Excessive rainfall at the time of sowing and the want of it afterwards caused the plants to be damaged.	It is not understood why there should be such a falling off from the normal area under the head "Other oilseed."
	Nadia	Linseed ... and Rapeseed ... and Mustard. Til (rabri). Other oilseeds. Total ...	Acres. 67,900 57,700 14,200 18,000 178,500	Acres. 44,200 24,100 6,800 9,500 84,600	Acres. 41,200 24,700 7,100 9,300 81,300	Annas. 10 8 9 9	Annas. 10 8 9 9	The decrease in the area sown is owing to the excessive rainfall in the beginning of November last, which greatly affected the crops as well as the area sown.	

District	Crops	Area sown this year as compared with the normal	The last year's area is due to the low lands not being fit for cultivation owing to the heavy rain during the sowing season	The increase in the estimated outturn, as compared with that of last year, is attributable to the moisture of lands caused by the rains mentioned above.	The decrease in the area and outturn is due to the heavy rainfall in the first week of November, and absence of rain in December and afterwards.	Heavy rains at the time of sowing damaged the seedlings, and hence the outturn is expected to be poor.	The plants have grown up well and the outturn of oil and linseed is expected to be 16 annas. The outturn of mustard is expected to be 14 annas, there being excessive moisture in the land brought on by the last flood. Separate figures for oil are not available.	See note against Hooghly.	The Deputy Commissioner did not return area under last year's "Other oilseeds." This year's area has accordingly been reproduced in column 5.
Murshidabad	Linseed and Rapeseed and mustard.	80,500	27,000	24,500	11	14			
	Til (rabi)	23,700	18,700	18,400	11	14			
	Other oilseeds	4,300	4,000	4,000

DIVISION.	District.	Names of oil-seeds.	Approximate normal area under oilseeds.	Approximate area sown last year (1893-94).	Estimated area sown this year (1894-95).	Taking 10 annas to represent how many annas represented the average outturn in the preceding year.	Taking 10 annas to represent how many annas will represent this year's outturn (1894-95).	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
RAJSHAHY—continued.	Darjeeling.	Rapeseed and mustard, <i>Til</i> ( <i>rabai</i> )	7,500 100 7,400	7,500 100 7,400	7,500 100 7,400	13 10 13	13 10 13		
	Rangpur.	Rapeseed and mustard, <i>Til</i> ( <i>rabai</i> ) Other oilseeds Total	104,800 800 1,200 106,800	112,500 500 1,500 114,500	113,500 600 1,300 115,400	10 10 10 10	10 10 10 10	Want of timely rainfall retarded the growth of the plants.	
	Bogra.	Linseed and Rapeseed and mustard, <i>Til</i> ( <i>rabai</i> ) Other oilseeds Total	19,000 105,000 20,200 2,000 146,200	18,000 100,000 11,200 2,800 134,000	15,000 77,000 14,000 2,000 98,000	8 10 10 10 10	8 10 7 10 9	The heavy rainfall in October kept the soil damp and unfit for the cultivation of the oil-crops till it was very late in commencing; hence the area cultivated greatly fell short of the normal area and the outturn is accordingly expected to be poor.	Separate figure for this year's <i>til</i> ( <i>rabai</i> ) was furnished by the Collector, but normal and last year's areas were bracketted with other oilseeds. Separate figures for these have been calculated in his office in the proportion which this year's area under <i>til</i> bears to the total of this year's areas under <i>til</i> and other oilseeds.
	Pabna.	Linseed and Rapeseed and mustard, <i>Til</i> ( <i>rabai</i> ) Total	22,500 117,000 30,100 149,600	20,000 115,700 30,100 165,800	19,500 104,000 20,100 143,600	5 10 9 9	9 10 8 9	The rise of the river in November 1894 caused a smaller area to be sown this year. The rainfall at the end of October accounts for the increase and decrease in the outturn of linseed and mustard seed, <i>ac</i> , respectively. The figures for <i>til</i> ( <i>rabai</i> ) refers to Simjau sub-division only. Castor-oil crops are not grown in this district.	

District	Crop	Area sown in 1894-95	Area sown in 1893-94	Area sown in 1892-93	Area sown in 1891-92	Area sown in 1890-91	Area sown in 1889-90	Area sown in 1888-89	Area sown in 1887-88	Area sown in 1886-87	Area sown in 1885-86	Area sown in 1884-85	Remarks	Separate figures for 1894-95 should be furnished in the final Report on the oilseed crops, 1894-95
Dacca	Linseed	12,800	8,900	7,600	10	10	9						The area sown this year is less than that of the previous year, owing to the water not having subsided at the time of sowing, and the outturn is also expected to be less on account of heavy rain in November. Correct estimates of normal areas (a) from 26,400 acres to 27,000 acres and (b) of oilseeds from 35,700 acres to 36,000 acres have been given as far as possible. The oilseed harvest this and the last return are not much and call for no remarks.	
	Mustard	110,100	97,400	89,500	94	94	9							
	Other oilseeds	27,600	23,900	9,000	8	8	84							
	Total	150,500	130,200	106,100	112	112	94							
Mymensingh	Linseed	42,500	55,900	37,500	13	12							Owing to the heavy rains just before the time of sowing of mustard and linseed, the area was much less than the normal. The outturn is also expected to be less than that of the last year owing to the use of too poor in the latter part of the rainy season and the untimely rains which destroyed the sowings.	
	Mustard	47,500	55,500	55,500	14	13								
	Other oilseeds	9,500	71,500	74,500	14	23								
	Total	99,500	182,900	207,500	29	35								
Faridpur	Linseed	7,500	5,000	7,000	10	10							The decrease in area sown is due to the flood continuing longer than usual and to the heavy rainfall in November last. There is no excellent line recorded since the sowing the outturn is not expected to be better except in Madaripur, where the Sub-divisional Officer estimates an average crop.	
	Mustard	44,500	41,500	41,500	10	10								
	Other oilseeds	9,000	9,000	9,000										
	Total	61,000	55,500	57,500	20	20								
Backergunge	Linseed	30,100	29,800	29,800	11	13							The decrease in outturn is due to want of rainfall at the sowing time.	
	Mustard	1,700	1,500	1,500	11	8								
	Other oilseeds	26,500	34,500	31,500	12	10								
	Total	58,300	65,800	62,800	34	31								
Noakhali	Linseed	17,100	14,700	27,600	8	13							Agricultural circumstances having been favorable this year, the normal area has been sown, and a fair outturn also is expected.	
	Mustard	6,200	6,200	6,200	7	13								
	Other oilseeds	6,100	5,000	6,100	10	11								
	Total	29,400	25,900	39,900	25	37								
Tippera	Linseed	27,500	7,000	2,500	9	16							The decrease in the area sown is compared with that of last year is due to unreasonable rains in the case of linseed and to submergence of flood water late in the season in respect of rapeseed and mustard. The prospect of the crop appears favorable, and an average outturn is expected. I have put down 10,000 as I believe this to be the correct figure. The returns I have recorded are much lower. As regards the area it is probably below the normal, but the figures actually recorded are very doubtful.	
	Mustard	10,400	25,500	29,500	11	16								
	Other oilseeds	24,500	14,500	23,500	11	16								
	Total	66,400	47,000	55,500	32	48

DIVISION.	District.	Names of oilseeds.	Approximate normal area under oilseeds.	Approximate area sown last year (1893-94).	Estimated area sown this year (1894-95).	Taking 10 annas to represent the average outturn per acre, how many annas reported the outturn last year (1893-94)?	Taking 10 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1894-95)?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
CHITTAGONG (consolid.)	Chittagong	Linseed ... and Rapeseed ... Mustard, ... Til (rabi) ... Other oilseeds ... Total ...	Acres. 1,000 2,500 100 100 3,500	Acres. 1,000 2,300 100 100 3,500	Acres. 900 2,300 100 100 3,400	9 9 10 10 9	9 10 10 10 9	The figures shown in column 6 are those returned in table A(1) of agricultural statistics. The increase in the outturn of the last three kinds of oilseeds is due to the timely and copious rainfall this year.	The Collector did not return the normal and last year's areas under other oilseeds. This year's area has therefore been reproduced in columns 4 and 5.
	Patna	Linseed ... and Rapeseed ... Mustard, ... Til (rabi) ... Other oilseeds ... Total ...	Acres. 24,500 30,000 1,500 16,000 75,000	Acres. 21,400 23,900 1,300 13,100 59,700	Acres. 21,100 23,700 1,300 12,300 61,200	14 14 13 14 14	14 14 9 14 14	The season is, up to date, very favourable for the full growth of the crop, and a better outturn is expected this year than the last.	In view of the Collector's remark the estimate of outturn appears very low.

CHOTA NAGPUR.										Remarks.
Division.	Sub-division.	Year.	Area.	Production.	Value.	Price.	Quantity.	Value.	Price.	
Sonthal Parganas.	Linseed ... and Rapeseed ...	13	13,800	67,900	19,600	11,900	12	11,900	12	In Deoghar and Godda sub-divisions the rainfall in October last injured the crops and consequently outturn in these places will not be favourable. In other sub-divisions it is expected to be fair.
	Til (rai)	13	2,800	98,100	2,400	2,100	13	2,100	13	
	Other oilseeds	13	98,100	97,100	97,100	94,800	13	94,800	13	
	Total	13	182,600	182,600	182,600	175,700	13	175,700	13	
Cuttack.	Linseed ... and Rapeseed ...	11	4,200	14,300	3,600	4,100	11	4,100	11	In consequence of silt deposited by the floods of 1894 in the Jajpur sub-division, the outturn of various oilseeds is expected to be better. In the Kendrapara sub-division on account of accumulation of rain water in October 1894, the places where <i>rai</i> (cereals and pulses) used to be grown were sown with oilseeds. On the whole the weather has been favourable. Had there been rain in November and December, more than average crops would have been reaped.
	Til (rai)	11	2,700	16,600	2,600	12,600	9	12,600	9	
	Other oilseeds	11	16,600	16,600	12,400	12,400	10	12,400	10

Lohariabagh.	Linseed ... and Rapeseed ...	11	76,100	76,100	75,100	75,100	10	75,100	10	The seasonable rains proved conducive to cultivation, and hence the increase over last year's outturn.
	Til (rai)	11	100	100	100	100	12	100	12	
	Other oilseeds	11	288,400	288,400	288,400	288,400	12	288,400	12	
	Total	11	373,600	373,600	373,600	373,600	12	373,600	12	

The Deputy Commissioner has changed his figures for normal and last year's areas under *rai* from 1,300 acres to 2,800 and 2,400 acres respectively, and those under other oilseeds from 99,300 and 98,300 acres to 94,100 and 97,100 acres respectively without assigning any reason for the change.

The Collector did not return separate figures for last year's *rai* and other oilseeds. The figures for this year have been reproduced.

The cause of the decrease in area from the normal has not been explained.

Return not received.

The Deputy Commissioner did not return separate figures for last year's *rai* and other oilseeds. This year's figures have been reproduced.

1	2	3	4	5	6	7	8	9	10

# REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1894-95.

No. 133B., dated Calcutta, the 13th February 1895.

From—N. K. Bose, Esq., Offg. Secretary to the Board of Revenue, L.P.,  
To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to submit the following report on the state of the salt market for the third quarter of 1894-95, comprising the months of October, November and December 1894.

SALT.

THE HON'BLE MR. D. R. LYALL, C.S.I.

2. The quantity of salt of every description cleared during the quarter under report amounted to 24,25,443 maunds against 27,54,188 maunds in the previous quarter and 24,95,688 maunds in the corresponding quarter of the previous year; and the net duty levied thereon was Rs. 56,96,284 against Rs. 63,79,206 in the previous quarter and Rs. 58,03,452 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of excise salt removed from the golas in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I:—

TABLE I.

1.	2
	Puri.
	Mds. s.
Balance at the close of the last quarter ...	2,00,701 0
Manufactured or added during the quarter ...	3 0
Total ...	2,00,701 0
Sales during the quarter ...	11,599 0
Wastage ...	454 0
Total ...	12,053 0
Balance at the close of the quarter ...	1,88,651 0

There was no salt in golas in the other two districts.

4. The total sale of excise salt during the quarter under review amounted to 11,599 maunds against 12,023 maunds in the previous quarter and 3,686 maunds in the corresponding quarter of the previous year. The total amount of excise salt on which duty was paid during the quarter was 11,599 maunds.

5. The subjoined table shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review compared with the figures of the corresponding quarters of the previous two years:—

NOTE.—Rio-de-Janeiro comes properly under none of the groups, but for convenience sake is placed under group IV.

6. Table III shows the quantity of the sea-imported salt remaining in the warehouses at the close of the quarter as compared with the results of the previous four quarters:—

TABLE III.

WHERE STORED.	Third quarter of 1893-94.	Fourth quarter of 1893-94.	First quarter of 1894-95.	Second quarter of 1894-95.	Third quarter of 1894-95.
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	Mds.
Sulkea Government godas	7,94,078	9,80,216	14,74,417	26,25,575	29,01,285
Kidderpore Docks ditto	...	...	...	3,66,559	5,62,578
Chittagong ditto	91,185	1,63,832	71,381	1,18,723	1,45,109
Total	8,85,263	11,40,048	15,48,798	31,10,857	36,09,972

The warehouses are still abnormally full, and the shipments as shown in paragraph 10 have not decreased to the extent anticipated. The stock is not therefore likely to decline for some time.

7. The despatches of salt from Calcutta by water and the three railways passing the several salt-pass stations into the interior of the country both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter under review and the corresponding quarters of the previous two years, are shown in the table below:—

TABLE IV.

PERIOD.	BY WATER.					BY RAIL.			BY STEAMERS AND FLATS.	
	Via Bahkhal.	Via Sankrail.	Via Gowa- hally.	Via Kidder- pore.	Via Balla- ghata.	Via Rutherford Ghat.	By the East Indian Rail- way.	By the East- ern Bengal and South- Eastern Rail- ways or via Chitpur.	Quantity des- patched to the interior (excluding Orissa).	Quantity des- patched to Orissa.

Ditto of 1893-94	1,69,769	1,18,476	82,785	69,820	4,65,926	958	9,47,631	3,26,558	2,28,483	60,150
Ditto of 1894-95	1,58,452	1,11,163	76,041	73,154	3,98,474	4,442	9,00,660	2,00,651	2,82,362	61,744

8. The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter under review amounted to 2,248 maunds 20 seers as noted in the margin, against an equal quantity in the previous quarter and 8,994 maunds in the corresponding quarter of the previous year.

9. The quantity of saltpetre-salt removed from the refineries on payment of duty amounted to 3,782 maunds against 6,238 maunds in the previous quarter and 2,874 maunds in the corresponding quarter of the previous year.

10. The shipments of Liverpool salt for the port of Calcutta according to published market reports were as follows:—

October	...	...	...	Tons.
November	...	...	...	18,550
December	...	...	...	17,230
				16,190
				<u>51,970</u>

It is reported that 17,130 tons of Hamburg salt were shipped for Calcutta during the quarter under review, of which 2,625 tons may go to Chittagong.

11. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

TABLE V.

	Total ... ..	95,240 0 0	60,284 0 0	78,229 32 0	65,793 13 0

No transactions of sea-imported salt have been reported for the quarter from the ports of Cuttack, Puri and Balasore.

## WEATHER AND CROP REPORT.

For the week ending the 25th February, 1895.

**Burdwan.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops good and of sugarcane fair. Fodder sufficient. Price of common rice varies from 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. *Rabi* crops mostly off the ground. Fodder and water sufficient. Rice selling at from 16 to 20 seers per rupee.

**24-Parganas.**—Rainfall nil. Weather seasonable. Prospects of *rabi* and other standing crops good. Condition of cattle good. Fodder and water sufficient. Rice sells at—

	Srs.	Ch.	
Sadar	...	...	11½ to 14 0
Barasat	...	...	15 0
Basirhat	...	...	13 5
Diamond Harbour	...	...	15 0

} per rupee.

**Murshidabad.**—Rainfall nil. Weather seasonable. Prospects of *rabi* and other standing crops good. Fodder sufficient for cattle. Price of rice 15½ seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *aman* is over. Land is being cultivated for *boro* (spring rice). *Rabi* crops doing well. No cattle disease. Fodder and water sufficient. Common rice sells at from 16 to 22 seers per rupee.

**Dinajpur.**—Rainfall nil. Weather fine. Cultivation of jute and *bhadoi* is going on. Prospects of standing crops good. No report of cattle disease and no complaint of fodder and water. Price of common rice varies from 14 to 16 seers per rupee.

**Rangpur.**—Rainfall nil. Weather cool. Rain wanted. Harvesting of mustard finished. Land under preparation for *bhadoi*. Price of common rice 10 to 14 seers per rupee.

**Pabna.**—Rainfall nil. Weather seasonable. Prospects continue good. Cutting of sugarcane in progress. Fodder and water-supply sufficient. Common rice is selling at from 17 to 20 seers per rupee.

**Dacca.**—Rainfall nil. Weather seasonable. Prospects of standing crops fair. Rain much needed. No cattle-disease. Fodder available. Price of common rice varies from 12 to 20 seers per rupee.

**Chittagong.**—Rainfall nil. Weather warm. Prospects of standing crops fair. Rain needed. Water and fodder sufficient. Prices steady.

**Patna.**—Rainfall nil. *Rabi* crops doing well, prospects excellent. Lancing of poppy and extraction of opium in progress. Common rice selling at—

	Srs.	
Sadar	...	18
Bihar	...	20
Barh	...	17½
Dinapore	...	17½

} per rupee.

**Gaya.**—Rainfall nil. Weather fine. *Rabi* crops doing well. Collection of opium in progress; drug secretions satisfactory. Prices about normal. Fodder and water sufficient.

**Champaran.**—Rainfall nil. Prospects of *rabi* and poppy good. Fodder and water for cattle sufficient. Common rice selling at 16½ seers per rupee.

**Darbhanga.**—Rainfall nil. Prospects of *rabi* crops continue favourable. Mustard being harvested. Low lands being ploughed for *mung* and paddy sowings. Fodder for cattle sufficient. Prices remain almost stationary.

**Bhagalpur.**—Rainfall nil. Weather healthy and normal. Standing crops are doing well. Fields are being ploughed for paddy sowing.

**Purnea.**—Rainfall nil. Harvesting of mustard almost finished. Pressing of sugarcane going on. Standing *rabi* crops doing well. Fodder and water sufficient. No cattle-disease. Common rice selling at from 15 to 24 seers per rupee.

**Cuttack.**—Rainfall nil. Weather growing hot. *Dabua* (spring rice) being weeded and in places in ear. Prospects of all crops, including tobacco, are good. Rice sells at from 11 to 24 seers per rupee.

**Hazaribagh.**—Rainfall nil. Weather clear; getting warm. *Rabi* crops excellent. Mustard being harvested. Fields being ploughed. Poppy prospects good. Fodder and water ample. Common rice selling at from 14 to 20 seers per rupee.

**General Summary.**—There was no rain during the week; the weather is becoming warmer throughout the province. Reports of the *rabi* and other standing crops continue generally favourable, but rain is required in some of the eastern districts and also in Rangpur. Lands are being prepared for the *bhadoi* crops in parts of Northern Bengal and for the sowing of early paddy in Darbhanga and Bhagalpur. Mustard is still being harvested, and the pressing of sugarcane is going on in some districts. Prospects of poppy are good; the lancing is in progress and the outturn is reported satisfactory. Cattle are in good condition. The price of common rice is generally normal and almost stationary.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT;  
The 26th February, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

\* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the mean at the numerical means or average of the rainfall in that district as determined from the returns sent in by the subdivisional stations for the period in question. In the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 23rd of February 1895.

DISTRICT OBSERVATIONS.																DISTRICT.
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	OF WEEK.				RAINFALL.							
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

est ten years. The variations are *negative* when the mean of the week is less than the corresponding normal mean, and *positive* when greater. Numbers denoting cloud amount represent the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal during the past ten years. The means of the district are the numerical average of the rainfall received in the district, i.e., from total rainfall at the subdivisions.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 23rd of February 1895.

*Explanation.*—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rain fall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0.10 in. of rain has fallen.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 23RD OF FEBRUARY 1895.

At the close of the previous week fine settled weather of about normal character for the season prevailed in Bengal. On the 17th, or the first day of the week under review, the changes were unimportant except in the western districts, where a brisk fall of pressure had occurred, though elsewhere the fall was slight. Generally also temperature had increased, but fine settled weather usually continued. On the 18th a rapid and rather remarkable increase of pressure occurred, the increase ranging up to nearly a sixth of an inch at Jalpaiguri, and pressure became in moderate excess. A very rapid increase of temperature and humidity also occurred, and skies clouded over quickly, though rainfall continued absent. On the 19th a further moderate to brisk increase of pressure occurred, while the temperature and humidity changes were variable, a fall being reported in the west of the province and an increase at the central, eastern and northern stations. On the 20th, again, pressure increased, but more slowly than on the previous two days, and pressure became in excess by amounts ranging up to about a seventh of an inch in the western districts. A brisk fall of temperature and humidity occurred on this day, and in the hills weather was disturbed, as Gnatong received about seven inches of snow, while light rain fell at Darjeeling. In the plains, however, weather continued fine and settled. On the 21st the changes were small and unimportant, and about half the stations reported increasing pressure and half decreasing pressure, and similarly in the case of temperature. Weather was again fine and settled over practically the whole reporting area. On the 22nd a moderate to brisk fall of pressure had occurred, but pressure was still in large excess, while temperature had usually risen by about a degree or a degree and-a-half. The sky was somewhat clouded at the western stations, but weather continued fine and settled. On the 23rd, or the last day of the week, pressure had generally risen slowly, but it was still in excess by amounts averaging about a tenth of an inch, while the mean temperature was still below the normal, usually by about 1° to 2°. Steady westerly and northerly winds prevailed over the whole province, and fine, settled weather still prevailed. Hence for practically the whole week north-east monsoon conditions have prevailed over the province.

**Pressure.**—The mean pressure for the week has therefore been in rather considerable excess in all districts, the usual excess ranging between 0.06" and 0.09", and the excess being largest at the western stations.

**Temperature.**—The average mean temperature for the week has been 1.1° above the normal, the excess having been largest in North Bengal and Bihar, where it has equalled about 2°.

The actual temperatures registered during the week, and their variations from the normal temperature of the present season, are clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been generally moderate in the day or maximum temperatures, which have been usually about a degree in excess. In the case of the minimum or night temperatures three stations report rather considerable excess amounts, and the remainder moderate to considerable defects, so that the variation in the mean temperature at the nine stations is not very large in amount :—

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 23rd of February 1895.*

	Normal mean maximum temperature for the week ending 23rd February.	Actual mean maximum temperature for the week ending 23rd February 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 23rd February.	Actual mean minimum temperature for the week ending 23rd February 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 23rd February.	Actual mean daily temperature for the week ending 23rd February 1895.	Variation of actual mean from the normal.
Cuttack	91.4	90.8	-0.6	66.0	66.0	-0.6	79.0	78.4	-0.6
Calcutta	88.3	85.0	+1.7	61.6	59.4	+2.2	72.5	72.2	+0.3

Gaya	83.4	84.6	+1.1	55.6	56.7	-1.1	70.6	70.6	+0.1
Purnea	81.1	82.1	+1.0	52.6	51.7	+0.9	66.9	67.9	-1.0
Hazaribagh	79.6	79.7	+0.1	53.7	52.3	+1.4	67.7	68.5	-0.8
Darjeeling	48.3	49.4	+1.1	35.5	37.4	-1.9	41.9	43.4	-1.5

**Rainfall.**—A few showers have been received in the Darjeeling Hills, some in the Jessore district, and one or two in Orissa, but with these exceptions, the province has been practically rainless during the week.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 23rd of February 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

$\Delta$ , dew;  $\equiv$ , fog.

CIRCULAR AND EASTERN CANALS.

*Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.*

The Council met at the Council Chamber on Saturday, the 23rd February, 1895.

#### Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General*.

The HON'BLE H. J. S. COTTON, C.S.I.

The HON'BLE SIR JOHN LAMBERT, K.C.I.E.

The HON'BLE D. R. LYALL, C.S.I.

The HON'BLE J. A. BOURDILLON.

The HON'BLE MAULVI ABDUL JUBBAR KHAN BAHADUR.

The HON'BLE F. R. S. COLLIER.

The HON'BLE C. E. BUCKLAND.

The HON'BLE C. A. WILKINS.

The HON'BLE ROMESH CHUNDER DUTT, C.I.E.

The HON'BLE SURENDRANATH BANERJEE.

The HON'BLE L. GHOSE.

The HON'BLE MAHARAJA SIR LUCHMESSUR SINGH BAHADUR, K.C.I.E., of DARBHANGA.

The HON'BLE MAULVI SERAJUL ISLAM KHAN BAHADUR.

The HON'BLE W. C. BONNERJEE.

The HON'BLE J. G. WOMACK.

The HON'BLE MAULVI MUHAMMAD YUSUF KHAN BAHADUR.

### THE LEPERS BILL.

The Hon'ble MR. BOURDILLON moved that the Bill to provide for the segregation of pauper lepers, and the control of lepers exercising certain trades, be referred to a Select Committee consisting of the Hon'ble SIR JOHN LAMBERT, the Hon'ble MR. LYALL, the Hon'ble MR. WILKINS, the Hon'ble BABU SURENDRANATH BANERJEE, the Hon'ble MAULVI MUHAMMAD YUSUF and the Mover. He said:—

"I have ascertained that all the gentlemen named are willing to act on the Select Committee, and I trust that after the remarks which I made at the last meeting of the Council, the principles of the Bill may be accepted, and the Select Committee may be entrusted with the duty of working out the details."

The Motion was put and agreed to.

### THE LAND RECORDS MAINTENANCE BILL.

The Hon'ble MR. BUCKLAND moved that the Bill to provide for the maintenance of Records of Rights in Bengal, and for the recovery of the cost of Cadastral Surveys and Settlements be referred to a Select Committee consisting of the Hon'ble MR. LYALL, the Hon'ble MR. WILKINS, the Hon'ble MAHARAJA OF DARBHANGA, the Hon'ble MAULVI SERAJUL ISLAM, the Hon'ble MR. DUTT and the Mover.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I beg to move as an amendment to the motion which has just been laid before the Council that the consideration of this question be postponed; and that pending the reference of the Bill to the Select Committee, the reports of the High Court and of the several public bodies which have been received by the Government, be circulated among members. This is a question of the gravest importance; it has excited a considerable measure of interest and attention, and I think members ought to be placed in possession of all the papers which have been received before they are called upon to give their opinion upon the Bill. I take it that this is the first legislative proposal in connection with what is known as the Bihar Cadastral Survey."

The Hon'ble THE PRESIDENT said:—"I am sorry to interrupt the hon'ble member, but I must point out that it is not open to him to move an amendment at this stage, as he has not given notice of it. The motion before the Council is, that the Bill be referred to a Select Committee, and it will be in his power to vote against that motion. But any amendment which he wished to put should have been submitted beforehand, and brought on the Agenda before it could be considered by the Council."

The Hon'ble BABU SURENDRANATH BANERJEE continued:—"I do not exactly wish to move an amendment, but I would like to suggest that the consideration of the matter be adjourned. If I am in order that would be the motion which I would like to move for the consideration of the Council. I was going to say that it is impossible to speak of the Bihar Cadastral Survey without adverting for a moment to the feeling which it evoked when it was first started some two or three years ago. That feeling has not yet subsided, and the measure is one which has met with universal and emphatic condemnation among all sections of the community. Neither the friends of the zamindars nor the friends of the raiyats can be persuaded to approve of the measure. Neither the zamindars nor the raiyats want it. If they want it, it is open to them under the provisions of the Bengal Tenancy Act to call for a record of rights. The highest officials in the land, having the widest experience of the Province, have condemned the measure. I need only read one or two extracts from some observations made by the Chief Secretary to the Government of Bengal a few years back in connection with the cadastral survey. He said:—

'It is well, no doubt, that an independent agricultural record should exist which neither zamindar nor zamindar's amla could transfer. Such a record is very desirable on many grounds, but I see no reason for supposing that it will bring with it a general agricultural settlement or any material increase of rural prosperity. And a similar result has not ensued in those provinces in India in which a survey and record of rights has been accomplished.

It is not fair to compare the North-Western Provinces with Bengal, as other causes have led to the accumulation of wealth in our favoured province; but certainly I do not find any evidence to show that the record of rights has led to the enrichment of the peasantry of Upper India. And I am sure of this, that in Bengal, where, owing partly to the accident of the Permanent Settlement, it has hitherto been the policy of Government to interfere as little as possible with the people, the attempt to make a survey and record of rights will give rise to great local opposition and to excessive litigation, by which many persons who are now well off will be impoverished. . . . The evil, I think, will outweigh any administrative advantages derived from it. I venture also to think that most persons who are competent from their knowledge and experience of these provinces to form an opinion on the subject will be found to agree with me in this deliberate conclusion, that a survey and record of rights, if it is calculated to settle disputes where they already exist, is equally calculated, where they do not, to call them into existence.

"I think the public verdict is, that the evil will greatly outweigh the good to be derived from the survey. The survey is calculated to sow the seeds of dissension between zamindar and raiyat, to foster litigation, and to let loose a class of low, under-paid amins among the most helpless and defenceless section of the community. Further, it will be a matter of considerable expense, for the Bill provides for the imposition of a cess. I will not enter into the question as to whether the imposition of the cess is or is not consistent with the terms of the Permanent Settlement—that is a very wide question, but I do contend that it will be a grievous burden to impose upon the raiyats—more than what they can bear—more than what I venture to think they ought to be called upon to bear, having regard to the benefits, immediate and prospective, likely to be derived from such a survey. It was understood some three years ago, when the survey was started, that it was intended that the Government would bear a substantial share of the cost. Section 19 of the Bill provides for the apportionment of the cost, but that section is absolutely silent as to what proportion the Government should bear of the cost. I am sure that this is a matter which will engage the attention of the Select Committee. I desire to point out that when survey operations of a similar character were taken in hand in the Benares Division of the North-Western Provinces, which is a permanently-settled division, it was the Government that bore the entire cost of the survey. However that may be, I hope the consideration of the matter will be adjourned, and the Council will be in a position to discuss it in the light of the papers and reports which have already been received."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"As regards the request to postpone the consideration of this matter for a fortnight, I beg leave to submit that I agree with the hon'ble gentleman who has last spoken, but I put forward the proposition not in the light of an amendment, but as one likely to offer facilities in the consideration of the subject-matter of the Bill, and to promote the due consideration thereof, regard being had to the gravity and importance of the measure. When this Bill was before the Council on the last occasion it was decided that public opinion should be invited, and no doubt such opinions have been sent in, because we have seen some of them in the public papers; but those opinions, although they are printed in the public papers, are not in a form convenient for the members of the Council to consider along with this Bill. I submit that it is a practical suggestion and a sound one, that papers in connection with a Bill before the Council, which have been received after the Bill has been read in Council, should be furnished to the members of the Council as soon as they are received. I have had very great difficulty in informing myself upon the points upon which opinions have been offered to the Council, and how far those opinions are relevant or sound with reference to the various provisions of the Bill. I therefore support the request that has been made to adjourn this matter for a fortnight. Of course, if it is decided to proceed with this Bill, I shall make such observations upon the general provisions of the Bill, and as regards its details, as I have been enabled to form my opinion upon from such crude materials as I have been able to put together and gather or collect in connection with the question."

The Hon'ble THE PRESIDENT said:—"Finding that the feeling of the Council, as expressed by the Hon'ble BABU SURENDRANATH BANERJEE and the Hon'ble MAULVI MUHAMMAD YUSUF, and supported by other members who have spoken to me, is in favour of adjourning the discussion, I am prepared on the part of

Government to agree to it. I think it would be a great pity, if in the minds of members there was any feeling that this question was rushed or hurried more than was desirable. At the same time I must remind them that it is not the ordinary practice to submit papers of this kind to the Council before the passing of the motion which we have met to pass to-day. The papers, as far as they have come in, have been carefully studied by myself and by the hon'ble member in charge of the Bill, but they are mostly in reference to details. Undoubtedly they also contain remarks more or less bearing upon the principle of the Bill, and that being so, I have great pleasure in acceding to what I understand to be the general wish of the Council, namely, that we should defer the present motion till the next meeting of the Council."

The consideration of this Motion was accordingly postponed.

### THE PUBLIC DEMANDS RECOVERY ACT, 1880, AMENDMENT BILL.

The Hon'ble Mr. BUCKLAND presented the Report of the Select Committee on the Bill to amend the Public Demands Recovery Act, 1880.

### THE BENGAL SANITARY DRAINAGE BILL.

The Hon'ble Mr. LYALL presented the Report of the Select Committee on the Bill to facilitate the construction of drainage works for improving the sanitary condition of local areas.

### ADJOURNMENT OF THE COUNCIL.

The Hon'ble THE PRESIDENT said:—"It was suggested by one hon'ble member that a fortnight would be required for the discussion of the Record of Rights Bill. I venture to think that if the papers are circulated at once a week will be enough. Considering the stage which we have reached and the amount of business before the Council, I think it would be desirable to take up the discussion next Saturday. I do not wish to press this against any strong feeling of the Council, but my advice would be that we should take up the discussion next Saturday. The papers will be circulated at once by the member in charge of the Bill."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I ventured to make a request for a fortnight, but if Your Honour does not see your way to grant a fortnight's postponement, we shall accept a week's time. But a week's time might not be sufficient consistently with our other avocations to study the Bill, and these papers might require a longer time. If, however, Your Honour thinks it necessary that the discussion should come on this day week, I do not wish to press the point."

The Hon'ble Mr. BONNERJEE said:—"I beg that this discussion should not come on till this day fortnight. The matter is one of very considerable importance, and will require study at the hands of every member of the Council, and the reports of the Select Committee that have been presented to-day will also require very careful consideration, and as the business is to come on one after the other, I do not think a fortnight's time is too long."

The Hon'ble THE PRESIDENT said:—"The Council will meet next Saturday. We will then take up the Bill to amend the Public Demands Recovery Act, 1880, and we will defer the discussion on the Record of Rights Bill to this day fortnight."

The Hon'ble MAHARAJA SIR LUCHMESSUR SINGH BAHADUR OF DARBHANGA said:—"I thank Your Honour on behalf of the Council for this concession."

The Council adjourned to Saturday, the 2nd March, 1895.

GORDON LEITH,

CALCUTTA;  
The 5th March, 1895.

Assistant Secretary to the Govt. of Bengal,  
Legislative Department.

## WEATHER AND CROP REPORT.

For the week ending the 4th March, 1895.

**Burdwan.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops, sugarcane, potatoes and peas are fair. Fodder sufficient. Price of common rice 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather seasonable. *Rabi* crops are still being harvested. Fodder and water sufficient. Rice selling at from 16 to 21 seers per rupee.

**24-Parganas.**—Rainfall nil. Weather seasonable. Prospects of standing crops good. Condition of cattle good. Fodder and water sufficient. Prices of common rice:—

	Srs.	Ch.	
Sadar	...	...	11 to 14 0
Barasat	...	...	16 0
Basirhat	...	...	18 5
Diamond Harbour	...	...	14 8
			} per rupee.

**Murshidabad.**—Rainfall nil. Prospects of *rabi* crops good. Fodder and water sufficient. Rice sells at 16 seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *rabi* crops has commenced. Transplantation of *boro* (spring rice) continues. Fodder and water sufficient. No cattle-disease. Common rice sells at from 16 to 22 seers per rupee.

**Dinajpur.**—Rainfall nil. Weather fine. Prospects good. Cultivation of jute and *bhadoi* rice is going on. No report of any disease among the cattle and no complaint of fodder and drinking water. Price of common rice from 14 to 16 seers per rupee.

**Rangpur.**—Rainfall nil. Rain urgently wanted for cultivation of lands for *bhadoi* crops. Prospects fair. Common rice sells at from 10 to 15 seers per rupee.

**Pabna.**—Rainfall nil. Weather clear; getting warm. Prospects continue good. Fodder and water-supply sufficient. Common rice selling at from 17 to 20 seers per rupee.

**Dacca.**—Rainfall nil. Weather seasonable. Prospects of standing crops fair. Rain wanted. Ploughing for early rice and jute going on. No cattle-disease. Fodder available. Price of common rice from 12 to 20 seers per rupee.

**Chittagong.**—Rainfall nil. Mornings cool, days warm. Prospects of crops fair. Rain much needed. Water and fodder sufficient. Condition of cattle generally good. Prices steady.

**Patna.**—Rainfall nil. Prospects of *rabi* crops fair. Poppy being lanced and opium extracted. Common rice selling at—

	Srs.	
Sadar	...	18
Barh	...	18
Bihar	...	18
Dinapore	...	17½
		} per rupee.

**Gaya.**—Rainfall nil. Harvesting of *rabi* crops and lancing of poppy in progress. Weather favourable to lancing. Water and fodder sufficient. Prices about normal.

**Champanan.**—Rainfall nil. Weather seasonable. Prospects of *rabi* crops and poppy continue favourable. Opium being collected. Fodder for cattle sufficient. Common rice selling at 16½ seers per rupee.

**Darbhanga.**—Rainfall nil. Prospects of *rabi* crops continue favourable. Mustard being gathered. Cultivation for paddy and *mung* sowings going on. Fodder for cattle sufficient. Prices almost stationary.

**Bhagalpur.**—Rainfall nil. Weather seasonable. Prospects of standing crops good. Fodder and water sufficient.

**Purnea.**—Rainfall nil. Weather getting hotter. Harvesting of mustard and tobacco nearly over. *Rabi* crops on the ground promise well. Land being prepared for *bhadoi* and *aghani* rice. Fodder and water sufficient. Price of common rice varies from 16 to 24 seers per rupee.

**Cuttack.**—Rainfall nil. Weather growing hot. *Dalua* rice in ear and wants rain for maturing. Fodder sufficient. Rice sells at from 11 seers 13 chitaks to 23 seers 10 chitaks per rupee in the district.

**Hazaribagh.**—Rainfall nil. Weather getting decidedly warm. Mustard being cut. Other *rabi* crops in good condition. Poppy doing excellently. Fields being ploughed. Common rice sells at from 14 to 20 seers per rupee.

**General Summary.**—No rain during the week; the weather is seasonable. The *rabi* crops are doing well, and the earlier kinds are being gathered. In Eastern Bengal the *rabi* crops are still in need of rain, and rain is also required there for the cultivation of the *bhadoi* crops. The collection of opium is going on well, the weather being favourable for lancing. No cattle-disease is reported. The price of common rice continues generally steady and normal.

By order of the Lieutenant-Governor of Bengal,  
REVENUE DEPARTMENT,  
The 5th March, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

\* Mean of 8 days.

**Explanation.—Summary.**—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the year. The humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question is the district rainfall in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 2nd of March 1895.

DISTRICT OBSERVATIONS.															DISTRICT.
Variation from normal mean. Mean 8 A.M. temperature. Average humidity at 8 A.M. Average cloud amount at 8 A.M. Rainfall of week at observing station.					OF WEEK.				RAINFALL.						
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 2ND OF MARCH 1895.

ORDINARY north-east monsoon conditions had prevailed over the whole of Bengal for the previous week. On the 24th of February, or the first day of the present week, conditions were to a great extent unchanged; pressure had risen slowly to moderately over the whole province, and had become in excess by amounts ranging up to 0.15 inch at Jalpaiguri and 0.16 inch at Darjeeling; temperature had also risen in all districts, but the night temperatures were still low, though the maximum or day temperatures were somewhat in excess. Steady northerly winds also prevailed over practically the whole province and weather was fine and rainless, while skies were cloudless except at the southern stations where a moderate amount of cloud prevailed. On the 25th, pressure and temperature had begun to fall slowly, but in other respects there was no practical change. On the 26th, pressure continued to fall briskly to rapidly in Bengal, and the area of maximum pressure, therefore, began to retreat southwards, and pressure was higher on the mid-west coast of the Bay than in Bengal. Hence the conditions favourable for northerly winds began to disappear, and southerly winds were reported at several stations in Bengal, and both the temperature and humidity changes on this day were variable. On the 27th pressure had continued to fall briskly over Bengal, and the distribution had become almost normal, but pressure was still higher on the Madras coast than in South Bengal, and hence southerly winds were reported at a good many stations in the province, and these had caused a rapid increase in humidity at many stations, while temperature had also generally risen. Weather, however, continued fine and settled. On the 28th a reaction occurred, and pressure rose briskly to rapidly over the province, and the highest pressures were again recorded in Bengal and North-East India. Hence the southerly winds blowing in Bengal began to disappear, though temperature again rose, while humidity remained very high. On March 1st, again, pressure rose slowly in Bengal, and it had become in excess by amounts ranging up to more than a tenth of an inch. Ordinary north-east monsoon conditions, therefore, again prevailed over the province, and humidity fell briskly at most stations, while temperature fell slowly at a few. These conditions of fine settled weather with light northerly winds also prevailed on the 2nd of March or the last day of the week, and hence throughout the week weather has again been practically fine and settled, and there has been a complete absence of rain at the stations in the plains.

**Pressure.**—The average pressure for the week has been in considerable excess in all districts, and the excess usually has ranged from about a twentieth of an inch in South-East Bengal to about 0.08 inch in the north and west of the province.

**Temperature.**—The average mean temperature for the week has been from one to two and a half degrees in defect in Chota Nagpur, South-West Bengal and Orissa, while it has been nearly normal in East Bengal and Bihar. On the other hand, in North Bengal an excess of more than a degree has been registered. In the whole province a defect of 0.7° has been registered.

The actual temperatures registered during the week, and their variations from the normal temperature of the present season, are clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been generally moderate in the day or maximum temperatures, about half the stations reporting excess temperatures and the remainder defects. In the case of the minimum or night temperatures defects of about 3° to 7° have usually been registered.

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 2nd of March 1895.*

	Normal mean maximum temperature for the week ending 2nd March.	Actual mean maximum temperature for the week ending 2nd March 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 2nd March.	Actual mean minimum temperature for the week ending 2nd March 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 2nd March.	Actual mean daily temperature for the week ending 2nd March 1895.	Variation of actual mean from the normal.

The total fall from 1st January to 2nd March 1895	...	...	...	0.02
The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	1.72

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

 dew;  fog.

Meteorological report of the Province of Bengal for the week ending Saturday, the 9th of March 1895	368	Weekly return of Traffic Receipts on Indian Railways	380

The following is published for general information :

### ENDOWMENT OF MAHARAJA SIR JOTEENDRA MOHAN TAGORE, BAHADUR, K.C.S.I.

No. 1002, dated Calcutta, the 9th March 1895.

From—N. BONHAM-CARTER, Esq., Under-Secretary to the Government of Bengal, General Department,  
To—The Director of Public Instruction, Bengal.

I AM directed to acknowledge the receipt of your letter No. 1278, dated the 25th February 1895, and its enclosure, regarding the offer of Maharaja Sir Joteendra Mohan Tagore, Bahadur, K.C.S.I., to make over to Government an endowment of Rs. 15,000 for the foundation of scholarships for the promotion of Sanskrit learning.

2. In reply, I am to say that the Lieutenant-Governor accepts the offer, and desires that the acknowledgments of Government be conveyed to the donor for his liberality and public spirit. As it is desirable that in all such cases advantage should be taken of the provisions of the Charitable Endowments Act VI of 1890, you should request the Maharaja Bahadur to make an application under section 6 of the Act for vesting in the Treasurer of Charitable Endowments the property he proposes to make over to Government.

## WEATHER AND CROP REPORT.

*For the week ending the 11th March, 1895.*

**Burdwan.**—Rainfall nil. Weather cloudy. State of *rabi* crops fair. Sufficient fodder. Price of common rice varies from 10 to 20 seers per rupee.

**Midnapore.**—Rainfall nil. Weather seasonable. *Rabi* crops are being gathered. Fodder and water sufficient. Rice sells from 15 to 20 seers per rupee.

**24-Parganas.**—Rainfall 0·02. Weather seasonable. Prospects of standing crops good. Ploughing for early crops and jute has commenced. Condition of cattle good. Fodder and water sufficient. Rice sells at—

Basirhat	...	...		13	5
Diamond Harbour	...	...		14	8

} per rupee.

**Murshidabad.**—Report not received.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *rabi* crops has commenced. *Boro* (spring rice) is being transplanted with good prospects. Fodder and water sufficient. Common rice sells from 16 to 22 seers per rupee.

**Dinajpur.**—Rainfall nil. Heavy west wind. Cultivation of jute and *bhadoi* rice is going on. No outbreak of cattle-disease and no complaint of want of drinking water and fodder. Common rice sells from 14 to 16 seers per rupee.

**Rangpur.**—Rainfall nil. Weather seasonable. Lands under preparation for *aus* paddy and jute. Rain wanted.

**Pabna.**—Rainfall nil. Weather warm and partially cloudy. Prospects continue good, but rain wanted. Fodder and water-supply sufficient. Common rice selling at 17 to 20 seers per rupee.

**Dacca.**—Rainfall nil. Weather seasonable. Prospects of standing crops fair. Rain wanted. Ploughing for early rice and jute going on. No cattle-disease. Fodder plentiful. Common rice sells from 12 to 20 seers per rupee.

**Chittagong.**—Rainfall nil. Days warm; mornings pleasant. Rain much needed for *rabi* crops. Prices steady. Water and fodder sufficient.

**Patna.**—Prospects of *rabi* fair. The crops are being harvested in places. Opium extraction going on. Prices of common rice:—

				Srs.	
Sadar	...	...	...	18	} per rupee.
Barh	...	...	...	18	
Bihar	...	...	...	18	
Dinapore	...	...	...	17½	

**Gaya.**—Rainfall at Sadar 0·10. Harvesting of *rabi* crops and collection of opium in progress. Weather favourable. Fodder and water sufficient. Prices about normal.

**Champanan.**—Rainfall practically nil. A slight shower last night (10th) with heavy wind. Prospects of *rabi* crops and poppy continue favourable. Opium is being collected; outturn promises to be good. Indigo seedlings are looking well. Fodder and water for cattle sufficient. Common rice selling at 16 seers per rupee.

**Darbhanga.**—*Rabi* prospects continue favourable. Mustard is being harvested. Poppy doing well. Fodder for cattle sufficient. Prices stationary.

**Bhagalpur.**—*Rabi* harvest begun; yield rather above average. Indigo thriving. Fodder and water plentiful.

**Purnea.**—Weather cloudy with westerly winds. Harvesting of mustard and tobacco nearly finished. Standing *rabi* crops promise well. Ploughing for *bhadoi* and *aghani* going on. Fodder and water sufficient. Price of common rice varies from 16 to 24 seers per rupee.

**Cuttack.**—Rainfall nil. Weather growing hot. *Dalua* (spring rice) maturing in places. Rain needed for standing crops. Condition of cattle good. Fodder sufficient. Rice sells from 11 seers 13 chitaks to 23 seers 10 chitaks per rupee.

**Hasaribagh.**—Weather seasonable. Ploughing in progress. Sugarcane being planted. Standing crops doing well. Opium half collected and expected to yield up to estimate. Water ample. Pasturage scanty.

---

**General Summary.**—There was practically no rainfall during the week except for  $\frac{1}{16}$  inch at Gaya. The prospects of the standing crops continue generally good, but in Eastern Bengal and in the Outtaek district rain is still required. Rain is also wanted for the cultivation of the *bhadoi* crops in Northern Bengal. In some districts the *rabi* harvest has begun. The collection of opium is in progress, and the outturn is generally expected to be good. In Bihar the prospects of the young indigo are favourable. Outbreaks of cattle-disease have been reported from Rajshahi and Jessore. The price of common rice continues normal and almost stationary. •

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

*The 12th March, 1895.*

C. E. BUCKLAND,

*Secretary to the Govt. of Bengal.*

**Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of February 1895.**

	Inches.	Date.	Hour.
The mean pressure of the month ... ..	29.979		
The average pressure of February from 24 years' registers ...	29.945		
The highest pressure in the month ... ..	30.132	24th	10
The lowest pressure in the month ... ..	29.831	3rd	16
The range of pressure ... ..	0.301		
Hours.			
The total number of hours of bright sunshine during the month	240.2		
The maximum possible number of hours of sunshine ...	318.0		
°			
The mean temperature of the month ... ..	69.9		
The average temperature of February from 24 years' registers	73.0		
The highest temperature in the month ... ..	87.9	27th	
The lowest temperature in the month ... ..	52.5	8th	
The range of temperature during the month ... ..	35.4		
The mean daily range of temperature ... ..	23.5		
The greatest range of temperature in one day ... ..	31.1	27th	
Per cent.			
The mean humidity of the month ... ..	65		
The average humidity of February from 24 years' registers ...	67		
Inches.			
The mean vapour tension of the month ... ..	0.455		
The average vapour tension of February from 9 years' registers	0.538		
The mean cloud proportion of the month ... ..	1.30		
The average cloud proportion of February from 18 years' registers ...	1.86		
Inches.			
The total rainfall of the month ... ..	0.02		
The total rainfall indicated by a Beckley's self-registering rain-gauge (month of the gauge about 52 feet above the ground)	Nil		
The average fall of February from 48 years' registers ...	0.87		
The greatest fall in 24 hours ... ..	0.01	3rd & 13th	
Days.			
The number of rainy days in the month ... ..	2		
The average number of rainy days in February from 24 years' registers ...	3		
°			
The mean maximum equilibrium temperature of solar radiation during the month ... ..	137.8		
The mean difference of sun and air temperatures ... ..	55.6		
The greatest sun temperature ... ..	145.8	18th	
The greatest excess of sun over air temperature ... ..	60.0	18th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth ... ..	51.0		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground ... ..	8.1		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature ... ..	10.4	14th	
Miles.			
The mean movement of the wind per day ... ..	60.0		
The greatest movement of the wind in one day ... ..	92.0	5th	
The greatest movement of the wind in one hour ... ..	11.0	26th, 2 to 3 p.m.	
The number of hours with winds from each of the 8 points—

Calm 86.			

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2.1° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

O. LITTLE,

METEOROLOGICAL OFFICE, INDIA;  
Calcutta, the 8th March 1895.

*For Meteorological Reporter to the Govt. of India.*

## SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF FEBRUARY 1895.

The most important features in the meteorology of Bengal and Assam in February have been—

1. The mean pressure of the month has been distinctly higher than the normal in all districts. The excess has been generally largest in the south-west of the province and along the foot of the hills, where it has averaged about 0.03". Over the remainder of the province and in Assam the excess has equalled from about 0.015" to 0.02".
2. The average day, or maximum, temperatures for the month have usually been above the normal, the excess usually equalling about one to two degrees. In the case of the night, or minimum, temperatures, about half the stations report excess amounts and the remainder defects, and the variations have usually equalled from about a degree to a degree and-a-half. The night temperatures have usually been in defect at the southern and eastern stations, and in excess elsewhere. Hence the variations of the mean temperature from the normal have been small, and the majority of stations show excess amounts of less than a degree, while a few of the southern stations show defects of a few tenths of a degree.
3. In the case of the average humidity, about half the stations in Bengal show excess amounts and the other half defects, but the former have been very much larger in amount than the latter; and therefore on the whole the air has been more moist than usual. In Assam, on the other hand, all the reporting stations show slight excess amounts. In the case of cloud proportion, practically all the stations in both Bengal and Assam show average amounts very decidedly smaller than the normal.
4. Winds have been strongly westerly over the western half of Bengal, but over the eastern half and in Assam winds have usually been southerly and south-easterly.
5. The barometric depressions coming from North-Western India during February were very few in number, and only two feeble disturbances affected Bengal during the month, the first giving unsettled weather from the 1st to the 4th, and the second from the 10th to the 14th. Practically for the whole of the remainder of the month weather was fine with no rain, and usually winds were more or less northerly, and conditions generally of light north-east monsoon character.
6. Owing to only two extremely feeble disturbances having visited Bengal in February, and which also mainly affected the western districts, the rainfall during the month has been singularly small in amount. Indeed, the whole of South-West, East and North Bengal have received practically no rain, the average amounts only equalling a few hundredths of an inch. In Oota Nagpur about a third of an inch has been received on the average, but this is only half the normal fall for the period. Bihar has received an average fall of about four-tenths of an inch, or about a normal fall, while Orissa has received the largest average amount of 0.92 inch, which is very slightly larger than the usual amount for February.

*Meteorology of the month.*—During the first two days of February a feeble barometric depression, which had advanced eastwards from North-Western India, had affected Bengal, and hence on the 2nd pressure was low, while temperature was high, and the night temperatures reported on the 2nd were in some cases 10° above the normal; skies were also almost overcast, and a good many rain showers were reported. Conditions in Bengal continued somewhat disturbed up till the 5th, when the depression had filled up, and the cool wave of air in the rear of the depression swept over Bengal, giving fine settled weather with a rapid decrease in both temperature and humidity. These conditions continued till the 10th, when another feeble form of barometric depression began to advance over Bengal from the Central Provinces, and this affected the weather over the province up till the 13th or 14th, when the depression had again passed away. Hence, from the 10th to the 13th increasing temperature, humidity and cloud proportion with decreasing pressure and a few local rain showers prevailed, but from the 14th again weather was fine and settled with low temperature and humidity and rather high pressure. On the 18th a rapid and rather remarkable increase of pressure occurred, which continued up till the 20th, when an excess pressure of a seventh of an inch was reported at some stations, but except for a slight disturbance in the hills on the 20th, weather in the plains continued fine and settled, and of ordinary north-east monsoon character up till the 25th or 26th, when the area of maximum pressure, which in the cold-weather months is situated in the north-west of the province, began to retreat southwards, and on the 26th and 27th pressure was higher in the Madras Coast than in South Bengal; and hence moist southerly winds began to set in over Bengal. On the 28th, however, a reaction occurred, and pressure rose briskly to rapidly over Bengal, where the highest pressures were again reported, and hence the southerly winds again began to disappear and weather returned to the ordinary north-east monsoon condition. Hence from about the 14th to the end of the month weather was generally fine and settled, and of ordinary north-east monsoon character.

*Pressure.*—The variations of pressure during the month have been rather large, especially about the 13th. The general average pressure for February has been in excess at the western and northern stations in Bengal by from about 0.02" to 0.04", while over the remainder of the province the excess has equalled about 0.01" to 0.02". In Assam the average excess has been 0.018".

**Temperature.**—The average maximum, or day, temperature of the province for February has usually been about  $1^{\circ}$  to  $2^{\circ}$  above the normal, while the average minimum, or night, temperatures have been almost normal, for about half the stations in the south and east report slight defects, and the remaining stations slight excess night temperatures. Thus the average mean temperature of the whole province of Bengal for the month has been in excess by  $0.3^{\circ}$ . In Assam the general excess has equalled  $0.6^{\circ}$ .

The following table shows the variations of the average, maximum, minimum and mean temperatures, week by week, during February at nine typical stations in different districts of the province from the normal values for the same period, and will show the rather large variations that have occurred :—

STATIONS.	WEEK ENDING 9TH FEBRUARY 1895.			WEEK ENDING 16TH FEBRUARY 1895.			WEEK ENDING 23RD FEBRUARY 1895.			WEEK ENDING 2ND MARCH 1895.

**Rainfall.**—The only falls of importance have occurred in Orissa, Bihar and Chota Nagpur, Orissa having received an average fall of nearly an inch and the other two divisions between three and four tenths. In the two first divisions the falls have been almost normal in amount, and in the last district nearly 50 per cent. in defect. The other divisions have been almost rainless.

In Bihar the districts of Malda, Purnea and Bhagalpur have received a decidedly scanty rainfall, while in Chota Nagpur the same is the case in all districts except Lohardaga, but in Orissa the falls have been fairly evenly distributed, and rainfall is thus almost normal.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the month of February 1895 :—

METEOROLOGICAL DIVISIONS.				TEMPERATURE.					RAINFALL.								
				Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th October 1894.

\* Mean of 6 days.

**Explanation.—Summary.**—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the years 1871-80. The humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 9th of March 1895.

DISTRICT OBSERVATIONS.															DISTRICT.
Variation from normal mean. Mean 8 A.M. temperature. Average humidity at 5 A.M. Average cloud amount at 5 A.M. Rainfall of week at observing station.					OF WEEK.				RAINFALL.						
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 10th October 1894.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY,  
THE 9TH OF MARCH 1895.**

At the close of the previous week fine settled weather prevailed with pressure considerably above the normal, and conditions generally of the north-east monsoon character. Though no disturbance of any kind occurred during the week under review till towards the end, an almost uninterrupted change has been going on, and has led to lower pressure and consequently southerly or westerly winds and higher temperature. The fall of pressure began slowly on the 3rd, the first day of the week, and continued with moderate rapidity on the 4th, but there was a slow rise on the 5th, after which the fall again set in, and continued in varying amounts till the end of the week except in some of the north-eastern districts, where there was a slight rise on the last two days. As the distribution was fairly uniform, and the changes have been of similar amount over the province and along the west coast of Bay, the general uniformity still continues, but from being highest in Chota Nagpur and lowest in the south of Burmah at the beginning of the week, readings have become highest in the south of Burmah and lowest in South-West Bengal. At the same time the difference from the normal has changed from excess of about a twentieth of an inch over the greater part of Bengal, but especially the western districts, to defect varying from .02 inch in Chota Nagpore to nearly .1 inch in the centre of South-West Bengal.

The wind circulation has been generally light and westerly, but the tendency has been for directions when northerly to become southerly, especially in Orissa and the north of the Bay. At the same time the area of relatively high temperature, which at first did not include the southern part of the province and the north of the Bay, extended southwards, though not as far as Orissa till near the end of the week. The excess continued almost unchanged throughout the week in Behar and North Bengal, but in the southern districts the difference from the normal changed from a defect ranging up to nearly 5° to excess of about 4°, and in places to as much as 7°. These high temperatures occurred at Ranchi and Bankura on the 9th, the last day of the week.

The changes at the end of the week were partly due to a slight disturbance which passed from west to east across the province. It was due to a very shallow depression, which was attended by an irregular cyclonic circulation of light winds, and which produced no change in the weather beyond the southerly winds and a warmer moist, and in places a foggy atmosphere.

**Pressure.**—The mean values for the week are below the normal over the whole province by amounts ranging from less than .01 inch in Chota Nagpur to nearly .05 inch in part of East Bengal. This distribution, as stated above, has been brought about by fairly steady, slow downward changes, the only fall of any magnitude occurring on the 7th, and varying from .05 inch at False Point to .12 inch at Darbhanga.

**Temperature.**—The only part of the province where the mean temperature is below the normal is Orissa, and there defect is only half a degree as compared with a defect last week of two and-a-half degrees. In the other districts there is rather a large excess, varying from 1.1° in South-West Bengal to 2.4° in Bihar.

The actual temperatures registered during the week and their variations from the normal temperature of the season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The day temperatures have been everywhere above the normal, while the nights have been comparatively cool at the southern stations, the difference from the mean minimum readings varying from defect of 2.4° at Cuttack to excess of 2° at Hazaribagh, Patna and Purnea:—

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 9th of March 1895.*

	Normal mean maximum temperature for the week ending 9th March.	Actual mean maximum temperature for the week ending 9th March 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 9th March.	Actual mean minimum temperature for the week ending 9th March 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 9th March.	Actual mean daily temperature for the week ending 9th March 1895.	Variation of actual mean from the normal.
Cuttack	95.3	96.3	+1.0	70.1	67.7	-2.4	82.7	82.0	-0.7

The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	2.18

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

, dew; , fog; , overcast; , lunar corona.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

Calcutta, the 11th March 1895.

O. LITTLE,

For Meteorological Reporter to the Govt. of India.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of February 1895.

From—J. LANE, Esq., Offg. Under Secy. to the Govt. of Bengal, Municipal Dept.,  
To—The Commissioner of the Presidency Division.

In continuation of my letter No. 1084Med. of today's date, I am directed to say that the Lieutenant-Governor accepts the offer of Rs. 28,000 made by Babu Kailash Chandra Mookerjee of Belgoria, in the district of Nadia, for the establishment of a dispensary in that village, and to request that you will be so good as to convey to him the thanks of Government for his liberality and public spirit.

## THE EMPIRE OF INDIA EXHIBITION, 1895.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 15th March 1895.

}

C. E. BUCKLAND,  
Secy. to the Govt. of Bengal.

*Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture,—No.  $\frac{7}{3}$ , dated 7th March 1895.*

### COMMERCIAL EXHIBITIONS.

#### RESOLUTION.

READ the following:—

Prospectus of the Empire of India Exhibition to be held in London in 1895.

## THE EMPIRE OF INDIA EXHIBITION, 1895.

TO BE HELD AT EARL'S COURT, LONDON, S.W.

*Proprietors:*

THE LONDON EXHIBITIONS, LIMITED.

*Directors:*

PAUL CRÉMIEU-JAVAL, *Chairman.*

HAROLD THOMAS HARTLEY.

JAMES MARSHALL FRESHWATER.

*Managing Director:*

IMRE KIRALFY.

This Exhibition will open early in May 1895, for a period of about six months, and will be held in the well-known Earl's Court Exhibition Grounds, which cover an area of about 22 acres, and will be characterised by brilliant and unique attractions.

Ample capital has been provided for this purpose by the London Exhibitions, Limited, who have a capital of £100,000, of which £90,000 is subscribed in cash. It is intended to expend the whole of this amount in preparing THE EMPIRE OF INDIA EXHIBITION.

The Exhibition will be divided into sections, *viz.*:—The Art and Loan Section, the Industrial Section, and the Spectacular Section.

The Company will be glad to receive particulars of proposed Loan Exhibits from the owners of Artistic and Historical Objects emanating from or connected with India, such as Arms, Furniture, Costumes, Pictures, Jewellery, etc., for which, if approved, the Company will provide carriage to the Exhibition free of cost, and ample space for exhibiting, also every possible protection in the way of safes, show-cases, police, fire insurance, etc., and will guarantee to return the same at the end of the Exhibition at their own expense. This Section will be under the Direction of Sir JAMES LINTON, President of the Royal Institute of Painters in Water Colours.

Industrial Exhibitors—whether of Indian produce and manufactures, or manufacturers of goods for the markets of India—who are desirous of securing space, should state the nature of their Exhibits, the space required, and whether process of manufacture employing native or other labour will be shown. To those Exhibitors showing working exhibits employing native Indian operatives special facilities will be afforded.

"THE EMPIRE OF INDIA" is so suggestive of Oriental splendour and of the manifold interests which are associated with this Great Dependency of the British Crown, that it affords abundant inspiration for this Exhibition. Only of late years has any attempt been made to meet the long-felt and pressing need of London for a Pleasure Resort easily accessible from all parts of the Metropolis, and it is confidently believed that this magnificent Exhibition of 1895 will fulfil this requirement; support and co-operation from the highest and most influential quarters have been secured to the enterprise.

The Exhibition will comprise Illustrations of Historical, Artistic, and Industrial India—not only by means of Oriental Pageants, but also by exemplifications of the Customs and Amusements of the various Races; and in order to make THE EMPIRE OF INDIA EXHIBITION

really and instructively representative it is intended to reproduce all the leading characteristics of the varied and picturesque phases of life in an INDIAN CITY, comprising Bazaars, Streets, and Shops, peopled by Natives engaged in their various avocations. Arrangements have been made by the Company's Official Delegates in India for securing the presence, during the term of the Exhibition, of a number of Native Craftsmen and other typical representatives of Hindoo and Mahomedan Bazaar-life. In order to stimulate the best artisans of India to take part in the Exhibition and exhibit their choicest works, valuable prizes, amounting to about 7,000 rupees, will be offered by the Company for the best examples of the various native Indian Arts and Crafts.

To ensure a thorough and impartial examination of the Exhibits for the Awards, which will be made in money prizes, the Company invited the co-operation and assistance of the Society for the Encouragement and Preservation of Indian Art, of which Sir MOUNTSTUART GRANT DUFF, G.C.S.I., is President, Sir GEORGE BIRDWOOD, K.C.I.E., C.S.I., is Chairman of the Executive Committee, Mrs. DAVID CARMICHAEL, Mr. C. PURDON CLARKE, C.I.E., and Mr. MARTIN WOOD, Honorary Secretaries. This responsible and onerous task has been undertaken by the Society as a duty in the interest of Indian Arts and Manufactures.

MR. IMRE KIRALFY has undertaken the Composition and Production of a Great Indian Spectacle, which it is intended shall eclipse anything of the sort that has hitherto been produced, and his name, so well known as the author and producer of "Venice in London," "Nero," "America," and numerous other triumphs, familiar to the inhabitants of both hemispheres, will guarantee both the novelty and the artistic excellence of this Section. The Artistic and Architectural Features of the Exhibition also are his conception and design.

The present buildings being inadequate for the purposes above enumerated, a special feature of the new Exhibition will be the erection in the grounds of one of the finest glass and iron structures in the world, covering 66,014 superficial feet, to be known as THE IMPERIAL PALACE, in which the Exhibits will be displayed.

A New Theatre, probably the largest in the world, will be constructed for the purpose of adequately presenting Grand Spectacular Productions, and will be named "THE EMPRESS THEATRE."

The existing Gardens—which, with their manifold natural charms, have always been a great feature of attraction at Earl's Court—will be improved, and Electric Illuminations, First-class Bands, and other attractions will be provided therein.

Arrangements will also be made with persons having control of typical Indian Amusements, or Shows connected with India, which they are desirous of exhibiting to the British public for special payment at the doors. Such arrangements can be made either on the basis of a fixed rental or of sharing the receipts for admissions. Spaces for this purpose will be provided in the grounds separate in every way from the Exhibition Buildings.

Arrangements have been made with Messrs. SPIERS & POND to provide an efficient system of Restaurants and Refreshment Bars to suit all classes of visitors, at prices varying from the cheap tourist tariff to the celebrated Quadrant Dinners provided by them at the well-known South Kensington Exhibitions of 1885 and 1886.

Intending Exhibitors should fill up the Preliminary Form attached, giving particulars of their Exhibit, and forward the same, addressed to the Secretary, at the Offices of The London Exhibitions, Limited, 10, 11 and 12, New Bridge Street, London, E. C., from whom all information can be obtained, as well as at the Offices of Messrs. KING, KING & Co., at Bombay, and KING, HAMILTON & Co., of Calcutta.

After receipt of the Preliminary Form above referred to, the Applicant will be informed if the space can be allotted to him, and on what conditions, when the Rules and Regulations and Form of Agreement will be sent for his approval and signature.

## THE EMPIRE OF INDIA EXHIBITION, 1895.

THE LONDON EXHIBITIONS, LIMITED.

*Offices:—10, 11, 12, New Bridge Street, E. C.*

To Manufacturers and Importers desirous of developing or establishing trade with India, the commercial importance of this Exhibition cannot be overstated. It will not only bring the manufacturer into practical touch with the consumer, but will also afford

an unrivalled opportunity of making brands prominently known in the most desirable of markets.

The solid support the Exhibition meets with both here and in India, in the very highest and most influential quarters, indicates the serious interest taken in it.

The important trade already existing between the two countries is clearly shown in the following Government Statistics of Exports to which we particularly invite the attention of Merchants and Manufacturers of all classes; a trade to which it is believed the Empire of India Exhibition will afford an enormous impetus.

THE LONDON EXHIBITIONS, LIMITED.

*Directors :*

PAUL CRÉMIEU-JAVAL, *Chairman.*

HAROLD THOMAS HARTLEY.

JAMES MARSHALL FRESHWATER.

*Managing Director :*

IMRE KIRALFY.

*Director of Fine Art and Loan Section.*

SIR JAMES D. LINTON,

*President of the Royal Institute of Painters in Water Colours.*

### FINE ART AND LOAN SECTION.

#### REGULATIONS FOR EXHIBITORS.

##### CONDITIONS ON WHICH WORKS WILL BE RECEIVED.

1. The Exhibition will consist of Paintings in Oil and Water Colours, Black and White Drawings, Miniatures, Pastels, Engravings, Etchings, all of which must be of Indian or allied subjects, and Loan Objects of Indian Art. Owners of Historical Pictures, Portraits of Governors-General and other personages who have figured conspicuously in the History of India, are particularly invited to co-operate in this Section.

2. The Receiving Days for Pictures intended for the Exhibition will be from Monday, March 18th, to Wednesday, March 20th; for all Loan Objects other than Pictures from March 11th to the 13th, inclusive. All Works must be sent in to the Galleries at Earl's Court on one of those dates, as nothing can be admitted after the last named day. The hours for receiving will be from 10 A.M. to 5 P.M.

3. All Works, except those specially invited, will be subject to the approval of the Fine Art Committee, whose decision will be notified to the Artists and Contributors with as little delay as possible.

4. All Works, except such as are specially invited or promised, must be delivered at the Galleries free of charge and without packing cases, and Artists or Contributors living in the country or abroad must send their Works to an Agent in London to be unpacked and delivered at the Galleries on one of the appointed days.

5. All specially invited Works will be returned by THE LONDON EXHIBITIONS, LIMITED, to the various Contributors free of charge after the close of the Exhibition.

6. The Number and Title of the Work, or description of the Object, with the name and address of the Artist or Contributor, and the price (if the Work or Object be for sale), must be placed on labels, one to be fixed to the back and the other to hang over the front of the Picture or attached to the Object; and the same information with corresponding numbers must be placed upon the form herewith, *which form must be delivered with the Works or Objects.* On receipt of a stamped directed envelope the Curator will forward form and labels.

7. All Pictures and Water-colour Drawings must be in Gilt Frames. This rule does not apply to Black and White Drawings, Engravings and Etchings. All Pictures must be Glazed with the exception of Oil Paintings, which may be glazed or not at the option of the Artist. Drawings with white or other coloured mounts are admissible.

8. No exhibited Work or Object can be removed before the close of the Exhibition.

9. A commission of 15 per cent. upon the price first sent in will be charged upon all Works sold in the Galleries, whether the sale be effected by the Exhibition Company or by the Contributor. In the case of Loan Objects other than Pictures from abroad, a commission of 10 per cent. will be charged; and any expenses incurred by the Exhibition

Company's Committee will also be deducted from the proceeds of the sale before the amount is remitted to the Contributor.

10. On any Work or Object being sold privately by the Artist or Contributor, intimation should at once be sent to the Curator, as a sale in the Gallery will take priority of a sale effected by the Artist or Contributor unless due notice be given.

11. In case the purchaser of any Work or Object sold in the Galleries cannot be found within a reasonable period after the close of the Exhibition, the deposit, if any, shall be forfeited to the Artist or Contributor, after deducting the commission as mentioned in Regulation 9; but the Exhibition Company will not hold itself responsible for more than the amount of such deposit.

12. Every reasonable care will be taken of the Works and Objects contributed, but THE LONDON EXHIBITIONS, LIMITED, does not hold itself responsible for any injury or loss which may occur to such Works or Objects whilst in the Exhibition or in transit thereto or from, except in the case of such Pictures and Objects which are specially invited by THE LONDON EXHIBITIONS, LIMITED, and which will be insured by them.

13. At the close of the Exhibition an order for the delivery of the Works (except those sold and such as are specially invited) will be sent to each Artist or Contributor, and it is earnestly requested by THE LONDON EXHIBITIONS, LIMITED, that all Works be removed on one of the appointed days, otherwise they will be warehoused at the expense of the owner.

14. ALL CORRESPONDENCE must be addressed: Fine Art and Loan Section, The Empire of India Exhibition, 10, 11, 12, New Bridge Street, London, E.C.

#### TO INDIAN EXHIBITORS.

No Loans can possibly be received unless a full description, including dimensions, of the proposed objects be previously sent to SIR JAMES D. LINTON, The Fine Art and Loan Section, Empire of India Exhibition, 10, 11, and 12, New Bridge Street, London, E.C., for consideration; when, if acceptable, due notification will be given and the Exhibitions Company's Agents—Messrs. KING, KING & CO., Bombay, and Messrs. KING, HAMILTON & CO., Calcutta, will be advised to receive the same, provided they are properly packed for shipment and delivered free to them. THE LONDON EXHIBITIONS CO. will then defray all charges for freight to and from their Agents' Offices.\*

## FINE ART AND LOAN SECTION DEPARTMENT.

## THE EMPIRE OF INDIA EXHIBITION, 1895.

EARL'S COURT, LONDON, S.W.

## RECEIVING DAYS.

For Loans—March 11th, 12th, and 13th. For Works—March 18th, 19th, and 20th.  
Between the hours of 10 A.M. and 5 P.M.

*Exhibitor's List.*

Please write legibly the Number and Description of each Work.

Do not write on the back of this paper.

Let the Numbers and Description correspond with the labels of the Works.

All Works must be delivered at the Galleries *free of any expense or charge* to The London Exhibitions, Limited.

Works cannot be received packed in cases, or by parcel post.

## EMPIRE OF INDIA EXHIBITION, LONDON, 1895.

## CLASSIFICATION OF EXHIBITS FOR AWARDS AND DIPLOMAS.

## MONEY PRIZES AND DIPLOMAS OF MERIT.

IN order to stimulate the best Artizans of India to take part in the Exhibition and exhibit their Choicest Works, the following valuable prizes are offered by the Company for the best examples of the various Native Indian Arts and Crafts; and to ensure a thorough and impartial examination of the exhibits for the awards, which will be made in money prizes, the Company invited the co-operation and assistance of the Society for the Encouragement and Preservation of Indian Art, of which Sir Mountstuart Grant Duff, G. C. S. I., is President, Sir George Birdwood, LL.D., K.C.I.E., C.S.I., Chairman of the Executive Committee, Mrs. David Carmichael, Mr. C. Purdon Clarke, C.I.E., and Mr. Martin Wood, Honorary Secretaries. This responsible and onerous task having been undertaken as a duty in the interest of Indian Arts and Manufactures, the Society has allotted the sum of ₹7,000 placed at their disposal by "The Empire of India Exhibition," in the following manner, and in addition, will on their part, award Special Diplomas to all those who obtain these awards, and also for work which may be considered of sufficient merit.

Class 21.—Bookbinding.

Class 22.—Embroidered Leather of all kinds.

**SECTION 10.—WEAVING AND LOOM WORK. 5 Prizes—500 Rupees, 500 Rupees, 200 Rupees, 200 Rupees and 100 Rupees.**

<b>Class 23.—Silk Weaving, Plain and Figured.</b>	<b>Class 26.—Carpets and Rugs.</b>
<b>„ 24.—Cottons of all kinds.</b>	<b>„ 27.—Mats, Baskets, and Straw Work.</b>
<b>„ 25.—Woollens of all kinds.</b>	

**GENERAL INSTRUCTIONS AND RULES AND REGULATIONS.**

**I.—**Only articles enumerated in the Classification will be admitted, these must be of Indian manufacture.

**II.—**Preference will be given to articles adapted to the European market, but in which Indian Art characteristics have been preserved.

**III.—**Articles will not be esteemed on account of excessive labour employed in their decoration, but for excellence of design, good workmanship, and moderate price.

**IV.—**Every article sent must be for sale, and the price asked by the sender clearly stated on a label attached to each object. The Exhibition Company reserves the right to add to this price such charges as it may consider necessary in order to cover the transit and packing expenses with regard to each article.

**V.—**All articles unsold at the close of the Exhibition will be returned free of expense to the senders.

**VI.—**The articles in competition will be judged by a Committee of the Society for the Encouragement and Preservation of Indian Art, who will award the Money Prizes, and, in addition, grant Special Diplomas of Merit, in several grades, to those receiving the prizes and also to those whose exhibits are honourably mentioned.

**VII.—**The Commercial Exhibitors and Importers can also enter any articles in their stalls for competition, and will also be eligible to receive prizes for general excellence of collective exhibits in each class should any prizes remain unawarded, owing to a lack of merit, after the Committee has inspected the articles sent specially for competition.

**VIII.—**Every article must bear a label giving a full description, also stating its Class number and the full name and address of the maker as well as that of the Exhibitor, should they be different persons, and selling price asked by the sender. These details must all be given in English.

**IX.—**All articles must be securely packed and forwarded with the attached duplicate forms correctly filled up, one being enclosed in the case with the articles, to Messrs. KING, KING & CO., Bombay; or Messrs. KING, HAMILTON & CO., Calcutta; and must arrive at Bombay not later than the 7th February, or Calcutta on the 1st February 1895. In order to ensure safe delivery, special attention is called to the packing of all objects as they will be forwarded to London by the Company's Agents in the condition received and will in no instance be re-packed. Every package must be addressed "The Empire of India Exhibition, London," and bear the name of the sender.

**X.—**The Exhibition Company will insure the goods against all possible risks, but will not be responsible for any loss or damage which may not be covered by such insurance.

**XI.—**No Exhibitor may send more than two articles in any one class, but he may compete in several classes.

All particulars and information can be obtained from Messrs. KING, KING & CO., Bombay; Messrs. KING, HAMILTON & CO., Calcutta; and THE LONDON EXHIBITIONS, LIMITED.

## EMPIRE OF INDIA EXHIBITION, LONDON, 1895.

### LOAN EXHIBITION OF RELICS AND MEMORIALS OF THE LATE HONOURABLE EAST INDIA COMPANY.

#### HONORARY COMMITTEE OF ADVICE.

SIR GEORGE C. M. BIRDWOOD, K.C.I.E., C.S.I., M.D., LL.D., *Chairman.*

DAVID F. CARMICHAEL, Esq., *late Member of the Government of Madras.*

C. PURDON CLARKE, Esq., C.I.E., F.S.A., *Assistant Director, South Kensington Museum.*

FREDERICK C. DANVERS, Esq., *Registrar and Superintendent of Records, India Office.*

SIR JOSEPH FAYRER, K.C.S.I., M.D., LL.D., F.R.S., *Hon. Physician to H. M. The Queen and T. R. II. The Prince of Wales and Duke of Saxe-Coburg-Gotha.*

GEORGE W. FORREST, Esq., B.A., *Director of Records, Calcutta.*

SIR WILLIAM W. HUNTER, K.C.S.I., C.I.E., M.A., LL.D., *late Member of the Governor General's Council.*

CLEMENTS R. MARKHAM, Esq., C.B., F.R.S., *President of the Royal Geographical and Hakluyt Societies.*

GENERAL JAMES MICHAEL, C.S.I., J.P., *late Military Secretary, Madras Government.*

JOSEPH PARKER, Esq., *Director General of Stores, India Office.*

J. R. ROYLE, Esq., C.I.E., *Curator, Indian Section, Imperial Institute.*

WILLIAM FOSTER, Esq., B.A., *Honorary Secretary.*

The Directors of The Empire of India Exhibition, to be opened at Earl's Court, Kensington, in May next, desiring to make it as useful and instructive as possible, have decided to form a Loan Collection of Relics and other Historical Memorials of the late Honourable East India Company.

The Directors have been much gratified by the warm approval the proposal has received. A number of distinguished Anglo-Indian officials have already kindly consented to act as an Honorary Committee of Advice, to assist the Directors in their efforts to secure a collection which shall recall to the minds of the present generation of Englishmen the remarkable achievements of the great Merchant Company of the City of London, to which we owe our Indian Empire, and shall be worthy of the heroic record they fill in the pages of our National history.

The Directors will be glad to receive particulars of any proposed Loan Exhibits from the owners of objects connected with the history of the Honourable East India Company, such as Portraits, Drawings, Sketches, Maps and Plans, Original Commissions, Arms, Medals, Coins, Old Plate, China and Glass, or other Historical Relics associated with the H. E. I. Co. in India or in this country. For all approved Exhibits the Company will provide free carriage to the Exhibition, and ample exhibiting space, and they will return the same at the close of the Exhibition at their own cost.

Every reasonable protection will be afforded in the way of safes, show cases, police supervision and fire insurance by the Company.

The Directors further beg to state that the Loan Collection will be suitably installed in the Imperial Palace, in one of the finest glass and iron structures in the world, now in course of construction.

Intending contributors to this section of The Empire of India Exhibition should fill up the attached form and forward it to

WILLIAM FOSTER, Esq., B.A.,  
*Honorary Secretary, H.E. I. Co. Loan Collection,  
 Empire of India Exhibition,  
 Earl's Court, London, S.W.*

## THE KHARIF IRRIGATION OPERATIONS FOR 1894-95.

No. 446A.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

Irrigation.

*Dated Calcutta, the 18th March 1895.*

## RESOLUTION.

READ—

Statements Nos. I, II, and III showing irrigation operations of canals in Bengal during the kharif season of 1894-95.

OBSERVATIONS.—The area irrigated during the kharif season of 1894-95 was 483,858 acres, against 493,085 acres in 1893-94, showing a decrease of 1·87 per cent.

2. The decrease took place mainly in the area commanded by the Sone and Midnapore Canals. In the Orissa Canal area there was a slight, and in the case of the Eden Canal a large increase. The increase was due to defect in the rainfall, and where there was an increase, the rainfall of 1894 was more abundant than usual.

3. The increase or decrease in the irrigation from each canal is given in the following statement:—

CANALS.		KHARIF SEASON.		More.	Less.
		1893-94.	1894-95.		
1		2	3	4	5
		Aores	Aores.	Aores.	Aores.
Orissa	Taldunda Canal ...	11,911	25,214	13,273	.....
	Kendrapara Canal ...	59,393	63,319	3,926	.....
	High Level Canal, Ranges I, II and III, and Jajpur Canal.	29,288	30,232	974	.....
Midnapore Canal ...		79,550	69,940	.....	9,610
Eden Canal ...		11,601	20,370	8,769	.....

\* There was no irrigation from the Saran Canals during the kharif season of 1894-95.

4. On the Orissa, Midnapore, Eden and Saran Canals, the only kharif crop irrigated is rice, whilst on the Sone Canals there are in addition sugarcane and hot-weather crops.

ORDER.—Ordered that a copy of this Resolution and of the statements Nos. I, II, and III be published in the Supplement to the *Calcutta Gazette*, and submitted to the Government of India, Public Works Department, for information.

Ordered, also, that copies of this Resolution and of the statements be forwarded to the Commissioners of Orissa, Burdwan, and Patna Divisions; the Collectors of Cuttack, Balasore, Midnapore, Burdwan, Hooghly, Gaya, Patna, Shahabad, and Saran; the Superintending Engineers, Orissa, South-Western, and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Lieut-Col., R.E.*,

*Offg. Secretary to the Government of Bengal.*

## WEATHER AND CROP REPORT.

*For the week ending the 18th March, 1895.*

**Burdwan.**—Rainfall at Sadar .02. Weather getting sensibly warmer. Sugarcane is being pressed. Potatoes and other *rabi* crops are being harvested. Price of common rice 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather growing hot. *Boro* (spring rice) and indigo are doing well. Rice sells from 17 to 21 seers per rupee.

**24-Parganas.**—Rainfall at Sadar .02. Weather seasonable. Prospects of standing crops good. Ploughing for early crops and jute has commenced. Condition of cattle good. Fodder and water sufficient. Rice sells at—

				Srs.	Ch.	
Sadar	...	...	...	12	to 13	0
Barasat	...	...	...		15	0
Basirhat	...	...	...		13	0
Diamond Harbour	...	...	...		14	8

} per rupee.

**Murshidabad.**—Rainfall .16. Weather getting hot. Prospects of crops good. *Rabi* being harvested. Fodder available. Price of common rice 14 seers per rupee.

**Khulna.**—Rainfall at Bagirhat .02, elsewhere nil. Weather hot in the day; cool in the morning and the latter part of the night. Transplantation of *boro* (spring rice) going on. *Rabi* crops are being harvested. Fodder and water sufficient. A few cases of cattle-disease reported from the Sadar subdivision. Common rice sells from 16 to 22 seers per rupee.

**Dinajpur.**—Rainfall nil. Weather fine. Cultivation of jute and *bhadoi* rice going on. Price of common rice from 14 to 16 seers per rupee. No outbreak of cattle-disease and no complaint of want of fodder and drinking water.

**Rangpur.**—Average rainfall .04. Sowing of *aus* paddy and jute has commenced in Gaibanda. Rain is wanted. Outturn of tobacco 16 annas.

**Pabna.**—Rainfall nil. Weather hot. Prospects favourable, but rain wanted. Common rice selling at from 14 to 17 seers per rupee. Fodder and water sufficient.

**Dacca.**—Rainfall .13. Weather seasonable. Prospects of standing crops fair. More rain wanted. Ploughing going on. Price of common rice from 12 to 20 seers per rupee. Cattle-disease in north-west of the district. Fodder plentiful.

**Chittagong.**—Rainfall .26. Weather seasonable. Prospects of crops bad. Rain much wanted. Prices stationary. Condition of cattle generally good. Water and fodder sufficient.

**Patna.**—Rainfall .02. Harvesting of *rabi* crops and collection of opium in progress. Outturn promises to be good. Common rice sells at—

				Srs.	
Sadar	...	...	...	18	
Dinapore	...	...	...	18	
Bihar	...	...	...	18	
Barh	...	...	...	19	

} per rupee.

**Gaya.**—Harvesting of *rabi* crops in progress. Weather not very favourable for opium; about 10 annas of the produce collected. Price of rice from 16 to 18 seers per rupee, which is about normal. Water and fodder sufficient.

**Champaran.**—Rainfall at Motihari .03, but in Bettiah subdivision as high as .9 at one place, and much of the indigo land in that subdivision is being resown. Indigo seedlings in the Sadar subdivision are looking well. Harvesting of wheat has commenced. Opium being collected. Common rice selling at 15½ seers per rupee. West wind getting up and weather becoming hot.

**Darbhanga.**—*Rabi* harvest commenced. Indigo sowing almost completed. Collection of opium in progress. Mango blossoms abundant. Fodder for cattle sufficient. Prices almost stationary.

**Bhagalpur.**—Mustard and linseed have been harvested with excellent result. Cutting of wheat and barley has begun. Indigo looks well.

---

**Purnea.**—Rain urgently wanted. Harvesting of mustard over. Tobacco still being harvested in places. Lands being prepared for *bhadoi* crops. Common rice selling from 15 to 24 seers per rupee. Fodder and water sufficient. No cattle-disease.

**Cuttack.**—No rain. Weather seasonable. *Dalua* (spring rice) maturing in places. Rain much wanted. Condition of cattle good. Fodder sufficient. Rice sells from 11 to 26 seers per rupee in the district.

**Hazaribagh.**—Weather warm. *Rabi* crops being harvested with fair outturn generally. Collection of opium three-fourths completed, and outturn expected to come up to estimates. Pasturage scanty. Water sufficient.

**General Summary.**—There was rain in several districts during the week, but it was insignificant in amount except in Murshidabad (·16), Dacca (·13), Chittagong (·26), and the Bettiah (·9) sub-division of Champaran. More rain is required for the standing crops in Eastern Bengal and for the cultivation of the *bhadoi* crops there and in Northern Bengal. In Orissa rain is required to mature the spring rice. The *rabi* harvest is in progress and promises generally to yield a good outturn. The collection of opium is going on satisfactorily, but in Gaya the weather is said to be not very favourable. The young indigo is generally doing well. No cattle-disease is reported except in the north-west of Dacca and a few cases in Khulna. The price of common rice continues normal and almost stationary.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 19th March, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

\* Mean for 6 days. † Mean for 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the 30 years 1865-1894. The humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The

for the week ending Saturday, the 16th of March 1895.

DISTRICT OBSERVATIONS.																	District.
Variation from normal mean. Mean 8 A.M. temperature. Average humidity at 8 A.M. Average cloud amount at 8 A.M. Rainfall of week at observing station.					OF WEEK.				RAINFALL.								
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 16TH OF MARCH 1895.

THE slight disturbance which occurred at the end of the previous week passed off with little or no effect on the general weather conditions. It was followed almost immediately by another in the early part of the present week, the effect of which was felt chiefly in the northern districts, where fairly general light rain fell on Monday and Tuesday. The rainfall was followed by a fall of temperature, which spread slowly across Bengal, but which was of little importance in the southern as compared with the northern half of the province. Temperature soon rose after the rainfall ceased, and gradually increased till by the end of the week there was a large excess, especially in South-West Bengal and Bihar.

One of the most noticeable features in connection with the weather of the week under review is the low pressure, which continued steadily throughout, but was most marked on the 14th and following days. There was a rapid fall on the 14th, varying from  $\cdot 07$  inch in Orissa to  $\cdot 15$  inch in Bihar, and the resulting distribution was below the normal by amounts ranging up to a fifth of an inch. The greatest defect has been in the northern districts, and to this arrangement is due the steady south-westerly or westerly air circulation which has prevailed in all districts except at some of the extreme northern stations, where wind directions have at times been north-easterly. Humidity has been high, and the sky more cloudy than is usual at this season of the year.

*Pressure.*—At the beginning of the week pressure was about a twentieth of an inch below the normal. A slow rise prevailed during the first two days of the week, after which a fall set in slowly on the 12th and 13th, then rapidly on the 14th. This was followed by a slow rise on the 15th and 16th. The large defect, which was the result of the fall on the 14th, continued almost unchanged till the end of the week, and it is owing to these low readings that the means of the week are so much below the normal. Mean defect varies from  $\cdot 06$  inch in Chota Nagpur to nearly  $\cdot 12$  inch at the northern stations in North Bengal and Bihar.

*Temperature* was above the normal at the beginning of the week except at some of the southern stations. The rainfall on Monday and Tuesday caused an almost general fall of temperature, and there was then defect except in East Bengal. During the latter half of the week there was a steady rise, which resulted in a large excess, especially in Bihar and Lower Bengal. The mean excess at the close of the week in Lower Bengal averaged about  $6^{\circ}$ , and in places was as much as  $9^{\circ}$ . The excess at Faridpur was  $8\cdot 9^{\circ}$ , at Ranchi  $7\cdot 4^{\circ}$ , at Dehri  $7\cdot 2^{\circ}$ , and at Rampur Boalia  $6\cdot 9^{\circ}$ .

The actual temperatures registered during the week and their variations from the normal temperature of the season are clearly seen in the table below, when the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 16th of March 1895.

	Normal mean maximum temperature for the week ending 15th March.	Actual mean maximum temperature for the week ending 16th March 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 15th March.	Actual mean minimum temperature for the week ending 16th March 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 15th March.	Actual mean daily temperature for the week ending 16th March 1895.	Variation of actual mean from the normal.
Cuttack	96.6	98.0	+2.0	71.8	71.6	-0.2	85.9	84.8	-0.9
Coxenra	89.9	90.8	+0.9	65.4	61.2	-4.2	79.4	80.3	+0.9
Chittagong	86.3	87.1	+0.8	65.0	60.5	-4.5	76.7	78.3	+1.6
Burdwan	92.8	92.3	-0.5	67.9	67.7	-0.2	80.4	80.0	-0.4
Patna	89.7	87.8	-1.9	62.6	61.7	-0.9	76.2	76.3	+0.1
Gaya	92.3	88.1	-4.2	64.9	61.2	-3.7	78.6	76.5	-2.1
Purnea	88.8	87.0	-1.8	59.3	62.4	+3.1	74.1	78.7	+4.6
Hazaribagh	87.1	85.1	-2.0	62.6	63.2	+0.6	74.9	74.2	-0.7
Darjeeling	55.9	51.0	-4.9	41.7	42.5	+0.8	48.8	46.8	-2.0

*Rainfall.*—Light rain fell in nearly all districts on Monday and Tuesday, the 11th and 12th, except in East Bengal, where the falls occurred on the 12th and 13th. The falls rarely exceeded half an inch, and the averages for the various districts are all below the normal for the week. East Bengal and Chota Nagpur each received a third of an inch, North Bengal  $\cdot 14$  inch, and South-West Bengal and Bihar less than a tenth of an inch. No rain was received in Orissa.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 16th of March 1895 :—

METEOROLOGICAL DIVISIONS	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

The maximum possible number of hours of sunshine	...	...	...	57.0
				83.4
The mean temperature of the seven days	...	...	...	80.2
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	79.7
The extreme variation of temperature	...	...	...	32.0
The maximum temperature	...	...	...	97.4
				Miles
The highest velocity of the wind in one hour	...	...	...	14
				%
The mean relative humidity	...	...	...	62
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	68
				Inches
The total fall of rain from 10th to 16th March 1895	...	...	...	0.03
The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	0.19
The total fall from 1st January to 16th March 1895	...	...	...	0.05
The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	2.37

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 36, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; <, lightning; >, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

Calcutta, the 18th March 1895.

The HON'BLE MAULVI SERAJUL ISLAM KHAN BAHADUR.

The HON'BLE J. G. WOMACK.

The HON'BLE MAULVI MUHAMMAD YUSUF KHAN BAHADUR.

## THE PUBLIC DEMANDS RECOVERY ACT, 1880, AMENDMENT BILL.

The Hon'ble Mr. BUCKLAND moved that the Report of the Select Committee on the Bill to amend the Public Demands Recovery Act, 1880, be taken into consideration in order to the settlement of the clauses of the Bill. He said :—

"I propose on this occasion to make a few remarks with regard to our proceedings in Select Committee, as, when I laid the Report of the Committee on the table on the last occasion, I refrained from doing so then. We met several times, and I think I may say that we discussed the Bill most thoroughly. We were unfortunately deprived of the presence of the Hon'ble the MAHARAJA OF DARBHANGA owing to his illness, and the Hon'ble the MAHARAJA OF GIDHOUR was unable to be present at all our meetings. But I think I may fairly say that every side was fairly represented and every point discussed, and the Hon'ble Mr. LALMOHUN GHOSE gave us the benefit of his advice and criticism very fully. The Report of the Select Committee, which is laid on the table, has been purposely made pretty full, and it will not be necessary to advert to every one of its paragraphs.

"There are a number of amendments to be considered to-day, so that I shall not take up the time of the Council by going over the ground now more than I can help, for we shall have to deal with each matter subsequently in considering those amendments. There are some important changes in the Bill which have not been made the subject of amendments; for instance, the important changes in the section of definitions. We say in our Report that the proceedings under Act VII (B.C.) of 1880 have hitherto been mainly carried out, under the general control of the District Collector, by an officer specially appointed for the purpose of performing the functions of a Collector. The Select Committee were aware that there had been much trouble and confusion in times past, (which necessitated the passing of a short amending Act), with regard to the meaning of the word 'Collector' in the original Act. We now propose that the law should conform with the ordinary practice, and we have therefore only defined two words, namely, 'District Collector' and 'Certificate Officer,' and our object has been throughout the Act to preserve the whole power of control and supervision in the District Collector, leaving the main work to be done by the Certificate Officer, reserving at the same time to the District Collector power to do the work of the Certificate Officer if he chooses. We have also defined 'local authority' for certain purposes under section 7(g), the object being to allow payments which are made under leases of pounds, for instance, to be recovered as a public demand: they are public demands in every possible sense of the word. In section 6, we have made certain changes to make it correspond as exactly as possible to section 15. Section 6 refers to the two particular kinds of demand referred to in section 5, namely, when an estate or tenure has been sold for its own arrears and the sale-proceeds are insufficient to liquidate the same, or when arrears of revenue due from a farmer are not paid on the latest date of payment. The special feature in respect of these two kinds of demand has always been preserved, that before the demand can be contested by a civil suit, the amount stated to be due must be paid. With the exception of this feature sections 6(2) and 15(1) (which refers to all other public demands) have been made now as like as it is possible to make them. Section 11, which allows the Certificate Officer to attach moveable property when he is satisfied that the property of the judgment-debtor is likely to be concealed, or removed or disposed of, has also been considered from another point of view. We considered whether the principle of section 256 of the Code of Civil Procedure, which allows such attachment in cases under Rs. 1,000, should not be introduced, but we came to the conclusion that it was not necessary to confer such a power under this Bill. The present law gives, in our opinion, sufficient power of attaching moveable property when required. Under the law the District Collector must be satisfied of the judgment-debtor's intention to remove his property, &c.; but we have thought it right that the Certificate Officer should record his reasons before attaching moveable property. In section 12(2) we have provided for the verification of petitions under certain sections of the Civil Procedure Code, the object being to discourage frivolous objections and make the petitioner liable to the penalties attaching to false verifications. We have

similarly in the proviso to section 12 provided that the Certificate Officer may require a deposit to be made before entertaining a petition of objection. The question was whether we should make this obligatory or not, but on consideration we thought it sufficient to give the Certificate Officer power to require a deposit to be made, the object being, of course, to prevent, as far as possible, frivolous and merely dilatory objections.

"Then, in the proviso to section 13, we have somewhat altered the provision, which was in the Bill referred to the Select Committee, to allow the Certificate Officer to refer hard cases to the Civil Court. What we have done is to allow the Certificate Officer to make an order suspending proceedings before himself for a period of six months. That will give the judgment-debtor an opportunity of going to the Civil Court. We have provided in a subsequent section that the judgment-debtor must, within six months, determine whether he will file a suit. If he does not take advantage of the order, then the certificate will become absolute. Similarly, we have provided that if no suit is brought by the judgment-debtor under section 15 within six months, then the certificate will become absolute. This is provided for in section 16. In section 17, which states the grounds of cancellation or modification of a certificate by the Civil Court, we have thought it right to allow certain grounds on which the Civil Court may be moved not only to cancel but also to modify a certificate, these grounds being that the amount was not due, or that the amount due has been paid and not credited. In section 18 we have taken power for a District Collector to re-transfer any petition transferred by a Certificate Officer, so as to allow the District Collector to order that it be heard and determined by the Certificate Officer. We think this is a power of control which may be very useful for the District Collector to possess, namely, to refer a petition back to the Deputy Collector who works as the Certificate Officer.

"In section 19 we have tried to make it clear that an appeal may be preferred from an original order of the District Collector to the Commissioner. We do not propose to interfere much with the appellate sections in the Act. It is not proposed to give two appeals—first to the Collector and then to the Commissioner. It was considered that one appeal to the District Officer, except when he deals with a case himself originally (and in that case one appeal to the Commissioner), would be sufficient; that in all cases the Commissioner should have power of revision, which is a very wide power, as it will enable the Commissioner to interfere with any order on the records which come before him. Then, in section 19, we have also provided that an officer appointed to perform the functions of a Certificate Officer shall, if authorised by the District Collector, with the sanction of the Commissioner so to do, exercise the appellate powers of a District Collector subject to the general supervision and control of the District Collector. Cases may possibly arise when, the Collector being away in camp, or over-burdened with work, it may be necessary in the interests of good administration to provide for the prompt disposal of appeals. There will be ordinarily an experienced Certificate Officer at head-quarters, and the District Collector should be allowed, with the sanction of the Commissioner, to authorise the Certificate Officer to hear appeals rather than allow them to accumulate and add to the already overburdened file of the Collector. It is a power which can only be exercised under the sanction of the Commissioner, and I think it ought to be allowed as a matter of administrative convenience. Section 21, which is the redemption section, provides for the payment of a penalty of one-tenth of the auction-price by a judgment-debtor who seeks to set aside a sale, and all we have done in this section is to add the words 'not less than one rupee.' I think this is a very small matter with which nobody need find fault.

"We have had an important discussion about section 21, because it appears to infringe at first sight the Act passed last year to amend the Code of Civil Procedure (Act V of 1894). The Report of the Select Committee states what is the difficulty about this section. We had some doubt whether we could override, so to speak, section 310A of the Code of Civil Procedure. But since the section was drafted we have found that under the Indian Councils Act of 1892 we have power, with the previous sanction of His Excellency in Council, to make changes in a law passed by the Council of the Governor General, and it also provides that any changes we make in a law passed by the Viceroy's Council shall not be invalid if His Excellency in Council subsequently sanctions them. This

section with very small changes, which have since been introduced, was in the Bill laid before the Government of India last year, and so it may be fairly assumed that we have their permission to proceed with this section. There are two amendments on the agenda with regard to this section, particularly with reference to clause (2), which provides that if the deposit referred to be made within the said thirty days, the Certificate Officer may, if he thinks fit, pass an order cancelling the certificate and setting aside the sale. I am at liberty to say that the amendments will be accepted by the Government which suggest that instead of the words 'may if he thinks fit' the word 'shall' be substituted. This will really bring the proviso into accord with section 310A of the Code of Civil Procedure, with only a small point of difference, and it will also be in accord with the language of section 174 of the Tenancy Act. We had thought that the words 'may if he thinks fit' might properly be introduced at this stage of our experience; that the obligatory word 'shall' was probably too rigid, and that it might somewhat tend to diminish prices obtained at sales. But after further reflection it is thought better to adopt the word 'shall' so as to bring it into accord with section 310A of the Code of Civil Procedure.

"In section 23(2) we have made changes in the wording to make it short. At one time the idea was that all the Chapters and all the Sections of the Civil Procedure Code which should apply to the enforcement of certificates should be set out at length in the Bill. The list of those Sections and Chapters as they appeared in the Bill, which was introduced on the 31st March last year, was a rather formidable one, and when the Bill was referred to Revenue Officers and Associations for criticism that list grew to even greater length. There were in fact few Sections of Chapters XIX and XX of the Code which it was not proposed to adopt for some reason or another. We have therefore by a few words made the procedure of the whole of those Chapters apply, as far as practicable, to certificate proceedings and to realization of the amounts recoverable thereunder. These general words are the words of the existing Act, but it will be my duty to move an amendment by the addition of a few words to provide for the omission of section 310A of the Code of Civil Procedure, because that section cannot stand compatibly with section 21 of our Bill.

"In section 33 we have taken advantage of the latest provision of the law regarding the service of notices by adopting, *mutatis mutandis*, section 45 of the last Land Acquisition Act passed in 1894. Section 33 now provides for personal service wherever it may be practicable on the judgment-debtor, for substituted service when the judgment-debtor cannot be found, or any adult male member of his family, and for alternative service by fixing a copy of the notice in certain specified places; and lastly, if the Certificate Officer shall so direct, the notice may be sent by post by a registered letter addressed to the judgment-debtor at his last known residence. Further than this we are not prepared to go. That enactment may be said to contain the collective wisdom of the Supreme Legislature on this particular point, and until some experience is gained, it seems very undesirable for us to attempt to improve upon it.

"I think I have now run over the principal sections of the Bill as they are affected by the Report of the Select Committee. I have been asked whether it is the object of this measure to make the procedure more drastic than it is now. I may safely say that that is not our intention. The origin of the amendment of this law was fully stated in this Council when the Bill was introduced, viz., that it had its rise from the judgment of the High Court in the case of *Sadhusarun Singh versus Panchdeo Lall*, which I daresay is pretty well known—at any rate to the legal members of this Council. The effect of that decision was to cause serious administrative inconvenience. It necessitated an appeal to the Commissioner of the Division at a distance, under the Revenue Sale Law, instead of to the officer on the spot, to set aside a sale. The effect of that decision was that only a certain number of sections of the Civil Procedure Code applied to the execution of decrees, and certificates had to be executed under the Revenue Sale Law. That was the origin of the amendment of Act VII (B.C.) of 1880. The first letter suggesting an amendment of the Act was submitted to the Government of India in September, 1889, and this Bill has been the subject of discussion ever since. The object of the Legislature at present is to incorporate the result of the experience of the working of the Act

which has been gained during the last fifteen years. There is no intention to make the Act more severe or more summary. The object is to take advantage of the experience which has been gained, and we think we have produced a more reasonable and a more workable measure. The first duty before me now is to move that the Bill be taken into consideration in order to the settlement of the clauses of the Bill."

The Motion was put and agreed to.

The Hon'ble MR. BUCKLAND also moved that the clauses of the Bill be considered in the form recommended by the Select Committee.

The Hon'ble THE PRESIDENT said:—"Before I proceed to call upon hon'ble members to move the respective amendments which stand in their names, I wish to state that the Government are prepared to accept the amendments which are numbered (5), (25), (28) and (29), and, therefore, it will probably be considered unnecessary for the movers of those amendments to adduce any arguments in support of them. With regard to some of the other amendments on the Agenda, we desire to be guided by the views of the Council and by the advice we may receive from our legal advisers, and as the discussions proceed the Council will be informed how far the Government can accept them, and how far the Government intends to oppose them."

The Motion was put and agreed to.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, moved that at the beginning of section 2 the following be inserted:—

'This Act, so far as is consistent with the tenor thereof, shall be construed as one with Act XI of 1859, passed by the Governor General in Council, and Act VII of 1868, passed by the Lieutenant-Governor of Bengal in Council.'

He said:—"I may remind the Council that these words are to be found in the original Act, but they have been omitted from the present Bill, and I understand that the omission has been intentional. The Report of the Select Committee, however, does not give any reason for the omission. I think some difficulty may be created in consequence of this omission. The Council will observe that, after the passing of the decision in the well-known case, which was referred to by the hon'ble member in charge of the Bill, it has been held both by the High Court and, I understand, also by the Board of Revenue that a judgment-debtor, whose property is sold under the Certificate Act, has no remedy under that Act, but that his only course is to appeal against the order of sale under section 2 of Act VII (B.C.) of 1868. The provisions of this Act are only made applicable to sales under the certificate by the inclusion of the words which have now been omitted from this Bill; so that if these words are now omitted, I am afraid that the only provision which gave a right of appeal will be removed, and a person whose property is sold will have no remedy left to him. It may be said that section 19 of the present Bill gives a right of appeal, but that section is only a re-enactment of section 16 of the Act, and it only provides for an appeal from any 'order' of a Deputy Collector, &c. It has been held that the word 'order' there does not apply to sales, but only to the orders mentioned in the previous section. Therefore the present section 19 of the Bill will not give any right of appeal to a person aggrieved by the sale of his property; and if the provisions of section 2 of Act VII of 1868 will not apply to orders passed under this Bill, there will be no remedy left. There is also another difficulty, namely, that the Bill makes no provision for the granting of a certificate to the auction-purchaser.

"Under the present practice the auction-purchaser gets a certificate under section 28 of Act XI of 1859, which is the section under which, by the Board's rules, a certificate is granted. But the provisions of that law are made applicable to the procedure of the Certificate Act by force of the words which have been omitted from the present Bill. Therefore, if these words are omitted, I am afraid that the provisions of Act XI of 1859 cannot be applied to proceedings under the Certificate Act, and there is no other provision under

which a certificate can be granted to an auction-purchaser. Consequently, I submit that these words are very material, and ought not to be omitted. It is said that section 23 of the Bill makes all the provisions of Chapters XIX and XX of the Code of Civil Procedure applicable to certificate proceedings. Now, section 316 of that Code, which finds a place in Chapter XIX, makes provision for giving a certificate to a purchaser. I have great doubt whether the concluding words of section 23 (2) do not limit the applicability of the procedure under Chapters XIX and XX of the Code of Civil Procedure to certain specified things, namely the enforcement of the certificate and the realization of the amount recoverable thereunder. These words also occur in section 19 of the original Act VII of 1880. It was held by the High Court that up to the stage of the sale the procedure of the Civil Procedure Code would apply and no further. The words of the present section do not give a wider scope, so that if you cannot avail yourself of the procedure of the Civil Procedure Code after the sale, you will have no power to grant a certificate to the auction-purchaser. Therefore, I submit that these words should not be omitted, and that if they are omitted, difficulties may arise in the working of the law."

The Hon'ble Mr. GHOSE said:—"I think this is a very necessary and important amendment. I desire as a member of the Select Committee to take this opportunity of saying one word in order to explain my position in reference to this and other amendments that are to be moved to-day. It ought to be borne in mind that this Bill is of a very special character, and in order to correctly appreciate and form a proper estimate of its provisions, they have to be very carefully compared with the corresponding sections of the original Act and other Acts upon cognate subjects. Without such comparison it would be impossible to say whether the Bill makes any new departure, and, if so, whether such departure is a step in advance or the reverse. But we had to go rather rapidly through the Bill in Committee, as the time before us was very limited. We had, I believe, three or four meetings, and one of them I was unfortunately unable to attend on account of absence from town. I am free to confess, therefore, that certain matters escaped my attention which I should otherwise have brought to the notice of my colleagues. Under these circumstances, I shall feel it my duty to support such of the amendments before the Council to-day as may commend themselves to my judgment, although I may not have referred to them in my note of dissent.

"Coming to the present amendment, it has been pointed out by the hon'ble mover of the amendment that the High Court has held that, but for the existence of these words in section 2 of Act VII of 1880, a judgment-debtor would have no right of appeal against a sale under the provisions of that Act. The learned Judges distinctly point out that it is only because by virtue of these words in section 2 of Act VII of 1880 you have to read the various provisions of the three Acts as if they were sections of one Act that the judgment-debtor is entitled to the benefit of section 2 of Act VII of 1868, which gives him a right of appeal to the Commissioner, and they have further held that sections 311 and 312 of the Civil Procedure Code do not apply to these cases. The result is that if you omit these words, you will leave the judgment-debtor without any right of appeal. And even if the matter admitted of any doubt, it is unquestionable that the deliberate omission of these words after the interpretation put upon them by the High Court would be a clear indication that it was the intention of the Legislature to deprive the judgment-debtor of the right of appeal. This in my opinion would be a distinctly backward step, and I therefore hope the Government may yet be able to see their way to accept this amendment."

The Hon'ble Mr. BUCKLAND said:—"This is rather a technical legal subject, somewhat difficult to discuss in this manner. As far as I have been able to follow the arguments of the two learned gentlemen who have spoken, they are afraid that if these words are not restored in the Act, the judgment-debtor will be deprived of the right of appeal. That certainly was not the intention, and I do not myself see how the omission will have that effect. The object of

omitting these words dates back from the time of Mr. Beames' connection with the Bill. In his first report he distinctly stated that 'the words by which Act VII (B.C.) of 1880 was directed to be construed as one with Act XI of 1859 and Act VII (B.C.) of 1868 have been omitted. The provisions necessary for making the certificate procedure independent and self-contained have been inserted in various sections of the Bill. The provision, however, that the powers given by the Act are to be deemed to be in addition to the powers conferred by any Act now in force, has been retained.'

"That was the object of the whole thing. The two Acts were to be made independent of each other, and we hold that the Bill before us is self-contained and amply sufficient for all practical purposes. I fail to see why it should be necessary to incorporate Act XI of 1859 with this Bill. The intention is that when a certificate has to be executed it should be executed according to the provisions of the Code of Civil Procedure. I fail to see why it is necessary that an auction-purchaser should be provided with a certificate under section 28 of Act XI of 1859, to which the hon'ble mover of the amendment seems to attach so much value. A certificate under section 28 of Act XI of 1859 is intended, as far as I know, for the special purposes of that Act, and does not apply to sales in execution of decrees under the Code of Civil Procedure. It seems to me, therefore, that the hon'ble gentleman's argument, so far as it lays stress on the value of that certificate, is irrelevant; because, when sales take place under the Code of Civil Procedure in execution of decrees under this Bill, the auction-purchaser will be put in possession in the ordinary way without any such certificate.

"As for the point whether the judgment-debtor is deprived of any right of appeal, the statement has been made, and I am not prepared to say that it is erroneous, but I am not prepared altogether to admit it. I would rather hear the learned Advocate-General's opinion on the point. We have certainly incorporated the two Chapters of the Code of Civil Procedure with the full intention of allowing the judgment-debtor to have every right of appeal for the purpose of setting aside the sale, as is allowed under that Code. We have not cut off any rights which attach to an auction-purchaser under the Code of Civil Procedure, and I do not see why we should go out of our way to incorporate another Act merely for the purpose of giving some fancied right of appeal, which, as far as I can see, is unnecessary. But it is such a technical question that I confess I should like to have further legal opinion upon it. For my part I do not see that the insertion of the words in the amendment is necessary. We think the Bill is sufficient in itself, and that no object will be gained by incorporating Act XI of 1859 with this Bill, whereas by incorporating it there may be some risk of confusion."

The Hon'ble MR. LYALL said:—"I desire to say a very few words in defence of my action in the Select Committee in having agreed to the omission of these words. The subject was fully considered by the Committee, I fancy, on the day on which the Hon'ble MR. GHOSE was not present. We went through the Act carefully, and considered that the addition of the words was absolutely unnecessary. I desire to call the attention of the Council to the great difference between section 19 of the Act, which is to be repealed, and section 23 of this Bill, which we ask you to pass to-day. Section 19 of the Act did not incorporate the whole procedure of Chapters XIX and XX of the Code of Civil Procedure, but only certain sections of them, and those sections were understood for many years to extend to sales as well as to the executions of decrees. But owing to the decision of the High Court, which was referred to by the hon'ble mover of the amendment, their scope was limited. The reason why I agreed to the exclusion of these words was, that as the section had now been amended by incorporating the whole of Chapters XIX and XX of the Code of Civil Procedure, the mention of Acts XI of 1859 and VII of 1868 was not now necessary. I do not think this amendment is necessary, and I believe the insertion of the words proposed will be mere surplusage."

The Hon'ble SIR CHARLES PAUL said:—"I think that after the decision of the High Court, which has been referred to, it is very necessary to be careful. The Board of Revenue had decided previously that the provisions in respect

to sales in execution of a decree would apply to the setting aside of sales under the Certificate Act, because a sale was not a sale until it was confirmed. But the High Court decided against such an interpretation; therefore it is necessary to be careful, and I accordingly propose one of two alternatives: either to state, as in section 23, that the procedure of Chapters XIX and XX of the Code of Civil Procedure shall, so far as it is applicable, be the procedure followed in execution proceedings to enforce such certificate, or that it shall be the procedure followed in execution proceedings in respect of such certificate. But the proposal that this Act shall be read as part of Acts XI of 1839 and Act VII of 1868, I think very objectionable. Every Act should stand by itself."

The Hon'ble Mr. WILKINS said:—"I was of the same opinion as the Hon'ble Mr. LYALL. All the members of the Select Committee who were present at the discussion thought that the inclusion of these words was altogether unnecessary; but now my opinion is modified to a certain extent by what has fallen in the course of the discussion, and I consider that it is necessary to put in some specific words to make it clear that there is no intention to deprive the judgment-debtor of the right of appeal, which he undoubtedly has."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I gather that there is a general unanimity of feeling that the judgment-debtor should have some remedy in cases of grave irregularity, and that in such cases he should be allowed to move for the setting aside of a sale. It is a matter which is attended with considerable difficulty. The words used by the High Court are as clear as words can be. Mr. Justice Mitter observed that 'the only remedy of a judgment-debtor whose property has been sold in execution of a certificate issued under Bengal Act VII of 1880, and who has sustained substantial injury by reason of a material irregularity in publishing or conducting the sale is by way of an appeal under section 2 of Bengal Act VII of 1868'; and further on the Judges say:—"We think that by the force of section 2 of Act VII of 1880, the provisions in section 2, Bengal Act VII of 1868, became applicable to a sale under an execution issued upon a certificate made under Act VII of 1880."

"The Hon'ble the Advocate-General himself admits that the matter is attended with considerable difficulty; and that being so, it strikes me that it would be only wise that we should retain the provision which it is now proposed to omit. If the sense of the Council is that the judgment-debtor should have a remedy, and if it is doubtful whether without these words he would have a remedy, I think it would be right and proper that these words should not be omitted from the Bill."

The Hon'ble MAULVI SIFRAJUL ISLAM, KHAN BAHADUR, in reply said:—"My object in moving this amendment is not that these two Acts should be incorporated with this Bill. If this is a self contained Act as the Hon'ble the Advocate-General seemed to think, and all the provisions necessary to confer the power of appeal are to be found in the Bill, I do not wish the Council to insert these words. But as I read the present Bill, I do not think it is a self-contained Act. Reference has been made by the Hon'ble Mr. LYALL to Chapters XIX and XX of the Code of Civil Procedure, and to section 23 of the present Bill, but then Chapters XIX and XX, the provisions of which are made applicable under section 23 do not provide for any appeal at all. They deal only with execution proceedings and the setting aside of sales under section 311, that is to say, for irregularity. The appeal section is to be found in Chapter XLIII of the Code of Civil Procedure. Therefore, if these words are omitted, section 23 of this Bill will not provide a remedy, although the whole of Chapters XIX and XX be made applicable. I admit that if some words are inserted such as will give the judgment-debtor a right of appeal, there will be no necessity for the inclusion of the words which I have proposed; but if the right of appeal is not given clearly by any section of the Bill, then I think these words are necessary."

The Hon'ble THE PRESIDENT said:—"I understand the view of the hon'ble the Advocate-General to be that a small addition to section 23 of the Bill, which he will be prepared to move when the occasion arrives, will satisfy the wish

of the hon'ble member that provision should be made for an appeal, and that being so, I think we ought to be satisfied with the advice of our chief legal adviser."

The Motion was, by leave, withdrawn.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, also moved that in sub-section (1) of section 5, for the words "an estate, tenure or any share of either" the words "a tenure or any share thereof" be substituted. He said:—

"I must confess that I rise with some hesitation and diffidence to move this amendment. I am aware that my amendment would be a new departure from the existing law, and that if the amendment is carried, it may affect the interests of the Government to a certain extent. Hence my hesitation. At the same time I am so much convinced of the justice of my amendment that I feel it my duty to submit it for the consideration of the Council. Under the provisions of this Bill and of the existing Act, it is a fact that a zamindari may be sold for arrears of revenue, and if the sale-proceeds are found to be insufficient to meet the Government arrear, the Government can now, under the provisions of this section, proceed against the person and other property of the judgment-debtor for the balance of the arrear due. This is also the provision of the existing law. But I submit that it will operate hardly upon the zamindar. Take, for instance, the case of a zamindari worth Rs. 25,000; it is put up for an arrear of Rs. 5,000 and is knocked down for Rs. 1,000. Every zamindari is hypothecated to the Government for its revenue, the Government revenue being the first charge upon it. The Government has a summary procedure under Act XI of 1859, otherwise called the Sunset Law, to realize its dues from such zamindari, and then when the property is sold by the Government, by the aid of its own machinery, the auction-purchaser gets the property free from all incumbrances created by the defaulting zamindar. That being so, if the price which the property fetches is inadequate, the zamindar ought not to be held responsible, and the Government should not proceed against his person and other property for the balance of the arrears due. That appears to me to be unjust and inequitable. He loses his property; it is sold for an inadequate price; it may be on account of any irregularity which might have occurred in the sale: the zamindar should not be held liable for the balance of the arrear. The object of the amendment is to remove zamindari estates from the operation of this section."

The Hon'ble MR. BUCKLAND said:—"I think I may say at once that we cannot possibly accept this amendment. The hon'ble mover is aware that this has been the law for the last 15 years. All that he says is, that the poor zamindar ought not to be held responsible. He is aware that the interests of the Government may be affected if a zamindari is sold for an inadequate price and the Government dues are not paid up, but he would let the zamindar go, and leave the Government apparently no remedy at all. That is entirely a one-sided way of looking at the matter. This law, I believe I am right in saying, has been in force for a very long time. I said in my remarks on the Report of the Select Committee, that the two demands referred to in these sections 5 and 6 stand upon a different footing to the general list of public demands. They are taken from an old Regulation, and it would be subversive of a very sound principle if the change now sought were introduced. The object of the whole of the procedure is to recover the dues of the Government, and if a zamindar fails in paying the Government revenue and his estate does not fetch an adequate price, surely the hon'ble member is not prepared to say that the Government should be deprived of its dues. This procedure is the only means I am aware of of getting the balance of the arrears out of the zamindar. I think it would be hard if the Government were to be deprived of this power."

The Hon'ble MR. LYALL said:—"I desire to say a very few words in opposition to this motion. The hon'ble mover of the amendment does not propose to exempt tenure-holders from this liability, but only the owners of estates.

In other words, he proposes to make the Government the only sufferer. There is another point on which the hon'ble member scarcely stated his case very fairly. He said that the auction-purchaser obtained the property free from all incumbrances, but that is only true to a certain extent because a zamindar is able to create certain incumbrances against all purchasers, and thus to deprive the Government of its revenue. I oppose the motion as being entirely one-sided."

The Hon'ble THE PRESIDENT said :—" I agree with the last two speakers in thinking that this is not a motion which can be supported by the Government."

The Motion was, by leave, withdrawn.

The Hon'ble BABU SURENDRANATH BANERJEE moved that in line 2 of sub-section (2) of section 6, for the words "six months" the words "one year" be substituted. He said:—

" If this amendment is accepted, the law will remain as it is at present. Under the existing law the judgment-debtor may file a suit in the Civil Court, for the purpose of contesting a certificate, within one year from the date of the service of notice, or within one year from the date of the determination of the objection, or from the decision of any appeal preferred by him to the revenue authorities. It is now proposed to reduce this term and to restrict, so far as time is concerned, the opportunities which the judgment-debtor has hitherto had for contesting a certificate. I have read very carefully the papers which have been circulated, and have listened very attentively to the hon'ble member in charge of the Bill, and I must say that I fail to see that any justification has been made out for the reduction of the limit of time. No complaint has ever been made against the operation of the existing law. This is a restrictive measure so far as the opportunities of contesting a certificate are concerned; and that being so, it is incumbent on the Government to bring forward the amplest justification for a provision of this kind, and I submit that no such justification has been made out. I hope that under those circumstances the existing period of one year will be retained."

The Hon'ble MR. BUCKLAND said :—" I think the hon'ble member has made a little slip. He says that under the present law a judgment-debtor may bring a suit within one year from the date of the service of notice, within one year from the date of a petition of objection, or within one year from the date of an appeal. If he will look at section 6, sub-section (b) of the existing law, he will find it stated that a judgment-debtor may at any time within one year after service upon him of such notice, as is mentioned in section 10, bring his suit. Nothing is said there of the period of limitation running from the date of the petition of objection, or from the date of the appeal. We have in Select Committee extended in section 6 (2) the term from which the date of the right to appeal begins to run; what we have allowed by section 6 (2) is that the judgment-debtor shall have a clear period of six months, if he has filed a petition of objection, after the determination thereof, or if he has appealed after the decision of such appeal, within which to consider whether it is worth his while to prefer a suit. This suggestion emanated from the Board of Revenue with regard to section 15, and it is from that section that we imported it. I therefore cannot see any justification for allowing a longer period of time. The object should be to clear off work, and not to allow these cases to hang on. I think the judgment-debtor will have ample time to make up his mind whether he will bring a suit or not."

The Motion was, by leave, withdrawn.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the whole of the proviso to sub-section (2) of section 6, marked (a), commencing with the words "has omitted to state" and ending with the words "that there was good reason for such omission, and" be omitted. He said:—

"The effect of this proviso is to place the judgment-debtor who goes straight to the Civil Court in a better position than the judgment-debtor who

goes to Court after preferring an appeal to the Revenue authorities. The judgment-debtor who goes to the Civil Court may prefer whatever grounds of appeal he chooses, but the judgment-debtor who has once been to the Revenue authorities will not be allowed in his appeal to the Civil Court to prefer other grounds than those which he has already submitted to the Revenue authorities. There may have been an omission on the part of his legal adviser, but he is precluded from supplying the omission, except with the leave of the Court, and unless sufficient grounds are shown. The object of my amendment is to place both classes of judgment-debtors in the same position, and that not by restricting the right which the one possesses, but by placing both on the same footing of justice and freedom."

The Hon'ble MR. BUCKLAND said:—"The hon'ble gentleman has brought his amendment upon section 6 (2). He will find that the words to which he objects to in this sub-section are only copied into it from section 8 (b) of the existing Act. He will find it there stated, with regard to the majority of public demands, that any judgment-debtor can bring a suit in the Civil Court to contest his liability, but no suit shall be entertained unless the judgment-debtor has stated in a petition to the Collector the ground upon which he claims to have such certificate cancelled, or unless, having omitted to state such ground in such petition, he can satisfy the Civil Court that there was good reason for such omission. That is the existing provision with regard to the majority of public demands under section 8 (b) of Act VII (B.C.) of 1880. All we propose to do is, to incorporate the same provision in section 6 (2). It is obvious that, when a man goes to the Civil Court direct, he will be required to state his whole case there; but if he prefers to go in a roundabout way by presenting a petition of objection first, he should state his case at once. It is believed to be a sound principle of law that a man should show his whole case—his whole hand—and not keep in the background certain facts to be laid before a later Court. That is the whole point."

The Hon'ble MR. LYALL said:—"The object of this provision in my view is to reduce litigation. If a man has a good case, there is no reason why he should not declare it before the Collector, who would in all probability decide in his favour. I can see no reason why he should be allowed to make reservations before the Collector, and not state his whole case there. This provision is a reproduction of section 33 of Act XI of 1859. The Imperial Council has decided that, in sales of estates for arrears of revenue, the zamindar who has an objection to urge against the sale of his estate should state his whole case to the Commissioner in the first instance, and not be allowed to keep back a part of his case for the Civil Court; and that provision has been incorporated into the present Bill."

The Hon'ble BABU SURENDRANATH BANERJEE in reply said:—"With all deference, I desire to submit that the point I raised has not been met. It is admitted that the two classes of judgment-debtors are treated in a different manner. The one who goes to the Civil Court direct is allowed to state what he likes; the other is not so privileged. Practically, the man who shows his confidence in the Revenue authorities is placed in a worse position than he who goes to the Civil Court in the first instance. It may be that the Government of India has not affirmed the principle for which I am contending; but we are now amending the law, and it is but fair that the two classes of judgment debtors should be placed upon the same footing. I hope that under these circumstances this amendment will be accepted by the Council."

The Motion was put and negatived.

The Hon'ble MR. R. C. DUTT moved that the concluding portion of clause (2) of section 6, beginning with the words "and has not paid such arrears" be omitted. He said:—

"This portion of the clause prevents a judgment-debtor from going to the Civil Court unless the money demanded has been paid within 15 days.

This has been the law for the last 15 years, but as we are amending the law, I think it is open to any hon'ble member to suggest the omission of any clause which is both unnecessary and open to objection. I think these words unnecessary, because, as far as my experience goes, this clause does not help the work of collection in any appreciable degree. When a man from whom money is due has any property, we can, by following the procedure of the Certificate Act, obtain the money without restricting his right to go to the Civil Court. On the other hand, this is a provision which the judgment-debtor is in most cases unable to comply with. Suppose a man has taken farm of an estate from the Government for a number of years, and is unable on account of an inundation or other cause to pay up the amount in due time? The question is whether, if he brings an objection before the Collector, pleading that the inundation is due to breach of an embankment kept up by the Government, and the Collector rejects that ground of objection, then, before he can go to the Civil Court, he must pay the money within 15 days after the order is passed. It is very often impossible for a man under such circumstances to pay the money, and we are therefore imposing a sort of impossible condition upon him. As I have already said, it is not a condition which helps us in realising the money when a man is insolvent. But when a man is solvent, when he has any property, we find no difficulty in recovering the money, and therefore I would let him go to the Court to contest the certificate. I suggest this all the more, because the certificate is made by the Revenue authorities, and if we are wrong in any way, let the judgment-debtor go to the Court and prove that we are wrong. As the law now stands, he must first put down the money within 15 days before he can show us that we are wrong and have his remedy. For these reasons I think that, although this has been the law for the last 15 years, the law should be amended."

The Hon'ble MR. LYALL, with the permission of the President, asked the hon'ble mover of the amendment to state whether he based his proposal on any case of hardship within his own knowledge?

The Hon'ble MR. R. C. DUTT replied:—"There have been cases similar to the case supposed. There has not been any case that I know of exactly on all fours with the supposed case, but there have been analogous cases in which I have found it impossible for the man to pay the money within 15 days. I cannot refer just now to any particular case exactly similar to the case I have supposed."

The Hon'ble MR. BUCKLAND said:—"I am not prepared to accept this amendment on behalf of the Government. The hon'ble member said he considered it unnecessary because the present procedure did not help us in making realizations. The procedure requires that the judgment-debtor, before making an objection, should pay up the money, and if that does not help us, I do not know what will. But though the hon'ble member admits that this has been the law for 15 years, he has not consulted the proceedings of the Council in connection with the passing of this law. It has been my lot to call attention to the difference between these two sections in the Act. The demands referred to in these sections (5 and 6) were intended, when the Bill, which became Act VII (B.C.) of 1880, was introduced, to be called 'certificates absolute.' That expression was subsequently dropped, but afterwards they were called 'certificates of the 1st class.' I shall read a few words to show what Mr. Field, who was in charge of the Bill, meant. He said on the 3rd April, 1880:—

'In respect of these two classes of arrears, what was then termed a Certificate Absolute was proposed to be made, that is to say, a certificate which should have to all intents and purposes the force of a final decree of the Civil Court. In the margin of the Bill Mr. Field had, however, pointed out an old Regulation of the Bengal Code which had, in all probability, been overlooked when the Act of 1868 was before the Council. The effect of that Regulation was that if a person were called upon by the Collector to pay a sum of public revenue, and

at the time made an objection in writing and then paid the amount, such person could afterwards bring a suit in the Civil Court to contest his liability. It appeared to the Select Committee desirable to bring that Regulation within the purview of the Bill. The Committee have accordingly done so, and the right which the Regulation gave of contesting the liability to pay has been left intact, but the provision that the amount must first be paid up has been retained. Certificates of this class would no longer be *Certificates Absolute*, and the Committee therefore struck out the term *absolute*. The result is to leave the law as it was before, only that this law is now contained in one Act, instead of being as it was before to be sought for in an Act and a section of an old Regulation.

"So that the law to which the hon'ble mover of the amendment takes exception has been the law for much more than 15 years, and on the part of Government I am not prepared to alter it in the way proposed."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have heard it said in the course of these debates more than once that this law has been more than 15 years old. We legislate with the view of introducing changes in the law. I think this amendment deserves the support of the Council. My hon'ble friend, the mover of the amendment, has not been able to cite specific instances, but the fact which he asserts is that to make this demand must deter the judgment-debtor from bringing his suit. If he has been unable to pay the money, and a certificate has been made, it stands to reason that he will have considerable difficulty in paying the money before launching into expensive litigation. Zamindars do not find difficulty in recovering their rents. The whole question between the Government and the raiyat is whether the raiyat should pay the money or not? He denies his liability to pay, but you make him pay before he can contest his liability. This, I submit, is inverting the natural law of justice. The man denies his liability, the State compels him to make the payment, and then gives him leave to contest his liability. This is not, in my judgment, the light in which we ought to amend the law, and I therefore think this amendment ought to be accepted by the Council."

The Hon'ble MR. WILKINS said:—"The hon'ble member who has just spoken has not quite correctly stated the object of legislation when he says that we legislate to introduce changes into the law. I think it may be more fairly said that we legislate and make changes in the law when such changes are shown to be necessary and desirable, not otherwise. In the present instance, I see no necessity for any change. An hon'ble member had in the course of these discussions expressed a considerable amount of sympathy for the individual whom he has been pleased to call the poor and oppressed raiyat. As I read section 6, the poor and oppressed raiyat does not come into consideration at all. It refers to a judgment-debtor in respect of certain arrears which are still due after an estate or tenure has been sold, or in respect of arrears due from a farmer who has not paid; therefore I think that this particular part (b) of clause (2) should be retained, and that for a very essential reason—because, if the objector (the judgment-debtor) has money to file a civil suit, he has money to pay the arrears which are undoubtedly due from him. He is allowed every possible opportunity of objecting against the payment of an amount undoubtedly due, and he should not have the further opportunity of filing a civil suit until he has paid the money."

The Hon'ble MR. R. C. DUTT in reply said:—"I do not think that I can quite follow the reasoning of the hon'ble gentleman who has last spoken. It very often happens that an estate is farmed to a farmer for a large sum of money. It would be very difficult for him to find all that money and pay it down before going to the Civil Court, whereas the initial expense of filing a civil suit will not be anything like Rs. 2,000 or Rs. 3,000 which he may have to pay the State. If in such case he has been unable to pay, owing to floods caused by a breach of a Government embankment for instance, we ought to allow him to contest his liability without imposing upon him the condition to pay a large amount within 15 days, which it would be impossible for him to do."

The Motion being put, the Council divided:—

*Ayes 7.*

The Hon'ble Maulvi Muhammad Yusuf  
Khan Bahadur.  
The Hon'ble Mr. Womack.  
The Hon'ble Maulvi Serajul Islam Khan  
Bahadur.  
The Hon'ble Mr. Ghose.  
The Hon'ble Babu Surendranath Baner-  
jee.  
The Hon'ble Mr. Dutt.  
The Hon'ble Mr. Cotton.

*Noes 8.*

The Hon'ble Mr. Wilkins.  
The Hon'ble Mr. Buckland.  
The Hon'ble Mr. Collier.  
The Hon'ble Maulvi Abdul Jubbar Khan  
Bahadur.  
The Hon'ble Mr. Bourdillon.  
The Hon'ble Mr. Lyall.  
The Hon'ble Sir John Lambert.  
The Hon'ble Sir Charles Paul.

So the Motion was lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the following words be added at the end of the proviso to sub-section (2) of section 6:—

'or in any case in which an appeal has been preferred under section nineteen within fifteen days of the determination of such appeal.'

The Motion was put and agreed to.

CALCUTTA;

The 26th March, 1895.

GORDON LEITH,

Assistant Secretary to the Govt. of Bengal,

Legislative Department.

(To be continued in the next Gazette.)

## LIBERALITY OF BABU GOPAL LAL SEAL OF CALCUTTA.

No. 1577C., dated Calcutta, the 26th March 1895.

From—F. J. JOHNSTONE, Esq., MEM. INST. C. ENGRS., Secy. to the Govt. of Bengal,  
Public Works Department,

To—The Commissioner of the Burdwan Division.

WITH reference to your memorandum No. 821T.—J.M., dated 8th March 1895, forwarding copy of a letter from the Covenanted Deputy Collector, Howrah, in which he reports that the balance of the contribution of Rs. 30,000 made by Babu Gopal Lal Seal towards the construction of the Elliott bridge across the Bhurpara khal near the Civil Engineering College, Sibpur, was paid up by that gentleman on the 6th February 1895, I am directed to say that in accepting the contribution under reference, the Lieutenant-Governor desires that you will be so good as to convey to Babu Gopal Lal Seal His Honour's thanks for his liberality and public spirit.

2. This letter will be published in the *Calcutta Gazette*.

## WEATHER AND CROP REPORT.

For the week ending the 25th March, 1895.

**Burdwan.**—Rainfall at Sadar ·19. Weather seasonable. Sugarcane and potatoes are being harvested. Prospects good. Price of common rice varies from 10 to 21 seers per rupee in the district.

**Midnapore.**—Rainfall ·20. Weather hot. Indigo and *boro* (spring rice) are doing well. Fodder and water sufficient. Rice sells from 16 to 21 seers per rupee.

**24-Parganas.**—Rainfall at Sadar ·14. Weather seasonable. Prospects of standing crops good. Condition of cattle good. Fodder and water sufficient. Rice sells at—

	Srs.	Ch.	
Sadar	...	12 to 13	0
Barasat	...	15	0
Basirhat	...	20	0
Diamond Harbour	...	14	8

} per rupee.

**Murshidabad.**—Rainfall ·19. Weather hot. Sowing of til (sesamum) continues. State of crops appears good. Fodder available. Price of common rice 14 seers per rupee.

**Khulna.**—Rainfall at Sadar 1·46, Bagirhat ·28, Satkhira ·43. Weather seasonable. Threshing of *aman* continues. Transplantation of *boro* (spring rice) going on. *Rabi* crops are still being harvested. Fodder and water sufficient. Common rice sells at from 18 to 22 seers per rupee.

**Dinajpur.**—Rainfall ·19. Weather seasonable. Cultivation of jute and *bhadoi* rice going on. Price of common rice 15 to 17 seers per rupee. No outbreak of cattle-disease nor any complaint for fodder and drinking water.

**Rangpur.**—Rainfall ·09. The rainfall on 21st was beneficial to spring sowings and to tobacco crop. Sowings are in progress everywhere. Common rice sells at from 10 to 16 seers per rupee. Cattle-disease reported from Nilphamari and Gaibanda subdivisions.

**Pabna.**—Rainfall nil. Weather warm and partially cloudy. Prospects favourable, but more rain wanted. Common rice selling from 14 to 17 seers per rupee. Fodder and water-supply sufficient.

**Dacca.**—Rainfall ·63. Weather seasonable. Prospects of standing crops fair. Recent rain has done good. More rain wanted. Ploughing going on. Common rice sells from 12 to 20 seers per rupee. Cattle-disease in some places. Fodder plentiful.

**Chittagong.**—Rainfall nil. Weather growing hot. Standing crops almost withering for want of rain. Prices steady. Water and fodder sufficient.

**Patna.**—Rainfall ·02. Harvesting of *rabi* crops and collection of opium in progress. Outturn expected to be good. Common rice selling at 18 seers per rupee.

**Gaya.**—Rainfall at Sadar 18. Weather generally seasonable. Harvesting of *rabi* crops in progress. Collection of opium approaching completion. Mango blossoming *Mahua* ripening. Fodder and water sufficient. Price of rice about normal:—

			Srs.	
Sadar	...	...	16	} per rupee.
Nawada and Jahanabad	...	...	17	
Aurangabad	...	...	18	

**Champaran.**—Rainfall nil. Harvesting of wheat in progress. Indigo doing well. Collection of opium approaching completion. Common rice selling at 16 seers per rupee. Fodder and water for cattle sufficient.

**Darbhanga.**—Weather slightly cloudy. *Rabi* harvest in progress. Lands being ploughed for early paddy sowings. Mango blossoms considerably injured by unfavourable weather. Prices almost stationary.

**Bhagalpur.**—Weather cool with north-east wind. *Rabi* harvest continues with good results. Indigo doing well. Fodder and water sufficient.

**Purnea.**—Rainfall 26. Rain is still needed. Weather hotter with high winds generally. Land is being prepared for and sown with *bhadai* paddy. Indigo sowings are nearly completed. Harvesting of wheat has commenced; outturn will be 15 or 16 annas. Price of common rice varies from 15 to 24 seers per rupee. Fodder and water sufficient.

**Cuttack.**—Weather seasonable with a few drops of rain. Harvesting of *dalua* (spring rice) commenced in places. Rain wanted for ploughing. Outturn of tobacco estimated to be 16 annas. Condition of cattle good. Fodder sufficient. Rice sells from 11 seers 13 chitaks to 26 seers per rupee.

**Hazaribagh.**—Weather warm. Slight rain in places. *Rabi* harvest practically completed. Ploughing for *bhadai* crops in progress. Fodder scanty. Water sufficient.

**General Summary.**—There was rain over all the districts of Central Bengal during the week, and in Dacca, Dinajpur, Gaya and Purnea; elsewhere there was little or none. The rain has been beneficial to the spring sowings of rice which are doing well. But in Northern Bengal more rain is required for the jute sowings, and in Chittagong the standing crops are said to be withering from drought. The *rabi* harvest is in progress, and the yield is generally reported good. The collection of opium is approaching completion, and a fair outturn is expected. No cattle-disease is reported except in parts of Kangpur and Dacca. In Hazaribagh the fodder-supply is said to be scanty. The price of common rice continues generally steady and normal.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 26th March, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

The total fall from 1st January to 23rd March 1895	...	...	...	0.27
The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	0.20
The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.	...	...	...	2.57

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; <, lightning; /, strong wind; Δ, dew; =, fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

C. LITTLE,

Calcutta, the 25th March 1895.

For Meteorological Reporter to the Govt. of India.

\* Mean for 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 23rd of March 1895.

DISTRICT OBSERVATIONS.																District.
Variation from normal mean. Mean 8 A.M. temperature. Average humidity at 8 A.M. Average cloud amount at 9 A.M. Rainfall of week at observing station.					OF WEEK.				RAINFALL.							
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 16th October 1894.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 23RD OF MARCH 1895.

THE week just past has been peculiar as regards weather conditions in the occurrence of two series of disturbances which caused a large fall of temperature, but were attended in some cases by no rainfall, and in most of the others by very light showers. The first series occurred in the early part of the week, on Sunday and Monday the 17th and 18th, on which days very light showers were reported from scattered stations in the western half of the province, and heavier showers from the extreme east. Though the rainfall was so light, the temperature change was large, especially in the western districts, as from excess varying up to 7° on Sunday morning, the difference from the normal changed to defect of as much. In Chota Nagpur the change was about 12°. These large changes followed a rapid rise of pressure in Chota Nagpur; the rise of pressure continued with moderate rapidity for some days, resulting in relatively high readings in Bengal as compared with the south of the Bay, and a northerly or north-westerly wind circulation on the 19th and 20th in the north-west angle of the Bay.

Pressure began to fall on the 20th, but somewhat more rapidly in the south of Burma than elsewhere, and the resulting distribution was peculiar in there being a high pressure area over Bengal and a depression in the south of Burma. Probably owing to this arrangement, and the resulting north-westerly winds, the second series of disturbances commenced. Thunder-storms usually accompanied by light showers of rain occurred in all districts, in the west on Wednesday, the 20th only, but in the central and eastern districts on the 21st as well. The heaviest showers fell in East Bengal. A very rapid fall of temperature began in the west and spread over the province. On the 20th defect in mean temperature was 8° in Chota Nagpur; on the 21st it was over 10° in part of Chota Nagpur, South-West Bengal and East Bengal, while in North Bengal it was over 11°. This large defect slowly diminished, but at the end of the week still amounted to about 4°. During the latter half of the week pressure generally fell, but the low readings in Burma continued and the northerly winds in the east of the Bay.

**Pressure.**—Owing to the steady rise of pressure during the first half of the week mean values for the week are above the normal, though not by very large amounts. Excess varies from .02 inch at a few scattered places to .07 inch in part of Bihar and North Bengal.

**Temperature.**—As stated above, the changes in temperature have been very large. The highest reading in Bihar was 106.6° and the lowest 55.7°; giving a range of 51°; the highest in South-West Bengal 105.9° and the lowest 56.3°, the range being 47.6°. The means for the various districts are all below the normal by less than 2° in East Bengal, Bihar and Orissa, by 2° in North Bengal, 3° in South-West Bengal and 4.4° in Chota Nagpur.

The actual temperatures registered during the week, and their variations from the normal temperature of the season, are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 23rd of March 1895.

	Normal mean maximum temperature for the week ending 23rd March.	Actual mean maximum temperature for the week ending 23rd March 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 23rd March.	Actual mean minimum temperature for the week ending 23rd March 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 23rd March.	Actual mean daily temperature for the week ending 23rd March 1895.	Variation of actual mean from the normal.
Cuttack	96.8	97.6	+1.2	71.5	70.9	-1.2	84.2	84.3	+0.1
Calcutta	91.3	90.3	-1.0	71.5	69.6	-1.9	81.4	80.0	-1.4
Chittagong	86.4	85.3	-1.1	63.0	63.0	0.0	74.7	74.1	-0.6
Burdwan	94.9	90.8	-4.1	63.7	63.2	-0.5	79.3	78.5	-0.8

Purnea	91.8	84.2	-7.6	63.2	63.4	+0.2	77.5	75.2	-2.3
Hazareebagh	90.5	84.5	-6.0	63.4	63.4	0.0	76.5	73.6	-2.9
Darjeeling	67.9	53.7	-14.2	41.5	41.3	-0.2	54.7	47.6	-7.1

**Rainfall.**—Light showers fell in places on every day of the week except the last two, but they were most frequent in the southern districts, and especially in East Bengal. Showers were most numerous on the 20th and 21st, during which days rain fell at nearly all stations except in Bihar. As the falls were light, the averages for the various districts are not large, but are slightly above the normal in all districts except North Bengal. The average fall for East Bengal is about half an inch, and in the other districts a quarter of an inch except Behar, where it is less than a tenth.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 23rd of March 1895 :—

METEOROLOGICAL DIVISIONS	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

APPENDIX TO

# The Calcutta Gazette.

WEDNESDAY, MARCH 27, 1895.

## NOTICES TO MARINERS.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 49.

[First Publication.]

#### AUSTRALIA—TORRES STRAIT, INNER ROUTE.

*Reported danger near Halfway islet.*

THE Port master, Brisbane, has given notice (No. 3 of 1895) that Coast Pilot Binstead reports that the S.S. *Duke of Buckingham* touched upon a shoal patch situated about  $3\frac{1}{2}$  miles S.S.W. from Halfway islet.

Approximate position—

Latitude	...	...	...	...	$11^{\circ} 26' S.$
Longitude	...	...	...	...	$142^{\circ} 56' 8'' E.$

As this reported danger is on or near to the recommended track and in the vicinity of the Pearn Reef, reported to have 12 feet over it at low water, mariners are cautioned with respect thereto. H.M.S. *Paluma* recently searched unsuccessfully for the Pearn Reef in its assigned position.

Charts affected—Nos. 2919, 2354.

Australia Directory, vol. 2.

B. P. CREAGH, Comdr., R.I.M.,  
Port Officer of Calcutta.

Published for general information.

G. C. MACONCHY,  
Under-Secretary, Marine Department.

CALCUTTA, the 23rd March 1895.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 50.

[First Publication.]

#### AUSTRALIA—WIDE BAY BAR.

*Alteration to leading lights and beacons.*

THE Port master, Brisbane, has given notice (No. 4 of 1895) that the square white leading beacons, carrying the lights for crossing Wide Bay Bar through the North Channel, have been shifted, and must now be kept in line bearing N.  $77^{\circ} 30' W.$  This line carries a minimum depth of 20 feet at low-water springs.

The triangular leading beacons for the South Channel across the Bar now bear when in line N.  $52^{\circ} W.$  As this channel is subject to rapid alteration, it must be used with caution.

The red buoy on the end of Hook Point Spit is temporarily absent. It will be replaced as soon as possible.

Chart affected, No. 1030.

B. P. CREAGH, Comdr., R.I.M.,  
Port Officer of Calcutta.

Published for general information.

G. C. MACONCHY,  
Under-Secretary, Marine Department.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 51.

[First Publication.]

AFRICA, EAST—RED SEA, WESTERN SHORE.

*Shoal E.S.E. of Mersa Durur.*

THE British Admiralty has given notice (No. 128 of 1895) of the existence of discoloured water, probably a sand and coral shoal, its southern end situated in lat.  $19^{\circ} 49' 30''$  N., long.  $37^{\circ} 18' 15''$  E.

The danger line of the outlying reefs eastward of Mersa Durur should be extended to the southward to include the above shoal.

B. P. CREAGH, Comdr., R.I.M.,  
Port Officer of Calcutta.

Published for general information.

G. C. MACONCHY,  
Under-Secretary, Marine Department.

CALCUTTA, the 23rd March 1895.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 52.

[First Publication.]

AUSTRALIA—TORRES STRAIT, WESTERN APPROACH.

*Reef southward of Deliverance island.*

THE British Admiralty has given notice (No. 129 of 1895) of the existence of a reef now named Kerr reef, about 700 yards long in an east and west direction and 100 yards wide, with a vegetated sand-bank on it, lying 6 miles southward of Deliverance island, or in approximately lat.  $9^{\circ} 40' S.$ , long.  $141^{\circ} 46' E.$

B. P. CREAGH, Comdr., R.I.M.,  
Port Officer of Calcutta.

Published for general information.

G. C. MACONCHY,  
Under-Secretary, Marine Department.

CALCUTTA, the 23rd March 1895.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 49.

[Second Publication.]

PACIFIC OCEAN—SOLOMON ISLANDS.

*Guadalcanar island—Dangers near Taruto island.*

THE British Admiralty has given notice (No. 95 of 1895) of the existence of a shoal, with a depth of  $2\frac{1}{2}$  fathoms on it, lying about a third of a mile south-eastward of Taruto island, with Susu point in line with the island; also that there is a reef round the north and east sides of that island.

Approximate position, centre of Taruto island, lat.  $9^{\circ} 34' 40'' S.$ , long.  $160^{\circ} 36' 40'' E.$   
(Variation,  $8^{\circ}$  Easterly in 1895.)

B. P. CREAGH, Comdr., R.I.M.,  
Port Officer of Calcutta.

Published for general information.

Under-Secretary, Marine Department.

CALCUTTA, the 16th March 1895.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 41.

[Second Publication.]

CHINA, EAST COAST—AMOIY APPROACH.

*Danger W.-N.-W. of Chapel island.*

THE British Admiralty has given notice (No. 97 of 1895) that the Master of the Chinese steam-vessel *Taisang*, 18 feet draught, reports having touched some danger, supposed to be a rock, at 8 A.M., 15th December 1894, in a position with Chapel island, bearing E.S.E. (S.  $67^{\circ}$  E.), distant  $4\frac{1}{2}$  miles, or approximately in about lat.  $24^{\circ} 11' 45'' N.$ , long.  $118^{\circ} 9' 30'' E.$

This has been marked as three fathoms, position approximate, on the Admiralty Charts; a patch of that depth, which could not be found, having been also reported near that position by the steam-vessel *Erl King* in 1899.

(Variation, nil in 1895.)

B. P. CREAGH, Comdr., R.I.M.,  
Port Officer of Calcutta.

Published for general information.

G. C. MACONCHY,  
Under-Secretary, Marine Department.

CALCUTTA, the 16th March 1895.

## GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 47.

[Second Publication.]

CHINA SEA.

*Hainan strait—Flashing light on Cape Kami.*

THE British Admiralty has given notice (No. 114 of 1895) that, on 1st January 1895, a light was exhibited from a light-house recently erected on cape Kami, north side of western end of Hainan strait:—

Cape Kami light is a fourth order, dioptric, *group-flashing white* light, showing *two flashes* in quick succession every *thirty seconds*; elevated 67 feet above the sea, and visible from a distance of 13 miles in clear weather.

The light-house, 67 feet high, is an iron screw pile tower, painted white, as are the dwellings near, the former situated 83 yards northward of the south point of the islet forming cape Kami.

Approximate position, lat.  $20^{\circ} 13' 30''$  N., long.  $109^{\circ} 55' 5''$  E.

B. P. CREAGH, Comdr., R.I.M.,  
Port Officer of Calcutta.

Published for general information.

Under-Secretary, Marine Department.

## GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 48.

[Second Publication.]

JAPAN—(1) KII CHANNEL—(2) SIMONOSEKI STRAIT.

(1) *Flashing light on Hino Misaki.*

THE British Admiralty has given notice (No. 115 of 1895) that, on 25th January 1895, a light would be exhibited from a light-house recently erected on Hino misaki, eastern side of Kii channel :—

Hino misaki light is a second order *flashing white* light every *thirty seconds*, elevated 261 feet above the sea, and visible from N. 65° W., through north and east, to S. 4° E., a distance of 20 miles in clear weather.

The iron light-house, 35 feet high, is cylindrical in shape and painted white.

Approximate position, lat. 33° 52' 40" N., long. 135° 4' 20" E.

(2) *Simonoseki strait—Alteration in colour and position of Moji-shoal south-west buoy.*

Also that the buoy (black) previously marking the south-west end of Moji shoal was sunk by a vessel in December 1894, and it would be replaced in January 1895 by a buoy, painted black and white in horizontal stripes, moored in a depth of 3½ fathoms, in a position one cable north-eastward of the old position, or approximately in lat. 33° 56' 50" N., long 130° 56' 30" E.

(Variation, 4° Westerly in 1895.)

*(The remaining portion of the debate in Council on the 2nd March, 1895, regarding the Public Demands Recovery Act, 1880, Amendment Bill.)*

The Hon'ble Mr. R. C. DUTT moved that clause (f) of section 7 be omitted, and that the necessary alterations be made in other parts of the Bill. He said:—

“Under the law as it at present exists, the certificate procedure may be had recourse to for arrears of rent due to estates under the Court of Wards, and managers of estates under the Court of Wards have for many years past applied to the Collector for certificates for realization of arrears of rent. I am not sure that the result of this practice has always been either successful or what is desirable. It has been my experience in several districts that managers have taken undue advantage of this facility in collecting rents, and that tahsildars have not exerted themselves as they would if they had not the advantage of this procedure. In several districts, year after year, thousands of requisitions were sent by managers to the Collector for realizing rents from raiyats which it was the duty of the manager to realize, but which he did not exert himself to realize. And the result was that as the Collector had charge of the property, he had to make the certificates in the way laid down by the law. Some years ago an order was passed by the Government that certificates should not be made with regard to rents due to any estates unless such estates had been

surveyed and settled. The result is that in most parts of the estates managed by the Court of Wards, the certificate procedure is not now followed. There are something like 8 or 10 such estates in the Midnapore district, and in Burdwan there is the very large estate of the Burdwan Raj under the Court of Wards. Very small portions of these estates have been surveyed and settled, and the managers are therefore trying to realize rents without the help of the certificate procedure. I do not think the result has been any worse than in previous years, and this shows that managers can realize rents without that procedure.

"I therefore submit that it is unnecessary to invest managers of Court of Wards' estates with the power of sending requisitions to the Collector for the collection of arrears under the certificate procedure. I do not think, strictly speaking, rents due to such estates can be called public demands. They are not rents due to the Government, but they are rents due to private zamindars, whose estates we are managing for the time being, and they are being realized by managers who are paid out of the proceeds of the estate. They are not public revenue in any sense of the word, and the principle upon which we have recourse to the certificate procedure to realize Government demands does not apply, I humbly think, to such classes of demands. The principle I understand is that, when money is shown in public books as due to the Government, there is very little doubt as to the amount being due, and therefore it is unnecessary to go to the Civil Court for the realisation of the amount, and a simple declaration of the Government that the sum is due may be held to be tantamount to a Civil Court decree. I do not think that this principle can apply to rents due to a private zamindar from his raiyats; he depends upon a large number of tahsildars who are there before we take charge of an estate, and who continue making collections after we take charge, and on whom we have to depend to a large extent. I do not think we can be as certain in this class of demands as we can be with regard to demands due to Government; and I therefore object to this procedure being followed for the recovery of such demands. And our recent experience has shown that it is quite unnecessary, because managers can do the work very well without the aid of the certificate procedure."

The Hon'ble MR. BUCKLAND said:—"I am not prepared to accept this amendment on behalf of Government. The hon'ble gentleman who has just spoken is perhaps not aware that this question has been debated more than once in this Council. It has been the subject of a number of reports, and comes before us with a long history attached to it. If the hon'ble gentleman before entering upon this question had only referred to the proceedings of this Council which took place when Act VII (B.C.) of 1880 was being passed, he would have seen a great deal of discussion upon this very point, namely, whether the principle of the certificate procedure should be applied to the recovery of arrears of rents in estates under the management of the Court of Wards. It becomes almost painful to have to go over the same ground over and over again. When the Sale Law Bill and this Bill were first circulated for criticism some years ago, the High Court went into this question and made some remarks about it. The Judges considered in paragraph 10 of their letter of the 29th August, 1891, that the system, *i.e.*, the certificate procedure, should no longer be allowed to prevail in respect of rents due upon private estates under the management of the Courts of Wards or otherwise in the hands of the Collector. The Board of Revenue, I think, fully answered everything which had been said by the High Court, and before the Government referred the present Bill to the Government of India in 1893, we examined carefully the proceedings of this Council at the time the Certificate Act was passed. It will probably save the time of the Council on the whole if I read a rather long extract from our letter to the Government of India, because there we take care to sum up as precisely as possible all that has been said on the subject. We said:—

"The High Court's argument was mainly directed against the inclusion in the class of public demands of rents due in estates under the management of the Court of Wards, and the Lieutenant-Governor asked the Board whether there was any reason why the conditions suggested by the High Court should not be fulfilled in the case of Wards' estates.

The Board's reply (in paragraphs 7-12 of their letter of 12th September, 1892) is that demands on behalf of the Court of Wards partake but slightly of the character of claims made on behalf of a private individual: such estates are under Government officials, their records are open to inspection, and their accounts are audited, so that the theoretical objection to the use of the certificate procedure hardly exists in case of such estates more than in respect of Government estates.

"An estate," the Board observe "under the Court of Wards is not liable to sale for arrears of revenue, and as the demands due to it from tenure-holders, and raiyats are often so numerous and for so small an amount as to make a resort to the Civil Court in every case impossible, the management of the estate could not be carried on without the employment of a summary procedure. It is also the fact that the management of a Government estate, as regards the nature of the demand, is on all fours with that of an estate under the Court of Wards; yet the High Court have not objected to the employment of the certificate procedure in respect of demands due from the raiyats on a Government estate."

"The principle which is now criticised is not a new one, but has been established for a long period of years. The Lieutenant-Governor thinks it unnecessary to go over the whole history of this matter, but he would invite a reference *inter alia* (1) to Section XIX of Regulation VII of 1799, which rendered a certain summary procedure, authorized for the recovery of arrears of rent due to proprietors and farmers, applicable to the Managers of Wards' estates and to joint undivided estates, as well as to Collectors holding lands in attachment or under khas collection; (2) to the proceedings in the Bengal Legislative Council of the 13th and 20th March and 3rd April, 1880, in connection with the Bill which became Act VII (B.C.) of 1880; (3) to the Hon'ble Mr. O'Knealy's speech in Council on the 20th March, when he agreed with the Hon'ble Advocate-General and Mr. Dampier that since the beginning of the British rule in India, realizations in rent in Wards' estates were subject to exactly the same procedure as that of Government estates, and the reason was that the Government having taken charge of the estates and looked after them, considered itself justified in recovering amounts due to the estate by the same process as in Government estates; (4) to the fact that, on the 3rd April, 1880, when the Hon'ble Babu Kristo Das Pal, in Council, moved that the certificate procedure should not be applicable to the realization of rents in Wards' estates, his motion was negatived almost unanimously, mainly on the ground that Government should be allowed such powers by reason of its fiduciary interest in Wards' estates. The principle had been admitted when section 63 of Act IX (B.C.) of 1879 was passed; it was extended to the recovery of interest and costs by section 10 of Act III (B.C.) of 1881, and the Lieutenant-Governor does not see that any facts have come to light which require a reversal of this policy. It is true that there are cases where estates when first taken over are found to have their accounts in confusion, and the Board have, at the Lieutenant-Governor's request, issued orders that the certificate procedure is not to be employed in a Ward's estate until a settlement and record of rights have been made therein, and that no certificate shall issue in any case where a question of right or title is involved."

"That sums up the history of the discussion upon the question as shortly as it can be done. As regards Wards' estates, the Government occupies very much the same position as it does with regard to estates belonging to the Government. It is absolutely responsible for the good management of Wards' estates as much as it is responsible for its own property. It has been held hitherto that without this summary procedure rents could not be properly collected. The hon'ble gentleman referred to some Wards' estates in the Midnapore and Burdwan districts under his supervision, which showed that managers were trying to do their best. I trust that all managers would try to exert themselves to collect rents whatever the law might be; but it is much too early to say, in fact we have absolutely no information before us, whether those managers are successful or whether they will fail. We know that this procedure has been found necessary elsewhere to enable the Board of Revenue and the Court of Wards to render a proper account of their stewardship, and I am not prepared on behalf of the Government to surrender it at present."

The Hon'ble Mr. GHOSH said:—"Although I have an amendment on the same subject which is in the nature of a compromise between the amendment of my hon'ble friend and the provision contained in the Bill, I shall be very glad if this amendment is carried. I entirely agree with my hon'ble friend that it is difficult to see how rents due to private estates under the management of the Court of Wards or of the Revenue authorities can properly be said to be public demands, and I do not see any reason why a summary procedure, which is only justifiable in the case of debts due to the Crown, and which are easily and correctly ascertainable from public records, should be extended to private demands having no analogy to those exceptional cases. I will not dwell on the evils and the abuse to which this system is liable. The

hon'ble mover of this amendment can speak on that subject with an authority which I do not possess. Hon'ble members are well aware that the learned Judges of the High Court are strongly opposed to this provision of the law, and I submit that their opinion on a matter like this is entitled to the greatest deference. The hon'ble member in charge of the Bill alluded to the previous debate on the principle of this provision as having settled the question so far as the principle of this amendment is concerned, but he did not tell the Council that even in 1880 some strong protests were made against this measure. The Hon'ble Mr. FIELD, who was then in charge of the Bill, certainly spoke in very guarded and hesitating terms when he alluded to the principle of this provision. He said :—

'I then come to clause (7), which proposes to extend the special procedure to the recovery of rents in estates which, under any law for the time being, are under the management of the Court of Wards. This is a new provision, and I am prepared to admit that it is a provision which carries the principle of the Bill to its extreme limits.'

"The hon'ble gentleman has also told us that a motion was made in regard to this provision, and that it was lost by a large majority. The late Babu Kristo Das Pal, than whom no abler representative of his countrymen has ever sat within these walls, made a strong protest, and he was supported by his colleague, Raja Peary Mohun Mookerjee. Then, again, what is of greater importance and to which no reference was made by the hon'ble member in charge of the Bill, the protests of those gentlemen were virtually endorsed by no less an authority than the then Lieutenant-Governor of Bengal, SIR ASHLEY EDEN. I will, with your permission, Sir, draw the attention of hon'ble members to the grave and weighty words which fell from the President of the Council on that occasion. His Honour said :—

'His Honour the President, before putting the question that the Bill be read in Council, would say, as regards the question of principle that had been raised, that he must admit it seemed to have a great deal of force and reason in it, and it was a subject which the Select Committee should carefully consider. It was not a matter which the Council could raise and dispose of off-hand. He understood it was not the intention of the hon'ble member who raised this question to move a specific amendment, but to request that the Select Committee should consider it. It might be quite true, as the hon'ble member on the right (Mr. Dampier) said, that the history of this principle, although it had been rather confused at times, had been generally to affirm that there should be a special procedure for the recovery of demands in estates under the management of Government officers, even though they were not the property of Government. His Honour did not think it necessary to go back to the practice of 1799, because the summary procedure which existed then was not the present certificate procedure, and bore no sort of resemblance to it. Then, in the Act of 1870, a clear distinction was drawn in section 4 as to estates managed *khass* and those managed through a Manager or agent, and he thought the necessity for making that distinction showed how unsound was the principle of bringing Wards' estates under the procedure of that Act; the section provided that under direct management of the Collector, the special procedure might be accepted, but not where Wards' estates were under the charge of managers, showing the doubts that existed in the minds of the framers of that measure. Therefore it could not be said that the principle of the provision in the present Bill was absolutely affirmed in 1870. It would no doubt be said that if the special procedure was absolutely necessary to ensure the recovery of a sufficient amount of rent to meet the Government demand, the same security was necessary for all estates in the country. It should be remembered that special powers were given to Government, because it was not holding as a private individual, but as a trustee for the public. Government had no individual interests in the collection of its dues, and was not likely to be influenced by selfish or unjust motives, but that was not the case where the interests of a private estate were concerned. Where estates were managed by the Court of Wards, it was not the interests of the public which were being guarded and protected, but the interests of a private individual: the loss or profit did not affect the public revenues, but the revenues of a private estate, and therefore the question of Wards' estates differed altogether from Government estates \* \* \* \* \*

'On the whole, he thought it desirable that the Select Committee should consider very carefully the whole principle, whether the grounds which made it necessary to have a summary procedure for the recovery of Government demands applied to the management of Wards' estates. He should be very glad, in consequence of what had passed, if the Committee would give to the subject their serious consideration when the Bill was laid before them.'

"Under these circumstances, I think my hon'ble friend who moved this amendment and those who agree with him are perfectly justified in respectfully asking the Council to reconsider a principle, the soundness of which was at that time condemned in such unmistakable language by the President, which was

protested against by those who then represented the popular voice in this Council, and which is still opposed by public opinion and by the learned Judges of the High Court."

The Hon'ble SIR CHARLES PAUL said:—"I was a party in the discussions to which the Hon'ble Mr. BUCKLAND has referred, and as I think that the arguments which I then adduced were very strong arguments, and as they commend themselves to me now as much as they did then, perhaps the view I took then may serve to convince hon'ble members of the necessity for this provision of the law. I said then:—

'Although an estate managed by the Court of Wards was not a Government estate, still the Government was to a certain extent directly interested in the collection of the rents of that estate. When an estate came under the charge of the Court of Wards it could not be sold for arrears of revenue, and it behoved the officer in charge to get in the rent (as speedily as possible) in order to pay the Government revenue, and in that way the collection of rents in Wards' estates became a matter as important to the Government as its own revenue.'

"That was what I then stated, and although on principle one is perfectly justified in saying that the rent which the Court of Wards collects is not a public demand, still in reality there is very scarcely any difference between a Government demand which should go into the treasury as speedily as possible and may be recovered by summary procedure, and a demand which the Government through the Court of Wards is entitled to realize without delay for the benefit in part of themselves. Therefore the difference, although it exists in principle, does not appear in reality, and hon'ble members are justified in extending to such demands the summary procedure prescribed by this Act."

The Hon'ble MR. LYALL said:—"I desire to traverse one or two of the statements which have been made by the hon'ble mover of the amendment. He said that at the end of the year a number of requisitions are filed by the managers of the Court of Wards' estates. I would ask whether the zamindars do not follow the same course in respect of their rents? Do not they file suits to avoid claims being barred by limitation? And why should not managers of Courts of Wards of estates take proceedings to avoid their claims being barred? That these requisitions are made broadcast at the end of the year I deny so far as my experience goes, and I think it is generally admitted that out of the many departments administered by Government few or none do more good to the country at large than the Court of Wards. Many families have been saved from ruin by its management, and estates have been saved from sale. Such being the case, I think we are bound to give every facility to managers to do their work, and I am convinced that the Court of Wards would not be able to do the amount of work it does without this summary procedure. This procedure was legalized under the Court of Wards Act, 1879, section 63 of which provides that 'all arrears of rent due by farmers, under-tenants and raiyats in respect of property under the charge of the Court, (whether such rents have become due before or after the Court has taken charge) shall be recoverable as arrears of revenue, and shall constitute a demand under Bengal Act VII of 1868, or any similar Act for the time being in force. The last preceding clause shall not apply to arrears of rent enhanced after issue of notice under section 13 of Act X of 1859, or under section 14 of Act VIII of 1869, but of which the enhancement has not been agreed to by the person who is liable to pay the same, or has not been confirmed by competent authority.' That law is now in force, and even if the amendment is carried, it will absolutely have no effect, for what I have read will still remain the law. I desire also to bring to the notice of the Council what has happened since the passing of that Act. Almost immediately after the Wards Act was passed, the Tenancy Act came before the Government—a measure which was originally based on a digest of the then existing law prepared by Mr. Field, and in section 4 of that digest he retained this procedure as regards Wards' estates. The next draft of the Tenancy Act was prepared by a Commission, and there again this procedure was included in section 4. The next was what is generally known as the Bengal Bill, and in section 4 of that Bill also it was included. It was again included in section 284 of the Bill introduced in the Council of the

Governor-General; and finally when the Tenancy Act was passed, this provision was contained in section 195, and no word was said in the Imperial Council against the retention of this provision in the Tenancy Act. The Hon'ble Mr. GHOSE has read what was said by SIR ASHLEY EDEN on this subject. I desire to place before the Council a later opinion of a Lieutenant-Governor of this Province (SIR RIVERS THOMPSON) when he reported to the Government of India his opinion upon the Tenancy Act. In paragraph 28 of that letter he said :—

"There is besides the paramount reason that the rents collected by Government are really revenue, and the procedure for enforcing payment of State dues must, in the general public interests, be more summary than the procedure for enforcing private dues. If this were not so, the ultimate result would be the employment of larger establishments, greater expenditure, and increased taxation. Thus a summary procedure for collecting the public revenue, while necessary if the Government of the country is to be efficiently administered, and while not open to the objections to which a summary procedure for collecting private debts is opposed, is in the long run the easiest and the cheapest for the people. Nor is this principle inapplicable in case of estates of disqualified proprietors managed by Government, for the rents of such estates include the revenue."

"The above embodies a later opinion of this Government than that quoted by the Hon'ble Mr. GHOSE, and we have heard from the Hon'ble Mr. BUCKLAND that this is still the opinion of the Bengal Government. In conclusion, I wish to say that the Board of Revenue believe that if this amendment is passed, the management of estates under the Court of Wards will suffer very severely."

The Hon'ble Mr. R. C. DUTT in reply said :—"The Hon'ble the Advocate-General has admitted that in principle rents due to estates under the management of the Court of Wards are not public demands, and this Council will have to decide whether under those circumstances the law for the recovery of public demands should be applied for the realization of such rents. I entirely agree with what has fallen from the Hon'ble Mr. LYALL as to the amount of good which is done to the country by the Court of Wards managing the estates of minors incapable of managing their own estates, and also as to the feeling all over the country that the Government is doing a vast amount of good by saving the property of minors by employing their own officers to manage minors' estates. My only contention is that we shall be able to manage just as well without this summary procedure. In that respect I have ventured to differ from a senior and more experienced officer. I believe that the experience of the last few years has shown that what I propose can well be done."

The Hon'ble THE PRESIDENT said :—"This is in my opinion the most important amendment before the Council to-day, and although the opinion of the Government has been well and ably expressed by the hon'ble members who have spoken on behalf of the Government, I think it right to express my own view as briefly as possible in order to show why I consider it most inadvisable to accept this amendment. The Hon'ble Mr. DUTT has supported his amendment upon two grounds—*first*, that it is just in principle, and *secondly*, that it is feasible in practice. Taking the latter point first, the question of practice, I do not think the hon'ble member has himself sufficient information to put the matter fully before the Council. The order passed at my request by the Board of Revenue, that in Wards' estates which are not settled and surveyed the certificate procedure should not be adopted, has not been in force very long, and we have no definite statistics as to the effect it has produced. I find in the last Board's Report (for 1893-94) that in Court of Wards' estates 7,930 certificates were filed. This is not altogether in agreement with the impression which exists in the mind of the Hon'ble Mr. DUTT, and which he conveyed to us, namely, that the certificate procedure in these estates has been to a large extent stopped. It is evident that it is to a large extent going on, although it may have decreased. But what would be the effect of stopping it altogether?

"The hon'ble member seems to think that this procedure is only used by managers and tahsildars in Wards' estates who are lax in collecting

rents; that they are slack in their procedure and rush into the Collectorate with a bundle of requisitions at the end of the year. I am not prepared to say that this is not altogether correct, simply because there is a certain amount of imperfection in the human organization. No one will believe that tahsildars are absolutely free from the faults due to common human nature. But as the Hon'ble MR. LYALL has explained, it is absolutely necessary, when all has been done which could be done, at the last moment, to avoid the operation of the Limitation Act, that a certain number of certificates should be filed on the requisition of tahsildars, just as suits are filed by zamindars during the last two or three days of the year. If these 7,930 certificates were to be turned into 7,930 civil suits, what would be the result? Would it be for the good of the 'poor and oppressed' raiyats? Certainly not. They would have the cost and labour of defending the suits, and they would also have to pay the expense incurred in the execution of decrees instead of the simple procedure and trifling expense of a certificate. It would be to his injury and not to his good if the principle of this amendment is carried out. I entirely agree with the expression of SIR RIVERS THOMPSON'S opinion which the Hon'ble MR. LYALL has read, that the certificate procedure is the most convenient and easy procedure on behalf of the judgment-debtor. It is for the debtor's good that we should use this procedure.

"Then, from the question of practice we come to the question of principle. The attack is based on the principle that this is a Public Demands Recovery Act, and that money due to Wards' estates is not a public demand. Even on that ground the attack should be resisted. We have heard the Hon'ble the Advocate-General say that the opinion which he held fourteen years ago is still held by him in his maturer mind unchanged, and the same opinion is expressed by the Government letter which has been read by the Hon'ble MR. BUCKLAND. But I take my stand from a different point of view. Although this is called a Public Demands Act, it is not intended to be confined to public demands. That is a convenient way of denoting demands on account of which a certificate is issued, but it is not an exhaustive description. The operation of the Act is not confined to public demands, for we know that under the Road Cess Act this procedure may be used for the recovery of sums due to a landlord who has paid the cess on behalf of his shareholders. That is essentially a private demand, and yet we allow the certificate procedure to be used by the zamindar, and I wish to impress upon the Council that the reason why we do so is that it is a demand which is positively known. This is what differentiates claim for which a certificate may be taken out from other claims. If there be no dispute, if it is clearly laid down in the *jamabandi* or the *jamawasil-baki*, that a certain tenant owes a certain sum as rent to Government or to the Manager of the estate on behalf of Government, what necessity is there to file a suit in the Civil Court when you know absolutely the fact that the demand is due? This question will come before the Government shortly in another shape. A suggestion has been made with regard to the maintenance of the Record of Rights Bill that zamindars who pay the survey cess on behalf of their tenants should be allowed to recover it if necessary by taking out a certificate. This suggestion seems to me a reasonable one, and if the Select Committee approve it I shall be ready to give the assent of Government to it. I shall do this the more readily because it will to some extent pave the way to granting to zamindars a more summary method of collecting arrears of rent. Hon'ble members know that it has long been my desire to be able to provide a measure of this sort. The difficulties are very great, but I hope before I leave India that I may be able at least to put before the Government of India a project of law to the effect that where there is a demand which is absolutely certain, where a zamindar has had his estates surveyed and settled under the Tenancy Act, and the record kept up and all mutations registered, he should be able to get a certificate from the Collector, and be free from the trouble and annoyance of going to the Munsif to enforce his right on account of arrears. For these reasons, I think it will be extremely inconvenient to take a retrograde step now. My view is that we should be able to extend the law to other cases in which the sum in demand is truly and certainly known to be due, so that there can be no dispute about it."

The Motion being put, the Council divided:—

Ayes 4.

The Hon'ble Maulvi Serajul Islam Khan Bahadur.  
The Hon'ble Mr. Ghose.  
The Hon'ble Babu Surendranath Banerjee.  
The Hon'ble Mr. Dutt.

Noes 11.

The Hon'ble Maulvi Muhammad Yusuf Khan Bahadur.  
The Hon'ble Mr. Womack.  
The Hon'ble Mr. Wilkins.  
The Hon'ble Mr. Buckland.  
The Hon'ble Mr. Collier.  
The Hon'ble Maulvi Abdul Jubbar Khan Bahadur.  
The Hon'ble Mr. Bourdillon.  
The Hon'ble Mr. Lyall.  
The Hon'ble Sir John Lambert.  
The Hon'ble Mr. Cotton.  
The Hon'ble Sir Charles Paul.

So the Motion was lost.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, moved that in the proviso to clause (f) of section 7, after the word "this" the words "and the preceding" be inserted. He said:—

"It is but fair that the proviso should be extended also to clause (e) with reference to Government *khas mahals* as well as to estates under the management of the Court of Wards. I submit that where there is any question about the enhancement of rent, about which there is a dispute, it is but fair that the procedure of the Certificate Act ought not to be applied, and the *rai-yats* be forced to pay the enhanced rate of rent in this summary manner. I therefore move that this proviso, which is applicable to the Court of Wards' estates, ought to apply also to clause (e) regarding the recovery of arrears in *khas mahals*, and which the Government is in the same position as a *zamindar*."

The Hon'ble MR. BUCKLAND said:—"As far as I can make out, the hon'ble member has not brought forward a single reason for altering the existing law. He proposes to extend to clause (e) a proviso which applies only to clause (f). It applies to clause (f) because it is the present law under section 63 of the Court of Wards' Act of 1879. That clause does not now appear in the Court of Wards' Act, as it finds a place in the Certificate Act, but I cannot see any reason for extending it to clause (e). Does the hon'ble gentleman suppose that the Government—the Collector or other Certificate Officer—would issue a certificate as a means of enhancing and recovering any enhanced revenue or rent under clause (e)? The object of the whole Act, as His Honour the President explained, is that certificates may be issued for the dues of Government, which are absolutely and certainly known to be due. Is it likely that the Collector would deliberately issue a certificate for an enhanced rate of rent without being certain that it is absolutely due? I see no real reason whatever for adopting the amendment. Has the hon'ble member known of any single case in which a Certificate Officer has tried, on behalf of the Government, to levy a demand which he is not perfectly entitled to levy? If he has not, I am bound to say that I cannot accept the amendment."

The Hon'ble SIR CHARLES PAUL said:—"I must confess I do not understand the meaning of this amendment. Enhanced rent must be rent which has been either agreed upon or which has been confirmed by a competent Court. There can be no element of uncertainty about it."

The Hon'ble MAULVI MUHAMMAD YUSUF, KHAN BAHADUR, said:—"As I understand the object of this amendment is to introduce some sort of uniformity in the issue of certificates, and to remove want of some uniformity. One uniform rule is suggested to govern cases falling within both clauses (e) and (f), and it is contended that both the clauses should be governed by the same

principle both as regards the cases in which the certificates ought to be issued and also in regard to cases in which certificates ought not to be issued; the law laid down in the Bill makes a distinction by applying the proviso only to clause (f). The question, therefore, is, do not the cases which fall under both the clauses (e) and (f) stand on the same footing, and should they not be dealt with in all respects by the same rule and the same principle? I do not see any material difference between the cases falling under those two clauses, regarded from the point of view from which they are now being considered. If the principle regulating the issue of certificates is the certainty of the demand, and if the cases under clauses (e) and (f) have been included under the certificate procedure by reason of such certainty, and further, if, by reason of want of such certainty, some cases are to be taken out of the operation of the rule laid down in clause (f) and thrown in the proviso to that clause, then it is clear that the very same want of certainty affects those identical cases when they fall under clause (e). There is no reason why the exception should be confined to clause (f), and should not be extended to clause (e). If it is necessary that there should be an exception in clause (f) in favour of cases in which there has been no decree of a competent Court, then it is likewise necessary that there should be a corresponding exception in clause (e) in favour of like cases. Under clause (f) the landlord is the Court of Wards; under clause (e) the landlord is the Secretary of State. Both might have power to issue a certificate when the demand is certain, and consists of what is really and strictly an arrear of rent; but an enhanced rent is only nominally an arrear of rent. To make it really an arrear of rent, the enhancement must have been agreed upon or finally adjudicated upon; and before adjudication by a competent authority, the enhanced rent is not a demand for a sum certain. Until such adjudication, the enhanced rent contains all the elements of uncertainty in consequence of the parties interested entertaining conflicting notions of the right to enhance. I therefore venture to think that when the demand results from a question of enhancement of rent, the right to issue the certificate should be withheld from clause (e) for the same reasons for which it has been considered proper to withhold it from clause (f)."

The Hon'ble Mr. LYALL said:—"I venture to point out a mistake which has been made by the hon'ble gentleman who last spoke. He contended that clauses (e) and (f) are analogous, but I say they are quite different. The gist of the demand under clause (e) is that it is a public demand and no enhancement of rent is payable unless it is legally due. The wording of clause (e) is entirely different from the wording of clause (f). Nothing is entered in the Collector's books as 'payable' until it has become a legal liability, and certificates are properly issued for the recovery of such demands."

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, in reply said:—"With great respect to the hon'ble gentleman who spoke last, I do not think that the word 'payable' makes everything payable to Government a legal liability. It may be payable in the view of the Collector, but a Civil Court may hold otherwise, and say that enhanced rent is not payable, though the Collector or the manager of a Ward's estate may claim it to be payable. There may be a dispute whether enhanced rent is payable or not, and under such circumstances the certificate procedure should not apply. With regard to the observation which fell from the hon'ble member in charge of the Bill whether it is likely that the Collector would issue a certificate for a demand which was not due, if the Collector was bound to look into the matter himself it would be different. If the Collector could do everything personally there could be no complaint; and as a matter of fact many complaints are made of irregularities occurring and, therefore, this power should not be given to a Government officer or a manager of a Ward's estate. It is admitted to be the principle of this law that where a demand is disputed this procedure ought not to apply. The very foundation of this Act is that the demand is justly due, and therefore this summary procedure is granted; but where there is a question of enhancement of rent, I submit that this summary procedure ought not to be given even to the Government."

The Motion being put, the Council divided :—

The Hon'ble Maulvi Abdul Jubbar Khan Bahadur.  
The Hon'ble Mr. Bourdillon.  
The Hon'ble Mr. Lyall.  
The Hon'ble Sir John Lambert.  
The Hon'ble Sir Charles Paul.  
The Hon'ble the President.

So the Motion was lost.

The Hon'ble Mr. R. C. Dutt, by leave of the Council, withdrew the motion of which he had given notice that the last paragraph of section 7, beginning with the words "Provided also that a certificate filed" be omitted.

The Hon'ble Mr. GHOSE moved that the following proviso be added at the end of section 7 :—

"Provided further that as regards claims under clause (f), no certificate shall issue until after such estate has been surveyed and a record of rights made in respect thereof, and in no case shall a certificate be issued in respect of such claims where any question of right or title is involved."

He said:—"After the discussion which has taken place on the motion of my hon'ble friend, the Commissioner of Burdwan, it will not be necessary for me to detain the Council for more than a moment or two. I said on that occasion that the amendment I have now the honour to move is a compromise between the amendment moved by my hon'ble friend and the provision contained in this Bill. I ask the Council to embody in the law the wholesome restrictions that under instructions from your Honour's Government, have been imposed by executive order forbidding, in certain cases, the employment of the certificate procedure for the realization of debts due to estates under the management of the Court of Wards. I have endeavoured to follow almost word for word the terms of the letter of the Government of Bengal, and I hope the Government may be able to accept this amendment. The Public are thankful to the Government for its endeavours to mitigate the hardships and rigour of the law by executive order, but I submit that when this Bill is under consideration those restrictions should be embodied in the law itself rather than that the executive administration should continue to exercise a sort of dispensing power to moderate the hardships of the law. Under these circumstances, I ask the Council to accept this amendment."

The Hon'ble Mr. BUCKLAND said :—"The hon'ble gentleman's amendment consists of two parts, but he has spoken only to one of them. With regard to the part to which he has spoken, I should like to ask him whether any fault can be found with the executive administration since that order to which reference has been made was issued in May, 1892? That order was issued in consequence of a Resolution of this Government in April, 1892, and the order now in force is an order of the Board of Revenue with which I need not trouble the Council. The effect of that order is, that the certificate procedure is, not to be used until a survey and settlement of rights has been carried out. Since May, 1892, has any single case come to notice in which that order has been disregarded? I hear no reply, and I am not prepared to say of my own knowledge that a single case has occurred in contravention of that order. Therefore it seems to me that the order has sufficiently fulfilled its purpose. It is very often made a charge against the Legislature that they legislate for things which are unnecessary. It has certainly been a charge against us in the past that a great many things have been included in Acts which might better have been made the subject of executive orders. We are told that an order which has been working

well for the last three years should be included in the law, but I fail to see any necessity for it so far as regards the first part of the amendment. But the second part of it is just as important, namely, that in no case should a certificate issue in respect of claims where any question of right or title is involved. Very serious objection has been taken to that suggestion by the Board of Revenue, and for this reason, that there is hardly any case in which an ingenious Pleader or learned Counsel would not be able to make out a *prima facie* case that a question of right or title is involved. It will never do for the course of a certificate to be suddenly arrested at the outset by some very fine drawn plea that some remote question of right or title is involved. We had this question brought to our notice at full length in a report of the Board of Revenue submitted in respect to the particular Bill. What we want is to be able to issue the certificate and then if it is found subsequently to be the fact that the man has a *bona fide* question of right or title, let him go to the Civil Court, but we do not want that the certificate should be nipped in the bud in the first instance because some clever Pleader or experienced Counsel may be able to show that in some way or other a question of right or title is involved. Therefore, in regard to both branches of the amendment, I put it to the Council that this amendment should not be accepted."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"It is admitted by the hon'ble gentleman who has just spoken that the first part of my hon'ble friend's amendment has been made the subject of an executive order. What objection can there be to make it also the subject of a legislative enactment? The hon'ble member has asked the hon'ble mover of the amendment whether any case has occurred in contravention of the executive order. But an executive order is a very unstable thing; it is liable to changes. His Honour the present Lieutenant-Governor has issued this order, but his successor may not agree with him, and may modify or rescind the order. I am quite aware that a legislative enactment may also be changed, but it can only be changed by a very complicated process. I think that if there is no objection to the executive order, it ought now to be made the subject of legislative enactment."

The Hon'ble Mr. CORSON said:—"I would suggest that there seems no particular objection to accepting the amendment proposed by the Hon'ble Mr. GHOSH. Although an executive order has been passed which substantially gives effect to this provision, I am not altogether satisfied that that order has been strictly carried out. Of course, I am not in a position to answer the hon'ble member in charge of the Bill by pointing out any particular case, but I will take the figures the President read out a few minutes ago, when His Honour himself observed that the order which had been passed had not led to much reduction in the number of certificates. [The Hon'ble THE PRESIDENT said:—"I did not intend to convey that impression, because I have not got the figures separately for estates which have been surveyed and settled."] I have not the figures either, but I think it should be unnecessary to issue so many as 7,930 certificates in the comparatively limited number of estates which have been surveyed and settled, and I am not at all satisfied that the order has been entirely carried out. I would venture to point out that an executive order is very different indeed from a statutory provision. If the proposed provision is contained in the law, it would afford a ground of objection in the Civil Court; but I do not think the Civil Court will take any cognizance of an executive order if it were brought to its notice by a plaintiff. There can be no question that the object of the Government is identical with that of the Hon'ble Member who has moved this proviso, and I think it will be the best solution of the question to accept the amendment which has been proposed. And with regard to the last portion of the amendment, I believe I am right in saying that similar orders have also been issued that no certificate shall issue in respect of a claim where any question of right or title is involved. If such an order has issued and it is desirable that it should be carried out, then I think it well that it should find a place in the statute book. I hope, therefore, Your Honour will find no difficulty in accepting this amendment, which is intended to give effect to executive orders which have been issued by the Government."

The Hon'ble MAJEST MUHAMMAD YUSUF, KHAN BAHADUR, said:—"I am prepared to support both branches of this amendment, and I venture to think that if the amendment were to be adopted, the law would be improved because the section would then, in express terms, correspond to what has been the admitted practice under, and by force of, the executive orders. I think it is highly desirable that there should be no uncertainty in the words of a Statute, and that an enactment should express correctly and properly the real intention of the Legislature. If it is the deliberate intention of the Council not to authorise the issue of a certificate in certain cases, then that intention should be made clear in the Bill itself, and not left to be gathered by executive orders and rules. I submit that it is wholly undesirable to make the law expressly and in terms extend beyond the limit of expediency, leaving it to executive rules and orders to cut down the law, and tone it down so as to be brought within the limits of expediency. Before the executive orders which have been referred to in the course of the debate, I know that the practice in the matter of issue of certificates was quite different. Those orders introduced a very salutary change, and brought about a very wholesome result; they mitigated much of the inconvenience and annoyance which existed before; by making the law conform to the practice, permanency would be given to the practice, and the result would be public confidence and security in the existence of the practice which would have the sanction of the law.

"In regard to the second branch of the amendment, I submit that the principle of the amendment is equally beyond question. Claims which involve a question of right and title fall, I submit, outside the principle which regulates the certificate procedure. Certificates should only issue in cases in which there is positive certainty, and where all elements of doubt are removed. When a question of right and title is involved, the parties interested are likely to hold conflicting views on that question, and so it would be undesirable to arm one of those parties with a weapon which he might wield with dangerous consequences to his adversary. In a case involving the question of right and title, both parties should be left to fight out their difference on equal terms without the law placing one of them on a vantage ground."

The Hon'ble SIR CHARLES PAUL said:—"If I apprehend rightly the question comes to this, that in cases where the parties differ and where there is no agreement, this certificate procedure should not be adopted. If that is so, the matter answers itself."

The Hon'ble MR. LYALL said:—"I think there are many things which are desirable, but which are not desirable to put into a law; and that restrictions are far more easily put into an executive order, and with better effect. It is not always well that such executive orders should be made rigid by being enacted into law. The present is a case in point. The executive orders have been thoroughly carried out in both these cases, and there is an inelasticity in a law which does not exist in an executive order. It may be that some future Lieutenant-Governor may think fit to enlarge the scope of the present orders, or it may be found necessary to reduce them; therefore I think such orders should not be made too unbending. Then as to the last portion of the amendment, I think the hon'ble member will admit that at first it does not appear whether a case is one of right or title or not; that only appears when an objection is filed. The present order is that when the Collector finds that it is a case of right or title, he is to dispose of the case under section 13 by dismissing it and leaving the decision to the Civil Courts. It is impossible for the Collector to see when a matter first comes before him on requisition that it will develop into a question of right or title. All that he can do when he finds that out after he has started the case is to take it off the file. Beyond that it is impossible to ask him to go."

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, said:—"I agree with the hon'ble mover of the amendment, but I wish to suggest a modification, namely, the addition of the words '*bona fide*' before the words 'question of right or title.'"

The Hon'ble Mr. GHOSH in reply said:—"I have unfortunately not by me the blue book relating to this subject, but if my memory serves me rightly, it will be found in page 134 of the blue book that, under instructions from your Honour's Government, the Board of Revenue have issued orders that not only in cases where a survey and record of rights have not been made, but also in cases where a question of right or title is involved, the certificate procedure should not be applied. That being so, there is no conflict between my amendment and the orders passed by the executive Government. The only question which remains for consideration is, whether those executive orders ought not to be incorporated with the law. I submit that they ought. As long as the law remained defective the Public were grateful to the Government for moderating the hardships of the law, but the whole law on the subject is now under amendment, and I see no reason why those orders should not now be made part of the law. As has been pointed out by the Hon'ble the Chief Secretary, if these orders are disregarded, the Courts of Law will not take cognizance of them, and a man who is proceeded against in spite of those orders will have no remedy. And, moreover, another order may be passed abrogating the existing orders. The hon'ble member in charge of the Bill has asked me if I know of any case of grievance after the issue of these orders. I am not in a position to give the information, but it should be remembered that the orders are now fresh, and therefore they are probably being implicitly obeyed. They will, however, gradually grow old and rusty, and be forgotten, and when certificates are made in spite of those orders, the poor men concerned will have no remedy; whereas by incorporating those orders with the law you will make it absolutely impossible for any one to disregard them. On these grounds I desire to put this motion before the Council, but before doing so I ask leave to divide the motion into parts, inasmuch as hon'ble members who may support one part may not be disposed to support the other; and as regards the second portion of the amendment, I thankfully accept the suggestion of my hon'ble friend, MAULVI SERAJAL ISLAM, to insert the words '*bona fide*' before the words 'question of right or title.'"

The Hon'ble THE PRESIDENT said:—"Before putting the question to the vote, I wish to say that I am unhesitatingly opposed to both the motions, and I trust the Council will not accept them. It is not a question of principle. We are all agreed as to what should be done, and I think you may take it that we of the executive know best the way in which to carry out our intentions. I have no doubt that the best way is to put it into an executive order rather than into a law. It is true it is less difficult to change a law than to change an executive order, but if this motion is carried it will not be long before the Council is called upon to change it, because I feel sure it will not work in the way in which it is intended to be worked. It is easy to frame an order, but it is very difficult to pass a legislative enactment in such a way that holes will not be picked in it. In the executive order the words 'record of rights' are used in a rough and practical way which is not liable to be misunderstood, but technically and legally speaking it has only one meaning, namely, such a record of rights as is framed under section 102 of the Bengal Tenancy Act. But the intention of Government was not to confine the operation of the order to those rights. We have other estates in other districts settled under other Acts. We have recently settled the Western Duars in the Jalpaiguri district under a very peculiar Act, which I have already proposed should be abolished, but the record prepared under that Act is not what the Bengal Tenancy Act calls a 'record of rights,' and once this provision is put into law every kind of objection will be raised against the Government in passing its orders. With regard to excluding any cases which may involve a question of right and title, it was the intention of the Government to introduce that principle, but the Board of Revenue, after grave consideration, pointed out that there is great danger of technical objections being raised. The first thing every objector will do will be to say that there is question of right and title involved. It will lead to a good deal of litigation, expense and delay, and throw a good deal of difficulty in the way of carrying out the simple and summary procedure of this Act, and will have no effect in producing a better administration of the principles of the law."

The amendment was divided into two parts: the first part to consist of the words "Provided further that as regards claims under clause (f), no certificate shall issue until after such estate has been surveyed and a record of rights made in respect thereof"; the second part to consist of the words "and in no case shall a certificate be issued in respect of such claims where any *bonâ fide* question of right or title is involved."

The first part of the amendment was put to the vote and negatived.

The second part of the amendment was put to the vote and also negatived.

The Hon'ble Mr. R. C. DUTT moved that after section 9 the following new section be added:—

'Before making a certificate under the provisions of sections five, seven or nine, the Certificate Officer shall send by post, addressed to the person from whom the demand is alleged to be due, at his last known residence, and registered under Part III of the Indian Post Office Act, 1866, or any similar Act for the time being in force, a notice calling upon such person to pay such amount within a date to be specified in the notice. And no certificate will be made if such amount be paid within the date fixed.

'The sending of such notice may be proved by the production of the Post Office receipt.'

• He said:—"My object in moving this amendment is this. In a great many cases defaulters fail to pay the amounts due from them, not because they are unwilling or unable to pay, but because they do not remember that there is such a demand due on a fixed date. Under the Certificate Act we have to deal with a very large class of people, many of whom are in very humble circumstances and are not in the habit of keeping accounts of sums due to them or payable by them. As an instance, I may mention that in the district of Hooghly we realize road cess from about 6,000 zamindars and 16,000 rent-free tenure-holders, and about 10,000 of the latter hold tenures whose annual value is not more than Rs. 40. If the road cess is not paid in due time, a certificate is filed and notice is issued under section 10, and the cost of serving the notice is added to the amount of road cess to be paid. The property of the defaulter is attached, and he has to pay the road cess with the costs incurred. I admit that it is the duty of these people to remember their liabilities, and to send in the amounts by the due date, but it would save a good deal of trouble and of expense to the defaulters if simple post office notices were sent to them. My experience is that even if a post-card were sent, probably in 75 per cent. of these cases the money would come in, and there would be no necessity to saddle these people with the cost of a certificate. The Board of Revenue have already recognized the necessity and desirability of issuing post-card notices in certain cases, but the number of cases included in the Circular is very small. It does not include the road cess except where the rate of cess has been altered. The Circular is contained in Rule 21, section 3 of the Rules framed by the Board of Revenue under this Act, and runs thus:—

'To obviate hardship, District Officers are directed to notify the existence of arrears before certificates are issued—(a) by putting up a list of defaulters in their offices, and (b) by sending warnings to defaulters by printed post-cards (see Appendix C) in all cases in which there is no reason to believe that the debtor has had intimation of his liability. In the case of road cess and zamindari dak cess collections, this procedure will probably be unnecessary, except in the rare instances in which the amount of the demand has recently been changed.'

"Most of our certificates are issued for realization of road cess: I may almost say that the certificate exists for realization of road cess. I was looking into the figures in Burdwan the other day, and I found that out of about 10,000 certificates dealt with in the current year, very nearly 9,000 related to road cess. My contention therefore is, that such post-card notices are most necessary in the case of road cess. My desire is, that notices should be sent in *all* cases before certificates are made. I may mention that in Burdwan we have travelled a little beyond the letter of the Board's Circular and have issued notices in all cases. The result has been very successful, for I find that within the last five months 1,119 defaulters paid up the amounts they were asked to pay by post-card, and were also good enough to pay in each case an additional pice, being the price

of the post-card. So that without any expense to Government, we are able to realize a large amount and save the cost to the people and the trouble to our office, of making certificates. For these reasons I hope this amendment will be accepted, and that it will be made compulsory to send post-cards as a sort of warning to defaulters."

The Hon'ble MR. BUCKLAND said:—"I am afraid that I cannot hold out any hope of this amendment being accepted on the part of Government. All that the hon'ble member has said points to the extension or amplification of the Board's Circular on the point rather than to an amendment of the law. It is a very different thing, as we have heard just now, to issue an executive order and to put a direction into the law and thus stereotype it. Here we have an excellent executive order issued by the Board of Revenue, the object of which is very good as far as it goes; but the hon'ble gentleman thinks it should go further. There is nothing to prevent him from persuading the Board of Revenue to extend the scope of the circular without putting it into the law. I see no reason why he should not try to influence the Board of Revenue in this way, but it is entirely a different thing for us to put a provision of this sort into law; because if you once put it into the law, it would allow the thin edge of the wedge to be inserted for all kinds of complications. As soon as a certificate is filed it has the force of a decree. It has been deliberately enacted that Government has a right to adopt this summary procedure for the recovery of sums due to itself, and by this procedure all the preliminary steps prior to a decree are waived; and, for this reason, that the demands for which certificates are issued are well known. We must consider how many complications may be introduced directly we begin to introduce any preliminary steps and make them obligatory by law. We should have to prove that the notice by post-card reached the individual to whom it was addressed, and then we have the suggestion made that preliminary evidence should be recorded—and the hon'ble gentleman will allow me to remind him that in his report he made this suggestion—that no certificate should be issued without this first step being taken. Thus we should have a procedure before the issue of the certificate, and I do not know what other complications might not be introduced. I think I am right in saying that we should have to prove the receipt of the notices. What is there to compel the addressee to give a receipt? [The Hon'ble Mr. R. C. DUTT said:—"I meant the receipt of the issuing Post Office."] What guarantee is there that the receipt of the Post Office will be accepted as evidence that the notice reached the addressee? We should have to prove the arrival of the notice at the hands of the addressee; we should have the postmen called in, and they would thus be taken away from the performance of their legitimate duty of serving letters, and would be constantly hanging about the Courts to prove the receipt of a number of preliminary notices with which we now dispense. But the matter will stand on quite a different footing if notices are issued in all cases, including road cess, by executive orders in extension of the existing orders. Then, if the notice fails to reach its mark, the certificate process can go on all the same, but it is a serious objection to impose by law all this preliminary trouble upon our already overburdened officers."

The Hon'ble MAULVI MUHAMMAD YUSUF, KHAN BAHADUR, said:—"This amendment raises a very important question—a question which, while it combines simplicity and usefulness, strikes at the very root of the complaint raised against the certificate system. The issue of a notice before a certificate is made will tend very largely to avert a great deal of the inconvenience and annoyance which, it is believed, follow in the wake of the certificate procedure. The issue of the notice is in itself the easiest thing imaginable, and no serious objection could be imagined against the proposal for the issue of such a notice. But objections have been raised, and it is necessary, therefore, to see whether the proposal should be entertained. Some of the objections raised by the hon'ble member in charge of the Bill do not appear to me to present serious obstacles against the reception of the amendment. If the issue of a notice is desirable in itself, no post-office difficulty need trouble our minds; but I submit that, as a matter of law, no difficulty exists in connection with any steps relating to the issue of the notice, because the receipt given

by the issuing Post Office would, by a natural presumption, lead to the inference that the notice was duly received by the party to whom it was addressed. The question, therefore, not being surrounded by any consideration of embarrassment, we revert to the question itself, and the first matter to enquire is whether a notice is necessary or desirable before the making of a certificate. Upon that, I submit, there should not be two opinions. Of persons who make default in payment, a large body consists of those whose default is not wilful. To such a body the notice would be most welcome, whilst the issuing of the notice would not increase the work of the Collector to any appreciable extent; nay, rather the work of the Collector would be diminished in proportion as the issue of the notice would reduce the list of default, and obviate the necessity of making of the certificate and carrying it through. Even in cases of persons whose default is wilful, the notice would serve to remind them of their default, and therefore in some of those cases also it is possible to imagine that the necessity to make a certificate might be removed. Altogether, I submit, it is in every way desirable that there should be a notice preliminary to a certificate being made."

The Hon'ble BABU SUBENDRANATH BANERJEE said:—"I have listened attentively to the hon'ble member in charge of the Bill, but I have not been able to follow him in regard to the complications to which he referred. On the other hand, the hon'ble mover of the amendment has made out a very strong case. I know something about the service of these notices. In the year 1888-89 the estate of Sujamutha came under the management of the Court of Wards, and in the Bengali year 1295 I think it was, so many as 12,000 certificates were showered on the devoted heads of the raiyats, and the complaint which they urged in their petition to the Board of Revenue was that they had not in many cases received notices of certificates issued against them, and that their properties had been sold without their having received any intimation of the issue of the certificates. I have with me an extract from their memorial to the Board of Revenue, made in November, 1889, in which they say:—

'Further, in many cases no notices of the issue of certificates or of auction sale are received, and decrees obtained and their holdings put up to sale without their knowledge.'

"That was deliberately stated in their memorial. I had an opportunity of visiting the estate, and discussing the matter with a body of about 5,000 raiyats, and the one complaint they made was that the service of these notices was made in the most careless and perfunctory manner. I submit that this amendment will afford an easy remedy, and it should be accepted by the Council."

The Hon'ble SIR CHARLES PAUL said:—"I confess that I am in sympathy with the hon'ble mover on this particular motion. It appears to me that the right of the Crown is to take action without previous notice, but inasmuch as it is provided in section 10, to take action without notice when a certificate is made, notice must be given, the mode of giving notice which is here suggested might be given. I do not say that two notices should be given, and I cannot understand that the giving of one notice should lead to any administrative inconvenience. And, inasmuch as one notice must be given, it does appear to me that it would be more logical to give the notice before making the certificate than after doing so. And in regard to the service of the notice, I do not think there will be such difficulty as the hon'ble member in charge of the Bill apprehends. The production of the receipt of the Post Office would be *prima facie* evidence of the letter having reached its destination. Of course that evidence may be rebutted, but we have no reason to suppose that in every case in which people owe money they will deny the receipt of notice; and as this change of law is likely to lead to no serious administrative inconvenience, I approve of this amendment."

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, said:—"Section 8 of the Bill gives the mere filing of a certificate the force of a decree; and under section 10 all the judgment-debtor's properties, moveable and immovable, are attached in pursuance of such *ex-parte* decree, and if the judgment-debtor wants to sell any portion of that property for the payment of the demand,

he cannot do so. I think it but fair and reasonable that before having recourse to this harsh procedure, the alleged debtor ought to have the notice which is proposed in this amendment. I can assure the Government from my experience that cases of intentional default are very rare. People do not, as a matter of fact, intentionally omit to pay road cess or Government revenue, but only do so from want of proper information or forgetfulness. Therefore I think that this amendment is a move in the right direction, and ought to be accepted."

The Hon'ble Mr. COTTON said:—"I should like to say one word to the Council in reference to this proposal. It appears to me that this is a proposal which comes in far more suitably in the form of an executive order than in that of a legislative enactment. I have seen enough of the working of the certificate procedure to be satisfied that in many cases it is an engine of oppression—that is perhaps rather a strong expression to use—but I mean that the certificate procedure is no doubt productive of hardship in many cases. It is, therefore, incumbent upon the Government, which has this powerful engine at its disposal, to avoid issuing certificates whenever it can do so, and I quite agree with the Hon'ble Mover of the amendment that if notices are regularly given before making certificates, it would have the effect of largely reducing the number of certificates. His own experience shows that in the Burdwan district thousands of persons in whose names these notices were issued paid up their dues without being required to do so by the certificate procedure. I therefore entirely agree with him that these notices should be issued, but I fail to see why a provision of this kind should find a place in the statute book. It is eminently an arrangement which ought to be provided for by means of an executive order. I desire to point out that if this were made the subject of legislative enactment, and if it were allowed to objectors to come forward and say, 'I did not get this preliminary notice,' it would add immensely to the difficulty of working the Certificate Department and recovering demands. There would be nothing more difficult than to prove to the mind of the Court that a preliminary notice of this nature had been properly served. I look upon this preliminary notice as conferring an advantage upon defaulters by saving them from all the harshness and annoyance of a certificate, and therefore I am in favour of issuing such notices, but I would not introduce such a provision in the statute book, as it might lead to a great deal of doubt and difficulty."

The Hon'ble Mr. LYALL said:—"I consider that the foundation of this proposal, as stated by the hon'ble mover, is entirely incorrect. He assumes that a great many of the demands covered by certificates are not known to the payees. I assert the contrary. If we go over the list of the dues which can be recovered by certificate procedure. They are all well known; but notwithstanding that, in the majority of cases we issue notices, especially as regards embankment dues. I say that no demand is unknown to those who have to meet them. There is certainly no arrear of revenue or rent due to the Government which is not known to the payee. Then, as regards water-rate, a person who gets his field irrigated must know that he has to pay for the water. In the case of cesses, I am quite aware that there is some hardship, chiefly owing to the number of co-sharers in estates. Then, as to estates under the management of the Court of Wards, as in the case of rents due to the Government, every raiyat knows what he owes, and the amount has been demanded from him over and over again. Then, there are the zamindari dâk cess, famine loans, agricultural loans, land improvement loans, forest dues, and dues under the abkari law. All these are dues which are well known. Every man who takes out a license knows that he has to pay for his license on the first day of every month. I consider that it is entirely exceptional when a man does not know what he owes. On receiving notice of this amendment I called on the Collectors of the districts in which the greatest number of certificates are issued to report in how many cases notices were issued before the issue of certificates."

"I have received telegraphic replies from the Collectors of six of these districts, in which the greatest number of certificates are issued. In Darbhanga, in 145 cases postal notices were issued—all in embankment cess cases; in Midnapore, 3,542 notices were issued; in Burdwan, 21,473; in Gaya, 16 were issued

last year and 7,841 have already issued in the current year; in Cuttack 172, and in Patna 500. These figures show that the orders which have been issued are not a dead letter.

"I turn now to another point. We are asked now to add another stage to the certificate procedure. In other words, we are asked to compel by law Collectors of districts, who are already overburdened with work, to issue as much as 150,000 notices year by year, or in other words, we ask them here to do about 150 times more work they have to do at present. It is very easy for us here to add to the burdens of Collectors of districts, but I know that they have an almost intolerable amount of work to go through, and what is now proposed to be added is, I submit, another piece of useless routine. The hon'ble mover has stated that these notices have been largely responded to. I take the figures of last year's certificate returns. I find that in 44,827 cases, which is about one-third of the 143,886 certificates issued, men paid up on the issue of the first notice. Is it probable that more men would have paid on receipt of a post-card than upon receipt of notices which bind their property? I say that the utmost which will be gained will be as much as is now gained under the notices at present issued, that is to say, about one-third of the debtors will pay up. If this amendment is adopted, our Collectors and their offices, already overburdened with work, will be unable to cope with the large increase. Another point is that the notices now issued under the law bind the whole of a man's property, but the notices now proposed to be issued would bind nothing, but would afford a man the opportunity of disposing of his property, and thus diminish the collection of the Government dues. This is a point which should be taken into consideration before disposing of this motion. And, further, if this motion is adopted, you will throw the cost of these notices on the debtors. At present the notices which are given under executive order are given free of cost; but if this amendment is passed, you will throw the cost of these notices on the debtors, and thus add to the amounts they will have to pay. I maintain that as far as I have been able to look up the records of the last 15 years, there has been no public demand for these notices, and I fail to see that any intimation of the nature proposed is necessary."

The Hon'ble Mr. R. C. DUTT in reply said:—"A suggestion has been made that the addressees will refuse to sign the receipt; but all that will be necessary on my wording of the amendment will be to prove the sending of the notices by production of the Post Office receipt. It has been said by the Hon'ble Mr. LYALL that defaulters do know the amounts due by them. I have no doubt that they do know this in regard to the dues to which he referred; but as regards road-cess dues, I believe I am correct in saying that in the case of a large number of petty holders, they do not remember that a small amount is due from them by a certain date. In the Hooghly district we have over 10,000 petty tenure-holders, the annual value of whose holdings ranges from Rs. 16 to Rs. 40 per annum, and the road and public works cesses due from these ranges from one Rupee to Rs. 2-8. That is a small amount due once a year, and it is possible they may forget to pay it. Under the present procedure they have not only to pay that amount, but a great deal more in the way of costs, and it is to avoid this that I suggest that post-cards may be sent beforehand. The fact that they have taken heed of such notices in many instances shows that it is not an inefficacious mode of recovery. With the permission of the President I will read to the Council a note on this subject which I made in the course of a recent inspection in Burdwan. I there said:—

'Before sending requisitions for certificates, the Road Cess Deputy Collector sends post-card warnings to the defaulters in every case, under Rule 21, section III of the Board's Certificate Manual, and the result is that many defaulters remit the money,—with one pice additional, being the value of the post-card,—by money order, and the issue of a certificate becomes unnecessary. I am glad to find that in October last, road cess was voluntarily paid by 853 persons on receipt of these post-cards; in January, such payments were made by 77 persons, and in the current month by 189 persons. The Deputy Collector has thus avoided having recourse to the cumbrous and harassing certificate procedure in 1,119 cases, within this half year by the issue of post-cards.'

"I gather from the remarks which have been made by the hon'ble member in charge of the Bill, and by the Hon'ble Mr. COTTON that they are not

unwilling to accept the amendment, but they would rather have it in the shape of an executive order. If that be so, I shall have no objection to withdraw this amendment on an assurance being given on the part of the Government that they will issue such an order."

The Hon'ble THE PRESIDENT said:—"I must complement the hon'ble member on the excellent way in which he put his case, and I think the Council may be congratulated in having an official in their midst, who has been practically engaged in carrying out the work of this particular Act, and who has given a sympathetic and intelligent consideration to the matter. I do not think, after what he has already stated, that there is considerable difference between the views he holds and those of the Government; and though on the part of the Government I agree with the hon'ble member in charge of the Bill that this amendment, as a motion, should be opposed, yet I am prepared to meet the hon'ble member a long way and to undertake the issue of executive orders that Post Office notices should be sent, though not, I think, in all cases. I will ask the hon'ble member to have confidence in the executive Government, and give them time to consider the matter with a little more leisure. I think such notices will be of no use in cases of *khas mahals* and Wards' estates. There we have establishments, the members of which go round to every village to collect the dues, and it is only when they fail to collect that they send in requisitions for the issue of certificates. In these cases the parties cannot be ignorant of their liabilities. On the other hand, it would be extremely useful to extend the present orders to all road-cess cases, embankment cess cases, and *dâk* cess cases—in fact, to all those cases in which a current demand exists, and it is possible that the debtor might forget, and would pay it if he had a reminder. But I think that what has been said by the Hon'ble Mr. Cotton and by the hon'ble member in charge of the Bill has forcibly shown that we should incur some danger by embodying the proposed provision into the law, and I accept with pleasure the proposal of the hon'ble mover of the amendment to withdraw the motion on the receipt of this promise and the assurance of the Government which I have given."

The Motion was then, by leave, withdrawn.

The Hon'ble Mr. GHOSE, by leave of the Council, withdrew the motion of which he had given notice that, for section 10, the following section be substituted:—

'Before a certificate is filed in the office of a Certificate Officer under the provisions of sections five, seven or nine, such Certificate Officer shall issue to the debtor a notice in Form No. 4 in the Schedule hereto annexed, calling upon him either to pay the amount claimed from him, or to show cause within thirty days from the date of service of such notice why a certificate should not be filed against him.'

The Hon'ble Mr. GHOSE, by leave of the Council, also withdrew the motion of which he had given notice that Form No. 4 in the Schedule and the sections relating to appeals be amended accordingly.

The Hon'ble Mr. R. C. DUTT moved that the proviso to sub-section (2) of section 12 be omitted. He said:—

"This is a new provision which has no place in the existing Act, and the operation of this provision is likely to be attended with a great deal of hardship to judgment-debtors. It requires that before a judgment-debtor can file his objection, he may be called upon to pay the full amount which is alleged to be due from him. I do not think there is any real necessity for this provision, and I think the working of it is likely to be attended with a great deal of hardship. I will state a recent instance which will show that the operation of this provision is likely to choke off reasonable objections and compel people to go to the Civil Court. Many villages in the Burdwan and Hooghly districts are irrigated by water from the Eden Canal, for which the Government realises a moderate water-rate. It is impossible for the Government to accept a contract from every particular villager whose fields are irrigated, and therefore one or two leading men in every village come forward for the

whole of the villagers and undertake to pay for all the villagers whose fields are irrigated. Either last year or the year before, a man who agreed on behalf of all the villagers to pay a large sum of money did not pay in advance, and the Engineer stopped the irrigation of that village altogether, and then sent a requisition for the collection of the rate for water which was not supplied. The man said he had been sufficiently punished by not getting water; why should he pay the water-rate over and above that. A case like this ought to be fairly gone into, but this new proviso may compel such a man to pay the whole of the money down before he can raise such an objection. This man had undertaken to pay for a number of co-villagers, and it would be impossible for him to get the money from his co-villagers who had not got the water, and he to pay it within 15 days. The new proviso is likely therefore to be attended with a great deal of hardship, and it is not practically necessary. Under the present Act we are succeeding in getting money from all defaulters who have money to pay, but if this new provision is enacted, it is likely to be very harsh in its operation."

The Hon'ble MR. BUCKLAND said:—"I do not know whether the hon'ble member who moves this amendment has noticed that it is not meant to be a compulsory provision, and the wording makes that very clear. In the case to which he referred I cannot imagine it possible that a deposit of the full amount would be demanded. But there may be cases in which a merely frivolous petition is put in to gain time, and in a case of that sort the Select Committee were of opinion that some reasonable course of action should be open to the Certificate Officer with the view of preventing the certificate procedure being practically laughed at. We have therefore provided that if the Certificate Officer sees fit he may call upon the judgment-debtor to deposit the amount, but not when the petition alleges payment in full, as the petition has to be verified in a special way and the verifier renders himself liable to very serious pains and penalties if he makes a false verification. Therefore, in that particular case we do not require the Certificate Officer to act on this provision, but we think it sufficient for the Certificate Officer to possess this power with a view to prevent the filing of frivolous objections. I cannot, however, suppose that it will often lead to such hardships as occurred in the unique case which the hon'ble member has just mentioned. Therefore I think we ought to take this power in the Act, although it may not be necessary to often use it."

The Hon'ble MR. R. C. DUTT in reply said:—"The hon'ble member thinks it is not likely that the Certificate Officer will use this power in cases of the nature to which I have just referred. We should, however, remember that the Certificate Officer is responsible for the collections, and that he is naturally inclined to look to the collections first, and to leave other questions for consideration later on; he may, therefore, be tempted to ask the man to pay the amount before he will listen to the objection. It is better, therefore, to omit this proviso, and, as I have said, under the present Act we do not feel any inconvenience."

The Hon'ble MR. LYALL said:—"I wish, with your Honour's permission, to say a word in regard to the slur which the hon'ble mover of the amendment has cast upon the officers who are working the Certificate Act. I have found those officers do their duty strictly and in a straightforward way, and I should be wrong to pass over such an imputation as has been cast upon them by the hon'ble member."

The Hon'ble MR. R. C. DUTT explained:—"I certainly had not the least intention to cast any slur upon these gentlemen. I only said that an officer whose duty it is to collect is naturally inclined to look to the collections first. I have the highest respect for the class of Deputy Collectors from among whom Certificate Officers are appointed, and many of them are my personal friends, and I certainly never meant to cast any slur or imputation upon them."

The Hon'ble THE PRESIDENT said:—"The proviso which it is proposed to omit was suggested to us by the High Court, but I cannot say that I feel very strongly about it, and what has fallen from the hon'ble mover of the amendment shows

that there is just a possibility of hardship attending its operation. I am sure, however, that the hon'ble member did not mean to cast any aspersions upon the officers who will have to exercise the proposed power. The Government would wish in respect of this amendment to be guided by the feeling of the majority of the Council."

The Motion being put, the Council divided :—

*Ayes 7.*  
 The Hon'ble Maulvi Muhammad Yusuf Khan Bahadur.  
 The Hon'ble Maulvi Serajul Islam Khan Bahadur.  
 The Hon'ble Mr. Ghore.  
 The Hon'ble Babu Surendranath Banerjee.  
 The Hon'ble Mr. Dutt.  
 The Hon'ble Mr. Collier.  
 The Hon'ble Maulvi Abdul Jubbar Khan Bahadur.

*Noes 6.*  
 The Hon'ble Mr. Wilkins.  
 The Hon'ble Mr. Buckland.  
 The Hon'ble Mr. Bourdillon.  
 The Hon'ble Mr. Lyall.  
 The Hon'ble Sir John Lambert.  
 The Hon'ble Sir Charles Paul.

So the Motion was carried.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the motion of which he had given notice that in line 3 of the proviso to section 12, after the words "alleged in the petition" the words "or when he is satisfied that the objection is made in good faith" be inserted.

The Hon'ble Mr. R. C. DUTT moved that the proviso to sub-section (2) of section 13 be omitted. He said :—

"This proviso enables the Collector to suspend proceedings for six months in cases of doubt. My only reason for proposing its omission is, that the proviso seems to me to be very vague. It does not lay down any special procedure, and it is not quite clear what is to be done after the proceedings before the Collector are suspended for six months. I may point out that there is a parallel provision in the Land Registration Act, to the effect that when a Collector has any doubt as regards a point of law, he may suspend his orders and refer the issues for the decision of the Judge, and then, on receiving the decision of the Judge, he may proceed accordingly. I do not find that such a provision has been made in this Bill, nor is there anything to show the intention of this proviso. Is it intended that the judgment-debtor should go to the Civil Court and prove a negative, namely, that nothing is due from him, or is it intended that the Collector should go to the Civil Court and find out whether any claim can be legally made or not? If, on the other hand, it is proposed to make provision like that in the Land Registration Act, I shall be very glad to accept it."

The Hon'ble Mr. BUCKLAND said :—"The form which this proviso should take was a matter of considerable discussion in Select Committee. We at one time thought of adopting almost exactly the words of section 55 of the Land Registration Act, that the Collector should refer the petition to the Civil Court. We discussed all the alternatives, but for some reasons we thought it better to adopt the present language. The Collector may refer the petitioner to the Civil Court, but the man may not go; so we thought the best form of provision to adopt was that the Certificate Officer should suspend proceedings, and that will give the petitioner the opportunity of considering the situation and going to the Civil Court during the six months. If the judgment-debtor does not go to the Civil Court during that time, then the certificate will become absolute. I am not particularly enamoured with the wording of the proviso, and if something better is suggested, I shall be happy to accept it; but I will repeat that, with section 55 of the Land Registration Act before us, we deliberately adopted these words as being the best under the circumstances."

The Hon'ble Mr. LYALL said :—"I desire to add a word or two in explanation of the reason which influenced me as a member of the Select Committee in leaving the proviso as it is. Both the hon'ble speakers have referred to

section 55 of the Land Registration Act. Under that Act a case is referred for the decision of the Civil Court, but under the Certificate Act there is no case to refer. We also had section 24 of the Partition Act before us, and under that section the proceedings are simply hung up for a certain time. All that we provide in the Bill is that the Collector, if he considers a case is a fit one for the decision of the Civil Court, shall hang up the proceedings and allow the parties to take it to the Civil Court, and himself go on with the proceedings under section 16 after that time lapses."

The Hon'ble Mr. GHOSE said:—"It seems to me that the last suggestion made by the hon'ble member in charge of the Bill will meet the requirements of the case. The mere omission of the proviso will not attain the object which my hon'ble friend, the mover of the amendment, has in view. The proviso in the Bill is so worded that it makes no provision for the reference of the petition to the Civil Court. In the Report of the Select Committee this matter is put thus:—

'The idea of referring hard cases to a Civil Court, which found place in the proviso to section 13, sub-section (2) of the original Bill, has been maintained in the corresponding provision of this Bill, but it is considered necessary to limit to six months the period within which the opportunity of bringing a suit may be taken.'

"The proviso does not say that a reference is to be made to the Civil Court, but the idea was that such a reference should be made in any case which, in the opinion of the Collector, is a fit case for the decision of the Civil Court. I cannot see any objection to say that the Collector when he thinks fit may refer a case to the Civil Court."

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, said:—"I think this is a very wholesome provision, and that it ought to be retained. The reasons urged by the hon'ble mover of the amendment do not point to the omission of the proviso but to an alteration of its wording. If section 55 of the Land Registration Act can be made applicable, then the Collector would have power to refer the matter to the Civil Court. The existence of this proviso in the Bill will show that the hon'ble member in charge of the Bill is anxious to give the judgment-debtor every opportunity to show that he is not liable to the payment demanded from him."

The Motion was put and negatived.

The Hon'ble BABU SURENDRANATH BANERJEE moved that in line 5 of section 15, the words "from the date of the determination of the objection" to the end of the sentence be omitted, and that in their place the following be substituted:—

'from the service upon him of notice under section ten, or, if he files a petition of objection under section twelve, from the date of the determination thereof, or, if he appeals under section eighteen, from the date of the decision of such appeal, bring a suit in the Civil Court to have the said certificate cancelled or modified on the ground that the arrears stated therein were not due by him.'

He said:—"There are two classes of judgment-debtors referred to in this Bill—one mentioned in section 6, the other in section 8. Section 6 of the Bill lays down the conditions as regards time within which a judgment-debtor may bring a suit in the Civil Court to contest the certificate. Section 15 does the same as regards judgment-debtors mentioned in section 8. But the conditions are not the same. There is an important omission in section 15 of the Bill, which does not occur in section 6. Under section 6 a judgment-debtor may bring a suit to contest a certificate in a Civil Court within six months from the service of notice, or from the determination of the objection or the decision of the appeal by the revenue authorities. Under section 15, he may bring a suit within six months from the determination of the objection. What if six months elapse before the determination of the objection by the revenue authorities? Then he loses his right of contesting the certificate in a Civil Court. The object of this amendment is to place both classes of judgment-debtors as regards the time within which they are to bring a suit in the Civil Court on the same footing, so that section 15 may follow the lines of section 6. I hope the hon'ble member in charge of the Bill will see his way to accept this amendment."

The Hon'ble Mr. BUSKLAND said:—"I am prepared to accept the greater part of the hon'ble gentleman's amendment, the object of which, as he rightly said, is to bring the sections 15 and 6 into harmony. On looking over the sections more carefully, I am not quite sure if I can accept the whole of the amendment. The last few words say, that a suit may be brought in the Civil Court to have the certificate cancelled or modified on the ground that the arrears stated therein were not due by him. Section 17 goes on to state the grounds upon which certificates can be cancelled or modified. I quite see that in section 6 (2) we have left in these words, but I am inclined to think that they ought to come out of section 6 (2) and not be inserted in section 15 as proposed by the hon'ble mover of the amendment. I think it will be bad drafting to adopt in other sections a different wording suggesting the possibility of other grounds on which a certificate may be cancelled or modified. There is also another point to which I should refer. The amendment refers to appeals under section 18, but it should be section 19."

The Motion was put to the vote and agreed to in the following amended form:—

That in line 5 of section 15, the words "from the date of the determination of the objection" to the end of the sentence, be omitted, and that in their place the following be substituted:—

'from the service upon him of notice under section ten, or if he files a petition of objection under section twelve, from the date of the determination thereof, or if he appeals under section nineteen, from the date of the decision of such appeal, bring a suit in the Civil Court to have the said certificate cancelled or modified.'

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the following be added after clause (b) of section 17:—

'That in the case of fines imposed, or costs, charges, expenses, damages, duties, or fees adjudged by a Collector or a public officer under the provisions of any Regulation or Act for the time being in force, the proceedings of such Collector or public officer were not in substantial conformity with the provisions of such Regulation or Act, and that in consequence the judgment-debtor under the certificate suffered substantial injury from some error, defect, or irregularity in such proceedings.'

He said:—"Section 17 states the grounds upon which certificates may be cancelled or modified. Commenting upon this section in the present law, the Select Committee observe that they have amplified its spirit. My amendment follows the spirit of the modification recognized by the Select Committee. What I contend for is, that the certificate should be cancelled when there have been grave irregularities on the part of the Certificate Officer, attended with substantial injury to the party concerned. This is the existing law. I do not ask for the creation of technical difficulties in the way of the Certificate Officer, nor do I wish that the judgment-debtor should obtain any technical advantage, but what I venture to urge is, and I am perfectly certain that the Council will agree with me, that where there has been any grave irregularity on the part of the Certificate Officer, and the judgment-debtor has suffered any substantial injury therefrom, he should have some remedy. It cannot be the intention of the Government that irregularities of this kind entailing serious hardship or even loss should hold good in law, and I am sure the principle will commend itself to the Council."

The Hon'ble Mr. BUSKLAND said:—"I am afraid I cannot promise to meet the hon'ble member quite so readily in regard to this amendment as I did on the last occasion. He asks us to restore a section of the existing Act, which has been deliberately cut out, more in deference to the opinion of the High Court than that of any other authority who has reported upon the Bill. The opinion of the High Court was that directly after a certificate has been filed the Civil Court should intervene to enforce it. I wish to bring this clearly to the notice of the Council and that they will bear it in mind. They say:—

'If the intervention of the Civil Court be thus made before and not after the certificate is enforced, there would seem to the Judges to be no reason for setting aside the certificate on the ground of any irregularity; for if any irregularity has occurred of such a kind as to place the judgment-debtor at a disadvantage, the remedy would naturally be to delay the execution for a reasonable time.'

"We do not propose on behalf of Government to allow the Civil Court to undertake the execution of the certificate. We have always been of opinion that the Revenue Courts are just as capable as the Civil Courts to execute decrees; therefore we have accepted the principle of the High Court's suggestion that a certificate should not be set aside on the ground of irregularity, and we consider that the Revenue Courts will take as much care in the enforcement of decrees as the Civil Courts do. When we addressed the Government of India on the 29th May, 1893, on the subject of this Bill, we stated that we could not accept the High Court's suggestion, that execution should be carried out by the Civil Court, but we went on to say that:—

'The rest of the suggestions made by the High Court under this head appears to the Lieutenant-Governor to be eminently wise and sound. He further concurs in their objection to the double series of litigation which is now open to parties—one before the Revenue Authorities and another before the Civil Courts; and he adopts their view that there should be no setting aside of the certificate after it has been carried into effect, on the ground of irregularity, and that no objection should be taken on the ground of jurisdiction. No suit should be allowed to lie for the purpose of questioning the certificate or invalidating the sale thereunder. It is true that the Hon'ble Judges recommend this course only on condition that the execution case should be transferred, as above explained, to the Civil Courts; but Sir Charles Elliott submits that the same arguments apply to the present system, so long as the procedure in the Revenue Courts is as careful and accurate as that of any Civil Court, and follows the same procedure.'

"The proposal of the Bill is, that all these matters connected with the issue of certificates should be dealt with by the Revenue Courts who are perfectly competent to examine these questions thoroughly and carefully. There will be an appeal to the Collector, or to the Commissioner from original orders of the Collector, and there will be the revisional power of the Commissioner to ensure perfect regularity with regard to the issue of certificates. Therefore we propose that in section 17 the grounds for cancelling or modifying certificates which will be open to the Civil Court should be confined to the grounds of previous payment or non-indebtedness. The use of the little word 'duly' in the beginning of the section will enable any Court to interfere if there has been any substantial irregularity. The section provides that no certificate duly made shall be cancelled, &c. If there has been any substantial irregularities in the making of a certificate, it can hardly be said to have been duly made, and if it has not been 'duly' made, it will be liable to cancellation or modification. There is of course the section in the Code of Civil Procedure which admits of a sale under a certificate being set aside on the ground of material irregularity in publication, but that refers to sales. We are dealing now with the question of cancellation or modification of a certificate, and we say that we have made sufficient provision to prevent any injustice or harm being done to the judgment-debtor when we provide that questions of irregularity should be considered by the Revenue Courts, the plea of non-indebtedness being dealt with by the Civil Court. I am therefore unable to accept this amendment."

The Hon'ble Mr. GHOSE said:—"I desire to point out that the suggestion of the High Court in regard to this matter is conditional on the Civil Court being allowed to intervene in the first instance."

The Motion being put, the Council divided:—

*Ayes 9.*

The Hon'ble Maulvi Muhammad Yusuf  
Khan Bahadur.  
The Hon'ble Mr. Womack.  
The Hon'ble Maulvi Scrajul Islam  
Khan Bahadur.  
The Hon'ble Mr. Ghose.  
The Hon'ble Babu Surendranath  
Banerjee.  
The Hon'ble Mr. Dutt.  
The Hon'ble Maulvi Abdul Jubbar  
Khan Bahadur.  
The Hon'ble Mr. Boudillon.  
The Hon'ble Sir John Lambert.

*Noes 5.*

The Hon'ble Mr. Wilkins.  
The Hon'ble Mr. Buckland.  
The Hon'ble Mr. Collier.  
The Hon'ble Mr. Lyall.  
The Hon'ble Sir Charles Paul.

So the Motion was carried.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the following be added to section 17 and marked clause (d):—

Want of jurisdiction.

He said:—"I move that section 17 be so modified that a certificate may be cancelled if it is made by an officer without jurisdiction. A certificate made without jurisdiction is really a certificate not 'duly' made: it is carelessly and perfunctorily made, and is therefore liable to be attended with hardship and injustice to the judgment-debtor."

The Hon'ble MR. BUCKLAND said:—"This provision was struck out of the law on the suggestion of the High Court. In making the remarks I made just now, I particularly drew attention to the fact that the High Court had coupled their suggestion about certificates irregularly made with a condition, and that we proposed to omit the condition while preserving their suggestion. I say this by way of explanation, because the Hon'ble Mr. GHOSE appeared to think that I had not borne that point in mind, but in regard to this particular suggestion of the High Court, I may observe that they say nothing about the intervention of the Civil Court. They remark as to this point:—

'Nor would the Judges allow any objection to be taken on the ground of jurisdiction. They do not see why a debtor to the Crown should be permitted to raise questions, often very difficult to solve, as to the boundaries between administrative districts; and they would therefore limit his right strictly to disputing his indebtedness. If this system were adopted no subsequent suit should be allowed to lie for the purpose of questioning the certificate or invalidating the sale thereunder by reason of one or the other not being warranted by the Act.'

"That is quite a different matter to the question of jurisdiction which the hon'ble mover of the amendment has in view. 'Want of jurisdiction' is a comprehensive term which may include several things, but I understand that the High Court mean that if a certificate is 'duly' made, this plea of 'want of jurisdiction' should not be allowed to be urged, and there I intended to leave it."

The Hon'ble MR. WILKINS said:—"I think the High Court may have referred solely to territorial jurisdiction, not to the jurisdiction of an officer who has no power. I find it has been ruled by the High Court that the procedure laid down by Act VII (B.C.) of 1880 must be very strictly followed, and therefore it is absolutely incumbent on the Court, in criticising the validity of a sale, to insist upon compliance with formalities, and one of the formalities is, that the officer has power to do certain acts which justify him in issuing a certificate. A certificate not 'duly' made is not only liable to be set aside, but is absolutely void, and the Hon'ble Judges are supported in that view by a decision of the Privy Council. Therefore a certificate issued by an officer who has no power to issue it is absolutely null and void, and we do not want this clause regarding want of jurisdiction."

The Hon'ble SIR CHARLES PAUL said:—"To insert the words 'want of jurisdiction' will be to have a contradiction of terms. How can a certificate be made if there is no jurisdiction? Every certificate 'duly' made is made with jurisdiction: if it is not made with jurisdiction, it is not 'duly' made."

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, said:—"With great respect to the learned Advocate-General, I will point out that the words of the original Act are [section 8 (b)]: 'Provided that no certificate duly made under the provisions of this Act shall be cancelled by the Civil Court otherwise than under one or more of the following grounds', and one of those grounds is 'want of jurisdiction.' As the learned Legal Remembrancer said, 'want of jurisdiction' will no doubt make everything null and void, and it may not be necessary to mention this particular ground in the Act, but the difficulty is that this is one of the grounds specified in the original Act, and the omission of these words may create a difficulty."

The Hon'ble MR. LYALL said:—"As a member of the Select Committee I desire to state that I agreed to the omission of these words solely on the ground of tautology. We have the words 'duly made,' and we do not require the same thing stated again."

The Hon'ble BABU SURENDRANATH BANERJEE in reply said:—"If these words are omitted from the law now, the inference will be irresistible that want of jurisdiction is not one of the grounds on which a certificate can be cancelled. If, under the present Bill, a certificate made without jurisdiction must necessarily be cancelled as a certificate not duly made, I have nothing further to say; but it has been pointed out that there would be a difficulty unless 'want of jurisdiction' was specifically stated as one of the grounds which would make a certificate null and void."

The Hon'ble THE PRESIDENT said:—"I think this motion stands in a very different position from the amendment which the Council has just accepted. There it would have been possible that grave and substantial injury might have been suffered; here we have only the removal from the mouth of the objector of a technical objection. No real injury will be suffered by the judgment-debtor, but he will have this technical advantage which I do not think he should have."

The Motion was put and negatived.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, moved that in line 1 of sub-section (1) of section 19, after the words "an appeal from any order" the word "whatsoever" be inserted. He said:—

"I am not sure that I am happy in the wording of my amendment. My object is to make the law self-contained, as the hon'ble mover of the Bill himself desires. If that is our object, then section 19 ought to provide for appeals against orders of every kind. It has been decided by the Board of Revenue and by the High Court that the words 'any order' in section 16 of the present Act refer to orders under the preceding sections—appeals against orders passed upon a petition filed under section 12—and that it gives no jurisdiction as regards proceedings under section 19. That being so, the words 'an appeal from any order' will not cover an appeal against an order of sale. We are in this position that this section does not give a right of appeal against an order of sale; therefore I submit that some words should be added which will provide a right of appeal against an order of sale."

The Hon'ble MR. BUCKLAND said:—"It is simply a question of language whether the words 'any order' meant any order or not. I should have thought that 'any order' ought to be sufficient. I cannot find any difference between 'any order' and 'any order whatsoever.'"

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, in reply said:—"I will refer the hon'ble member to the Resolution of the Board of Revenue. Section 16 of the present Act is the same as section 19 of this Bill, the only difference being that an appeal from an original order of the Collector should be presented to the Commissioner within thirty days. But the true meaning of the section is to be ascertained by comparing it with the section of the old law which it superseded, namely section 23 of Act VII of 1868. The place of the section in the Act shows clearly that the appeals referred to there are appeals against orders passed on petitions filed under section 12, and that section 16 gives no jurisdiction as regards proceedings under section 19; so that a doubt is thrown as to whether the words 'an appeal from any order' refer to orders directing sales."

The Hon'ble MR. LYALL said:—"I venture to think that there is no real difference between the hon'ble member and the Select Committee. I fancy it is not his wish that every *ad-interim* order given by a Deputy Collector, in the course of granting a certificate, should be appealable: that no one can desire; but all the hon'ble member wishes is, that the provision should be so drafted that there shall be an appeal against orders of sale. I submit that there is no objection to that, and that it is only a question of drafting."

The Hon'ble THE PRESIDENT said:—"I understand the Hon'ble the Advocate-General's opinion to be that the addition of the word 'whatsoever' will not affect the question at all; that nothing will be gained by so doing, and that the words 'any order' necessarily include orders of sale or attachment, or order for imprisonment, or any order that may be passed."

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, in conclusion said :—  
 “My object has been very correctly explained by the Hon'ble Mr. LYALL, namely, to give an appeal against an order of sale. If the language of the Bill gives a right of appeal in the case of orders of sale, I am willing to withdraw the motion.”

The Motion was then, by leave, withdrawn.

The Hon'ble Mr. R. C. DUTT moved that in sub-section (1) of section 19 for “15 days” the words “thirty days” be substituted. He said :—

“This is a re-enactment of section 16 of the Act, which allows an appeal from the Deputy Collector to the Divisional Commissioner. It has been thought necessary to make these orders appealable to the District Collector. I do not think that will make any difference in the working of the Act. Section 16 allowed thirty days to the judgment-debtor to prefer an appeal, but that has been cut down to fifteen days, presumably because the appeal now lies to the Collector and not to the Commissioner. That will make no difference to the judgment-debtor, because appeals made to the Commissioner from districts other than the Commissioner's head-quarters are made through the Post Office; so that an appeal to the Commissioner really does not require more time than an appeal to the Collector, and I do not see why the time should be reduced in the case of an appeal to the Collector.”

The Hon'ble Mr. BUCKLAND said :—“I am afraid the hon'ble member who moved this amendment can hardly have made a careful reference to the original Act. If he compares it with section 19 (1)(a), he will see that appeals from the officers named may be preferred to the District Collector within fifteen days. Then the section goes on to say that appeals from a District Collector's original order may be made within thirty days. I think the hon'ble gentleman is labouring under some mistake. I am not aware of any necessity for altering the existing law with regard to the number of days allowed for appeals.”

The Hon'ble Mr. LYALL said :—“On receiving notice of this amendment I looked up the time allowed in similar cases. I find that the general rule (Board's Rules, page 118) provides a period of fifteen days where the period is not regulated by law. Then, looking into certain enactments, I find that under the Land Registration Act (section 85) the period is fifteen days; in the Agrarian Disturbances Act the period is fifteen days; in the Partition Act, when the matter is simply a question of fact, the term is fifteen days, but when a question of law is concerned and the party has to consult his legal advisers, the term is extended to thirty days. In the present case it is well to have a rapid appeal to decide the question whether money is payable or not, and I see no reason for extending the period of appeal from fifteen to thirty days.”

The Hon'ble Mr. R. C. DUTT in reply said :—“I am afraid I did not sufficiently explain myself. Under the existing law, ‘Collector’ means a Deputy Collector in charge of certificate work. That is the definition of ‘Collector.’ Under section 4 of the Act, any Deputy Collector who performs the work of a Certificate Officer is a ‘Collector,’ and appeals from his orders are preferred to the Commissioner within one month. Under the wording of this Bill, the Deputy Collector in charge of certificate work is not a ‘Collector,’ but only a ‘Certificate Officer,’ and the appeal to the District Collector from the Certificate Officer must be made within fifteen days. That will be really tantamount to reducing the time of appeal from the orders of the Certificate Officer from thirty days to fifteen days. I submit that this reduction of time should not be allowed, and that this amendment should be accepted.”

The Hon'ble THE PRESIDENT said :—“I think it must be admitted that although there has been a change in the name of the Certificate Officer, the person who will be the Certificate Officer will be the same as at present. An appeal within the district is to be made within fifteen days; an appeal to the Commissioner outside the district is to be made within thirty days. In that respect no change has been made.”

The Motion was put and negatived.

The Hon'ble BABU SURENDRANATH BANERJEE moved that in clause (b) of sub-section (1) of section 19, the word "original" be omitted. He said:—

"The object of this amendment is to give a right of appeal from orders passed by the Collector as an Appellate Court to the Commissioner of the Division. Under the Bill, only original orders passed by the Collector are appealable. I want to give the judgment-debtor double protection—first by allowing him a right of appeal from the Certificate Officer to the Collector, and then an appeal from the Collector to the Commissioner of the Division. I think he enjoys that privilege now, and no case has been made out for depriving him of it."

The Hon'ble MR. BUCKLAND said:—"I must oppose this motion. There will be ample provision for the prevention of injustice if one appeal from the orders of a Certificate Officer is allowed to the District Collector, and a revisional power is vested in the Commissioner, with a right of appeal from the original order of a District Collector to the Commissioner. The matter has been carefully thought out, and it is considered most desirable that such cases should be brought to a conclusion, and that when opportunity for one appeal is given, there should be an end of it. The idea of allowing two appeals should not be encouraged by the Legislature. It is not that I wish in the least to prevent people from getting their rights, but when a man has had an appeal and can move the Commissioner for a revision, I think he has had ample opportunity for getting justice done to him. I think it would do more harm than good to multiply opportunities for appeal. If I thought there would be a greater chance of justice being done, no one would be more ready than myself to accept this amendment, but I think the judgment-debtor is sufficiently protected by one appeal to the Collector and the revisional power of the Commissioner. He has also power to file a suit in the Civil Court."

The Hon'ble BABU SURENDRANATH BANERJEE in reply said:—"I am not convinced. Opportunities for appeal mean so many safeguards. I am not in favour of multiplying appeals; but as this privilege is one that I understand is allowed under the existing law it appears to me that no case has been made out for withdrawing it."

The Hon'ble THE PRESIDENT said:—"I think the hon'ble member is making a mistake. Under section 19 of the existing law no appeal is allowed as a matter of right from the Collector in appeal, and we are maintaining the existing state of things."

The Motion was, by leave, withdrawn.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, by leave of the Council, withdrew the motion of which he had given notice, that the following proviso be added after sub-section (1) of section 19:—

'Provided that in either case the time requisite for obtaining a copy of the order shall be excluded.'

The Hon'ble MR. R. C. DUTT, by leave of the Council, withdrew the motion of which he had given notice, that sub-section (2) of section 19 be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the motion of which he had given notice, that in line 1 of section 20, for the words "no appeal as of right" the words "an appeal to the Commissioner of the Division" be substituted, and that the concluding words of the section, commencing with the words "but the Commissioner may" to the end of the sentence, be omitted.

The Hon'ble MR. GHOSE moved that at the end of sub-section (2) of section 19, the words "other than the officer against whose order such appeal is preferred" be added.

The Motion was put and agreed to,

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, moved that in subsection (1) of section 21, for the words "section eight" the words "this Act or any person claiming through him" be substituted.

The Hon'ble THE PRESIDENT said :—"Perhaps it will save time if I explain that the substitution of the words 'this Act' for 'section eight' is accepted by the Government. We have some doubt as to the utility of the words 'or any person claiming through him.'"

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, continued :—"The necessity for this amendment has arisen in consequence of a Full Bench ruling of the High Court concerning section 174 of the Tenancy Act, that the words 'judgment-debtor' mean judgment-debtor alone, and do not include an assignee or transferee. Therefore I wish to provide that either the judgment-debtor or his transferee or his heir should have the privilege of depositing the money, that is to say, that the privilege should extend to the judgment-debtor or his representatives."

The Hon'ble SIR CHARLES PAUL said :—"I think that, under these circumstances, the amendment should be accepted."

The Motion was put and agreed to.

The Hon'ble MR. R. C. DUTT moved that in section 22, the words beginning with "with interest" and ending with "and costs" be omitted. He said :—

"There has been some correspondence on this subject. The Legal Remembrancer was referred to, and he gave his opinion that interest falling due after a certificate is made cannot be included in it, and therefore the necessity arises of making a fresh certificate. I think the object of this provision is to avoid the making of a fresh certificate and to enable us to realize the amount due under a certificate with interest up to the date of realization. The difficulty is that when we make a certificate, we do not know when the money will be realised. It may take six months, it may take only one month. When the peon goes to the spot and the man pays the money, who is to calculate the amount of interest due up to that date and how is it to be realised? On enquiry I find that at present interest for small periods is not realised. If the money is paid within a month or two, we do not charge interest; but when the period extends over a year, a fresh certificate for the interest may be filed. But this section authorises the realization of any interest which may fall due between the date of the certificate and the date of the recovery of the money."

The Hon'ble MR. BUCKLAND said :—"The point of the objection raised by the hon'ble member is as to the calculation of interest up to the date of realization. I am quite willing to accept any form of words which will require the interest which has accrued to be specified in the certificate. I would certainly not leave it to be calculated by the peon from the date of the issue of the certificate up to the date of realization."

The Hon'ble MR. LYALL said :—"I think the object of the alteration proposed in this section has not been understood by the hon'ble mover of the amendment. He has quoted the opinion of the Legal Remembrancer. The change now proposed was made at the instance of the Board of Revenue in the interest of debtors in consequence of the opinion quoted. It seemed to the Board quite unnecessary to saddle debtors with the cost of two certificates when it is so easy in cases of delay in realisation to include the interest in the original certificate. It was never intended to allow a peon to realize interest up to the date of payment. All that was intended was that any sum entered in the certificate as interest and costs should be realized. That is the object of the alteration, but if the object has not been properly expressed, this wording of the section be amended. There is no reason why the Government should lose interest when it is due. At the same time it is hard that on account of interest a man should have to pay the whole cost of a second certificate."

The Hon'ble THE PRESIDENT said :—"Perhaps the hon'ble member's object will be met if we undertake to issue orders confining the charging of interest to some considerable period of time, say six months. At present first a notice is served, then follows attachment and sale; when property is sold the nazir calculates the interest and realizes it from the proceeds. I think the hon'ble member's object will be satisfied if the Board will issue orders carrying out the idea he has in view."

The Motion was then, by leave, withdrawn.

The Hon'ble MR. BUCKLAND moved that in sub-section (2) of section 23, for the words "Chapters XIX and XX" the words "Chapter XIX (with the exception of section 310A) and Chapter XX" be substituted. He said:—

"I made some remarks on this subject this morning, and there is not much left to say. Section 310A was passed last year as an addition to the Code of Civil Procedure. It provides for an application by the judgment-debtor to set aside the sale on deposit of the debt, and the Council will find that section 21 of this Bill is very much on the same lines as section 310A, though it varies in some small details. We cannot have two sections of very much the same character on very much the same subject; we prefer section 21 of our Bill, and therefore we propose to omit section 310A from the incorporation in section 23 of Chapters XIX and XX of the Code of Civil Procedure. As I have already mentioned, it is within the competence of this Council to do this with the sanction of the Governor General previously or subsequently received under section 5 of the Indian Councils Act of 1892. I think this amendment will commend itself to the Council."

The Motion was put and agreed to.

The Hon'ble BARU SURENDRANATH BANERJEE moved that in sub-section (2) of section 23, for the words "to enforce such certificate and realize the amount recoverable thereunder" the following be substituted:—

"for enforcing such certificate and realizing the amount recoverable thereunder, and for setting aside any sale held in the course of such execution proceedings, for such reasons for which execution sales are set aside under the provisions of the Civil Procedure Code."

He said:—"As the Government has already intimated its acceptance of this amendment, it is not necessary for me to say anything in support of it."

The Motion was put and agreed to.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, by leave of the Council, withdrew the motion of which he had given notice, that in sub-section (2) of section 23, for the words "to enforce such certificate and realise the amount recoverable thereunder" the words "in respect to such certificate" be substituted.

The Hon'ble MR. R. C. DUTT moved that the following proviso be added at the end of section 23:—

"Provided that if the amount of which a certificate is made under the provisions of sections five, seven, or nine, or any portion of such amount be not realized within three years from the date of the certificate, the certificate will cease to be in force in respect of such unrealized amount."

He said:—"I admit that this amendment is not very happily worded. I shall therefore ask permission to withdraw it and to give notice of a fresh amendment empowering the District Collector to strike off all certificates which are absolutely hopeless and under which it is not possible to realise any money."

The Hon'ble SIR CHARLES PAUL said:—"I think there is no necessity for this amendment. The Lieutenant-Governor and the Board of Revenue can always give orders for the cancellation of certificates which are unrealizable."

The Hon'ble Mr. R. C. DUTT in reply said:—"The practice is to keep these very old certificates in the Wards' department alive after we are convinced that their enforcement is practically hopeless. This practice only impedes work. I want power to strike off these certificates, even if proceedings in execution have been taken within three years. The difficulty lies in the fact that managers of Wards' estates will not consent to withdraw them. There are outstanding certificates in Burdwan of eight and ten years' standing, and when the estates are made over to their owners, these certificates remain, and owners will not consent to withdraw them."

The Motion was, by leave, withdrawn.

The Hon'ble Mr. GHOSE moved that in section 33, the words between the words "Provided that" and the words "be sent" be omitted, and that the words "whenever the debtor is not personally served the notice shall" be inserted. He said:—

"Practical experience has shown that peons very often do not go anywhere near the place of service, and make absolutely false reports of service. Hon'ble members will, I am sure, agree with me that greater confidence is reposed by the public on postal service than on service by peons. I do not see that there is any question of principle involved in this amendment which should induce the Government to oppose it. If by throwing a little additional work on the Post Office, we can make service more satisfactory, I think the object in view will be secured."

The Hon'ble Mr. BUCKLAND said:—"I made some remarks upon this section in my opening statement, and I do not see any reason to alter what I then said, that in framing this section the Select Committee adopted the very last improvement of the Imperial Legislature, and, until we have some reason to believe that it does not work well, we are very loth to go any further. I think it will be very objectionable to make it compulsory to issue these notices by post; we have therefore made it permissive."

The Hon'ble Mr. WILKINS said:—"I may point out that the mode of service of notice in section 33 is very similar to that for many years observed for service under the Civil Procedure Code, under which, in the case of persons of consideration, the Court may substitute for a summons a letter which may be sent by post or by messenger. This section goes a good deal beyond even the Code, for it empowers the Certificate Officer to send notice by post in any case, and not only when the person to be served with notice is a person of rank. If the order to send a notice by registered letter is made compulsory in every case in which personal service cannot be had, the judgment-debtor has only to refuse to sign the receipt, and then there will be no service at all; and even if the receipt is signed, there must be evidence to show that the judgment-debtor and not somebody else signed his name. There will be no evidence readily available to prove this, and the proviso to section 33 is intended to be made use of only under circumstances similar to those given in section 91 of the Code or in other exceptional cases which may arise; and to such cases it should, in my opinion, be restricted."

The Hon'ble THE PRESIDENT said:—"I think that on the part of the Government I must agree with the view which has been expressed by the hon'ble member in charge of the Bill, that the most recent Act passed by the highest authority should for the present guide our proceedings, and that hereafter, if any defect is found in this mode of service, it will be time to alter it."

The Motion was put and negatived.

The Council adjourned to Saturday, the 9th instant.

CALCUTTA ;  
The 2nd April, 1895.

}

GORDON LEITH,  
Assistant Secretary to the Govt. of Bengal,  
Legislative Department.

## WEATHER AND CROP REPORT.

*For the week ending the 1st April, 1895.*

**Burdwan.**—Rainfall nil. Weather seasonable. *Rabi* harvest nearly completed. Price of common rice varies from 10 to 21 seers per rupee in the district.

**Midnapore.**—Rainfall nil. Weather hot. *Boro* (spring rice) and indigo doing well. Fodder and water sufficient. Common rice sells from 17 to 21 seers per rupee.

**24-Parganas.**—Rainfall nil. Weather seasonable. Prospects good. Condition of cattle good. Fodder and water sufficient. Rice sells at—

				Srs.	Ch.	
Sadar	...	...	...	12	to 13	0
Burasat	...	...	...		16	0
Basirhat	...	...	...		20	0
Diamond Harbour	...	...	...		15	0

} per rupee.

**Murshidabad.**—Rainfall .53. Weather hot. Sowing of til (sesamum) nearly finished. Harvesting of *rabi* crops continues. Indigo and mulberry doing well. Fodder available. Common rice sells at 15 seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *rabi* crops nearly over. Threshing of *aman* going on. *Boro* (spring rice) doing well. Common rice sells at from 18 to 22 seers per rupee. Fodder and water sufficient.

**Dinajpur.**—Rainfall .04. Weather hot, but mornings and evenings still cool. Cultivation of jute and *bhadoi* rice going on. Common rice sells at from 15 to 17 seers per rupee. No outbreak of cattle-disease, nor any complaint for fodder and drinking water.

**Rangpur.**—Rainfall .41. *Aus* paddy and jute are still being sown; prospects favourable. Price of common rice 10 to 15 seers per rupee.

**Pabna.**—Slight rainfall has benefited the cultivation of *aus* rice and jute and also the standing crops. More rain is required. Fodder and water sufficient. Common rice selling from 14 to 17 seers per rupee.

**Dacca.**—Rainfall 2.32. Weather seasonable. Prospects of standing crops fair. More rain wanted. Ploughing and sowing of jute and *aus* going on. Common rice sells from 12 to 18 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Rainfall nil. Weather warm and occasionally cloudy. Chillies and pluse require rain. Prices steady. Cattle-disease reported from Patna. Water and fodder sufficient.

**Patna.**—Rainfall .02. *Rabi* harvest and opium collection approaching completion. Mango blossoms somewhat injured by unfavourable weather. Common rice selling at 18½ seers per rupee at Sadar and Bihar and 18 seers elsewhere.

**Gaya.**—Rainfall .08 at Sadar on Tuesday last (26th March). Weather seasonable. Harvesting of *rabi* crops going on. Opium collection approaching completion. Prices about normal. Fodder and water sufficient.

**Champanan.**—Rainfall nil. Harvesting of wheat is in progress. Indigo doing well. Opium collection almost finished. Common rice selling at 16 seers per rupee. Fodder and water for cattle sufficient.

**Darbhanga.**—Report not received.

**Bhagalpur.**—Weather hot. North-westerly winds. *Rabi* harvest proceeding. Wheat and barley are heavy crops. Land is being ploughed for *bhadoi*. Fodder and water sufficient.

**Purnea.**—Rainfall .10. Weather seasonable. Rain is still wanted. Harvesting of *rabi* crops is in progress. Land is being prepared for *bhadoi* and *aghani* crops, and *bhadoi* rice is being sown in places. Indigo sowings completed; prospects favourable. Price of common rice 15 to 25 seers per rupee. Fodder and water sufficient.

**Cuttack.**—No rain. Weather seasonable. *Dalua* (spring rice) harvest is in progress. More rain is wanted for ploughing and for standing crops. Condition of cattle good. Fodder sufficient. Rice sells at from 11 seers 13 chitaks to 23 seers per rupee.

**Hazaribagh.**—Weather warm. Slight rain in parts. *Mahua* flowering well. Fodder scanty. Cattle-disease reported. Rice selling average 14 seers per rupee.

**General Summary.**—There was rain in some of the reporting districts during the week, but, except in Murshidabad (·53), Rangpur (·41), Dacca (2·32) and Purnea (·10), it was insignificant in amount. The rain has assisted preparation of the land for *bhadoi* rice and jute in Northern Bengal. In parts of Eastern Bengal more rain is still required for the standing crops, notably for the chilly and pulse crops in Chittagong. Spring rice and indigo are doing well. The *rabi* harvest is proceeding with every prospect of a good outturn. The collection of opium is nearly finished and the weighment is about to begin. In Hazaribagh it is reported that the fodder-supply is scanty and that cattle-disease has appeared. Cattle-disease is also reported from Chittagong. The price of common rice continues generally normal. A slight fall has occurred in some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 2nd April, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

\* Mean for 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the readings during the same period for the five humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 30th of March 1895.

					DISTRICT OBSERVATIONS.										DISTRICT.
					OF WEEK.				RAINFALL.						
					Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month.			Since 10th October 1894.			
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.					Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 30TH OF MARCH 1895.

At the close of the previous week weather in Bengal was fine and settled, but a disturbance was shown in North-Western India, which had advanced over the western desert, the centre lying between Bikanir and Jacobabad on the 23rd instant. On the 24th instant, or the first day of the week under review, pressure had fallen moderately to rapidly in Bengal, and was becoming decidedly below the normal; temperature had also risen rapidly, though the day temperatures were decidedly below the normal; humidity was high and cloud proportion was increasing. These changes were apparently induced by the easterly advance of the depression, which was reaching the North-Western Provinces on the 24th, while at the same time a fresh disturbance appeared in the extreme north-west of India, and was largely affecting Quetta and Peshawar. On the 25th instant pressure had again fallen slowly to moderately, and had become in considerable defect, while temperature and humidity had also risen. The sky had become rather heavily clouded over a considerable part of the province, and one or two light showers were reported. The primary depression had again moved eastwards, but it had become of rather diffused character, and on the 25th it was affecting the east of the North-West and Central Provinces, and practically the whole of Bihar, while on the 26th it had again become more diffused and therefore of less importance, and had moved over Central and Eastern Bengal, Assam and Burma. The pressure changes on the 26th clearly indicated the eastward advance of the depression; and while the barometer had fallen in Assam and in Eastern Bengal, a rather rapid increase was reported at the western stations in the Province. Temperature had also again generally risen, and the sky was overcast at many stations, while very numerous stations reported light rain. The extreme northern stations in East and North Bengal, and the Assam stations continued to be affected by the depression on the 27th, and Gnatong reported a heavy snow-storm during which 1·52 inches of rain-water were collected, representing about 15 inches of snow. Over the remainder of the Province, however fine settled weather commenced, and there was a remarkable decrease in the amount of humidity and a smaller decrease of temperature at the western and central stations. On the 28th the depression had quite passed away, and a very rapid increase of pressure occurred, the rise equalling about a sixth of an inch at many stations, while at Daubri it equalled 0·19". Temperature and humidity on this day began to increase, while on the other hand cloud proportion decreased, and skies became generally almost cloudless. On the 29th and 30th, or the last two days of the week, the changes were unimportant, and fine settled weather of ordinary hot-season character prevailed.

**Pressure.**—The distribution of pressure during the week has been a little irregular due probably to the slightly disturbed conditions which prevailed during a part of the week. The variations from normal pressure have also been a little irregular, and at some stations slight defects and at others slight excess amounts have been registered, about two-thirds of the stations reporting slight defects. Generally, however, the variations have not been larger than a few thousandths of an inch.

**Temperature.**—The average mean temperature of the whole province for the week has been 0·6° below the normal, the defect having been largest in Bihar, where it has equalled a degree.

The actual temperatures registered during the week, and their variations from the normal temperature of the season, are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period:—

*Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 30th of March 1895.*

	Normal mean maximum temperature for the week ending 30th March.	Actual mean maximum temperature for the week ending 30th March 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 30th March.	Actual mean minimum temperature for the week ending 30th March 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 30th March.	Actual mean daily temperature for the week ending 30th March 1895.	Variation of actual mean from the normal.

**Rainfall.**—Moderate rain has fallen in East Bengal, which has averaged 0·36 inch, and in North Bengal, which has received 0·23 inch. Slight falls averaging 0·11 inch have been received in South-West Bengal, but the remaining divisions have received practically no rain. In all cases the falls have been decidedly below the normal. In the case of the smaller districts the following have received the largest falls:—In South-West Bengal, Nadia, Murshidabad and Birbhum; in North Bengal, Rangpur, Patna and Rajshahi, and in East Bengal, South Lushai Hills, Dacca and Mymensingh.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 30th of March 1895:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.				Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.	Since 16th October 1894.

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 0.20

The total fall from 1st January to 30th March 1895 ... .. 0.20

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... .. 2.77

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast;  $\Delta$ , dew

*Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.*

The Council met at the Council Chamber on Saturday, the 9th March, 1895.

#### Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General*.

The HON'BLE H. J. S. COTTON, C.S.I.

The HON'BLE SIR JOHN LAMBERT, K.C.I.E.

The HON'BLE D. R. LYALL, C.S.I.

The HON'BLE J. A. BOURDILLON.

The HON'BLE MAULVI ABDUL JUBBAR KHAN BAHADUR.

The HON'BLE F. R. S. COLLIER.

The HON'BLE C. E. BUCKLAND.

The HON'BLE C. A. WILKINS.

The HON'BLE ROMESH CHUNDER DUTT, C.I.E.

The HON'BLE SURENDRANATH BANERJEE.

The HON'BLE L. GHOSE.

The HON'BLE MAHARAJA SIR LUCHMESSUR SINGH BAHADUR, K.C.I.E., of DARBHANGA.

The HON'BLE MAULVI SERAJUJ ISLAM KHAN BAHADUR.

The HON'BLE W. C. BONNERJEE.

The HON'BLE J. G. WOMACK.

The HON'BLE MAULVI MUHAMMAD YUSUF KHAN BAHADUR.

## THE PUBLIC SERVICE COMMISSION.

The Hon'ble BABU SURENDRANATH BANERJEE asked:—

Will the Government be pleased to state why effect has not yet been given to the recommendation of the Public Service Commission, which has received the sanction of the Secretary of State, to the effect that the post of one of the Under-Secretaries to Government should be given to a member of the Provincial Service? Will the Government now appoint a member of the Provincial Service to the post of an Under-Secretary to Government?

The Hon'ble MR. COTTON replied:—

"The decision of the Government of India and of the Secretary of State referred to by the Hon'ble Member is not to the effect that the post of one of the Under-Secretaries to Government should be given to a member of the Provincial Service. The orders go no further than to say that members of the Provincial Service are eligible for such a post.

"In making appointments of this nature the efficiency of the public service ought to be the first consideration. The proper performance of the duties of an Under-Secretary requires exceptional qualifications, and the Lieutenant-Governor has not been able to satisfy himself that any member of the Provincial Service is as well fitted to perform those duties as any of the officers he has hitherto appointed when one of these posts has fallen vacant."

## TRANSFER OF THE CHITTAGONG DIVISION.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, asked:—

Whether Government will be pleased to lay on the table the papers, if any, in connection with the proposed transfer of the Chittagong Division from the jurisdiction of the Lieutenant-Governor of Bengal to that of the Chief Commissioner of Assam, and to state on what grounds such transfer has been recommended by the Government of Bengal?

The Hon'ble MR. COTTON replied:—

"There are no papers which can be placed on the table regarding the proposed transfer of the Chittagong Division from Bengal to Assam. The question has been under consideration, but is not likely to assume a practical shape until the railway from Chittagong to Assam is open to traffic."

## THE BEGUMGANJ MUNSIFI.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, asked:—

Whether Government is aware of the great inconvenience and harassment which the people are put to in consequence of the transfer of the Munsifi at Begumganj, which had been in existence there for about 90 years, to the head-quarters of Noakhali, and whether it has been brought to the notice of Government that the people of the Begumganj *chaki* are prepared to pay for the erection of a pukka building for the *cutchery* house, if necessary; and whether in view of such hardship Government would be pleased to reconsider its decision with regard to the location of the said *cutchery*?

The Hon'ble MR. COTTON replied:—

"Begumganj is very close to the head-quarters of the Noakhali district, and when the Munsifi there was burned down the other day, it was decided by the Lieutenant-Governor, with the concurrence of the High Court, who were consulted in the matter, to transfer the Munsifi's Court to the head-quarters of the district. His Honour is aware that petitions opposing this transfer have been sent in, signed by some of the people residing at Begumganj, but he does not believe that the inconvenience to them can be considerable, and he is

satisfied that the policy of concentrating Munsifis as far as possible at the headquarters of districts and subdivisions is desirable and beneficial to the administration of justice."

# THE PUBLIC DEMANDS RECOVERY ACT, 1880, AMENDMENT BILL.

The Hon'ble Mr. R. C. DUTT moved that, for the proviso to sub-section (2) of section 13 of the Bill to amend the law relating to the recovery of Public Demands, the following be substituted :—

'Provided that, if in the opinion of the Certificate Officer, the petition involves a *bonâ fide* claim of right, he shall refer the petition to the District Collector for orders, and the District Collector, if he is satisfied that a *bonâ fide* claim of right is involved, shall make an order cancelling the certificate.'

He said :—" I have taken the liberty of making one or two verbal alterations in order to adopt the usual legal phraseology. My object was fully explained at the last meeting of the Council, and I need only briefly state now that the proviso to the section as it stands in the Bill is somewhat indefinite, and I want to make it clear that we do not intend to depart from the principle on which we have proceeded so long, namely, that a certificate shall issue only in cases where there is no question of right or title. There is a Board's rule which lays down this principle, and I have drafted the amendment so as to make it clear that this principle shall be adhered to."

The Hon'ble Mr. BUCKLAND said :—" The Government are prepared to accept this amendment in the form in which it has been altered by the hon'ble member. Perhaps I ought to add a few words of explanation, and at the same time point out that the amendment is now slightly different from the proviso as it was originally drafted. The Government have been much influenced by the fact that the Board have for some time past issued and acted upon a Circular which involves the same principle as the amendment. The result will now be that if we have the concurrent opinion of the Certificate Officer and the District Collector that the petition involves a claim of right, then the certificate shall be struck off. The Government is of opinion that no harm will be done by this proviso, and in fact it makes more definite a ruling than that which we endeavoured to provide for by the proviso to section 13, clause (2). The original idea of referring the parties in these cases to the Civil Court came from the Board of Revenue, and the Select Committee adopted it in a different form of words. The original suggestion was that, if complicated or difficult cases arise, they should be referred to the Civil Court. Now, if this amendment is accepted by the Council, and if difficult and complicated cases arise which do not involve a claim of right, such cases will still have to be decided by the revenue authorities, but such complicated and difficult cases are so very few that they may be disregarded for all practical purposes. Therefore the Government are prepared to accept this amendment in the form of language adopted by the hon'ble member now."

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, said :—" In regard to the amendment, I submit that it is in perfect order, and is a workable amendment such as it is desirable to have in the Statute Book."

The Motion was put and agreed to.

The Hon'ble MAULVI SERAJUL ISLAM, KHAN BAHADUR, said :—" With Your Honour's permission, I beg to move an amendment of a formal character. I may remind the Council that at the last sitting I had the honour of moving an amendment in connection with section 2 of the Bill. What I then urged was, that the omission of certain words from section 2 of the Act created a difficulty as regards the right of appeal by a person whose property has been sold under the Act, and that a doubt was raised in consequence of a ruling in the case of *Satoo Sawaree* (?) I further pointed out that under a Resolution of the Board of Revenue, Messrs. Cockerell and Reynolds presiding, in connection with

section 16 of the Act, they concluded from the position of the section that it did not give a right of appeal to a person whose property is sold. Therefore I moved at that time that some words should be added to one of the sections of this Bill to remove the difficulty, but at the suggestion of the learned Advocate-General I withdrew the motion. But now an addition has been made with regard to sales to make the procedure of Chapter XIX of the Code of Civil Procedure applicable to sales under this Act. That Chapter, however, does not deal with appeals; so that at present there is no right of appeal provided by any section except section 19. If the words in section 19 be construed as giving an appeal in all cases, there will be no difficulty; but as there has been a ruling that the Legislature did not intend to give a right of appeal in case of sales, I now beg to move that the position of sections 19 and 20 be changed, and that they be placed at the end of the Bill."

The Hon'ble SIR CHARLES PAUL said:—"I at first thought that the section was far from being doubtful, but I have since been considering the matter, and I think the hon'ble member is right, and that it will be desirable to put those two sections at the end of the Bill."

The Hon'ble MR. BUCKLAND said:—"In deference to the advice of the learned Advocate-General, I have no objection to offer to the arrangement of the sections now proposed. The motion has been sprung upon us at the last moment, and I am not prepared to contest it myself."

The Motion was put and agreed to.

The Hon'ble MR. BUCKLAND moved that the Bill, as settled in Council, be passed. He said:—

"After the full consideration given to this Bill, section by section, and after the lengthy debates which took place at the last meeting of the Council, I think I may claim that this little measure has been fully and thoroughly threshed out, and I should be doing wrong in taking up the further time of the Council by recapitulating what we have already done."

The Motion was put and agreed to.

#### THE LAND RECORDS MAINTENANCE BILL.

The Hon'ble THE PRESIDENT said:—"Before calling upon the Hon'ble MR. BUCKLAND to bring forward the next motion which stands in his name, I may mention that notice of an amendment has been given by the Hon'ble BABU SURENDRANATH BANERJEE, which I think is out of order. His proposal is, that the motion to refer the Bill to provide for the maintenance of the Records of Rights in Bengal to a Select Committee be postponed until the Bill has been redrafted. I have already pointed out to the hon'ble member, and now mention for the information of the Council, that there is no way of redrafting the Bill except by referring it to a Select Committee. Whatever suggestions hon'ble members may make now will be brought to the notice of the Select Committee, and they will have the power of redrafting the Bill and making any amendments in it they may desire. I understand the Hon'ble BABU SURENDRANATH BANERJEE accepts my interpretation, and is prepared not to make the motion, but to bring forward for the consideration of the Select Committee whatever proposals he has to make."

The Hon'ble MR. BUCKLAND said:—"In rising to speak to the motion which stands in my name, I shall only remind the Council that a similar motion was before the Council a fortnight ago, and I hope that during the fortnight which has elapsed since the consideration of this Bill was postponed they have had time to consider the numerous reports we have received. We have received valuable suggestions from the Hon'ble Judges of the High Court and independent Associations, also some very useful and very helpful, and some perhaps

somewhat impracticable, but on the whole the reports contain a very valuable amount of criticism, which, speaking on behalf of myself and the members of the Government concerned, we cordially welcome. We also have had to consider these reports, and to provisionally make up our minds as to which are worthy of consideration, and which of them can be accepted and which we must decline to accept. But the general conclusion to which we have arrived is, that many of these points will be better discussed in Select Committee. In some cases the criticisms are directed merely to mistakes in drafting, and in others they have merely called attention to little slips and obvious omissions. There are, of course, other debatable points on which it is open to the many gentlemen reporting to hold as many different opinions. Many of the criticisms are directed to show that the Bill as it has been drafted is not a perfect one; that we are quite willing to admit, as we never expected that it would be so regarded. It has always been put forward as a tentative measure in which we expect the co-operation of the Council and the assistance of the classes which will be affected by it.

"The object of the Bill is to take a great step in advance in the registration of tenant rights, and this is not an easy matter to carry out; it is the first time that such an attempt has been formally made in this Council, or, as far as I know, by any Legislature. Many of the principal Acts which are now to be found in the Statute Book have had to go through several editions before they have arrived at anything like maturity. There have been several editions of the Registration Act, and it is perhaps not even yet perfect; there have also been several editions of the Codes of Civil and Criminal Procedure, and the Penal Code has been constantly amended. Therefore we cannot take to ourselves any reproach if this measure which we have now launched is not perfect at all points, and we admit candidly that it is not perfect. But we hope with your co-operation to make it as workable as such an Act can be made, by foreseeing as far as possible objections which can be taken, and doing all we can to anticipate difficulties which are likely to arise in working the measure.

"When I introduced the Bill in Council on the 19th January last, I made some general remarks with regard to the principles of the Bill, somewhat amplifying the Statement of Objects and Reasons which was then presented. I will with your permission to some extent recapitulate what the main principles of the Bill are. Its fundamental principle is that it aims at enabling a record of changes in tenant rights to be maintained automatically, and this it is proposed to do by the establishment of a number of registration offices, and by making it easy for tenants to appear and to register under this Act their transfers and successions, at the same time imposing upon them certain disabilities by way of stimulus to them to encourage them to come forward and register their mutations of tenant rights. The method which it is proposed to adopt to effect this object is somewhat similar to that contained in the Land Registration Act, which records transfers of proprietary rights in what is known as Register D, and from that register Register A of revenue-paying estates and Register B of revenue-free estates are written up from time to time. The *modus operandi*, if the Bill is passed in its present form, or some similar form as we expect it to be, is to fuse together the systems of registering deeds and of recording transfers of proprietary rights. We propose to adopt the main procedure of the Registration Act of 1877, and to use it so as to get mutations of tenant rights registered under this Bill. The idea is that, where it is compulsory to register a deed now, the registration of mutations should also take place. We also propose that where it is not compulsory now to register a deed, a notice of a transfer or a succession should be filed and registered; and it is further proposed that this notice should be made in a form which should contain all particulars necessary to show what transfer or succession has taken place, and that this notice of mutation should take the place of a deed which would otherwise be registered under the Registration Act. It is not intended in any way to make any revenue out of this Act, but it will be necessary to require certain little charges in the shape of fees to be paid in order to defray the cost of the establishments involved. The question of fees I will allude to at a later stage of my remarks.

"These are the main points of the first part of the Bill. When I introduced the Bill on the 19th January, I mentioned that the opportunity had been taken

to provide an alternative procedure for the apportionment of the cost of settlement and survey—an alternative procedure to that contained in section 114 of the Bengal Tenancy Act. That principle has been adopted, as I will afterwards explain, on the recommendation of SIR ANTONY MACDONNELL, who was acting as Lieutenant-Governor in 1893. The idea is to provide for the apportionment of the cost of survey and settlement among the parties interested, and to impose upon the zamindar the duty of collecting the share due from the raiyats unless it is collected by the Settlement Officer in the first instance.

"These are the main principles of the Bill; and with the permission of the Council, I will now go more particularly into the various sections, alluding as may appear desirable to some of the reports and opinions which we have received. On section 2, the Interpretation clause, we have received various suggestions to the effect that more words and expressions should be defined than we have defined in the Bill. It is suggested, for instance, that we should introduce definitions of the words 'proprietor,' 'tenant,' 'holding,' 'village,' 'raiayat,' 'non-occupancy raiyat' and 'holder of estate.' These are very proper and useful suggestions, which will receive due consideration. It is also suggested that we should alter the explanation to be given of the term 'record of rights' so as to include what is known practically as a record of rights, though it may not consist of the documents known as *khewat* and *khatian*.

"In section 3 of the Bill it is proposed that all Registrars and Sub-Registrars under the Registration Act shall be Registrars of Mutations under this Bill. It has been suggested that Registrars of Mutations for the purposes of this Bill should be persons who should not also be Sub-Registrars under the Registration Act. That suggestion has not commended itself to the Government. The idea is, that all Sub-Registrars under the Registration Act should have this extra duty of registering mutations imposed upon them, and not that Registrars should be appointed for a limited purpose only.

"Section 4 has appeared to many gentlemen and Associations to provide a procedure for doing very much the same work as that which is already done under the Land Registration Act. That is no doubt to some extent true. The object of the section is to provide facilities for the better use and application of the Land Registration Act. It has been thought that persons having proprietary interests would be more willing to go a few miles off to a Sub-Registrar under this Bill, and there give notice of a change of proprietary right, than if they had always to go to head-quarters. The idea has been that when a proprietor acquiring a right, or a manager coming into his charge, has got a notice of this sort to give, he might give it at the local office, and that the notice should there be taken charge of and the registration effected for him. It is perhaps a question, not whether this duplicate procedure, is necessary, but whether it is desirable. It is known to the Council that the Land Registration Act has not been as much used as it might have been. Numbers of proprietary rights have escaped registration which it would be very desirable to include. In fact the object of this section is to afford facilities for the registration of proprietary rights. The attitude of Government towards this section of the Bill is that its adoption or rejection may well be open to argument, and that it may be fairly considered on its merits. At the same time many objections have been taken to the fact that under this section of the Bill only four months are allowed to a person who has to give notice, whereas under the Land Registration Act six months are allowed. That is perhaps also open to argument, but Government are inclined to think that the term proposed under this Bill should be limited to four months rather than extended to six months.

"I come now to section 5, which proposes to limit the use of section 43 of the Land Registration Act. Section 43 allows the Lieutenant-Governor to exempt by executive order the owners of small estates from the performance of the obligations required under the Act. By this section of the Bill it is proposed to provide that such exemption shall only be granted on the registration of mutation being effected in the Sub-Registrar's office. This, however, may as easily be done under section 43 by the issue of an order that no such exemption shall be made; therefore the Government do not attach much importance to this section (5).

"By section 6 we provide for periodical statements to be filed in Sub-Registrars' offices. It has called down much criticism, and sometimes erroneous

criticism. It has sometimes been said that the road-cess returns are sufficient, and therefore no more periodical statements should be required under this section. I am afraid that some of the Associations who have reported on this Bill had very indefinite notions of what they were writing about; but with regard to this section, I may say that, while it is desirable to take this power under the Bill, it may be open to question whether it should be used. At present it is under consideration whether this power should be used so long as the Patwari Regulation, XII of 1817, remains in force. If it should happen that that Regulation should be repealed and the zamindar has no longer a patwari to provide for, it is considered that it will be reasonable to call upon him for an annual list of changes in the record of rights, and that this list of changes submitted by the zamindar should be compared with the registration of mutations, and any omissions corrected. This section as it stands by itself has been challenged by a Commissioner who reported upon it, and it has been suggested that some further provision ought to be made for a penalty in the case of an erroneous statement. That is a point which is well worthy of consideration by the Select Committee. The present object is for Government to take power to call for these statements if necessary.

"Section 7 is perhaps one of the most important sections of the Bill. It provides for transfers of, and successions to, tenures and rights lower than tenures being reported to the Sub-Registrar. The intention is, as I said just now, that, where a registered deed is not compulsory, notice of transfer should be filed and take the place of a deed. In this section it has been attempted to provide that the notice shall contain the information that so and so has transferred his right in certain parcels of land specified by certain numbers, and that somebody else has purchased them, and that both the transferor and transferee apply for their registration. We do not provide in the Bill for the compulsory appearance of both the parties at the same time. When these parties appear and acknowledge the mutation, if no objection is made, on notice being given, it is intended that the mutation shall be registered. But if either party denies the transfer, then the idea is that the Sub-Registrar will refuse to register it and refer the parties to the Civil Court, and at the same time the transferee should be warned of the legal disabilities to which he is subject until he gets the mutation registered. It is not proposed to give the Sub-Registrar any judicial or quasi-judicial power to enquire into objections. It is also intended to provide that in the case of successions the party succeeding should announce to the Sub-Registrar the death of the person from whom he inherits, and should apply that he and his co-sharers (if any) should be registered in the place of the deceased. Provision is made in this connection that the notice shall be affixed in a conspicuous place in the village, calling upon any objector to appear within a certain time to prefer objections. I wish particularly to lay stress upon this point that it is not intended to give the Sub-Registrar any judicial powers. It has been said that they are not altogether qualified for such duties as it is proposed to impose upon them. The answer to that is that the duties which it is proposed to give to them to do are not more onerous or difficult than those with which they are already charged, provided always that they are not given any judicial powers. It is thought that the time which is given to an objector to appear, namely, fifteen days, will be sufficient, considering the small extent of circle to which a Sub-Registrar would be appointed. It is intended that provision should be made for reference to the original record to see whether the transferor has his name recorded all right in that or in the Register of Mutations. The idea is that a continuous record of successions and transfers should be kept up, starting from the original record of rights; so that, if these mutation registers are properly kept, it will be possible for anyone on inspection to see who has held this particular parcel of land from the time when the survey and settlement which is now in progress were made.

"Section 8 provides for a notification of the fact of transfer being made to the landlord. As I have said, the Sub-Registrar is to register transfers of tenant right under section 7: he is to do so if they are acknowledged to be accomplished facts. The legal question whether a right to transfer exists is not affected by this provision of the Bill. It is thought fair to provide for intimation to be given to the zamindar of such transfer having been made so as to enable him

to declare whether he accepts the transfer or not. If he does not accept the transfer, it will be competent to him to take any steps he thinks proper to contest its validity, or he may ignore it and refuse to receive any rent from the transferee. It has been suggested that this provision will stimulate litigation and set class against class. The object of the provision is that the landlords should know what transfers are taking place, and should have due notice thereof. If they are not prepared to accept this provision, then Government will not oppose the omission of this section.

"Section 9 relates to the presumptive force of mutations in rent suits. It has been suggested that this presumption should apply more widely than to rent suits only; for instance, that it should apply to any judicial proceeding for possession. This is a question which is fairly open to argument, and deserves full consideration. Towards the middle of the section some words have crept in regarding registration under the Registration Act, which it would be desirable to omit, and to substitute the expression 'registered under this Act.' It is also suggested that it should be enacted that the presumption should only apply to undisputed transfers. That is a point also for consideration.

"I hardly need refer to section 10 regarding the specifications to be required in the notices of mutation, or to section 11, which gives power, formally, to the Sub-Registrars to keep any number of Registers, provided that two of them are Registers of Mutations.

"We have received hardly any criticism on section 12. Therefore I may pass on to section 13, which proposes to lay down that all Courts shall forward memoranda of decisions affecting landed property to the Sub-Registrars to enter in their mutation registers. But the High Court have called attention to the fact that a very similar provision to this was contained in Act XVI of 1864, but after some years the practice was abandoned. I have looked up the history of the matter, and find the provision in section 45 of Act XVI of 1864, one of the early Registration Acts. It was a provision that all Civil Courts shall send memoranda of decrees affecting immoveable property to the registry office for registration. The same principle was reproduced in sections 41-43 of Act XX of 1866, another Registration Act; but when that Act came again before the Legislative Council and was formally passed as Act VIII of 1871, Mr. Frank Cockerell, who was in charge of the Bill, gave good reasons for giving up the particular procedure of these sections. It was found in both the Revenue and the Civil Courts to be impracticable, and it was eventually left to the persons affected by decrees to make their own applications to the Registrar for the registration of their new rights. The Government are much obliged for the criticism which has called their attention to this point; and as it was found unworkable some years ago, it is not proposed to revive it. The intention, therefore, is to allow section 13 to be cut out of the Bill.

"Section 14 applies to fees to be paid under the Bill. As I said just now, fees of some sort must be provided for to admit of the cost of establishment in the working of the measure, and it is impossible to say beforehand what fees should be exacted. Therefore it is proposed that this section should be amended by giving power to the Lieutenant-Governor to prepare a table of the fees payable for registration of mutation, for granting copies, and for any other object for which a fee should be required. It is proposed to revise this section and to give Government power to alter the table of fees as may be shown to be necessary from time to time. In sub-section (3) there is a little slip in drafting, where it is provided that the Register shall be open for inspection at all reasonable hours without the payment of a fee. This would repeal a provision of the Registration Act, and therefore it is proposed to enact that inspection of the Register shall not take place without a fee.

"Section 15, sub-section (1), contains a provision for a disability to attach to a proprietor who has failed to register a mutation. The fate of this sub-section very much depends on the fate of section 4, which refers to the mutation of proprietary rights. If section 4 is struck out in Select Committee, then probably it will be thought necessary also that section 15, sub-section (1), should be altered so far as it relates to proprietary rights. But if it is kept in, it has been suggested that it should not be compulsory on the proprietor to file certified copies of the entry in the register in all cases of rent suits. It has been

suggested that this filing of extracts from the records of rights and Register of Mutations should only be required if the tenant denies that the landlord has registered or when the Court requires it. There would be a considerable reduction of the direct disability on the landlord by this sub-section. But sub-section (2) stands on rather a different footing. This is the only disability we have been able to devise to bring some stimulus to bear on the tenant to give notice of mutation of his tenant right. The meaning of this sub-section is that, if a landlord sues a tenant to enhance his rent, it should not be open to the tenant to plead that he has a particular status or a privileged right unless he has complied with the provisions of section 7 of this Bill and given notice of transfer of his tenant right. If the intention of the section is not clear, it will be open to the Select Committee to alter it in such a way as may be desirable.

"In section 16 we have provided a general penalty for failure to register mutations. Objections of course have been taken to this. Some people say it is superfluous; others that the fine is arbitrary and too heavy; and it has also been suggested that a sliding scale of fines based on the area or value of the holding should be substituted, and that provision should be made for rewards to be given to informers; also that a penalty should only be inflicted when the parties have voluntarily or negligently omitted to comply with the provisions of section 7 of the Bill. These are questions of detail which may fairly be discussed in Select Committee. It has also been thought, if Government are prepared to accept it, that provision should be made to enable those to register who have omitted to register within four months; and that an opportunity should be given to repair the omission by payment of some small charge. This was foreseen in the Land Registration Act, and it may be considered fair to allow a *locus penitentie* to a person who has omitted to register his tenant right under this Act.

"I come now to Part II, which deals with the recovery of costs of the Survey and Settlement and the preparation of a Record of rights. It has been pointed out that more names ought to be added to the list of persons from whom a portion of the costs ought to be recovered; that the owners and occupiers of rent-free holdings should be added to the list of those from whom the cost of survey-settlement can be levied; also that a zamindar who has let his land out in *patni* should not be held liable. These suggestions well deserve the attention of the Select Committee, and will no doubt receive it at their hands.

"I will not pause now over section 18, which refers to the levy of a cess for the recovery of the cost. The more important suggestions we have received refer to section 19, which deals with the question of the levy of a survey-settlement cess. It has been suggested, for instance, that the proportions in which the cess should be levied from the different persons interested in the survey and settlement should be stereotyped in the Bill; and that the proportions which have been adopted by the Secretary of State in regard to the Bihar survey should be made generally applicable to all future surveys and settlements. This is hardly a reasonable suggestion, and the Government are not prepared to adopt it. Circumstances may vary between one settlement and another, and it is therefore thought right to leave the proportion of cost to be determined from time to time by high authority. This question of proportion will no doubt be subjected to full discussion in each case, and it is thought better to leave it open for that reason. The Council will observe that in this section there is a list of proprietors and tenants and owners and occupiers of rent-free tenures and holdings who may be called upon to pay this cess. It has been suggested that the list of persons who are to pay this cess should be identical with the list of persons upon whom the rate per acre is imposed. That is a matter of drafting, and can easily be arranged. Then, the distribution of the cess will be found to be referred to in the last four lines of the section. We have had for the last few years a number of important settlements to deal with, and it has been found practically that in no two cases have the cost of settlement proceedings been distributed in quite the same way. It has been found necessary to charge the different grades of persons interested in the proceedings more or less according as they applied for survey-settlement, and according as through their neglect or misconduct such settlement proceedings were really necessary, or according as they were more or less benefited by its operations. It is therefore thought right that the

distribution of the cess should be made under rules to be framed from time to time by the Board of Revenue with the sanction of the Local Government. That would leave it open for the various circumstances of each case to be fully considered. With regard to section 20, it has been brought to notice that the amount leviable should not be payable only once annually with the instalment of revenue due on the 28th of March, but at other times of the year with other instalments of land revenue. That is a question on which the convenience of the payers may be fairly consulted. The 28th of March is hardly a good date to fix upon because there are estates, I believe, which do not pay revenue on that date; but this is a point which, like many others I have mentioned, may fairly be considered in Select Committee.

"In section 21 the proposal that the cess should be paid by the landlord on behalf of the tenants is one which, as might have been expected, has called forth many and various criticisms. The proposal that the cost of the survey and settlement should be levied in this way emanated, as I have stated in the early portion of my remarks, from SIR ANTHONY MACDONNELL in his long Minute of 20th September, 1893. I alluded to it briefly when introducing this Bill on the 19th January last, and I should like to refresh the memory of hon'ble members of Council by reading an extract from that Minute. He then wrote:—

'The method of recovering the cost of a Cadastral Survey and Record of Rights prescribed in section 114 of the Tenancy Act has been found by practice to be in some cases defective. It is suitable in the case of small estates; it is less suitable when large areas are concerned. In the latter cases it involves very intricate calculations, especially where subinfeudation has gone to any considerable length: it must cause some, though transitory, inconvenience to the poorer classes of people by making the debt payable in a single instalment; and by necessitating the employment of a collecting agency of tahsildars, peons, &c., it not only adds something in the shape of fees to the original burden, but opens the door to the irregularities which the memorialists connect with the employment of low-paid and ill-supervised agency. To the preceding objections against the existing arrangements from the landlords' and raiyats' side might be added the additional objection from the side of the Government (which advances the cost of the operations), that when the expenses are divided among and have to be collected from several millions of people, there is risk of short collections, unauthorized exactions on the part of process-servers or collecting peons, and the certainty of intricate accounts and protracted proceedings. All these conditions point to the desirability of devising some means whereby the costs of the Cadastral Survey and Record of Rights may be recovered in such instalments as will not be felt by any party, and under such conditions that there will be no addition to the original apportionment and no opportunity for exactions on the part of a collecting agency.'

"As I explained on a former occasion, the idea of adopting the Road Cess Procedure for the apportionment of the rate has been abandoned, because it would be difficult to conform to the proportion which the Secretary of State has decided upon, namely,  $\frac{1}{4}$ th from the Government,  $\frac{1}{7}$ ths from the landlord, and  $\frac{1}{6}$ ths from the tenants. The plan which we propose to adopt is set out in this Bill, namely, that tenants should be called upon to pay at the time the *khatians* are distributed to them, and that if they do not pay, the zamindar should be called upon to collect what is due from non-paying tenants, and pay it over to the Government, and that the zamindar should receive an additional 20 per cent. to cover their collection expenses. These provisions have been challenged on the part of the zamindars, who, of course, go back to the time of the Permanent Settlement, but I do not think anybody who has read the Proceedings connected with the passing of the Road Cess Act of 1871 can for a moment attach validity to any argument which is based on any condition of the Permanent Settlement. But other criticisms have been offered to the effect that we are calling upon the landlord to collect our bad debts for us, and not allowing him 20 per cent. for collecting what may be called good debts. I for one am not prepared to say that it will not be very hard on a tenant if Government were to refuse to receive a payment which he is willing to make, and to say that the zamindar will a month later collect from him Rs. 6, instead of the Rs. 5 which he is willing to pay. I am not at all prepared to accept that proposal. There are certain suggestions which Government are willing to entertain favourably; for instance, the proposal that these dues should be recoverable from landlords not by sale of their estates, but by the Certificate Procedure, of which we have heard so much lately.

"It has also been suggested, and Government are prepared to entertain the suggestion, that there should be a provision allowing the zamindar to make a requisition to the Collector, and that outstanding debts from non-paying tenants should be recovered on behalf of the zamindar by the Certificate Procedure. That of course will be a very great extension of the use of the Certificate Procedure, but it is one which is very fairly open to consideration, and it is one which Government is prepared to receive favourably. It will of course be necessary for Government, through its Settlement Officer, to give to the landlord a list of all the payments they expect the landlord to make on their behalf from non-paying tenants. That provision has not yet been introduced in the Bill, but there is no reason why it should not be.

"The whole question with regard to the recovery of these costs is,—what is the most convenient way by which they can be recovered? I am quite prepared to show the Council the reason why, when the Road Cess Act was passed in 1871, the duty of collecting was imposed upon the zamindar. The main point is that it is a matter of expediency. They have their establishments, and it is considered that on the whole the work will be more easily done by the zamindar than by the Government having a separate establishment going about the country for this purpose. The Council is perhaps not aware of the enormous number of *khatians* which will have to be made. In a district of three thousand square miles there may be as many as 12 lakhs of *khatians* to be made, on the assumption that there are  $2\frac{1}{2}$  plots to an acre and 4 plots to each *khatian*. To collect for 12 lakhs of *khatians* is rather a large undertaking. It has been suggested by the Commissioner of the Patna Division that if proper steps are taken at the time of the distribution of the *khatians*, there will not be any great amount of outstanding dues for recovery subsequent to the settlement proceedings. The Commissioner writes in a communication which is in the hands of the Council:—

'The subsequent certificate proceedings will, as a rule, be of a very simple character, for we shall have in the *khatians* a reliable description of the defaulter's immoveable property, and there should be no difficulty in summarily realizing the amounts due by attachment of their holdings. It must be remembered that the dues will individually be very small—only a few annas per acre, and I have no doubt that the raiyats will pay up at once when they see that we mean business.....where a collecting officer can present himself with a bill in one hand and a warrant in the other, it will only be in cases of downright insolvency where he will fail to realise.'

"That points to the adoption of the plan of Government collecting at once by the Certificate Procedure from the raiyats at the time of the distribution of the *khatians*. I am in a position to state that Government does not attach very great importance to the section as it is now drafted; and that it is willing to accept any modification of it by means of the Certificate Procedure or otherwise, which would admit of these costs being recovered with the least possible annoyance and oppression of the people.

"The remaining sections of the Bill will not detain us very long. A slight alteration will be requisite in sub-section (2) of section 22, which provides that every order passed by an officer engaged in the registration of mutations in any district shall be appealable to the Collector of the district. It has been suggested that the appeal should be confined to orders affecting any entry in the register, but that is a detail which can be considered.

"With regard to appeals, some of the Associations who have reported upon the Bill have made valuable suggestions. Some of them object to the Commissioner's order being final; others suggest that an appeal should lie to the Board of Revenue. No final conclusion has been arrived at by Government on this point, and it is a matter with which the Select Committee can properly deal.

"With regard to section 24, as to the power of making rules, it is certainly necessary that the power to do so should be retained in the hands of the Lieutenant-Governor—certainly as to the rules for regulating the fees to be paid. The clauses of this section speak for themselves. It must be open to Government to provide for the appointment, control, discipline and payment of all Registrars' and Sub-Registrars' establishments; and the Government must also have the power of prescribing the method and periods for making entries of mutations in the record of rights, and so on. These are matters

which the Government must keep in their own hands, but it will be open to the Board of Revenue to make any suggestions they may think fit. There will be no necessity for the retention of sub-section (c), regarding rules for the distribution of the cess, if it is to be also provided for in the previous section (19). Nor will it be necessary to retain sub-section (2) if power is taken in section 14, as has been suggested, for Government to prescribe the fees to be levied, and to alter them from time to time as may be necessary.

"I must apologise for taking up the time of the Council at such length over this important measure, but I have done so in order to make clear to hon'ble members what matters Government will agree to omit from the Bill, what matters they are prepared to leave to the Select Committee, and how far in a general way they are prepared to go in making concessions to the criticisms which have been advanced. The necessity for the maintenance of a record of rights in some form or other has been asserted throughout the correspondence ever since the time the Secretary of State, in his Despatch of the 24th December, 1891, gave his sanction to the Bihar survey-settlement operations. The particular form which the maintenance of the records of rights should take has been the subject of discussion for some years past since it was first mooted, more particularly in the letter which the Government wrote in June, 1892. The main principles on which it is now proposed to take action have, I think, been sufficiently elucidated by the several opportunities I have had of making explanations in this Council, and by the Statement of Objects and Reasons before the Council. It therefore remains for me only to ask the co-operation of the Council to enable Government to pass a workable and practical measure, entailing as little harassment and trouble to the parties concerned as may be compatible with the maintenance of the records in some way or other. We hope that in Select Committee any further defects which may present themselves will be found out and rectified, and that, by the time the Bill comes back from the Select Committee, it will be accepted by this Council as a workable and practical measure for the object for which it is intended.

"With these remarks I beg to move the further consideration of the motion that the Bill to provide for the maintenance of the Records of Rights in Bengal and for the recovery of the cost of Cadastral Surveys and Settlements be referred to a Select Committee consisting of the Hon'ble Mr. Lyall, the Hon'ble Mr. Wilkins, the Hon'ble the Maharaja of Darbhanga, the Hon'ble Maulvi Serajul Islam, the Hon'ble Mr. Dutt and the Mover."

The Hon'ble MAHARAJA SIR LUCHMESSUR SINGH BAHADUR OF DARBHANGA said:—"I desire to offer a few remarks upon the Bill which this Council is about to refer to the consideration of a Select Committee. In so doing I trust I may be allowed to say, in order to guard against any possible misconception as to my attitude upon the question, that I have not in any way withdrawn from, nor in any degree modified, the position taken up by me in the past with regard to the justice or desirability of either making or maintaining a Record of Rights in Bihar. I still hold, as I have always held, that any such scheme should only be undertaken with the cordial co-operation and the assent of those on whose behalf it is proposed; and that in face of the opposition manifested by all classes of the community in Bihar, the action of Government is inexpedient and, if I may say so with all due respect, altogether arbitrary. But I am compelled to bow to the inevitable, and to recognise the fact that, notwithstanding the strenuous objections and remonstrances of those affected, Her Majesty's Secretary of State has given his sanction to the proposal which has been embodied in the Bill now before us. Bearing in mind these preliminary observations, which I have thought it my duty to make on behalf of myself and of those whose interests I am privileged to represent, I come to a consideration of the Bill itself. I do not propose to enter into a lengthy criticism of Part I of the Bill. The system of registration which it provides is the best, inasmuch as it is the least burdensome of the schemes that have been in the contemplation of Government; and I am grateful to your Honour for so far yielding, if I may so express it, to the wishes of myself and those who think with me. I cannot, however, conceal from myself that the proposal to utilise the services of the Rural Sub-Registrars for the maintenance of the Record of Rights has met with strong objection in influential quarters. But with due deference to

the opinions of Mr. Forbes and Mr. D. J. Macpherson, I venture to think they have somewhat exaggerated the difficulties of the situation. Granting that the existing Sub-Registrars do not as a class give that satisfaction to which the Government as well as the Public are entitled, the true remedy, in my opinion, is to be found, as my friend Kumar Gopendra Krishna, the Inspector-General of Registration, remarks in considerably modifying the existing rules relating to the appointment of these officers. In any event, I am prepared to face these evils, if they can be said to exist. It is my deliberate opinion that the scheme propounded in the first part of the Bill is the most feasible under the circumstances; and it possesses, moreover, the merit of imposing no additional cost upon the taxpayer. The landlords and tenants of Bihar are deeply sensible of the consideration Your Honour has shown to them in this connection, and for your unceasing and unwearied advocacy of a proposal, which, whatever its defects, has this to recommend it that it relies in no small degree for its success upon the loyal co-operation of the people concerned: I trust I shall not be deemed presumptuous if I take it upon myself to give expression to their sentiments.

"There are, however, a couple of omissions in the earlier portion of the Bill to which I feel I should call attention. The first is, the omission of any procedure to be followed by the Registrars of Mutations in cases that may come before them under the Act. I submit that it is necessary, in the interests of those who will fall under the operation of the Bill, that some form of procedure should be clearly and carefully laid down by legislative enactment, and in the same Bill which confers new powers upon these officers. I trust it may be found possible for the Select Committee to add sections dealing with this important matter. While I am upon the point of procedure, I hope it will not be considered irrelevant if I give publicity to a criticism of the Bengal Chamber of Commerce, which appears to me to be well worthy of consideration. They say:—

'The Committee note that in sections 4, 6, 7, 8, 14, 19 and 24 power is given to the Board of Revenue to make rules and to do certain other matters. The Committee would protest against this transfer of what is clearly a duty of the Local Government to the Board of Revenue, and, similarly, they further object to an appeal to the Board of Revenue being denied by section 23, whilst an appeal from the decision of a Collector is only allowed to the Commissioner. The Board of Revenue sits as a Land Court, and where this is so, work should not be taken from it and given to a local officer like the Commissioner: and in this connection, the Committee may remark that they view with much alarm the attempt made from time to time to transfer judicial functions to executive officers and to make the decisions of such officers final. They consider the policy of such transfers inexcusable, uncalled for and wrong, and holding this view, they object to power being taken from the Local Government, properly belonging to that authority, and given to the Board of Revenue; whilst authority is taken away from the Board of Revenue and given with finality to the Commissioner.'

"I do not desire to dwell further upon this question at the present stage: but I cannot quit it without expressing a hope that in this connection also the Council may see its way by judicious excisions and amendments, to removing these very reasonable objections on the part of the Chamber of Commerce. I would urge further that the rules made under the Act should, before being put into force, be published in the Gazette for a period of at least three months, and that they should in every case be subject to the approval of the High Court.

"The second omission to which I have to direct attention is referred to by the Secretary to the Bihar Indigo Planters' Association in terms so concise and complete that I will venture to adopt them as my own. 'The draft Bill,' writes Mr. Macnaghten, 'makes no alteration in the status of the village patwari. Indeed, the name of that official is not once mentioned in it. It should be clearly laid down, if such is intended, that the patwari, as a Government servant, has ceased to exist. The deputation that waited on His Honour the Lieutenant-Governor at Sonpore received the distinct assurance from him that on the completion of the survey and record, the patwari would cease to be a servant of Government; and in his letter to the Board of Revenue, dated the 31st of June, 1892, the intention to abolish the patwari is affirmed. In the words of Sir Charles Elliott:—The patwaris have altogether failed to give satisfaction: they have long since ceased to fulfil the functions of a patwari under Regulation XII of 1817, and the present system of dual control has been

universally condemned. And again:—It is mainly from this point of view that Sir Charles Elliott is of opinion that the first step is to clear the ground by the repeal of Regulation XII of 1817, and the abolition of patwaris as a class of Government servants in Bihar. Section 6 imposes a heavy burden on zamindars and tenure-holders. Under the Road Cess Act, *jumabandi* papers are signed by the landlord or tenure-holder, while the real responsibility should rest on the patwari, who is not a private servant. If under section 6 the whole responsibility is to rest upon the landlord, he should have entire control of the patwari. The Tirhut Landholders' Association and the Indian Property Association express themselves in similar terms: and these important bodies are considerably strengthened in the position they take up by the observations of the Secretary of State in his despatch of the 5th of July last. In that despatch he remarks, with reference to the alternative schemes for the maintenance of the Record of Rights which were put forward by Your Honour and Sir Antony MacDonnell:—

‘There are two features common to both schemes. The first is that the patwaris, as established by Regulation XII of 1817, should be abolished and the Regulation repealed, on the ground that the patwaris have failed to perform for the villages, for the raiyats, or for the district administration, the services contemplated by the Regulation, while their dual relation to the Collector and to the Zamindar interferes with their usefulness to the landlords whom they served. As at present advised, I see no objection to the proposed repeal.’

“At the close of the despatch there is a further reference to the subject: when it is expressly ordered that ‘provision should be made for repealing the Patwari Regulations in the Bill for the maintenance of the Record of Rights which Your Honour was authorised to introduce into this Council.’

“I have not ventured, Sir, to impose this series of quotations upon the good nature of Your Honour and of this Council without a purpose. Your Honour's declarations on the question of the abolition of the patwari are so explicit, the sanction accorded by the Secretary of State to the proposal is so express and so unambiguous, that I cannot refrain from giving expression to my respectful astonishment at the fact that it finds no place in the Bill we are now considering. I would urge that effect should be given to the pledges of Government upon this point, approved and authorised as they are by Her Majesty in Council, and that the necessary provisions should be added before the Bill is passed into law, or that a separate Bill may be introduced and carried through simultaneously with the present measure. Not only will there exist after the passing of this measure no necessity for the dual services of the patwaris, but I will not conceal from Your Honour that a great measure of the support which the present proposal has received has been based upon the confident belief that the pledges given by Government upon this point will be fully and unhesitatingly redeemed. The omission from the Bill of all mention of the future status of the patwari has been productive of much disappointment and dissatisfaction: and I venture to express the earnest hope that the Government will carry out the promise to which they have committed themselves, by the adoption of one of the two courses I have indicated.

“There is one more point with which I wish to deal before I leave Part I of the Bill, and that is with reference to section 16. The penal provisions of this section have been most unfavourably commented upon by the Associations who have been consulted. It is pointed out, and, as it seems to me, with irresistible force, that section 15 provides an ample penalty for persons who fail to register. They are debarred from asserting certain rights in Court. If a person fails within the specified time to sue for or to recover the rent of any land which is the subject of mutation (and he can only succeed on production of a certified copy of the entry in the Record of Rights and of the entry in the Registers of Mutations) his right to institute the suit abates. As the Chamber of Commerce remark, ‘the section is of a distinctly minatory character.’ Sufficient precautions are taken under its provisions to secure the proper observance of the Act; and, that being so, I confess to finding some difficulty in understanding why the second penalty of a severe fine should be provided in section 16. The method by which the fine is to be realised is, in my humble opinion, also open to very serious objection. A system of daily fines, even though the amount may seem insignificant, will spell ruin and starvation to the Bihar raiyat, while it must not be forgotten that the fine proposed is an arbitrary

one of Rs. 50, and no regard whatever is paid to the value of the tenure. Under the circumstances, the penalty appears to me to be not only uncalled for (for the loss of the right to recover in a Court is surely in itself a sufficient punishment), but altogether out of all proportion to the offence. The remarks of Mr. Forbes upon the point are so pertinent and so forcible that I will quote them here:—‘I am much opposed,’ he says, ‘to any system of daily fines in the case of tenants. Any one who has had any experience of the working of the provision in the case of proprietors in cess revaluation, partition and other proceedings, will understand the inadvisability of extending the system further. As regards landlords, the punitive provisions of section 65 of the Land Registration Act of 1876 are sufficient. As regards tenants, I would prescribe fines on a sliding scale based on the area or annual value of the holding. There might be an initial fine, followed up by a further fine (or fines) for neglect to supply the omission within a reasonable period (or successive periods) to be allowed for the purpose.’ I will only myself add to this eminently reasonable suggestion the observation that the British Indian Association, the Bengal Chamber of Commerce, and the Bihar Landholders’ Association have independently arrived at the same conclusion as Mr. Forbes; and I would respectfully suggest to the Council the advisability of adopting a recommendation which finds favour in such influential and authoritative quarters.

“There is one other amendment in connection with section 16 that I desire to press upon the attention of the Council, although I trust it may be found possible to omit the section altogether, for the reasons to which I have already referred. But if this should be found impossible, the section should be redrafted, not only in accordance with Mr. Forbes’ excellent suggestion, but also as nearly as possible upon the lines of the corresponding section 65 in the Land Registration Act. That Act, as the Indian Property Association point out, also renders persons who omit to apply for registration liable to fines, but unlike the present Bill, it safeguards such persons by imposing upon the Collector the burden of showing that such omission was voluntary or negligent. There should be some similar safeguard inserted in section 16, and I would represent to the Council that the words ‘voluntarily or negligently’ should accordingly be added, as a measure of bare justice to those who will fall under the operation of the Bill.

“I now address myself to the second portion of the Bill, that which relates to the recovery of the cost of the Survey: and I regret to say that I am totally unable to accord my support to the method proposed. The principle under which cesses are levied is, in my humble opinion, a distinct violation of the conditions of the Permanent Settlement. I take my stand upon the provisions of Regulation VIII of 1793, which prohibits in the clearest and most express terms the levying by any actual proprietor of land of any new *abwab* or *mahtut* upon the raiyats under any pretence whatever. A cess such as the Survey-Settlement Cess, which is contemplated by the present Bill, is, I venture to assert, nothing more or less than a legalised form of an *abwab*. What does it matter to the raiyat that his money is appropriated to the use of the Government instead of finding its way into the landlord’s treasury? The fact that it is levied by Government and not by the Zamindar does not in any way absolve it from the charge of constituting a direct breach of the covenant of 1793. I am rejoiced to find that I am supported in this view by an array of names which include some of the most distinguished administrators and legal luminaries of this country during the present century. In the year 1877, when the Public Works Cess Bill was before this Council, Sir Erskine Perry, then a Member of the Council of India, wrote:—‘I object to the despatch of the Secretary of State (in which sanction was given to the introduction of the Bill), because, even in its modified form, it seems to decide, and I believe does decide, that there is nothing in the language or promises of Government in 1793 to preclude the present Government from levying local taxes in Bengal for local objects. I have come reluctantly to this conclusion after many struggles and attempts to draw fine distinctions in support of a different view, that the language and act of Lord Cornwallis and of the members of Government of his day were so distinct, solemn and unambiguous that it would be a

direct violation of British faith to impose special taxes in the manner proposed.' These are trenchant and weighty words, and they are endorsed by men such as Sir Frederick Halliday, Mr. Henry Thoby Prinsep, Mr. R. D. Mangles, Sir Frederick Currie and Sir H. C. Montgomery. The last named writes:—  
 'A Government should not, in my opinion, voluntarily place itself in a position which lays it open to the charge of breach of faith. It should rather avoid any measure which would be so held in the estimation of its subjects specially interested. Sound policy would seem to point out this as the course to be pursued, that carrying the landholders and their dependants with us must be more efficacious than meeting their opposition at every turn, and fostering in their mind the idea, however well or ill-founded, that their rulers are breaking faith with them under the specious plea of doing what they assert to be for their ultimate good.'

"How unavailing and unheeded were their dignified and statesmanlike protests may be gauged by the mere recitals of the various burdens which are to-day pressing the landed interest. Irrespective of the land-tax, the holders of land have to pay most of the local taxes raised in Bengal—the Zamindari Dak Cess, the Embankment Cess, the Municipal Taxes, the Chankidari Tax, the Rural Police Cess, the Road Cess, the Public Works Cess and the Irrigation Cess. I do not speak of the Survey Settlement which it is now proposed to add to this crushing list, nor of the bulk of the indirect taxes which are also contributed by the class most interested in land. I venture to put it forward with all respect that, even if we cast aside every other consideration, it is not consonant with the principles of equity and justice to thus burden a single class with the task of supplying the funds required for general administration and improvement. I will for a moment accept the answer to my contention which will probably be made, and allow that the present cess is not confined to the zamindars alone, but is levied also from the raiyats, who will equally share in the benefits to be conferred by the survey. The case on the side of the raiyats against the imposition of the cess is no less strong. It cannot, I apprehend, be admitted that it would be legal for a landlord to collect from his tenantry the expenses of a survey that he himself takes in hand, even if it is undertaken for the benefit of the tenantry. And the Government can claim to stand on no better footing. The smallest concession that the Government can make in this respect is to invite the opinions of the raiyats before authorizing the Cadastral Survey of a village or an estate. They cannot, in common fairness, be made liable for the cost of the survey unless and until the majority, or at all events a large proportion of them, consent to its being undertaken. But if the raiyats are silent, and the zamindar hostile, the inference becomes irresistible that the survey is solely required, if required at all, for administrative purposes, and as such its cost should be entirely borne by the Government. I would go even further. In my opinion no survey should be undertaken in a village except at the request of the zamindar or the raiyats, unless the presence of exceptional or prolonged agrarian disturbance calls for the interference of the Settlement Officer.

"But objectionable as is the levying of the proposed cess upon general grounds, I venture to say that the method in which it is to be levied is still more objectionable. And, first, I would point out that to all intents and purposes the cess which is to be levied is a permanent one. There is nothing in the Bill to indicate its temporary character, although it is distinctly stated in paragraph 3 of the Statement of Objects and Reasons that the object of this portion of the Bill is to facilitate the recovery of the cost of a Survey Settlement by a temporary cess. On the contrary, section 18 leaves the cess as a permanent cess. There is thus a conflict between the Bill and the Statement of Objects and Reasons, and it is a conflict which should be terminated by the explicit declaration in section 18 that the cess which it imposes is to be a temporary one. Then, as to the proportion of the cost which is to be borne by the various parties interested, it was distinctly laid down by the Secretary of State in his despatch of the 5th July, 1894, that the cost should be borne in certain ascertained and well-defined shares. He said:—'I agree in Lord Cross' view that, in the circumstances of the North Bihar Survey, the State should bear a smaller share of the cost than it did in the Benares district. But I do not think the State share ought to be less than one quarter of the total cost of making the

**Survey and Record of Rights.** The large rentals and profits enjoyed by the zamindars do not make the raiyats of North Bihar more able to sustain their share of the cost; and the additional one-eighth (two annas) devolving on the State under my present instructions should be given in reduction of the raiyats' share of the expenditure. The cost of the survey will then fall one-quarter on the State, five sixteenths on the raiyats, and seven-sixteenths on the zamindars. I submit these instructions are quite clear, and I confess I can discern no adequate reason why the proportions, as definitely fixed in Bihar by the Secretary of State, are not embodied in the Bill. As matters now stand, it is provided in section 19 that the distribution of the cess shall be made under certain rules to be framed by the Board of Revenue, but the proportion is not stated. The reason for its omission is by no means obvious, and I would recommend that the proportions, as sanctioned by the Secretary of State, should be repeated in the section. It should be definitely stated, as the Bengal Chamber of Commerce suggest, that, following the precedent set in Bihar under the orders of the Secretary of State, the amount to be paid by the Government on the levying of each temporary cess shall be four annas, that to be paid by the landlord seven annas, and that by the tenure-holder five annas. The amounts could be the maximum amounts, and the same procedure should be adopted as in the case of the other cesses, notably the Road Cess, levied upon the inhabitants of these provinces. And in this connection the Indian Property Association make the very reasonable suggestion, which I desire to endorse, that the number of annual instalments in which holders of estates shall be entitled to pay the amount leviable from them should be expressly specific in the Act, and that such number should not be less than five. It is in my opinion absolutely essential that these four points, to which I have referred, should find a place in the Bill before it is passed into law. As I have said, I find it difficult to comprehend why the explicit instructions of the Secretary of State are not carried into effect, or why this cess, which is declared to stand on the same footing as other cesses, should be subject to none of those very necessary restrictions and limitations under which all other cesses are levied.

"I now come to section 21 of the Bill. My own views upon this portion of the Bill are already known to hon'ble members, and I do not desire to weary them with any repetition. But the remarks of Mr. Forbes upon the point are so weighty and so suggestive, that I take the liberty of placing them before the Council *in extenso*. The argument, as I regard it, is unassailable, and I trust this Council will be found at a later stage to share my opinion that section 21 should find no place in the Bill. Mr. Forbes says:—

"I find it impossible to give my support to the proposal to throw the duty of collecting the arrears of the cess from defaulting tenure-holders and raiyats upon the landlords, and I trust that the Government, after further consideration, will abandon this part of the scheme. In the case of the Road and Public Works Cess there was this to be said in favour of such a system, viz., that those cesses formed an annually recurring demand for all time which could practically be incorporated by the landlord in his annual rent demand. It was foreseen that landlords and tenants would have time, in the course of recurring years, to fall in with the system, and this has been the case. The landlord's establishment has become accustomed to collect the aggregate demands, and the tenants to pay it, and the rent-stream, after the agitation caused by the first influx of its new tributary, flows smoothly along its former channel. But in the present instance the case is very different. The demand is an exceptional one, lasting for only a short period, and I have no doubt but that both parties, landlords and tenants, will mutually suffer by being forced into the position of tax-collectors and assesses. On the part of the landlords, I would submit that the recovery from them, as an arrear of land revenue, of debts due to Government by the raiyats, but for the collection of which the landlords are obliged to have recourse to the Civil Courts, cannot be regarded as fair or reasonable. Even for the recovery of the amount of Road and Public Works Cess which a landlord has paid in excess of his share from the co-sharer for whom he has paid it, he is allowed to have recourse to the certificate procedure, and thus practically to make the Collector recover his debt for him. In that case the person sued is usually a well-to-do person, from whom the amount of the decree and the costs of litigation can generally be recovered. But this is not so likely to be the case when the defaulters sued are the cultivators. I cannot think it right that while Government makes use for itself of the summary proceeding allowed by law against the middleman, it should not permit him to do so too. It is true that the landlord is allowed to recover from the raiyat 20 per cent. over and above the actual debt; but even if this covers his money losses, it will certainly not make up for the trouble to which the attendant litigation will put him, and for the strained relations that will necessarily result

between himself and his defaulting tenants. From the point of view of the raiyats the proposal is still less to recommend it. Where the landlord is unscrupulous, he will probably try to seize the opportunity of making a permanent addition to his demand; and even a good landlord, though he might be inclined to be lenient with his tenants in the matter of rent, will certainly not be so where the arrear is a debt to Government which the raiyat ought to have paid himself. It would certainly be a matter of much regret if an epidemic of litigation between landlords and tenants be the result of a Survey and Record of Rights. It seems possible that Government, in proposing this measure, has over-estimated the trouble to which it will be put in collecting the arrears. I see no reason why, with proper arrangements and foresight, the difficulty should be excessive. If the cost of the survey can be determined with sufficient accuracy for each tenant's accounts to be ready in time, and it be made an order on the Settlement Officers not to give out the *khatians* without payment of the amounts due, and if each Settlement Officer be allowed the services of one or more tahsildars to assist him in making the collections, I see no reason why the bulk of the dues should not be realized at once without recourse to law proceedings. For the recovery of the amounts outstanding we must look for lists of the defaulters, their debts and addresses, to the Settlement Officer. The subsequent certificate proceedings will, as a rule, be of a very simple character, for we shall have in the *khatians* a reliable description of the defaulters' immoveable property, and there should be no difficulty in summarily realizing the amounts due by attachment of their holdings. It must be remembered that the dues will individually be very small, only a few annas per acre, and I have no doubt that the raiyats will pay up at once when they see that we mean business. If at the same time the Settlement and Assistant Settlement Officer's hands are strengthened by then being given the powers of a Collector under the Certificate Act, the collections should proceed very rapidly. An instance of the success of a similar scheme is supplied by the case of the Sone Canals. There a collecting establishment, under a Deputy and two Junior Deputy Collectors exercising powers under the Certificate Act, realized over 9½ lakhs on account of water-rates in 1892-93, and about 8½ lakhs in 1893-94, from some 342,000 assesses. The efficiency with which the work of collection was performed can be judged by the fact that at the end of 1892-93 the outstanding balance on account of the preceding year (1891-92) amounted to only Rs. 7,353 while the outstanding balance for 1892-93 at the end of 1893-94 was only Rs. 3,960 against a demand for each year of something like 10 lakhs of rupees. Where a collecting officer can present himself with a bill in one hand and a warrant in the other, it will only be in cases of downright insolvency where he will fail to realize. We should not expect to get that even if we oblige the zamindars to make our collections for us, we shall still have to supply them with all the necessary information to enable them to sue the defaulters, so that we shall, after all, be able to shift only part of the work on to them. But that part, there can be little doubt, will, in their hands, cause a much greater sum total of vexatious harassment than if we undertake it ourselves.

"With reference to these remarks, I observe that Mr. Forbes has urged that the Government should permit the zamindar to avail himself of the certificate procedure for the recovery of arrears of cess. I was unfortunately unable to be present at the last meeting of this Council, but I understand that Your Honour announced at that meeting that it was proposed to adopt the suggestion of Mr. Forbes and to authorize the zamindar to collect these arrears by means of the certificate procedure. I desire to express my obligation to Your Honour for the concession. The injustice is patent of compelling the zamindars to collect the dues of the raiyats, and making their property liable to summary sale in case of default, without at the same time giving them summary powers for the realization of the arrears of the raiyats. But candour compels me to add that the concession deprives the proposed scheme of even that small measure of justification which it formerly possessed. Why should the Government hand on to the zamindar the task of proceeding under the certificate procedure? Is there any reason why the Government should not itself make use of the certificate procedure for the recovery of these arrears of cess, which are after all its own debts? It is surely most unjust upon the zamindar that the whole of the odium of employing this summary procedure should be transferred to his shoulders. The unwillingness of the Government to discharge its duties can only be ascribed to a knowledge of the unpopularity which the proposed cess will awaken and the consequent difficulty in realization. The Central National Muhammadan Association have described the situation very tersely and clearly. 'It is certain,' writes Nawab Syed Amir Hossein, 'that well-to-do tenants will pay direct to the Government and thus save themselves 20 per cent. The zamindars will then be left saddled with liability for those tenants who are in embarrassed circumstances and unable to pay the Government. The offer of 20 per cent. to the zamindars under such circumstances seems to be rather illusory.' I venture to submit it is not too strong a criticism to offer, to say that the Government are attempting to realise, through the zamindars,

debts which they cannot realise from the tenants. Wherein is the justification for such a policy? In my humble opinion, it is the bounden duty of the Government to itself undertake the collection of the cess from the raiyats. How can the zamindar hope to succeed when the Government, with all its resources, is apprehensive of failure? The present proposal to punish the zamindar for the sins of his raiyats was not in any way contemplated by the Secretary of State, and I will add that I find it difficult to believe it would have met with his approval. The principle by which it is sought to make one man responsible for the default of another is an essentially vicious one. It must not be forgotten, as the British Indian Association very justly remark, that 'in the case of the Zamindari Dāk Cess and the Road Cess, a provision was made in the law for the recovery of the cesses from raiyats through the landholders, simply because in both cases a large and influential body of landholders, as represented by the British Indian Association, agreed to realise the cesses from the raiyats and pay them to Government.' In the present case, however, they have agreed to do nothing of the kind. Experience has shown them that, even where a liberal allowance is made for cost of collection, the loss they have to suffer by non-realization on various grounds is very considerable. The Bengal Chamber of Commerce support the suggestion that if the section is retained (although it is not easy to see in what way it is possible to defend it), interest at a certain fixed rate per annum should be allowed on the arrears of cess in addition to the 20 per cent. already provided, the object being, if possible, to make the tenant perceive that it is to his interest to pay the landlord the amount of the cess, and to avoid trouble to himself and to his landlord. The Central National Muhammadan Association urge that, if the section is to be retained, all tenants should be bound to pay to the zamindar, so that the zamindars may be safeguarded against serious loss through default on the part of their tenants. This is the principle upon which the Road Cess is levied; and if we admit the justice of levying the present cess, the suggestion has everything to recommend it. But I find myself unable to make this admission. The zamindars do not demand this survey. It has been sanctioned in the teeth of their opposition. They are now not only called upon to pay their share of the costs of a measure which they regard as both unnecessary and unjust, but also to recoup the Government for the unrealisable shares of the raiyats. They are unable to perceive the equity or justice of such a proposal. The Government revenue on their property was fixed at 90 per cent. of their revenues at the time of the Permanent Settlement. This was clearly pointed out by Sir Frederick Currie in 1877, in his minute of dissent to the Public Works Cess Bill. It cannot surely be urged that the Government of 1793 erred on the side of leniency in their assessment. In this respect the Bengal Land Settlement is very different to the settlements in the other provinces, where the talukdars and zamindars receive a much higher percentage. It is notorious that many of the original landholders were reduced to beggary within the first twenty-five years of the settlement, by their inability to comply with the Government demands. Those estates whose good fortune enabled them to survive are now, it is true, in a better position than they were in 1793. But does that constitute a valid reason for mulcting them of the increase which they owe to their management and to the careful husbanding of their resources?

"I desire, in conclusion, to draw attention to the special hardships which the collection of the Survey Cess will occasion in districts such as Purnea, where the annual rent of a raiyat is often less than the average estimated cost per acre of the survey. A rule should be laid down that the cost of the survey should in no case exceed ten per cent. of the annual rent per acre of the raiyat's holding. I submit it is essential that the Government, which is conferring the unmixed benefit of a survey upon landlords and tenants, should at the same time acquaint those classes with the exact price they are to pay for the benefit that is being conferred upon them. It may not improbably be discovered hereafter that the cost is far beyond the means of the raiyats for whose protection the survey is being undertaken, but it will then be too late to remedy the evil.

"I do not desire, Sir, to detain the Council any further. I have already placed before hon'ble members the criticisms I had to offer with regard to

the sections in Part III of the Bill. The main portion of the Bill to which I am compelled to take serious exception is the second Part."

The Hon'ble MAULVI MUHAMMAD YUSUF, KHAN BAHADUR, said:—"I must, in the first place, offer my thanks to His Honour the President for having acceded at my request to the adjournment of this debate, and allowed a fortnight's time to enable us to consider the important questions of principle and the details involved in this Bill. I have made the best use of the time that I have been able, and I have informed myself of the views and opinions entertained on this subject by others, and I have formed conclusions on the various questions which relate to this Bill, and I shall place my opinions before the Council in as brief a compass as possible. But I must say with reference to most of the observations which I shall have to submit to the Council, that those observations are not to be taken as my matured, final and conclusive opinions on those questions, but that in matters of such great importance they are the first impressions I have formed on those questions, and that they are subject to modification, having regard to the views which may be expressed by any hon'ble member of this Council, and especially by the observations which may be addressed to the Council by His Honour the President at the close of the debate. The observations, therefore, which I shall make regarding some of the provisions of the Bill, not in a state of hostility, but by way of friendly criticism, are not to be regarded as final and conclusive as far as I am concerned.

"In regard to the questions of principle involved in this Bill, I say that it is wholly out of place and wholly unnecessary for me now to express the views I may entertain as regards the main principles involved in the Bill, and as regards the question of expediency whether this Bill should be considered or not. It is wholly unnecessary for the Council to say that this Bill should not have a trial. So much has been said by friends in support of the measure, by enemies by way of hindrance to the Bill, that the only way to decide the pretensions of the respective parties will be to give the Bill a fair trial, and then judge by experience. And in making these observations I am to a very considerable extent led by the opinions of those who are better able by their superior intelligence and by their experience to form mature views on the subject. And in fact it appears to me that for a long series of years a stream of thought has been running in certain quarters only in one direction, and that direction is the scheme which has now been submitted to the Council as one which is likely to prove beneficial to the raiyats, if not beneficial to the zamindars as well and to the Government likewise.

"The opinions entertained by persons in favour of this measure will either receive corroboration or will be displaced by the working of this Bill, but I think I may say that I shall not be true to myself or true to the traditions to which I belong were I to say that this Bill will result in anything but unmixed evil and unmixed mischief. I cannot shut my eyes to the fact that even at the present moment in litigations which come up to the High Court in matters relating to chittas of 1842 are laid hold of by suitors in support, or for the purpose of asserting claims and objections. And those chittas having been made from a point of view totally different from the purposes for which they are sought to be made available, the Courts have assigned to these materials a position in the cases with more or less satisfactory results. But I say in the year 1895, judging from the past history of this measure, and feeling that there is no escape from it, I say let this measure by all means have a trial. But I also say that to a large extent the success of this measure will be due to the proper wording of the Bill, to its being properly worked, and it will also be due to the absence of that interference of the Legislature in matters, because outside the Council the impression prevails that as soon as a measure of the Government has been commenced by the introduction of a Bill, and has commenced to work satisfactorily, the Legislature steps in for the purpose of unhinging that which has been just commenced to be properly understood and worked. As an instance of unnecessary interference with an existing measure, although not intentionally, I will refer to some of the provisions of this very Bill itself, as it bears on some of the sections of the Land Registration Act.

"There are two matters to which I wish to refer cursorily before coming to the sections of this Bill—the first is one which has been referred to by the Hon'ble THE MAHARAJA OF DARBHANGA. It relates to the patwari, and the way in which I put forward this matter is this, that there is no section in the Bill which provides for the repeal of any Act or Regulation. As I do not wish to prolong, I do not desire to revert to arguments which have been placed before the Council by the Hon'ble MAHARAJA OF DARBHANGA in favour of the view that the Patwari Regulation should be repealed, or rather that it is expedient that should be repealed. I submit that some steps should be taken either in this Bill or along side of this Bill, or at a time which may be convenient to the Government to do away with the dual control of the patwari. The second matter to which I wish to refer is the procedure in regard to the realisation of rents. Before the passing of the Tenancy Bill in 1885, and after 1885, in fact, it is impossible to discover the order of time, it has been under the consideration of the Government and of the officials to provide facilities for the realisation of rents by zamindars; but in 1885 no definite result could be arrived at because no procedure could be devised which was feasible and free from the defects to which such procedure is generally open. The defect on account of which this inability arose has now been remedied, and if the conviction is certain as regards the success of this Bill, I submit that the results which should follow from the working of this Bill should also follow, namely, that the zamindar should be armed with the certificate procedure within limits to be laid down for the purpose of realising their just dues.

"With these observations, I shall just glance over the provisions of this Bill and state to the Council on what point or points those provisions are in my opinion defective. I think I am right in saying that this Bill is the first outcome of Chapter X of the Bengal Tenancy Act, that it presupposes operations contemplated in that Chapter, namely, that a record of rights has been effected. With that this Bill has nothing whatever to do. Now, a record of rights having been effected under that Chapter X, and the points noted in section 101 of the Tenancy Act having been laid down, this Bill comes into play. The object of this Bill is to maintain that which has been attained by the operation of Chapter X.

"One or two minor suggestions have crossed my mind. In some of the papers before the Council it has been pointed out that section 1 should be improved in this way. As it stands if in reference to, say, twenty bighas of land in a certain district, this Bill comes into operation, then the whole of the district will be liable to the cess—a result which, I think, is not intended by the hon'ble mover of the Bill. I do not think it was ever the intention to make the whole of a district liable owing to operations which have taken place only in a certain defined area in that district. Therefore the language of the first section should be modified in order that the intention in reference to the operation of this Bill should be clearly expressed.

"In reference to section 2 of the Bill, the words 'record of rights' should be defined with reference to the *khewat* and the *khatian*, but they themselves are terms which require definition. But these are minor points. I have examined the provisions of the Bill, both as they bear on the subject-matter of the Bill, and also as they bear on existing Acts, and the result of my examination has been that certain sections of this Bill most certainly conflict with certain sections of the Land Registration and of the Bengal Tenancy Acts. I shall explain myself fully on this point so as to give an opportunity for explanation in reply that the conflict imagined by me is not real."

The Hon'ble THE PRESIDENT said:—"I would suggest that it is unnecessary to enter into such questions of detail: if there is any such conflict, the Select Committee will set it right."

The Hon'ble MAULVI MUHAMMAD YUSUF, KHAN BAILADUR, continued:—"Then I shall omit the observations I have to make with reference to sections 4 and 15, which seem to me to conflict with certain sections of the Land Registration Act. I was going to observe, with reference to section 3 and section 11 of the Bill, that regard being had to the scope and object of the Bill, it appears to me that it is not necessary that the *khewat* portion of the record of rights should

be reflected in the mutation registers, or if it is necessary for the sake of symmetry that the *khewat* should also find a place in the mutation registers, I submit that the words towards the end of section 4 would be amply sufficient to convey information to the Sub-Registrar to enable him to make the corresponding changes in the register.

"It should not be a part of this scheme that proprietors should be made to apply to the Registrar of Mutations in respect of proprietary interests, but that if it is necessary that proprietary interests should also find a place in the Register of Mutations, then the Collector should transmit the necessary information to the Registrar. Therefore I submit that this Bill should confine itself to the subject-matter of section 7.

"As regards section 6 also, it appears to me that it is not necessary that the information there required should be given by proprietors under the working of this Bill. As regards section 7, I know that non-occupancy raiyats are not obliged to register. The record of rights to the extent which concerns non-occupancy raiyats will be incomplete, and fresh additions will not be so certain as if the whole of the *khatian* had been considered. But the question which I raise is this, that under the working of section 7, as far as occupancy raiyats are concerned, zamindars might be placed under some disadvantage, because, as matters stand at the present moment, the transfer of occupancy rights depends upon custom; and I think the law should not be laid down now in a way to interfere with the law as it is to be found in the Bengal Tenancy Act. There are other suggestions which have been made with reference to section 7, which refer to matters of detail, and I therefore omit them for the present.

"As regards section 9, regarding the presumptive force of recorded mutations, I submit there is an apprehension that the section will militate against the right of the landlord not to recognise subdivisions of tenancy and subdivisions of rights, and that care should be taken that the law as it stands now should not be interfered with.

"As regards sections 15 and 16, they go along with section 4, and therefore I will not dwell upon them any longer.

"I now come to Part II, which is the most important part of the Bill. I submit that sections 1 to 4 contain sufficient provision for enabling the Government to realise its dues. But if those sections be considered insufficient, then I submit that the law should not be laid down in the way in which it has been laid down by section 21, because the considerations which obtained when the Road Cess Act of 1871 was passed, and the reasons for which the Act was passed and the obligation then imposed upon the zamindar do not exist at present. From the debate which took place in 1871, it would appear that it was considered the duty of landlords to make some provision for roads in their estates, and therefore he was bound to collect the cess. But the measure now before the Council is intended for the benefit of tenants, and I submit that either the Government should collect the dues from the tenants or they should not be collected at all; but if zamindars are to be made to collect the cess for the Government, then I submit that interest should be allowed to them.

"With regard to the last few sections of the Bill, I submit that it is not made clear whether the word 'final' in section 23 means final, so as to shut out the matter from the cognizance of the Civil Courts, or only so far as the Revenue Courts are concerned; that is a point which should be made clear. I think that the jurisdiction of the Civil Courts should not be barred from extending relief to persons who are dissatisfied with the decision of the Revenue Courts in these matters."

The Hon'ble MR. BUCKLAND in reply said:—"I do not propose to detain the Council at any length. The remarks with which we have been favoured by the Hon'ble THE MAHARAJA OF DARBHANGA, I am afraid, hardly reached us on this side of the room, but I did make out some of the points to which the hon'ble member referred. I am glad to hear from him that the scheme of registration contained in this Bill is the best of the schemes which have been before the public. Coming to the objections raised by the Chamber of Commerce, I may observe that I have already alluded to them in my preliminary remarks; they referred to the appellate sections at the end of the Bill, and I may say that they will receive our full consideration. With reference to the

quotation which the hon'ble gentleman read from Mr. E. MACNAGHTEN's report, it will be in the recollection of the Council that it was about the *patwari*. It is perhaps known to some hon'ble members that considerable correspondence has taken place on this very subject, and before long the papers will very likely be published, and will contain some very interesting information on this subject, but at present they are not available. I think I caught some remarks of the Hon'ble THE MAHARAJA OF DARBHANGA in regard to the Permanent Settlement. I do not propose to follow him in detail on that subject, because we shall never come to an end if we go back to the time of the Permanent Settlement, but I would ask him to refer to the debate in Council in June, 1871, when the Road Cess Bill was before the Council; and if he would refer to the remarks of MAHARAJA SIR JOTENDRO MOHUN TAGORE at the time, it will save me some trouble now. I would also refer him to the remarks of BABU DIGUMBER MITTER, who then said:—

‘As regards the main principles involved in the proposed measure, viz., the liability or otherwise of the lands in the permanently-settled estates in Bengal to additional taxation, the question having been already disposed of in the affirmative by the highest executive authority, this Council, he supposed, had no other alternative than to carry out that order in all its integrity. He would therefore refrain from making any observations on that point.’

“And MAHARAJA SIR JOTENDRO MOHUN TAGORE said:—

‘The question of imposing a cess on the permanently-settled estates of Bengal had been almost discussed threadbare. Eminent lawyers like SIR ERSKINE PERRY and SIR BARNES PEACOCK had given their decided opinion as to the legal bearing of the question; and statesmen of wide Indian experience had also clearly recorded their views on the subject, as we see from the Education Blue Book lately published. He had nothing new to add, and he would not attempt to hold his *farthing rushlight to the sun*. It had been said that the Government had no intention whatever of breaking the stipulations of the Permanent Settlement, and a distinction had been attempted to be drawn between land revenue and land tax. He confessed that to the natives it seemed to be a distinction without a difference; for so long as the demand was upon the land, and was to be recoverable as arrears of revenue, it mattered not under what name that demand was to be made; and so long as the landholder's found that it took away so much of the profits the enjoyment of which had been solemnly guaranteed to them, they could not but look upon the demand as an infringement of the promise made to them by Lord Cornwallis and ratified in the British Parliament.’

“And more to the same effect. But he went on to say:—

‘But we knew that the Secretary of State had already given his decision on the question of the proposed cess, and it was not for him (Raja JOTENDRO MOHUN TAGORE) to hamper the proceedings of the Local Government by raising factious opposition.’

“I think it is hardly necessary to multiply quotations from the literature of the subject on the question of the Permanent Settlement. There is no intention whatever of breaking that Settlement. All that we say is that, if it is decided by the Select Committee that this is the best way of collecting these dues on account of the cost of a survey and settlement, there is nothing in the Permanent Settlement to show that that procedure should not be adopted. Whether the procedure which is sketched out in the Bill should be adopted is a question which we practically leave the Select Committee to decide.

“There is no intention whatever, although the words in section 18 do not prevent that conclusion, to make this cess a permanent one. There is a certain bill to be paid, and when that is paid off the cess will naturally lapse. It has all along been considered advisable that this cess should be levied on certain lines, but those lines are not altogether settled, except that it is important to make it as light as possible. There are two ways of looking at this question, and it is for consideration whether we are not going a little too far in entrusting the collection of this cess to the zamindars. Several authorities have offered in their reports the opinion that there is a certain amount of risk attaching to these collections, and it has been thought that they are very liable to be abused, and by some of the smaller zamindars to be converted into a permanent cess, much to the discontent of the raiyats. Not long ago I found a rather strong passage to this effect in one of the native papers, in some comments upon this Bill. It said:—

‘The raiyat's part of the cost will be realized from the zamindar, who, in his turn, will realize it from the raiyat. This process will certainly lead to the oppression of the raiyat.

There are zamindars in Bengal who levy the Road Cess at the rate of one anna per rupee of rent, but pay to Government only at the rate of a quarter anna. In fact a good many zamindars have increased the rents of their raiyats in the name of the Road Cess. And it is certain that what is taking place in connection with the realization of the Road Cess will also happen in connection with the new cess, if its collection is left in the hands of the zamindars. Government is therefore earnestly requested to make the collections in the present instance directly from the raiyats.'

"I merely mention this to show that there are two sides to the question, and that it is a matter of some difficulty, and it is therefore thought that it will be best to leave it to the Select Committee to decide which is the best course.

"The hon'ble member who spoke last (MAULVI MUHAMMAD YUSUF) went considerably into details, and to a large extent over the same ground as I did in my preliminary observations. When the report of his speech is printed, I shall be able to give his views the attention they deserve.

"With these remarks, I hope the Bill will be allowed to go before the Select Committee."

The Hon'ble THE PRESIDENT said:—"I do not think I am called upon to-day to add very much to what has been said by the Hon'ble MR. BUCKLAND in defence or explanation of the provisions of the Bill, as I think that what had been said is sufficient. I listened with great attention, but I am sorry to say with very ill success, to the important speech made by the Hon'ble THE MAHARAJA OF DARBHANGA. What he said hardly reached me, but I shall have an opportunity of studying it very carefully afterwards. The principal point which he dwelt upon was the important point involved in section 21 of the Bill. If I apprehended rightly, what he said was that he met this section with uncompromising opposition. The Hon'ble MR. BUCKLAND has already explained pretty fully the position which the Government take up in proposing this form of collecting the cost of the survey. It was first suggested by SIR ANTONY MACDONNELL, who was greatly impressed by the argument used as to the labour which would be involved in collecting such a great quantity of minute demands from all the raiyats, and the great advantage which would result to them and the country at large if the zamindars would collect the cess on their behalf. I certainly thought when I adopted his views that the suggestion would not meet with any serious opposition. Of course I realized that there are cases in which there would be some annoyance and trouble to the zamindars, but on the whole I thought that the annoyance would be so small, and the advantage to the raiyats so great, and that there is so much solidarity between the interests of the zamindars and the raiyats which stand and fall together, that it would be better for them for their own sakes and for the raiyats' sakes to undertake this charge than to leave it in the alternative manner in which it stood, and is still standing, namely, that these costs should be collected individually by the certificate process from the raiyats.

"Since the discussion on this Bill began, we have had a report from Mr. Forbes, Commissioner of Patna, which is written with great ability and knowledge of details, and he has endeavoured to show that the difficulties and the annoyance to cultivators have been overrated, and that it will not be so costly and laborious a process to collect from them, and he instanced the collection of the canal water rate and canal dues in the district of Shahabad, where it may be said that innumerable small rates are collected with a minimum of friction and inconvenience. That of course is an argument which would weigh with the Government and with the Select Committee, but speaking on behalf of the Government, I wish it to be understood that there is no intention on my part to override the feelings and the wishes of the zamindars on this subject. I proposed it as a sort of olive branch: I threw it out as a procedure which I thought zamindars would be glad to adopt, feeling that with the responsibilities attaching to their position, they would obtain a certain amount of indirect but real advantage, and seeing that the interests of the zamindars are identified with those of the raiyats.

"I should myself be extremely unwilling to see this measure passed, if it is passed in the face of the opposition of the zamindars and landholders in Bengal; and if I did not succeed in bringing round the Hon'ble THE MAHARAJA OF DARBHANGA to our view and the other hon'ble members who represent the

landed interest in this Council, I shall be quite content to omit the proposal; but I should be very much more content and satisfied if we can bring them round to our views, and I should be glad if they would be prepared, with the modifications and facilities we propose to grant them, to withdraw their opposition and assent to the arrangement; otherwise if the opposition is kept up, my advice to the Select Committee would be to adopt their views and remodel section 21 so as to cut out the provision for collecting through the zamindars and to simplify and carry out the original procedure as laid down in section 114 of the Bengal Tenancy Act, under which we are now recovering, and collecting directly from the raiyats themselves. I believe that on the whole the better arrangement would be—for the good of the whole community, for the diminution of expenditure, diminution of loss of time, and friction and irritation in setting up of class against class,—I believe that it would be better that our proposal be accepted. I do not wish to take up the position of using the official majority of the Council or the general majority of the Council to force the measure on them, unless the zamindars themselves accept it.

“Turning to the remarks of the Hon’ble MAULVI MUHAMMAD YUSUF, I trust that he did not think that I interfered unduly in pointing out to him that this was not a suitable time for entering upon objections on matters of detail which he might see in the draft Bill. One of the principles which underlie the Bill is that we should attempt to fuse the Land Registration Act and the Indian Registration Act together, and make them work together, so that the work of registering a deed should *ipso facto* be the work of registering the *dakhil kharij*, and that the procedure of the Registration Act should go on and become the registration of mutations. When the Hon’ble MAULVI MUHAMMAD YUSUF said that there were many points in which there was conflict between the two Acts, I said that it was not necessary to elaborate the argument, because I admitted it, and the hon’ble mover of the Bill admitted it. Several small points of detail have been pointed out that would require a little modification here and there, but the object of appointing a Select Committee is that they may fuse the two Acts together in the way we desire.

“I will only say a word or two in regard to the papers which have been laid before the Council. I wish first to express on behalf of the Government our sense of the care and good sense with which the Bill has been criticised, and I wish particularly to return our thanks to the Hon’ble Judges of the High Court for the excellent letter which we have received from them. There is not a single suggestion made by them which I do not accept, and which I do not think should be embodied in the Bill, except so far as they have misunderstood our intention and assumed that we are going to give *quasi-judicial* powers to the Sub-Registrar. That assumption, as I have said, is a mistake: we have no intention to give any *quasi-judicial* powers to these officers, who are to treat these notices of transfer exactly in the same way as any other deeds brought to them. If they are properly admitted before the Registrar they are registered: if they are disputed, the Registrar will refuse to register them, and leave the parties to carry on their quarrels and settle their differences in the Civil Court; they will do nothing as to the registering notices of transfer unless both parties agree; and if it is a case of succession, unless full publicity is given and the village at large has full opportunity of stating whether they accept the fact that a certain person is the successor of a deceased raiyat, and that he ought to have his name registered.

“As the Hon’ble MR. BUCKLAND has stated, there are two sections in particular which we have put in for the sake of facilitating matters for the zamindars, and which are not essential to the principle of the Bill, section 4 and section 8. As I mentioned before, the idea in section 4 is to make it easier for land-owners to effect mutations by enabling them to go to the nearest Registrar only three or four miles off, instead of to the head-quarters at a considerable distance. But at the same time several difficulties have been pointed out, and unless the Select Committee can make the two Acts work together, it is a point which must be given up, and also if zamindars and raiyats do not desire it, it must go out. A more difficult section is section 8 which I commend to the careful consideration of the Select Committee. We propose that the zamindar should receive intimation that there has been a transfer *inter vivos* from one raiyat

to another of part of his holding or the whole holding. Thus if A B asserts that he has sold, and C D states that he has bought, and nobody disputes the fact, then the registration is effected. Then comes in the legal right of the zamindar to object to the transfer, totally apart from the fact that the transfer has taken place. Mr. Forbes has in a very forcible letter suggested that we should have nothing to do with this side of the question, on the ground that we would be creating an opportunity for litigation and would be setting class against class. That is not my own view, but it is a view which is tenable, and a view which, if this Committee agree with it, will be fatal to the section. From the zamindar's point of view it seems fair that he should receive information of transfers of this kind, and that transfers of holdings or parts of holdings which have taken place should not be recorded behind their backs and without their knowing it. But the section is in no respect vital to the Bill, and involves no principle, and it is for the Select Committee to be guided by the opinions they receive, and to decide whether the section should remain with more or less modification, or whether it should go out altogether.

"With these remarks, I will close the discussion of this subject, and I will only say with regard to the action of the Select Committee that if they find it possible to revise the Bill, although I know it requires a great deal of revision, and to make their report within a fortnight, it will be advantageous to the general procedure, and it will have the particular advantage of the assistance of the Hon'ble the Legal Remembrancer, who will be leaving at the end of that time; but if the report cannot be made before he leaves, his successor will take his place, and it will to a certain extent delay the completion of the work. I have no desire to press for any undue haste, but if the Select Committee find themselves able to bear this in mind and report the Bill within a fortnight, it will conduce to the general rapidity of the proceedings of the Council."

The Motion was put and agreed to.

#### THE LEPERS BILL.

The Hon'ble MR. BOURDILLON presented the Report of the Select Committee on the Bill to provide for the segregation of pauper lepers, and the control of lepers exercising certain trades.

#### CALCUTTA AND SUBURBAN POLICE ACTS, 1866, AMENDMENT BILL.

The Hon'ble SIR JOHN LAMBERT presented the Report of the Select Committee on the Bill to further amend the Suburban Police Act, 1866, and the Calcutta Police Act, 1866.

The Council adjourned to Saturday, the 23rd instant.

CALCUTTA;  
The 9th April, 1895.

GORDON LEITH,  
*Assistant Secretary to the Govt. of Bengal,*  
*Legislative Department.*

## WEATHER AND CROP REPORT.

For the week ending the 8th April, 1895.

**Burdwan.**—Rainfall at Sadar 82. Weather cool for the season. The harvesting of potato and sugarcane is nearly complete. The price of common rice varies from 10 to 20 seers per rupee in the district.

**Midnapore.**—Rainfall 16. Weather hot and sometimes cloudy. *Boro* and indigo are doing well. Tobacco is not promising. Rain badly wanted. Fodder and water sufficient. Common rice sells from 16 to 22 seers per rupee.

**24-Parganas.**—Rainfall 07. Weather seasonable. No crops on the ground except *boro* paddy which is doing well. Ploughing is going on for early crops. Condition of cattle good. Fodder and water sufficient. Rice sells at—

	Srs.	Ch.	
Sadar	12	13	0

} per rupee.

**Murshidabad.**—Rainfall nil. Weather hot; occasionally cloudy. Prospects of crops appear favourable. Sowing of *bhadoi* crops has commenced. Fodder available. Common rice sells at 16 seers per rupee.

**Khulna.**—Rainfall nil. Weather seasonable. Harvesting of *rabi* crops over. Threshing of *aman* continues. *Boro* doing well. Common rice sells at from 18 to 22 seers per rupee. Fodder and water sufficient.

**Dinajpur.**—Rainfall nil. Weather very hot at midday, but cool both in the morning and evening. Cultivation of jute and *bhadoi* paddy going on. Price of rice 15 to 16 seers per rupee. No outbreak of cattle-disease, nor any complaint for fodder and drinking water.

**Rangpur.**—Rainfall nil. *Aus* paddy and *tu* (sesamum) are being sown. Prospects favourable. Rain wanted.

**Pabna.**—Rainfall 10. Weather hot and windy. Sowing of paddy and jute has commenced. Rain wanted. Common rice selling at from 14 to 17 seers per rupee. Fodder and water sufficient.

**Dacca.**—Rainfall 24. Weather seasonable. Prospects of standing crops fair. Ploughing and sowing of jute and *aus* paddy continue. Common rice 18 seers per rupee. No cattle-disease. Fodder available.

**Chittagong.**—Rainfall 12. Weather variable. More rain is needed for crops. Prices have slightly risen. Cattle-disease still reported from Patia. Water and fodder sufficient.

**Patna.**—*Rabi* harvest and opium collection nearly finished. Threshing of *rabi* going on. Millets are being sown. Common rice selling at 18 seers per rupee.

**Gaya.**—Harvesting of *rabi* crops approaching completion. Opium collections completed and weighments commenced. Drug reported to be of high consistence. *Mahua* doing well. Prices of food-grains about normal. Water and fodder sufficient.

**Champan.**—Rainfall nil. Harvesting of *rabi* crops almost finished. Opium weighments have commenced. Common rice selling at 15½ seers per rupee. Fodder and water for cattle sufficient.

**Darbhanga.**—Weather cloudy. *Rabi* harvest and collection of opium approaching completion. Cultivation for early paddy sowing in progress. Common rice selling at 18 seers per rupee. Fodder and water sufficient.

**Bhagalpur.**—Weather much warmer. *Rabi* harvest nearly over; results above average. Ploughing for *bhadoi* proceeds. Indigo flourishing. Water and fodder sufficient.

**Purnea.**—No rain. Sowing of paddy, both *aghani* and *bhadoi*, going on. Indigo sowing is over, but jute is still being sown. Price of common rice 15 to 25 seers per rupee. Fodder and water sufficient. No cattle-disease.

**Cuttack.**—Slight rain. Weather cloudy. *Dalua* rice harvest continues. More rain wanted for ploughing and for standing crops. Condition of cattle good. Rice sells at from 11 seers 13 chitaks to 21 seers per rupee at Sadar market.

**Hazaribagh.**—Weather cooler owing to storms, but no rain. *Mahua* harvest in progress with good prospects. Fodder scanty. Water sufficient. Cattle-disease in parts.

**General Summary.**—There was rain in the central and eastern districts of the Province during the week. Preparation of the land for jute and *bhadoi* paddy is in progress, and in several districts sowing itself has commenced, but rain is still required in parts. *Boro* paddy and indigo are doing well. The harvesting of the *rabi* crops is approaching completion, and the general result is satisfactory. The weighment of opium has begun with expectation of a fair outturn. In Gaya the opium is said to be of high consistence. A good crop of *mahua* is expected in Gaya and Chota Nagpur. In Hazaribagh the fodder-supply is still scanty. Cattle-disease is reported in parts of that district and also in Chittagong. The price of common rice continues steady and normal.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,  
The 9th April, 1895.

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

**PRICES-CURRENT** (retail) of *Food-grains, Firewood, and Salt* in the
